

RED RIBBON WEEK & BULLYING PREVENTION RESOURCES

A collage of items promoting kindness and anti-bullying. It includes a book titled 'be a BUDDY not a BULLY' with illustrations of children, a white t-shirt with 'KINDNESS SQUAD' and 'DON'T BE A BULLY IMPRINT HERE', a blue water bottle with 'BULLY AND DRUG FREE IS A HEALTHY "ME!"', a red wristband with 'BE KIND', and a small red bag with 'KIND IS THE NEW COOL'. The background is a vibrant pink with radiating lines.

* A PORTION OF ALL PROCEEDS GO TO THE NATIONAL FAMILY PARTNERSHIP *

NIMCO, Inc. is proud to join forces with National Family Partnership in promoting National Red Ribbon Week®

Red Ribbon Campaign brings us together!

WHAT IS RED RIBBON WEEK? It is an ideal way for people & communities to unite & take a visible stand against drugs. Show your personal commitment to a drug-free lifestyle through the symbol of the Red Ribbon, October 23-31st.

WHY? The Red Ribbon Campaign was started when drug traffickers in Mexico City murdered Kiki Camarena, a DEA agent, in 1985. This began the continuing tradition of displaying Red Ribbons as a symbol of intolerance towards the use of drugs. The mission of the Red Ribbon Campaign is to present a unified & visible commitment toward the creation of a DRUG-FREE AMERICA.

WHO? The National Family Partnership, (NFP) was created in 1980 by parents across America in response to the rising level of youth drug use. The mission of the National Family Partnership is "to lead & support our nation's families and communities to nurture the full potential of a healthy, drug-free youth." The National Family Partnership works to accomplish its mission through parent training, networking & sponsoring the National Red Ribbon Campaign.

WHY SUPPORT NFP'S THEME? A theme unifies each year's campaign & helps to broadcast one message creating a tipping point to change behavior. To participate in the theme go to www.NFP.org.

HOW? Plan a Red Ribbon celebration. Order & display Red Ribbon materials with the National Red Ribbon Theme. Proceeds from the sale of Red Ribbon themed merchandise helps support prevention programs across America. Order for your family, students, staff, patients, employees and customers and encourage them to wear the Red Ribbon symbol during...

Peggy Sapp,
President & CEO
National Family Partnership

NIMCO Inc., is proud to join forces with National Family Partnership in promoting National Plant the Promise Week. This campaign coincides with National Red Ribbon Week, and provides an opportunity to reinforce the "Say No to Drugs" message. Join other schools, businesses, families and youth across America that will be planting bulbs during **Red Ribbon Week**. Planting flowers is a symbol of hope, and a great way to involve both children and parents in your Red Ribbon Week campaign. These bulbs will bloom into vibrant red tulips and will serve as a reminder to stay DRUG FREE.

(As an added campaign bonus, most bulbs that are planted during October will bloom in April, during National Alcohol Awareness Month.)

THE DANGERS OF VAPING

The Vaping Epidemic

What are "e-cigs" and vaping?

An electronic cigarette, or e-cig, is a handheld electronic device that simulates the experience of smoking a cigarette. It works by heating a liquid which generates an aerosol, or "vapor", that is inhaled by the user. Using e-cigarettes is commonly referred to as vaping.

WHAT DOES AN E-CIG LOOK LIKE?

There are many types of electronic cigarettes. The most popular among youth is the JUUL.

This device looks like a USB drive.

Due to different designs e-cigs are sometimes hard to recognize, making them easier to be used by youth in plain sight!

WHAT IS IN VAPOR?

TOLUENE

Commonly used paint thinner. Toluene is highly toxic. This chemical can cause headaches, nausea, and breathing difficulties.

FORMALDEHYDE

This is used to preserve dead bodies. It causes cancer and can lead to lung damage. Formaldehyde also leads to skin and digestive system damage.

BENZENE

Benzene is a widely used industrial chemical. Benzene is found in crude oil and is a major part of gasoline. Benzene can lower bone marrow, and affect blood cell levels.

LEAD

Used in car batteries. Lead is highly toxic. It has been banned from many products. Lead poisoning starts growth, causes brain damage, and can even lead to death!

LIQUID NICOTINE

THE MOST COMMON WAY OF USING NICOTINE IS THROUGH E-CIGARETTES. NICOTINE IS A POWERFUL ADDICTIVE DRUG THAT CAN BE VERY HARMFUL TO YOUR HEALTH. IT CAN CAUSE HEART DISEASE, HIGH BLOOD PRESSURE, AND OTHER SERIOUS PROBLEMS. IT CAN ALSO BE VERY TOXIC TO YOUR BODY.

2ND HAND VAPING ISN'T HARMLESS!

2nd hand vape is dangerous to everyone around. The e-cig does not produce a vapor (gas), but rather a dense visible aerosol of liquid sub-micron droplets, consisting of glycols, nicotine, and other chemicals, some of which are carcinogenic.

At least 10 chemicals are released in 2nd hand vapor that are toxic, or addictive.

VAPOR DOESN'T MEAN SAFER

SIDE EFFECTS:

POPCORN LUNG

One chemical in some e-cig flavorings is a buttery-flavored one called diacetyl. It's been linked to a serious lung disease called bronchiolitis obliterans. It's also known as popcorn lung.

Vaper's Tongue causes loss of taste, foods, drinks, even vapes will be flavorless. Vaper's tongue also causes gritty, numb, discolorization of the tongue.

Vaper's Tongue

TEENS AND VAPING

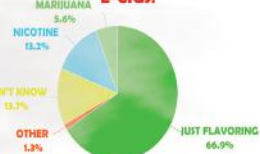

JUUL E-CIG SALES INCREASED 641% IN JUST ONE YEAR. JUULING IS ONE OF THE MOST POPULAR E-CIGS AMONG TEENS.

MALES ARE 2X MORE LIKELY TO USE E-CIGS THAN FEMALES

31% of teen e-cig users started smoking cigarettes within 6 months.

WHAT TEENS THINK IS IN THEIR E-CIGS:

YOUTH VAPING

What Everyone Should Know

(includes disposables, pods, THC devices, and high-nicotine vapes)

WHY DO TEENS TRY VAPING?

- Many devices come in sweet, candy-like flavors that appeal to teens.
- Sleek, colorful designs can make vaping seem harmless or trendy.
- Social media often promotes vaping as fun or stress-relieving.
- Some devices are easy to hide because they resemble USB drives or pens.

HIGH-NICOTINE VAPES: WHAT'S CHANGED?

- Many newer disposable vapes use nicotine salts, which enter the brain faster than older vapes.
- Some devices contain nicotine equal to multiple packs of cigarettes.
- Many disposables claim 3,000 to over 10,000+ puffs, keeping users addicted longer.

NICOTINE SALTS

3,000 - 10,000 high-puff count devices

WHAT ARE THE REAL RISKS?

NICOTINE ADDICTION

Nicotine changes the developing brain and makes quitting harder.

HARMFUL CHEMICALS

Vape aerosol can contain heavy metals and ultrafine particles.

NOT JUST NICOTINE

Some devices may contain THC or other substances — sometimes without clear labeling.

VAPING & THE DEVELOPING BRAIN

- Nicotine can affect attention, memory, and mood.
- Early exposure increases risk for future addiction.
- The teen brain is still developing until the mid 20s.

LEARN TO SAY NO!

Walking away from pressure is always okay.

