

Paper-Backed Wallcovering Information

Paper-Backed Wallcovering

Our collection of printed linens, lightweight plain weaves and mid-weight laundered fabrics can be paper-backed to create bespoke textile wallcoverings, bringing the natural beauty and character of linen to your walls.

Linen wallcoverings introduce a subtle, tactile texture through the inherent characteristics of linen yarns, while our dynamic print collection and broad palette of plain colours offer endless possibilities for creating a distinctive interior.

Our wallcoverings are produced at the full width of the original fabric (up to 58”), requiring fewer seams and creating a spectacular and cocooning effect.

Additionally, paper-backed linen wallcoverings offer sound absorption, insulation and can disguise imperfect wall surfaces.

Lead Time

The standard lead time for our paper-backing service is 2-3 weeks

Express service is offered with a lead time of 1 week +$5/yard

Roll Length

The maximum length of a paper-backed roll is 21.9 yards

Treatments

We can achieve both British and US fire-retardancy standards and we work with the largest specialist finisher in Europe to offer a range of additional treatments. Options include-

- Fire retardant paper-backing
- Fire treatment for the fabric
- Stain repellence

Certifications

Oeko-Tex

Installation

When ordering, please allow for some overage (3%), in addition to waste around doors and windows. A processing allowance of 12” is required at both the top and bottom of each roll.

Before installation, wallcoverings should be stored flat on a clean, dry and level surface to prevent creasing or distortion.

Walls should be primed with a primer specific for wallpaper; follow all manufacturer recommendations. Primers can be tinted to the colour of the wallcovering to reduce the risk of wall colour showing through.

Linen textile wallcoverings deserve maximum care and attention and should be installed by a skilled professional with relevant experience.

Maintenance and Considerations

It is important to understand that all textiles have movement and flow which will reflect in the wallcovering, and is part of the characteristic and charm of using paper-backed fabric. As a natural product, some colour variation and fraying may occur around corners or heavily trafficked areas.

To clean, lightly brush or vacuum to remove dust. Sponge with warm water and white soap (do not soak). Sponge first in a hidden corner to see reaction.

Please note that wallcovering is not meant for humid environments, such as bathrooms or laundry rooms.

Please note that the finished effect of your chosen textile wallcovering will be panelled and not seamless.

Whilst we cannot accept returns or offer any guarantees on pattern matching due to the inherent nature of paper-backing a linen fabric, we work with skilled craftsmen who take the utmost care with the production of this sumptuous product.

Pricing

Light Weight Plains

Paper-backed light weight plain linens start at $200 per yard.

For plain weaves in darker tones we recommend printing a matching colour onto the paper before we back the linen. This will avoid any of the white paper showing through the fabric. Including this additional process, light weight plains in dark shades start at $220 per yard.

Light Weight Fine Weave

All Shades $220 per yard

Mid Weight Laundered

All Shades $340 per yard

Printed Linen

All prints $375 per yard

Hillsleigh Road, London

Braids

Our collection of braids correspond perfectly with our plains and printed linen. Crafted to the finest quality in England, our braids are ideal for complementing our wallcoverings.

Our classic braids are available in Cornflower, Golden Ochre and Terracotta, alongside our Folkloric Stripe and Floral designs. Crafted as textured, woven tapes, they are perfect for adding decorative detail to wall edges.
