TRANSFORMING BATHROOMS.
REDEFINING LUXURY.

LIGHTING THAT ELEVATES **MODERN LIVING**

From fluid organic forms to industrial styling, the new lighting collection from SANIPEX GROUP comprises of a carefully curated selection of unique products that bridge the gap between art installation and interior design.

Blending aesthetic principles with technological innovation, every piece is crafted to both command attention and enhance the space in which it is placed, casting distinctive lighting effects to create a unique atmosphere and distinctive ambience indoors and out.

Representing innovative European brands, each selected for their quality, craftsmanship, and directional design approach, every product works as a stunning centrepiece across a variety of settings, from residential homes and restaurants through to hotels and retail premises.

Using the finest materials, including handblown Murano glass, textural ceramics, metal mesh, wood, and brass, the pieces in our lighting collection are expertly made by master craftsmen in Europe with a preference given to the use of local materials, resulting in exceptional pieces that will take pride of place in any space.

Sanaura

LIGHTING FOR **EVERY SPACE**

SANAURA has the power to inspire; to shed light on the possible; and illuminates the path towards innovation, creating beautiful spaces that connect everyone with their environment. Established in Dubai, UAE, SANAURA, the premium lighting brand by the renowned SANIPEX GROUP, blends form and function into every design. Derived from the name 'SANIPEX' and 'AURA' – meaning light and atmosphere – SANAURA offers luminaires for a range of needs and for every space, indoors and out. For homeowners seeking something high-end and luxurious, to architects and designers specifying with ambition, our pieces are perfectly suited for every space: within single homes, as well as contract hospitality, commercial, institutional spaces and beyond.

THE STORY OF **ALABASTER**

The alabaster used is a purely natural stone, its texture and translucency allowing it to filter light in a unique way, creating fascinating light and shadow effects. Formed from calcium sulphate, it features delicate veins and a remarkable ability to diffuse light, producing warm, glowing effects. Its softness makes it highly workable, enabling artisans to craft sculptures, decorative panels, and lighting elements that highlight its elegance. Each alabaster light is truly one of a kind, as no two pieces are ever the same. Beyond its aesthetic appeal, alabaster is considered sustainable and enduring, bringing serenity and timeless refinement to both traditional and modern spaces.