NO THANKS, I'M GOOD

I DON'T WANT TO GET ADDICTED

I'VE GOT GOALS THAT MATTER MORE

Dangers of VAPING MARIJUANA

SIDE EFFECTS

- Memory loss and learning problems
- Increased cardiovascular strain
- Risk of addiction and withdrawal symptoms
- Persistent anxiety, paranoia, and depression
- Severe nausea and vomiting (Cannabinoid Hyperemesis Syndrome in heavy users)
- Impaired coordination and slowed reaction time

HOW MARIJUANA HAS CHANGED

Cannabis 20-30 years ago averaged 2%-5% THC | Today's vape products can exceed 80%-90% THC

Higher potency is associated with stronger effects on memory, learning, reaction time, and mental health.

High-potency THC has been linked to increased emergency department visits, including severe vomiting episodes, Cannabis Hyperemesis Syndrome.

INHALING POISON

Toxic metals such as lead, nickel, and chromium have been found in some illicit THC vape cartridges.

Other potential contaminants may include:

- Pesticides
- Cancer causing chemicals

Some illicit THC cartridges have been linked to lung injury outbreaks (EVALI) due to additives such as vitamin E acetate.

SECONDHAND MARIJUANA EXPOSURE

MARIJUANA IN VAPES CAN GO UNDETECTED

Many disposable THC vapes produce little or no odor and may resemble nicotine devices.

THC Toxins Ultra-fine Particles

DANGERS OF VAPING MARIJUANA

HIGHER POTENCY. BIGGER RISKS.

HOW MARIJUANA HAS CHANGED

Today's vape products can exceed 80%-90% THC | Cannabis 20-30 years ago averaged 2%-5% THC

- Higher potency = stronger effects on memory, learning, reaction time, and mental health.
- Concentrates deliver THC faster than traditional smoking.
- Higher potency THC has been linked to increased E.R. visits, including severe vomiting.

QUICK FACTS

- Vaping can increase lung health risks.
- Inhaling poison can go undetected.
- Marijuana in vapes can go undetected.
- Higher potency = stronger effects on memory, learning, reaction time, and mental health.
- Concentrates deliver THC faster than traditional smoking.
- Higher potency THC has been linked to increased E.R. visits, including severe vomiting.

VAPING MARIJUANA AFFECTS YOUR BRAIN, BODY, AND DECISIONS.

the truth about ELECTRONIC CIGARETTES

also referred to as e-cigs, vape, and juul

what is it?

Electronic cigarettes (also known as e-cigs) are small, electronic devices typically used for the inhalation of toxic substances in the form of vapor.

The devices come equipped with "cartridges" that are used to refill the substance.

This substance contains chemicals that are very dangerous, including heavy metals, volatile organic matter and ultrafine particles that can cause lung disease and cancer.

Information

Despite popular belief, vaping is not a safer alternative to smoking cigarettes. Both contain chemicals that are harmful to your body.

This includes harm to your lungs, brain, and heart.

Some vape cartridges are illegally manufactured to sell online and through social media. These "carts" are often sold as "juul" and have been known to cause severe health issues, including cancer.

The risk of vape addiction is just as high as cigarettes thanks to the substance nicotine. This leads to more frequent use of the product to achieve the same "high" or "buzz" that cigarettes commonly provide.

What is EVALI?

ing product was recently multi-state was first clated with ts.

because the milar to those people and

th

Opioids/Alcohol/THC

FATAL VISION® OPIOID PROGRAM KIT

• The Fatal Vision® Opioid Program Kit offers a hands-on, immersive experience that models the physical and cognitive effects of opioid abuse • By simulating the impairments caused by opioid use, participants gain a deeper understanding of the risks and consequences associated with opioid addiction

• **The opioid simulation kit allows participants to experience four primary impairments:** 1. Divided attention failure, which narrows the field of view to reduce environmental awareness; 2. "Nodding out," simulated through intermittent blackouts; 3. Contrast sensitivity impairment, which uses a specialized film to limit peripheral vision; 4. Heaviness in the extremities, modeled by wrist weights that recreate the sluggish movement and lack of coordination associated with opioid use

• **This Program Kit includes:**

- Fatal Vision® Opioid Goggle with Case
- Hand/wrist weights set
- Backpack
- "Opioid's Addiction, Overdose and Death" DVD
- In-app educational materials, including instructional videos and user guides

ITEM # 11076

OPIOID PROGRAM KIT

\$3225.00

FATAL VISION® POLYDRUG [ALCOHOL & THC] GOGGLES EVENT KIT

• The Fatal Vision® Polydrug [Alcohol & THC] Goggles Event Kit clearly demonstrate how polydrug impairment from the use of alcohol and THC can lead to dangerous consequences, especially while driving.

• **How It Works:** The Polydrug [Alcohol & THC] Goggles impair a person's ability to perceive the visual cue of color and ability to maintain their balance • The goggles use these features to model drug-induced cognitive distortion (NOTE: someone under the influence of THC DOES NOT lose their ability to see colors) • The goggles also cause a loss of coordination, targeting skills, slowed decision-making, and delayed reaction time • The result is the participant's inability to make quick and accurate decisions and loss of motor skills, thereby demonstrating the amplified impairments and associated dangers of polydrug (alcohol and THC) consumption

• **This Event Kit includes:**

- (1) - Fatal Vision® Polydrug [Alcohol & THC] Goggles
- (1) - DIES® Maze Driving Mat Activity
- (1) - Tic Tac Two activity (Images on balls may differ in appearance)
- (10) - Large pop-up cones with case
- (12) - Activity balls
- (1) - Printed user guide and online access to instructional videos and materials
- (1) - Backpack

FENTANYL AWARENESS & PREVENTION

FENTANYL DEATH IN DISGUISE

WHAT IS FENTANYL?
Fentanyl is a synthetic opioid that can be up to 50 times stronger than heroin and 100 times stronger than morphine.

Fentanyl comes in two forms: pharmaceutical fentanyl, which is used for managing pain, and illicitly manufactured fentanyl, which is used in the illegal drug market.

With just two milligrams of fentanyl, you can **FATAL** overdose on the drug.

WHAT DOES FENTANYL LOOK LIKE?
Most users are unaware they are ingesting fentanyl. It can be found in pills, powder, patches, and liquid. Fentanyl can be found mixed with other drugs, such as heroin, counterfeit pills, metamphetamines, and cocaine, making it difficult to identify. In the community, fentanyl is often sold in small, clear, round, oval, or rectangular pills, or in a white powder. Additionally, liquid fentanyl can be dropped into food or drinks.

FAKE PILLS? WHERE?
For fake pills, there are two main types: 1. **Real Pills** - These are genuine pharmaceutical pills that have been tampered with. 2. **Fake Pills** - These are counterfeit pills made by drug manufacturers to look like real ones. They are often sold in bulk and are a major source of fentanyl in the community.

WHICH IS WHICH?
In 2022, the Drug Enforcement Administration (DEA) seized over 100,000 counterfeit pills. Fentanyl is often found in these counterfeit pills, which are sold in bulk and are a major source of fentanyl in the community.

RAINBOW PILLS?
Rainbow pills are a type of counterfeit pill that is often sold in bulk and is a major source of fentanyl in the community.

IT ONLY TAKES THIS MUCH
How much fentanyl it takes to cause a fatal overdose in an adult.

SIGNS OF AN OVERDOSE
• Respiratory distress
• Extreme lethargy
• Unconsciousness
• Pinpoint pupils
• Cold, clammy skin
• Blue lips and fingernails

NARCAN SAVES LIVES
Naloxone (Narcan) reverses an opioid overdose. It works by blocking the effects of opiates on the brain and by restoring breathing. Narcan will only work if a person has opiates in their system. Narcan allows for medical help to arrive.

