

THE ANT AND FISH TANK

Hello! My name is Jemin.

I'm a first-year middle school student.

I like do origami, watch video, and play game.

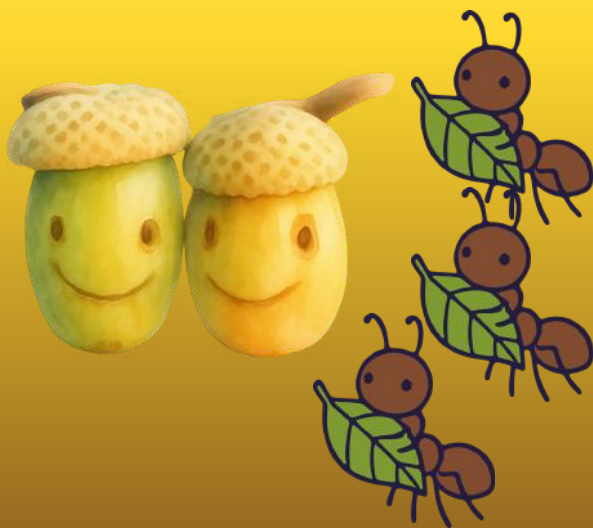

I wrote this story because I wanted to science is important.

Thanks you for reading my book. I hope you enjoy it.

In a house, there was a smart ant hill. The ants loved science.”Science helps us every day,”said the Queen Ant.

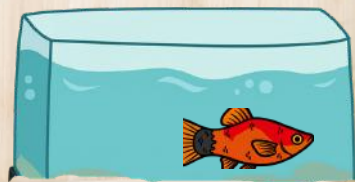

Smollas Smith,Mollis
Smith,and Highway Smith
were friend.They liked to
learn and machines.

Near the ant hill was
a fish tank.A big fish
named Platy lived
inside.

One day, the ants went
to study water. Doctor
Ant said, "Be
careful. Fish can see
movement."

Suddenly, Highway Smith
slipped. Platy saw him and
rushed to glass. Swoosh!

The ants were scared.
Platy bumped the
glass.BUMP!BUMP!

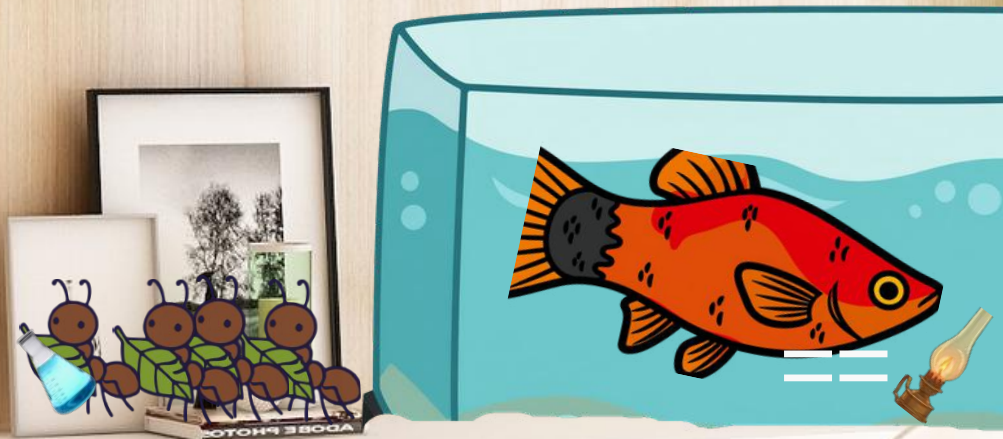

“We need a plan!” said
smollas.doctor Ant said,
“stay still.”

The ants stopped moving.
Platy could not find them
easily.

Then Docter Ant used a small light. Platy swam toward the light. the ants moved away safely.

The Queen Ant smiled .
“Science helped us solve the
safely propem,” she said. The
ants cheered “Hooray for
science!”