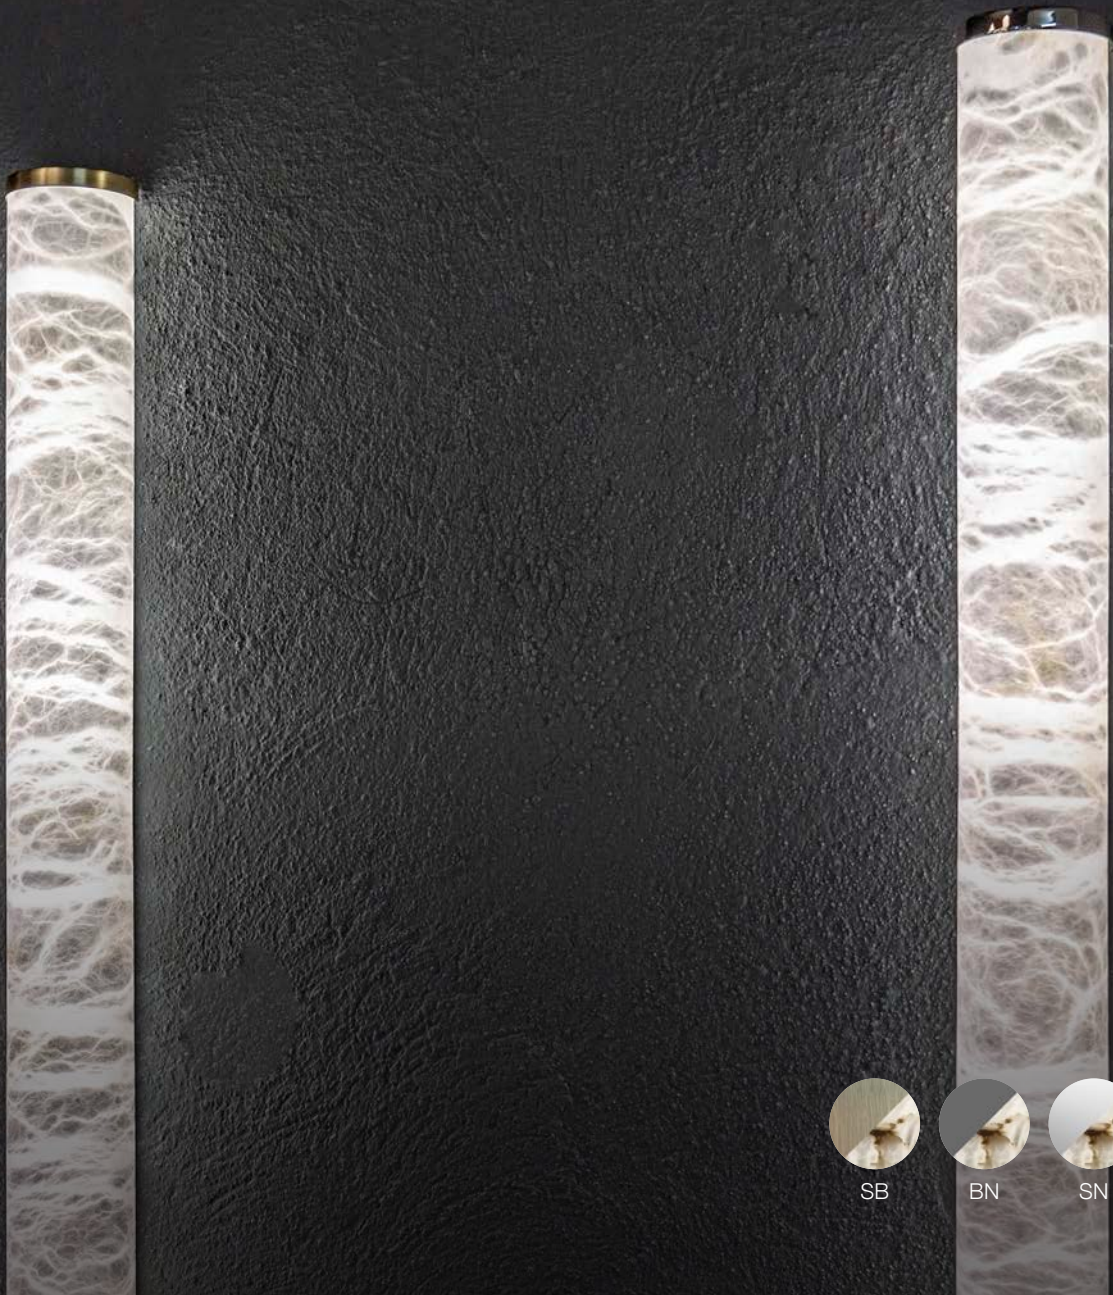

carlyle

The Carlyle range has a design where the emission of light is 180° in order to enjoy the translucency of the alabaster and where work has been done to avoid shadows inside the lampshade, emitting a very pleasant ambient light to create relaxing environments. The soft translucency of alabaster diffuses light beautifully, creating a warm, ambient glow that enhances the atmosphere of any room.

fonteyn

Due to its elegant design, Fonteyn brings a touch of sophistication in the bathroom. The meticulously crafted transparent glass diffuser provides a subtle but impactful shine, creating a very pleasant atmosphere.

astro

WHERE INNOVATION MEETS
TIMELESS DESIGN

Since 1997, Founders John Fearon and James Bassant, have shared a passion for British lighting design and a vision to create products with distinctive quality. Obsessive over the details, they refine elements others may overlook, challenging themselves so they get it just right.

DIFFERENT BY **DETAIL**

Future-proofed designs with a pared-down aesthetic. It's a simplicity of form that ensures our products retain a timeless quality. Every product should be made to last, no compromise, always choosing the best possible processes, trusting that if the engineering is great, the final product will be great too.

aquina

Offering effective illumination and modern silhouettes, a glass wall or ceiling light can be the perfect choice for bathrooms and beyond. Our latest design, Aquina, delivers a striking hand-blown glass shade and offers a bold lighting scheme.