SUSPECT AN OVERDOSE? THESE STEPS MAY SAVE A LIFE
1. CALL 911 IMMEDIATELY
2. ADMINISTER NARCAN
3. KEEP THEM AWAKE & BREATHING
4. LAY THEM ON THEIR SIDE TO AVOID CHOKING
5. STAY BY THEIR SIDE UNTIL HELP ARRIVES

FAKE & FATAL
WHEN ONE PILL CAN KILL

a growing problem
Deaths from fake pills laced with fentanyl are surging at an alarming rate all across the country. People are purchasing what they think are prescription pills such as Xanax, OxyContin, Percocet, and Adderall via social media or online websites, but drug dealers are making fake pills with cheaper, more deadly synthetic drugs called fentanyl to increase their profits.

fentanyl: the facts
• Fentanyl is up to 50 times more potent than heroin and 100 times more potent than morphine.
• Fentanyl is odorless, tasteless, and colorless.
• You can't tell if there is fentanyl in the pills by looking at them.
• The amount of fentanyl it takes to overdose is equivalent to 2 grains of sand.
• One pill is all it takes to kill... ONE PILL!

in plain sight: fake pills
These pills are so well made that even experienced users can't tell the difference between a counterfeit pill and a pill manufactured by a pharmaceutical company. There are no pharmaceutical-grade painkillers in these pills made by drug dealers, mostly outside of the country. There is no quality control; pills in the same batch can have wildly varying levels of fentanyl. Young people often find pills more appealing because they are cheap, more socially acceptable than meth or heroin, and don't have a smell like marijuana or alcohol.

WWW.NIMCOINC.COM • SKU# 11688

beyond our borders

rainbow pills
These pills are being sold in bulk and are a major source of fentanyl in the community.

this is all it takes
A fatal dose of fentanyl.

education is key
Use for parents, teachers and caregivers:
• Encourage open and honest conversations.
• Explain what fentanyl is and how it works.
• Stress not to take any pills or powder from a stranger.
• If a pill purchased on the street or from a friend is not what they know, it is not safe to take. If they suspect a pill is fake, they should not take it and should call 911.

FENTANYL AWARENESS & PREVENTION

JUST THE FACTS

FENTANYL

Fentanyl is a very powerful prescription opioid that is highly addictive. It is similar in make up to heroin and morphine. Fentanyl is also produced illegally in labs that are very unsafe and unregulated.

IDENTIFICATION

Street Names: Apache, China girl, China White, Dance Fever, Friend, Goodfella, Jackpot, Murder 8, TNT, Tango and Cash.

What's it Look Like? White powder that is often transformed for prescription use into liquid, patches or lollipops.

How's it Used? Snorted, injected, or placing it under the tongue.

What's it Do? Fentanyl fuses to the body's opioid receptors, the areas of the brain that control pain and emotions. This drives up dopamine levels in the brain, producing a state of euphoria or relaxation.

Warning Signs of Abuse

- Isolation from family and friends
- Poor academic performance and a lack of interest in school
- Extreme changes in appearance and attitude
- Difficulty communicating
- Injection wounds or track marks
- Fatigue followed by patterns of alertness

Facts about Fentanyl

- Fentanyl is often mixed with heroin on the street increasing the risk of fatality. This hybrid is often called "Ace of Spades" or "Ace of Hearts".
- When made illegally, fentanyl can be laced with all sorts of harmful chemicals including arsenic.
- Often people become addicted to fentanyl after just one use.

JUST THE FACTS

FENTANILO

El fentanilo es un opioide de prescripción muy potente que es altamente adictivo. Es similar a la heroína y a la morfina. El fentanilo también se produce legalmente en laboratorios que son muy inseguros y no regulados.

IDENTIFICACIÓN

Hombreres comunes en la calle: En inglés se le conoce como apache, dance fever, friend, goodfella, jackpot, murder 8, TNT, tango, cash. En español como: china blanca o china china.

¿Cuál es su apariencia? Como un polvo blanco el cual a menudo se transforma de polvo a lo que incluye la prescripción, sea este en líquido, parches o chupetines.

¿Cómo se usa? Ensnofado, inyectado o poniéndolo debajo de la lengua.

¿Qué ocasiona? El fentanilo se fusiona con los receptores de espasmos del cuerpo, las áreas del cerebro que controlan el dolor y las emociones. Esto impulsa los niveles de dopamina en el cerebro, produciendo un estado de euforia o relajación.

Señales de advertencia del uso de fentanilo:

- Aislamiento de la familia y amigos
- Mal rendimiento académico y falta de interés en la escuela
- Cambios extremos en la apariencia y actitud
- Dificultad para comunicarse
- Heridas o marcas de inyección
- Fatiga seguida de patrones de alerta

Hechos sobre el fentanilo:

- En la calle es usualmente mezclado con heroína, aumentando el riesgo de muerte. Esta mezcla se a menudo llamada "As de espadas" o "As de corazones".
- Cuando se hace ilegalmente el fentanilo puede ser mezclado con todo tipo de productos químicos nocivos, incluso arsénico.
- A menudo, las personas se vuelven adictas al fentanilo después de un solo uso.

JUST THE FACTS

NALOXONE (NARCAN)

Approved by the FDA, Naloxone is a medication that rapidly reverses opioid overdose. It does this by binding to opioid receptors and reversing the effects of opioids, such as fentanyl, heroin, oxycodone and morphine.

IDENTIFICATION

Administering It:

- Naloxone can be sprayed into the nose (intranasal), injected into the muscle (intramuscular), under the skin (subcutaneous) or through an intravenous injection. NARCAN (naloxone HCl) Nasal Spray is the most dispensed naloxone brand.

Candidates for Naloxone:

- Someone who is known to have overdosed
- Those receiving rotating opioid medication regimens
- Patients discharged from medical care following opioid poisoning or intoxication

How to identify an overdose?

- Slow or no breathing
- Excessive sweating
- Blue lips
- Gurgling, snoring, gurgling
- Pinpoint sized pupils

Side Effects of Naloxone: Naloxone use may cause symptoms similar to opioid withdrawal. Some of these symptoms are body aches, clamminess, weakness, dizziness, stomach pain or nausea, fever and chills, sneezing and a general sense of restlessness or feeling nervous.

Fentanyl

Fentanyl has quickly become a major problem and is a leading cause of the majority of drug overdoses around the world. Fentanyl is a very powerful prescription opioid that is highly addictive. It is similar in make up to heroin and morphine. Fentanyl is also produced illegally in labs that are unsafe and unregulated.

Facts about Fentanyl

- Fentanyl is often mixed with heroin on the street increasing the risk of fatality. This hybrid is often called "Ace of Spades" or "Ace of Hearts".
- When made illegally, fentanyl can be laced with all sorts of harmful chemicals including arsenic.
- Often people become addicted to fentanyl after just one use.
- There has been a rise in heroin overdoses when users unknowingly ingest fentanyl.

JUST THE FACTS

RAINBOW FENTANYL

Rainbow Fentanyl is fentanyl pills and powder that come in a variety of bright colors, shapes and sizes. It is a very powerful synthetic opioid that is highly addictive and very deadly. It is similar in make up to heroin and morphine.

IDENTIFICATION

What's the difference between Fentanyl and Rainbow Fentanyl?

Technically speaking the 2 drugs are one in the same and the effects of using either of these will be the same. Rainbow Fentanyl, however, are made to appear like candy, using bright colors and different shapes. By doing this, the drug is said to lure young children and drive addiction amongst kids and young adults.

Street Names: Teens are calling this form of fentanyl "Sweet Tens" and other candy-like names.

What's it Look Like? Multicolored pills that are made into many shapes and sizes.

Major Concern! Many people are worried that kids will take these pills thinking they are another drug or even assuming it's candy which may lead to accidental ingestion and possible overdose.

