NEOFLEX

Net-Zero Carbon-Inset® Gloves

With the assistance of The Carbon Consulting Company (CCC) and The Sustainable Future Group (SFG), and through the work done by Lalan's Green Future Initiative, our rubber-based land and biodiversity conservation project, we are now proud to present a range of certified net-zero Carbon-Inset® Products: the NeoFlex range of gloves.

CCC assessed and quantified the carbon footprint of manufacturing our LD selected range of products following the Life Cycle Analysis approach. CCC also measured the amount of carbon that would be sequestered through our land conversion project. SFG then independently verified the product carbon footprint assessment and our project's emission removals (Carbon Insets) using the ISO 14064-2 Standard. The insets obtained from our project wil be used to negate the environmental impact of producing the selected products, which can then be certified as "Carbon-Inset® Products".