J. ADAMS & CO

ENVISIONED IN **LONDON.**
FORGED IN **BIRMINGHAM.**

Every J. Adams & Co luminaire begins as an exploration of form, materiality, and light in their London studio. Once refined, their Birmingham workshop – drawing on over fifty years of experience – brings each piece to life. From concept to creation, they shape objects with permanence, designed to stand the test of time.

orbit

Mastering a refined elegance, Orbit is a highly versatile collection of pendant and wall lights. The simple, paired back design showcases the expertly engineered materials, contrasting the pure opal glass sphere with the natural stone or brass surround.

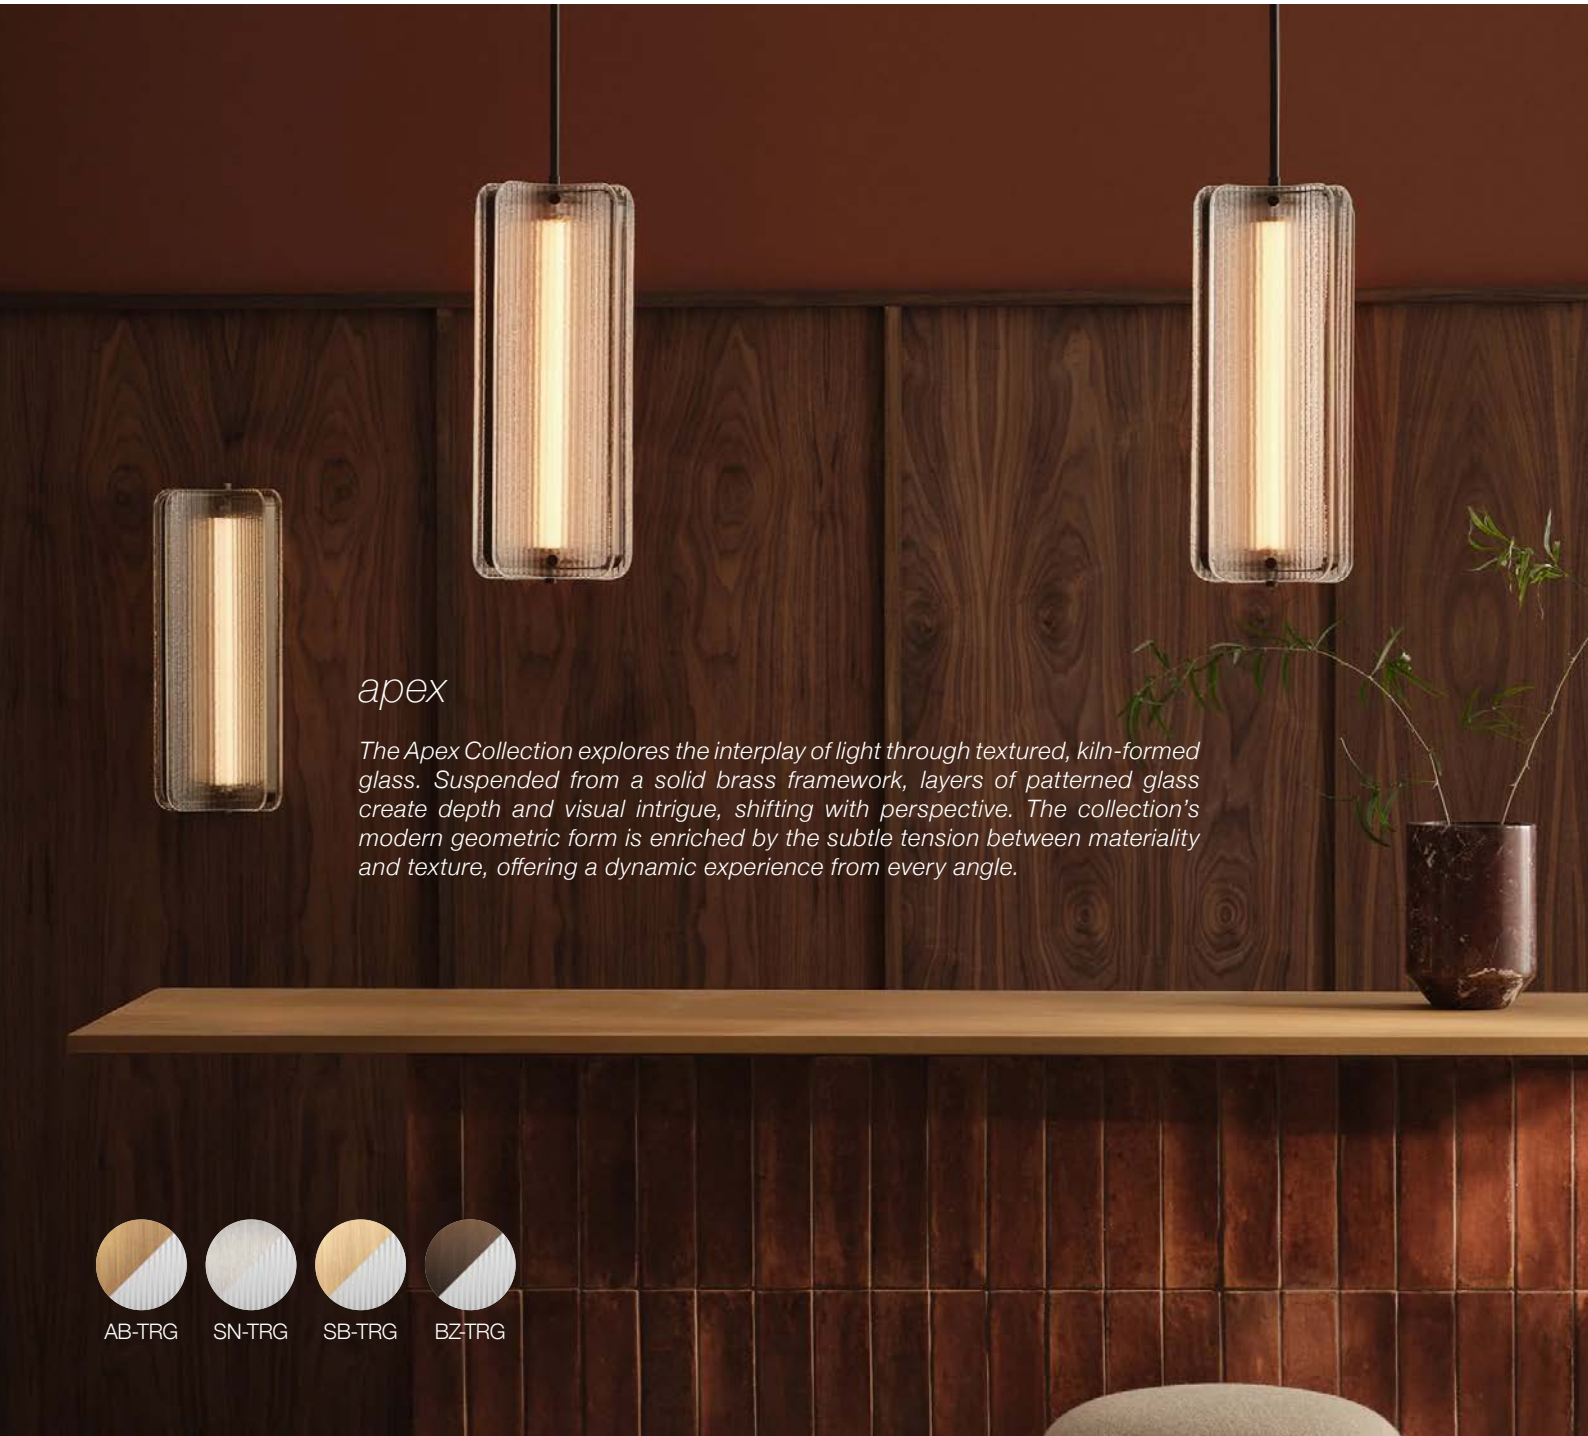

SUSTAINABLE DESIGN **MADE TO LAST**

Committed to using local materials and a Birmingham-based workforce, supporting both British industry and their local community. By manufacturing their products in the UK, they keep emissions low and significantly reduce their carbon footprint. J. Adams & Co pride themselves on designing and manufacturing lighting built for longevity.

apex

The Apex Collection explores the interplay of light through textured, kiln-formed glass. Suspended from a solid brass framework, layers of patterned glass create depth and visual intrigue, shifting with perspective. The collection's modern geometric form is enriched by the subtle tension between materiality and texture, offering a dynamic experience from every angle.

strata

The Strata collection is a celebration of craftsmanship and ingenuity. Playing with materiality and the beauty of light refraction through reeded glass, Strata provides an enchanting, linear focal point. Each piece is expertly produced at their workshop using precision-cut glass and engineered solid brass.