What's it Do? Just like regular Fentanyl, Rainbow Fentanyl fuses to the body's opioid receptors, the areas of the brain that control pain and emotions. This drives up dopamine levels in the brain, producing a state of euphoria or relaxation.

Warning Signs of Abuse

- Isolation from family and friends
- Poor academic performance and a lack of interest in school
- Extreme changes in appearance and attitude
- Difficulty communicating
- Injection wounds or track marks
- Fatigue followed by patterns of alertness

JUST THE FACTS

DANGERS OF ILLICIT DRUGS MIXED WITH FENTANYL

The powerful synthetic opioid, Fentanyl, is 50 to 100 times more powerful than morphine and highly addictive. It is frequently produced illegally in labs that are unsafe and unregulated. When Fentanyl is mixed with illicit drugs, they are much deadlier than when used alone.

IDENTIFICATION

Fentanyl is often mixed with other drugs, without the user's knowledge. Following are some examples of drugs that may be laced with Fentanyl:

- Cocaine: Stimulant that may be injected, snorted, or smoked
- Pain pills: Percocet, Oxycodone, etc.
- Heroin: white or brown powder
- Anxiety Medication: such as Xanax

There has been a rise in heroin overdoses when users unknowingly ingest Fentanyl. Most overdose related deaths in the emergency room have been related to Fentanyl.

Why is Fentanyl often mixed with other drugs?

- Fentanyl is cheap to produce.
- It is used as a "cutter" so that drug dealers can make more money.
- These substances are cheap, but potent. This may lead to a similar "high", and if users do not realize they're consuming cutting agents, they don't know how strong the drugs are.
- Fentanyl is easily disguised as a pharmaceutical pill, which makes people feel safer trying it.

PRESCRIPTION DRUGS

"Overdoses involving prescription pain killers are at epidemic levels and now kill more Americans than heroin and cocaine combined" former CDC Director Thomas Frieden, MD, MPH

What's the Problem?

Although most people take prescription medications responsibly an estimated 52 million people have used prescription drugs for non-medical reasons at least once in their lifetime. Prescription medication, such as those used to treat pain, attention deficit disorder, and anxiety, are being abused at a rate second only to marijuana among illicit drugs.

WHO ABUSES PRESCRIPTION DRUGS

6,600 Americans start abusing prescription drugs each day in which one-third are 12 to 17 years of age.

That is over 4.5 new abusers per minute

THE MOST COMMONLY ABUSED PRESCRIPTIONS ARE:

- SEDATIVES 1.1 million
- STIMULANTS 2.2 million
- TRANQUILIZERS 5.1 million

7 MILLION people were current users of prescription drugs taken non-medically.

835,000 Emergency room visits related to abuse of prescription drug abuse in 2011.

1 in 20 Americans 12 and older have misused prescription painkillers.

PRESCRIPTION DRUG ABUSE AND TEENAGERS

1 in 12 High school seniors have reported nonmedical use of Vicodin.

7.7% Youth 12-17 have reported nonmedical use of prescriptions.

1 in 20 High school seniors have reported abuse of Oxycodone.

70% of 12th-graders who've abused prescription narcotics got them from a friend or relative.

DEATHS

In 2016, the 63,632 drug-induced deaths exceeded the number of deaths from motor vehicle crashes (40,327).

63,632 DEATH FROM DRUG ABUSE

The peak of non-overdose of prescription medication has more than tripled in the past decade. More than 40 people die every day from overdoses of narcotic pain relievers like hydrocodone (Vicodin), oxycodone (OxyContin), and combination (Percocet).

40,327 MOTOR VEHICLE ACCIDENT DEATHS

There was a 9% increase in drug poisoning deaths among teens aged 15-19 between 2000 (30%) and 2009 (37%) due to prescription drug overdose.

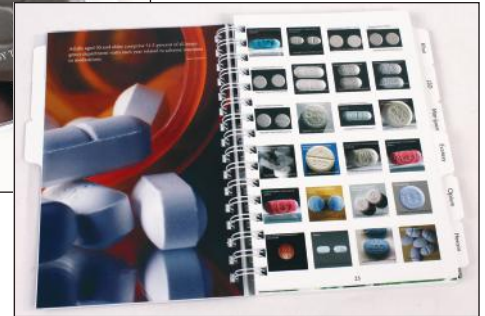

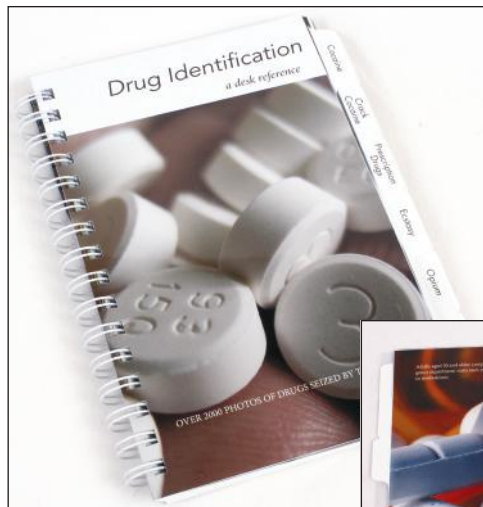

DRUG INDUCED DEATHS NOW OUTNUMBER GUNSHOT DEATHS IN AMERICA.

The Dangers of Using Marijuana

MARIJUANA LIFE UP IN SMOKE

MARIJUANA CONSUMPTION
SMOKING-INHALING
TYPICAL USES INCLUDE: THE MOST COMMON USES OF SMOKING MARIJUANA, THE USE OF CIGARETTES OF BOTH ARE INCREASING.
HAZARDOUS: INCREASED RISK OF LUNG CANCER, LUNG DISEASE, AND DEATH.

EDIBLES
EDIBLES ARE THE MOST COMMON USES OF MARIJUANA. THEY ARE EATEN AND NOT SMOKED. THEY ARE EATEN AND NOT SMOKED. THEY ARE EATEN AND NOT SMOKED.

PILLS, SPRAYS, AND MORE...
PILLS, SPRAYS, AND MORE... ARE EATEN AND NOT SMOKED. THEY ARE EATEN AND NOT SMOKED. THEY ARE EATEN AND NOT SMOKED.

TEENS AND MARIJUANA
WARNING SIGNS:
Dilated Pupils
Bloodshot Eyes
Lack of Motivation
Constant Hunger
EFFECTS OF MARIJUANA ON TEENS
Difficulty with critical thinking skills
Impaired reaction time
Decline in school performance
Increased risk of mental health issues
Higher chance of addiction.

Marijuana is a gateway drug.
The THC levels in vaped marijuana is almost 4 times higher than when smoked. Marijuana leads to addiction, hard drug use, and bad decision making.

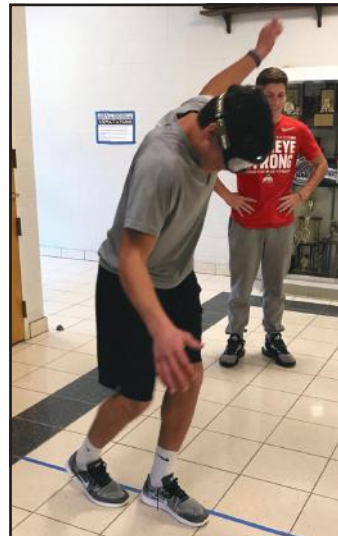

DAILY MARIJUANA USE:
8th graders: 0.7%
9th graders: 3.4%
10th graders: 5.8%
TEENS ARE MORE LIKELY TO SMOKE MARIJUANA THAN CIGARETTES.
44.5 PERCENT OF 12TH GRADERS HAVE TRIED MARIJUANA

SIDE EFFECTS
DECLINED IQ
IMPAIRED THINKING
ADDITION
WEAKENED IMMUNE SYSTEM
IMPAIRED COORDINATION
MEMORY LOSS
ANXIETY
PANIC ATTACKS
HALLUCINATIONS
INCREASED HEART RATE
INCREASED RISK OF STROKE
INCREASED RISK OF HEART ATTACK
DEATH
If it's legal, it's safe, right?
Many substances are legal but that does not mean they are safe. Marijuana has many negative side effects. Marijuana is not legal in all states.

Legalization and Effects
States that have legalized the use of marijuana have seen a recent increase in accidents. Drugged driving deaths spike with the spread of legal marijuana.

CRIMINAL CHARGES
SOME FEEL THEY CAN GET AWAY WITH IT. BUT THEY CAN'T. THEY CAN GET AWAY WITH IT. BUT THEY CAN'T. THEY CAN GET AWAY WITH IT. BUT THEY CAN'T.

WHAT'S IT REALLY COST?
Marijuana is safe unlike tobacco.
FACT VS. FICTION
FACT: Marijuana will affect school work.
FICTION: Marijuana use can negatively affect your performance in school, athletics, and work.
FACT: Marijuana smoke contains more tar than tobacco.
FICTION: Like tobacco smoke, marijuana smoke contains cancer-causing chemicals. There are 33 cancer-causing chemicals contained in marijuana. Marijuana smoke also deposits tar into the lungs. In fact, when equal amounts of marijuana and tobacco are smoked, marijuana deposits four times as much tar into the lungs. This is because marijuana joints are unfiltered and often more deeply inhaled than cigarettes.

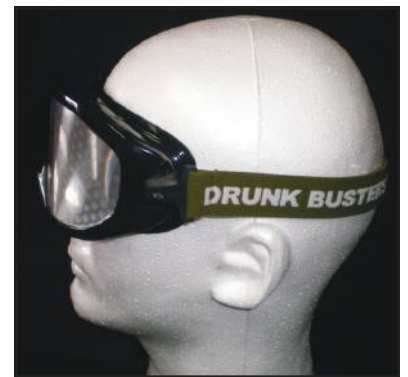

DRUNK BUSTERS CANNABIS GOGGLE

- According to recent U.S. Government studies, 30% of today's teenagers are smoking marijuana
- About 4% of adults smoke pot at least once a year, with roughly 1% abusing it
- Smoking marijuana can affect your ability to perform simple tasks, it impairs concentration and coordination, it can cause slowed reaction time, and can result in short-term memory loss
- Smoking marijuana can also result in a feeling of nausea, which these goggles simulate
- With several states recently legalizing marijuana, the Cannabis Goggle is a training tool which can be used with young people and with adults
- Each goggle includes a cloth carrying bag • Grades 7-Adult

DANGERS OF MARIJUANA EDIBLES: SAME THING, RIGHT? WRONG! (POSTER OR BANNER)

SAME THING, RIGHT? WRONG!

CONSUMING MARIJUANA EDIBLES CONVERTS THC INTO A COMPOUND KNOWN AS **11-HYDROXY-THC**, WHICH IS CONSIDERABLY MORE POTENT. THIS NEW COMPOUND HAS THE ABILITY TO NOT ONLY PUT THE USER INTO AN OVERDOSED STATE, BUT CAUSE A DANGEROUS CONDITION KNOWN AS **CANNABIS TOXICITY**

12" X 18" POSTER

ITEM # 11416

\$9.95

3' X 5' BANNER

ITEM # 21416

\$49.95

DANGERS OF MARIJUANA EDIBLES: ARE THEY CONSUMING YOU? (POSTER OR BANNER)

EDIBLES ARE THEY CONSUMING YOU?

EDIBLES COME IN ALL SHAPES AND SIZES, INCLUDING COOKIES, CANDIES, BROWNIES, PRETZELS AND MORE

SO WHAT'S THE RISK?

UNLIKE SMOKING MARIJUANA, CONSUMING EDIBLES RUNS THE RISK OF OVERDOSE!
IT CAN TAKE UP TO 2 HOURS TO FEEL THE EFFECTS OF EDIBLES, CAUSING MANY USERS TO BELIEVE THEY DIDN'T EAT ENOUGH, SO THEY EAT MORE! THIS IN TURN CAN CAUSE A VERY BAD "HIGH" FOR THE USER THAT IS NEAR IMPOSSIBLE TO GET OUT OF EARLY!
SOME OF THE WORST SIDE EFFECTS OF EDIBLE OVERDOSING ARE:
HALLUCINATIONS, PARANOID, PSYCHOSIS, PALPITATIONS

LEGAL DOESN'T MEAN SAFE!

Vaping Prevention & THC

THE DANGERS OF VAPING MARIJUANA

SIDE EFFECTS

- Memory loss and learning problems
- Increased cardiovascular strain
- Risk of addiction and withdrawal symptoms
- Persistent anxiety, paranoia, and depression
- Severe nausea and vomiting (Cannabinoid Hyperemesis Syndrome in heavy users)
- Impaired coordination and slower reaction time

Today's vape products can exceed **80%-90% THC**

HOW MARIJUANA HAS CHANGED

Cannabis 20-30 years ago: Averaged 2%-5% THC

VS

Today's vape products: Can exceed 80%-90% THC

Higher potency is associated with stronger effects on memory, learning, reaction time, and mental health.

High-potency THC has been linked to increased emergency department visits, hospitalization, and psychotic episodes.

DANGERS OF VAPING THC

AFFECTS BRAIN FUNCTION
High-potency THC can interfere with brain development, affecting learning, memory, and emotional health.

HARMFUL CHEMICALS AND CONTAMINANTS
Vaping products may contain harmful chemicals, heavy metals, and contaminants.

IMPAIRS MEMORY, ATTENTION, AND JUDGMENT
THC can impair focus, reaction time, and decision-making, putting you and others at risk.

HARMFUL TO LUNG HEALTH
Vaping can irritate and inflame the lungs, leading to coughing, shortness of breath, and long-term damage.

INCREASES RISK OF ANXIETY, PARANOIA, AND ADDICTION
THC use can increase feelings of anxiety or paranoia and may lead to dependence or addiction.

HIGH POTENCY REAL RISKS NOT WORTH IT

HEALTH RISKS OF VAPING MARIJUANA

Vaping marijuana is touted as "safer" than smoking marijuana but, vaping marijuana comes with its own set of serious risks. Marijuana vapor releases harmful chemicals into your lungs that can negatively impact your respiratory system, your heart, your central nervous system, your immune system, and your mouth, throat and teeth. Explores the latest research and assesses the risks, focusing on teen health. Includes teacher's resource book, student handouts and pre/post tests in digital format. Contains Spanish subtitles. Grades 7-12 • 19 minutes

ITEM # 11491	DVD	\$149.95
--------------	-----	----------

WHAT IS MARIJUANA?

Marijuana (also called cannabis) is a drug made from the dried leaves and flowers of the *Cannabis sativa* or *Cannabis indica* plant. The main mind-altering chemical in marijuana is delta-9-tetrahydrocannabinol (THC). Delta-9 THC is another mind-altering chemical in marijuana found only in small amounts. The amount of THC in marijuana determines how strong it is.

"Synthetic marijuana," such as K2 and Spice, is different from marijuana. These designer drugs contain lab-created chemicals that are similar to THC but are often stronger and can be deadly.

What Are the Consequences of Marijuana Use?

Although marijuana use continues to gain public acceptance, marijuana is not a risk-free drug.