Heathfield & Co

*LIGHT BEYOND **DESIGN.***

Heathfield & Co celebrates the inherent beauty of natural materials, combining unique finishes in innovative ways to create distinctive lighting designs. With a focus on organic shapes and refined silhouettes, each piece is crafted to stand as a decorative object in its own right. Balancing form and function, Heathfield & Co lighting is designed to look equally striking whether illuminated or at rest.

nula

A slender alabaster tube forms the Nula vertical pendant, with a warm, integrated LED light that accentuates the white, beige and brown veins running through the stone.

esme

"The crackle texture of Esme is a key part of the craftsmanship process. After the glass has been blown into shape, it is plunged into cold water. This rapid change in temperature causes tiny cracks to form on the surface of the glass." Hanna Walter, Creative Manager

henri

A simple and understated design, our Henri wall light features opal white glass and detailed chrome back plate.

A vertical, double-tube wall light made of alabaster, mounted on a dark grey wall. The light is illuminated from within, highlighting the natural swirls and veins of the stone. To the left, a portion of a round mirror with a gold-colored frame is visible. To the right, a framed line drawing of a human figure is mounted on the wall. In the foreground, a large, feathery dried plant arrangement is partially visible.

nula

Celebrating the natural beauty of alabaster, the Nula double wall light features two cylindrical alabaster tubes, illuminated by integrated warm LED lighting that highlights every individual swirl and vein running through the stone.

talía

Simple yet striking, the Talia triple wall light will effortlessly blend into any interior, adding instant elegance. This versatile design features three distinctive mouth-blown glass globe, suspended from a satin brass elongated oval backplate, with tones of taupe, white, and olive in a speckled finish.

PORTA ROMANA

BRITISH MADE

Founded in 1988 by Andrew and Sarah Hills, Porta Romana has continuously grown and evolved. From humble beginnings in a small UK workshop, to creating a lighting installation for the Royal Academy of Arts in London, they have designed iconic and unique pieces for countless homes, galleries and hotels across the world. At Porta Romana, every piece is handcrafted and unique. Whether you select from one of their existing designs, or customise your own, every product is made to order. This means that every detail can be tailored to work perfectly with your interior, from finishes and fabrics, to creating something completely bespoke.

monty

The Monty Wall Light was inspired by mid-century lighting design, with its sharp angles and clean-cut silhouette.

library

The Library Wall Light was originally designed for superyachts and has since been adapted into a classical piece to fit a variety of schemes and interiors.

willow

The Willow Wall Light is modelled on an old French street light, with a contemporary twist. The long conical shape elongates the arm of the light to act as both a downward-facing and side light.

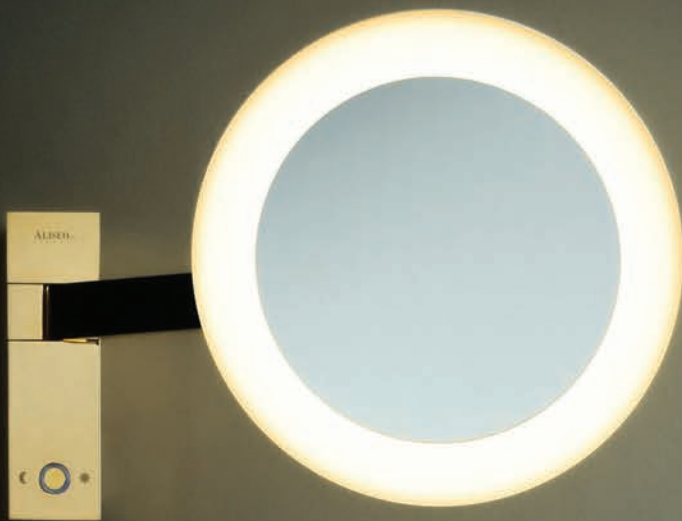

ILLUMINATED MAGNIFYING MIRRORS

An illuminated cosmetic mirror is an indispensable luxury detail in any hotel bathroom. Our models combine high-quality magnification technology with optimum illumination for maximum precision. Made from durable premium materials and equipped with energy-efficient LED lights, they ensure perfect vision and a comfortable grooming experience.