Possible Short-Term Effects:

- Altered senses
- Distorted sense of time
- Memory problems
- Impaired thinking and judgment
- Increased heart rate
- Changes in mood
- Poor coordination
- Hallucinations
- Delusions and paranoia

Potential Long-Term Effects:

- Addiction
- Changes in brain development
- Lung and breathing problems
- Cardiovascular stress
- Mental health problems
- Fetal and infant harm
- Severe nausea and vomiting

MARIJUANA / CANNABIS: A CLOSER LOOK

How Is Marijuana Used?

Marijuana may be smoked, vaporized as a dry herb, concentrate, or cannabis oil; consumed in foods and beverages; or absorbed under the tongue.

Smoking Marijuana
Marijuana is typically smoked in hand pipes, bong (water pipes), joints, and blunts (pipes that have been emptied of tobacco and refilled with marijuana).

Vaping Marijuana
Marijuana can be vaped in e-cigarettes using a liquid that contains THC (THC-vape juice). Additives found in some THC-vape liquids could cause serious lung injuries.

Oral Delivery Methods
Marijuana edibles are foods and drinks that are made with marijuana or marijuana-infused oil or butter. Edibles take longer to produce an effect than smoking or vaping. Users may over-eat if they consume too much while waiting to feel the effects.

Marijuana may also be used as a THC tincture. Usually created by extracting THC from cannabis with alcohol, which can be absorbed into the bloodstream by placing drops under the tongue. The tincture may also be added to foods and drinks.

MARIJUANA/ CANNABIS: A CLOSER LOOK 3-D DISPLAY

Helps parents and educators identify newer forms of marijuana while alerting young people to the potential risks of marijuana (also called cannabis) & shows how it is not a risk-free drug. This educational display features realistic 3-D models of marijuana and related paraphernalia secured behind a durable plexiglass cover. Covers smoking marijuana, vaping marijuana, and oral delivery methods (edibles and tinctures). A stand-alone panel (12" x 17½") explains what marijuana/cannabis is, how it differs from "synthetic marijuana," such as K2 and Spice, and potential consequences of marijuana use, including addiction and mental health problems. • 29" x 20" opened

Impaired motor skills and judgement, damage to short term memory, stroke, head aches

Psychological

Major mood swings, violent behavior, depression

Vision

Dizziness, blurred vision, blood shot eyes

Heart

Increased blood pressure

Stomach

Nausea, vomiting, alcohol poisoning, possible death

Coordination

Unable to walk or talk clearly, accident prone

LONG TERM EFFECTS

Brain

Brain damage and memory loss, addiction

Nervous System

Break down of the nervous system supplying limbs

Throat

Risk of laryngeal cancer, increased risk of cancer

Muscles

Weakening and pain

Heart

Heart attacks, heart disease, anemia

Liver

Liver damage, cirrhosis of the liver, possible death

Stomach

Peptic ulcer, gastritis

Pancreas

Early diabetes, bad digestion

Bones

Degeneration and risk of fracture

Refusal Tips

If you find yourself in a situation where someone is encouraging or pressuring you to drink alcohol, try one of these lines:

- "Sorry, I have to drive tonight"
- "No thank, I don't like beer"
- "No way, My mom will kill me if I come home smelling like alcohol"

NEW-FATAL VISION® DIES® ALCOHOL DRIVING – ACTIVITY MAT

Step into the driver's seat and experience the dangers of alcohol impairment in a powerful, hands-on way • This interactive mat simulates impaired driving by challenging participants to steer along a course while wearing Fatal Vision® Goggles • Unlike walking-based mats, this activity mirrors real driving behavior and decision-making, making the risks of impaired driving both realistic and unforgettable

Includes:

• (1) 4' x 14' durable, rubber-backed DIES Alcohol Driving Mat with carrying strap

• (1) Steering wheel *some assembly required.

• Fatal Vision® Goggles **NOT** included

ITEM # 13473

\$1250.00

DRINK AWARE DISPLAY

• Helping viewers understand recommended alcohol limits, this eye-catching display provides clear examples of one standard drink

• Features durable plastic models of a 12-oz beer, a 12-oz cooler, a 1.5-oz shot of spirits, and a 1.9-oz martini

• Includes two-sided, 8 1/2" x 11" tent card that defines a standard drink, as well as heavy, binge, and moderate drinking

• Comes with carrying case

ITEM # 978640

FATAL VISION® ALCOHOL IMPAIRMENT GOGGLES KITS

- These money saving kits offer different components of the **FATAL VISION® Alcohol Impairment Goggles** and **Hands on Activities** at a lower cost than buying the components individually
- Goggles are available in five (5) levels that simulate the impairments associated with a particular BAC – from less than .06 to .25+ BAC. Alcohol goggles come in either a clear lens to simulate daylight conditions or a shaded lens to simulate night condition
- Students can experience how alcohol affects vision, balance, reaction time, and judgment. While wearing the goggles, they perform tasks like walking a straight line, throwing a ball, or balancing on one foot to see the impact firsthand

Campaign Kit shown

THREE KIT OPTIONS PROVIDE FLEXIBILITY BASED ON YOUR NEEDS:

PROGRAM KIT

Includes goggles, core activities, and instructions—perfect for small groups or classroom demonstrations.

ITEM # 11934 - \$1100.00

FATAL VISION® ALCOHOL IMPAIRMENT GOGGLES

FATAL VISION® ALCOHOL IMPAIRMENT GOGGLES

• Fatal Vision® Alcohol Impairment Goggles provide a powerful, hands-on learning experience that goes beyond lectures and warnings • By simulating the effects of alcohol on balance, vision, and coordination, these goggles help high school students see and feel how impairment can impact their actions and decisions • The activity encourages safe choices, enhances engagement, and makes alcohol prevention lessons more relatable, memorable, and impactful—especially for teens who often learn best through experience

• These Goggles are available in five (5) levels that simulate the impairments associated with a particular BAC – from less than .06 to .25+ BAC. and come in either a clear lens to simulate daylight conditions or a shaded lens to simulate night conditions.

• Participants perform simple activities or sobriety tests without and then with the goggles

• Performing the activities twice lets participants experience their performance while unimpaired and then impaired. Students can experience how alcohol affects vision, balance, reaction time, and judgment

HANDS-ON ACTIVITIES TO ENHANCE FATAL VISION® GOGGLE DEMONSTRATIONS:

FATAL VISION® SMASH MATCH® IMPAIRMENT CHALLENGE

• Participants race to match and place traffic-related shapes on the Smash Match® mat—first without, then while wearing the impairment goggles

• The difference is immediate and impactful, reinforcing how even simple tasks become difficult under the influence • Positive safety messages printed on the mat encourage responsible choices and promote safe driving behavior

• (Fatal Vision® Goggles sold separately)

ITEM # 174313 GAME \$225.00

FATAL VISION® DIES® WINDING SIDEWALK MAT

• Participants attempt to walk the winding sidewalk first without goggles, then again while wearing them to simulate alcohol or drug impairment

• The sharp contrast in performance highlights the real-life danger of attempting to operate a vehicle while impaired

• (Fatal Vision® Goggles sold separately)

ITEM # 11015 4' X 10' MAT \$975.00

FATAL VISION® DIES® ALCOHOL BALCONY MAT

• This mat is designed specifically to help you raise awareness about one's susceptibility to the potential dangers associated with alcohol impairment in a party scene by providing the simulated challenge of walking through a room while performing simple tasks such as picking up a TV remote or piece of pizza, talking to another "partygoer," and avoiding tripping hazards that could result in a fall from the balcony to the street below • This activity addresses potential dangers associated with alcohol at house parties, block parties, holiday parties, family celebrations, and other events • (Fatal Vision® Goggles sold separately)

ITEM # 11014 4' X 14' MAT \$975.00

FATAL VISION® DIES® ROADSIDE SOBRIETY TEST & STAIRS CHALLENGE MAT

• This engaging activity simulates standard roadside sobriety tests, including a straight-line walk and stair navigation, offering a compelling, interactive way to demonstrate how alcohol or drug impairment can affect balance, coordination, and basic motor skills

• Participants attempt the tasks first unimpaired, then repeat them wearing simulation goggles

• The contrast in performance makes a lasting impression and reinforces the dangers of impaired driving

• (Fatal Vision® Goggles sold separately)

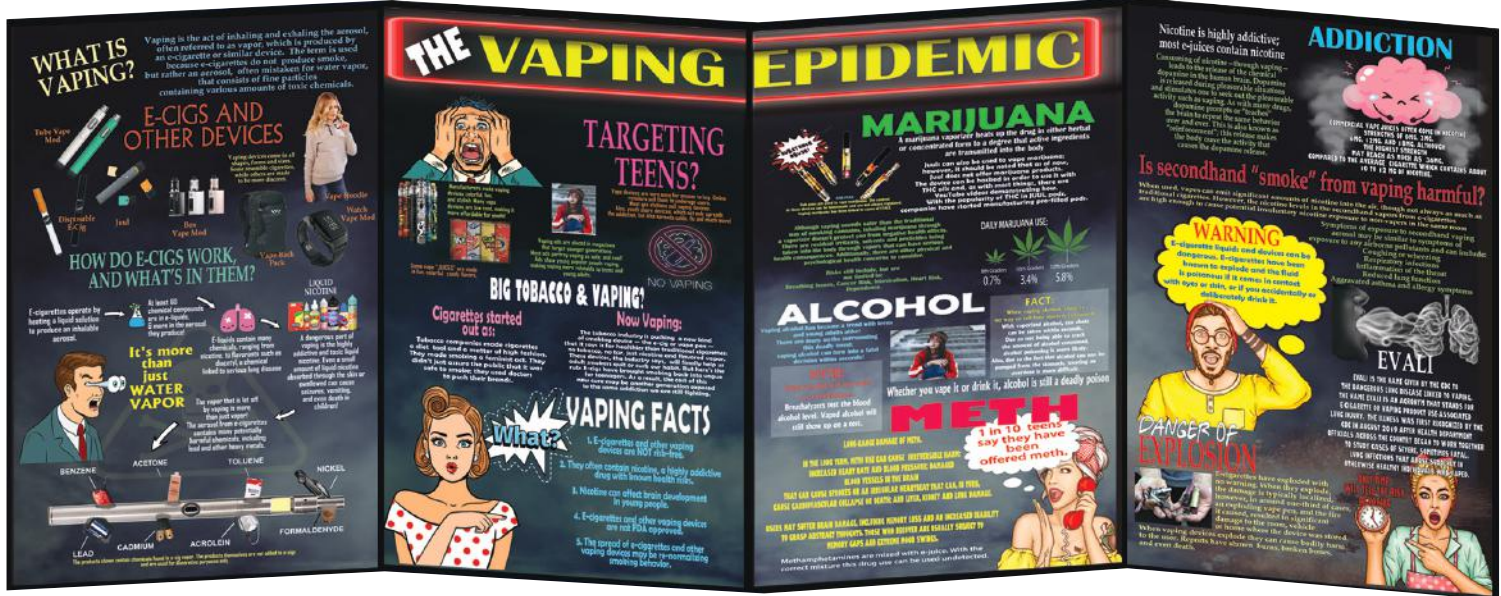

ITEM # 11016 4' X 10' MAT \$975.00

THE DANGERS OF VAPING

PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

THE VAPING EPIDEMIC FOLDING DISPLAY

- Helps your students understand the risks of this fast-growing trend in teenage drug abuse • Learn that e-cigarettes are not a safe choice and that vaping other drugs like marijuana and alcohol is a highly risky, often deadly choice • Can be exhibited on a tabletop or folded flat for easy transportation • 58" x 22"

ITEM # 74858

DISPLAY

\$119.95

E-CIGARETTES & VAPING: A CLOSER LOOK 3-D DISPLAY

- E-cigarette, or vaping, devices come in a variety of styles and appearances, making them attractive to young people and difficult for parents and educators to identify • This colorful, educational display (29" x 20" opened) features realistic 3-D models and images of different types of vaping devices and e-liquids secured behind a durable plexiglass cover • Great for health education classes to deter teen vaping, parent and teacher education, and more

ITEM # 11363

DISPLAY

\$859.95

THE DANGERS OF VAPING

PROMOTIONAL RESOURCES TO EDUCATE ABOUT VAPING RISKS

Hair Health
Nicotine content of e-cigarettes affects the body in the same way as ordinary cigarettes and tobacco. That means less blood flow to the scalp, which can significantly undermine hair follicle health, leading to thinning or loss of hair.

Brain Health
Nicotine exposure during adolescence, a critical period for brain development, can cause addiction and can harm the developing brain. It also has been shown to contain the nicotine of cigarettes.

Eye Health
Vaping contains several chemicals that are known to cause inflammation of the eyes, nose, and throat. It is well known resulting in any form can increase the risk of developing eye diseases such as macular degeneration, cataracts, and diabetic retinopathy. These risks are also present in e-cigarettes.

Lung Health
The inhalation of harmful chemicals from e-cigarettes can cause irreversible lung damage and/or lung disease. Physicians have also found that e-cigarettes can cause a condition known as popcorn lung, a medical condition that damages the bronchioles, the lung's smallest airways. Over time this will cause scarring that leads to breathing difficulties.

Heart Health
Popcorn lung has been tested. When tested they showed the heart-lung unit gets inflamed. Nicotine can reduce inflammation, potentially dangerous due to heart burning and heat. Nicotine itself can lead to heart attacks and strokes. Drugs in this can lead to heart attacks and strokes.

Skin Health
Any form of smoking leads to premature signs of aging, dry skin, wrinkles, sagging, under eyes and dull, dehydrated skin. This bad habit robs your skin of oxygen and restricts blood flow, which affects circulation and breaks down collagen and elastin.

Addiction
Using nicotine, regardless of how it is delivered, increases the risk of addiction. Nicotine addiction is notoriously difficult to reverse, and the use of e-cigarettes frequently leads to use of other nicotine products, including smoked cigarettes, or even alcohol and other drugs.

E-cigarettes and other vaping devices are NOT risk-free.

VAPING: A BAD DECISION

VAPING... A TOXIC MIX
It's more than just WATER VAPOR

BENZENE
Benzene is a highly volatile industrial chemical. Because it is found in crude oil and is a major part of gasoline, benzene can harm human health and affect blood cell counts.

ACETONE
Commonly used in nail polish remover. Acetone can irritate the skin, along with damaging the central nervous system.

TOLUENE
Commonly used in solvents. Toluene is highly toxic. This chemical can cause headache, dizziness, and breathing difficulties.

NICKEL
Commonly used in stainless steel, in production, transport and storage. Nickel can cause allergic reactions, lung damage, and cancer of the lungs.

LEAD
Used in car batteries. Lead is highly toxic. It has been found in many products. Lead poisoning causes growth, brain damage, and can even lead to death.

CADMIUM
Used in batteries, cadmium causes damage to the liver, kidneys, and brain. This chemical also enters the blood stream.

ACROLEIN
Used as a herbicide to control weeds and algae. It is a toxic irritant to the skin, eyes, and nasal passages.

FORMALDEHYDE
This is used to preserve dead bodies. It causes cancer and can lead to lung damage. Formaldehyde also leads to skin and digestive system damage.