led moon dance

The fascinating beauty of the moon in the night sky was the inspiration for the current flagship of Aliseo cosmetic mirror. The collaboration with Sieger Design, one of the most renowned design studios in Germany, resulted not only in a perfect design language, but also technical perfection. The mirror's moon-like aura is created by the seamless translucent acrylic body, which subtly unfolds its light holistically in all directions.

ALISO

INGRESS PROTECTION RATING (IP)

'IP' ratings are used to define levels of sealing effectiveness of electrical enclosures against intrusion from foreign bodies, tools, dirt, moisture and water. This international classification system, when considering outdoor/indoor lighting, largely refers to how waterproof a set of lights, or lighting accessory is. Please see the table below, defined and explained the differences of each IP.

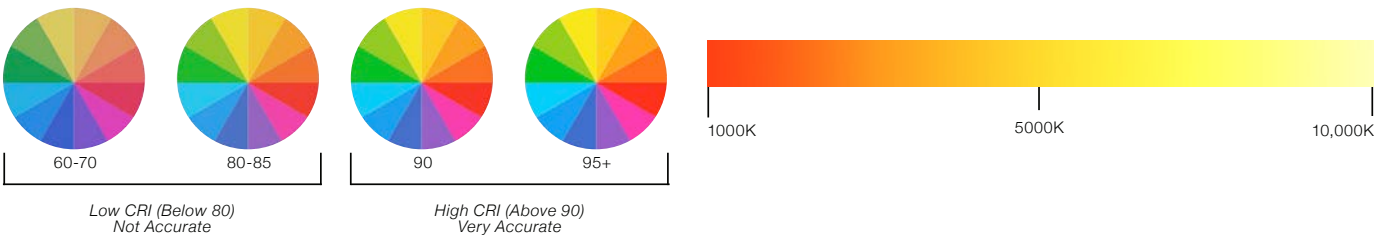

IP44	Protected from tools and small wires greater than 1 mm. Protected from water spray from any direction.	
IP65	Protected from total dust ingress. Protected from low pressure water jets from any direction.	

COLOUR RENDERING INDEX (CRI)

KELVIN RATING (K)

Measures the ability of a light source to accurately reproduce the colours of the object it illuminates.

Indicates the shade of white that is given off by the light source.

LUMENS (LM)

POWER (W)

VOLTAGE (V)

Unit of measurement for the luminous flux. This is the total quantity of visible light emitted by the light source.

The method of measuring the rate of energy transfer. The more Wattage, the brighter a light is.

Voltage is the pressure from an electrical circuit's power source that pushes the current to the light. When the lighting fixture operates at a different voltage, a driver (transformer) is required. **Voltage in the UAE is 230V.**

POWER EQUIVALENCY

LED equivalent wattages to traditional light sources can only be approximate, as they will vary depending on the colour temperature and quality of the bulbs being compared. Incandescent light bulbs are the least energy-efficient light source, with LED Light Bulbs using just 10% of the energy to produce the same amount of light as their incandescent equivalents.

INCANDESCENT LIGHT BULB WATTAGE	LED EQUIVALENT WATTAGE
100W	10W
75W	7.5W
60W	6W
50W	5W
30W	3W

BATHROOM IP RATINGS

ZONE 1: IPx5

Zone 1 is the area above the bath or shower to a height of 2.25m from the floor. In this zone, a **minimum rating of IP45 is required.**

ZONE 2: IPx4

Zone 2 is the area within 60cm to 75cm of a water source. It has to be protected against water splashes. **Therefore, a minimum of IP44 is required.**

ZONE 3: IPx0

Zone 3 is the area beyond Zone 2. **No IP is required.**