LIQUID NICOTINE
THE MOST DANGEROUS PART OF VAPING. NICOTINE ADDICTIVE AND TOXIC. EVEN SMALL AMOUNTS OF NICOTINE EXPOSURE THROUGH SKIN OR INHALATION CAN CAUSE DEATH. WOMEN WHO VAPED DIED IN CHILDS.

The products shown contain chemicals found in e-cig vapor. The products themselves are not added to e-cigs and are used for illustrative purposes only.

VAPING... A TOXIC MIX (BANNER OR POSTER)

• With this banner or poster, you will learn why vaping is a toxic mix • Gives names and descriptions of the many chemicals found in e-cig vapor including the harmful side effects for each one

TOXIC HAZE: VAPING POISONS™ DISPLAY

• Students can pick up this giant attention-grabbing 3-D display of an e-cigarette vape to see 8 models of products containing just a few of the same harmful chemicals found in e-cigarette aerosol vapor

• The 8 models included are:

- Cigarette (nicotine)
- Car (acrolein)
- Specimen jar (formaldehyde)
- Battery (cadmium and nickel)
- Gasoline can (benzene)
- Pesticide can (acetaldehyde)
- Nail polish remover (acetone)
- Laundry pod (propylene glycol)

• Also comes with a durable two-sided display stand that discusses other dangerous substances that have also been found in e-cigarettes, including diacetyl (which causes "popcorn lung"), vitamin E acetate (which is associated with severe lung injury), fentanyl (a synthetic opioid involved in many opioid deaths), and more

ITEM # 79309

\$499.00

Toxic HAZE: Vaping Poisons™ Display
If you think vaping is a safe alternative to smoking, think again! The match inside this e-cigarette (vape) represents just a few of the harmful substances that may be found in e-cigarette aerosol vapor.

Can You Find...

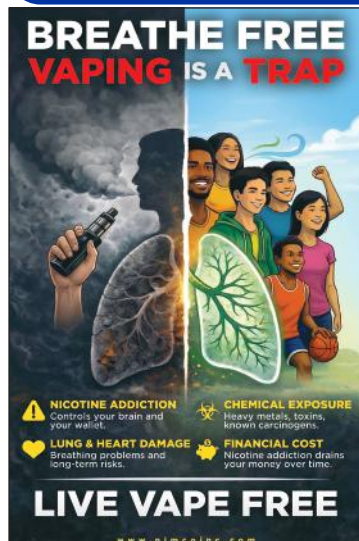

- ... A specimen jar?
- ... A battery?

NICOTINE POUCHES Not Risk-Free

- 1 Highly addictive - many pouches contain strong doses of nicotine
- 2 Can raise heart rate and blood pressure
- 3 May irritate gums and mouth - long-term risks are still being studied
- 4 Can cause nausea, dizziness, and headaches
- 5 Nicotine can affect mood, attention, and self-control
- 6 For youth, nicotine can harm the developing brain

Nicotine pouches tobacco-free, but NOT AS HARMLESS AS THEY SEEM

NICOTINE POUCHES What You Should Know

No smoke. No vapor. Still nicotine.

1. What Many People Don't Realize About Oral & Physical Health
 - They sit directly on your gums, because the pouch rests against the same spot in your mouth, it may cause irritation. Over time, repeated use may contribute to gum recession, where gum tissue pulls away and exposes the roots of teeth.
 - Nicotine affects your heart and blood vessels. Nicotine is a stimulant that can increase heart rate and blood pressure and cause blood vessels to tighten, which may also result in the cardiovascular system—especially with frequent use.
 - "Tobacco-free" doesn't mean chemical-free. Some nicotine pouches may contain small amounts of certain irritants or chemicals. Regular use of oral nicotine products may irritate white patches in the mouth called leukoplakia, which should be checked by a dental professional.
2. The "Hidden" Addiction Cycle
 - Nicotine pouches are designed to deliver nicotine quickly through the gums.
 - Fast absorption: Some pouches are formulated to help nicotine enter the bloodstream faster. This can create a short "buzz," which can make the brain want more.
 - Tolerance happens fast. After a while, the buzz fades. Many people find they continue using nicotine just to feel "normal," and avoid withdrawal symptoms like irritability, headaches, or trouble focusing.
3. Why Youth Are More Vulnerable to Nicotine
 - Brain development matters. Nicotine exposure during adolescence can affect some of the brain-related to learning, attention, mood, and impulse control.
 - Early nicotine use can increase future addiction risk. Using nicotine at a young age may make the brain more sensitive to other addictive substances later in life.
 - The "add-on" trap. Some young people can combine pouches with vaping or smoking. Using multiple nicotine products at once can increase overall nicotine exposure and make dependence stronger.

REMEMBER: Nicotine is addictive. Nicotine exposure during adolescence can affect some of the brain-related to learning, attention, mood, and impulse control.

A CLOSER LOOK AT TOBACCO 3-D DISPLAY

• Magnifying all the ways tobacco companies market their deadly wares, this 3-D display features ultra-realistic facsimiles of popular types of tobacco products enclosed behind plexiglass

ITEM # 11733

\$849.95 EA.

SMOKER'S HAND: THE DEATH GRIP OF NICOTINE™ MODEL

• This haunting, utterly realistic hand model (4" x 9½" x 3") grabs your attention by showing viewers how smoking can affect their hands • Made of lifelike BIOLIKE™, the model accurately depicts tobacco-stained fingers and fingernails, age spots, clubbed fingers, and a slightly bent finger (indicative of the early stages of a progressive condition called Dupuytren's contracture)

• An informative, two-sided tent card (8½" x 10") explains each condition depicted in the model

ITEM # 11751

\$239.95 EA.

SMOKED FOOT™ GANGRENE MODEL

• Many people don't realize that smoking affects the entire body, even the feet

• This alarming model of a diseased foot graphically depicts the results of peripheral artery disease, resulting in decreased blood supply to the foot and gangrene

ITEM # 11753 199.95 EA.

SMOKEFREE LUNG AND SMOKER'S LUNG DISPLAY

• Simple but effective way of showing how smoking damages the lungs

• Comparing the air sacs of the lungs to bubble wrap, this 3D model of 2 lungs shows the bronchial air passages entering two lungs

• Smokefree lung is pink and healthy, smoker's lung is black from tar

ITEM # 52482

\$349.95 EA.

WHAT'S YOUR POISON? 3-D DISPLAY

• 3D interactive display that shows a giant cigarette with descriptions of 15 toxic chemicals in tobacco smoke and details of what these chemicals can do to the body

• Each poison has a shelf of something to represent the common uses of the toxin • Many of the toxic chemicals have no safe level of exposure

• Perfect for a booth to allow people to inspect the poisons in tobacco smoke

• Can be used for the visually impaired as it allows people to pick up and feel the objects on the board

• Comes with objects and jars packed separately, ready to assemble

• Non-poisonous, colored liquids are used in the jars

• Approx. 25" x 18" wooden display and stand

ITEM # 423533

\$379.95 EA.

PUFFING POISON TANK: A SECONDHAND TRAP DISPLAY

• A demonstration of the effects of secondhand smoke without cigarettes is easy with this unique simulator!

• A special unit behind the nonsmoker's face stains a removable filter with tiny "smoke particles" • Includes 50 filters, "smoke particle" powder, and more • 110 volts required

• 11 1/2" x 10 1/2" x 9 1/2"

ITEM # 79596

\$899.95 EA.

PUFFING POISON TANK (SET OF 50 REPLACEMENT FILTERS)

ITEM # 85-79247-D

\$49.95 EA.

DROWNED LUNG MODEL

• Bring the reality of COPD to life with this audible, interactive model

• This lifelike model of a damaged lung swims in simulated phlegm, and picking up the jar triggers a voice module that plays a recording of a gasping, gurgling cough

ITEM # 11752

\$339.95 EA.
