Seating for 6 or 7

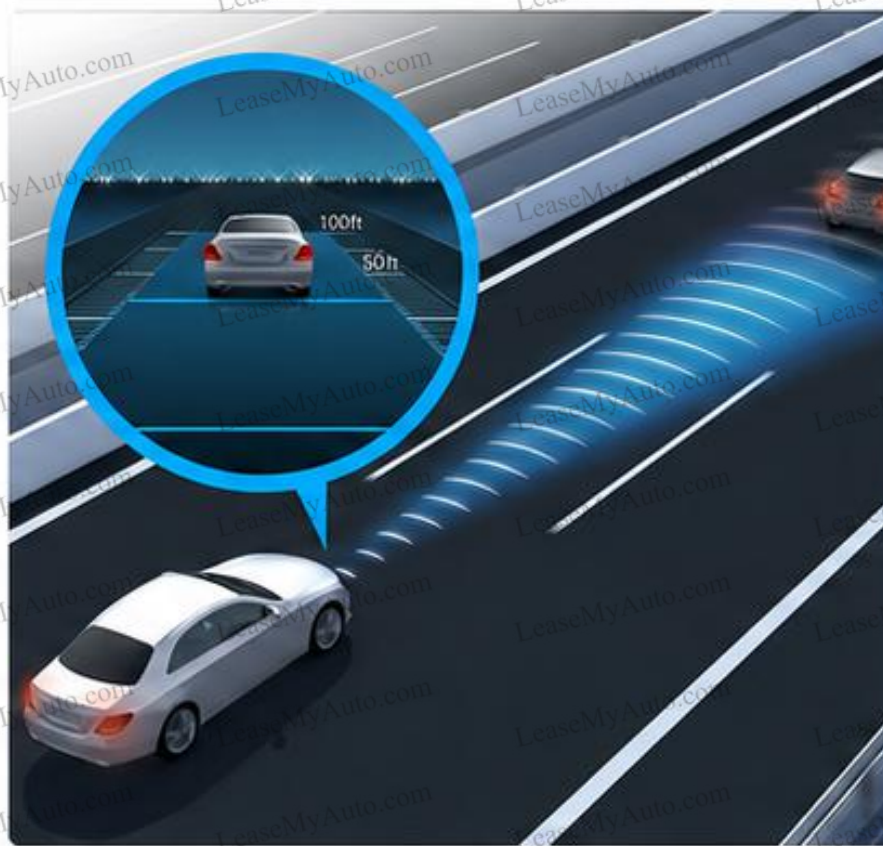

First-row comforts

SAFETY HIGHLIGHTS

All-around vision

Standard camera technology can make parking, reversing and even off-roading easier, from a virtual birdseye view of your surroundings to a clever 'Transparent Hood' display.

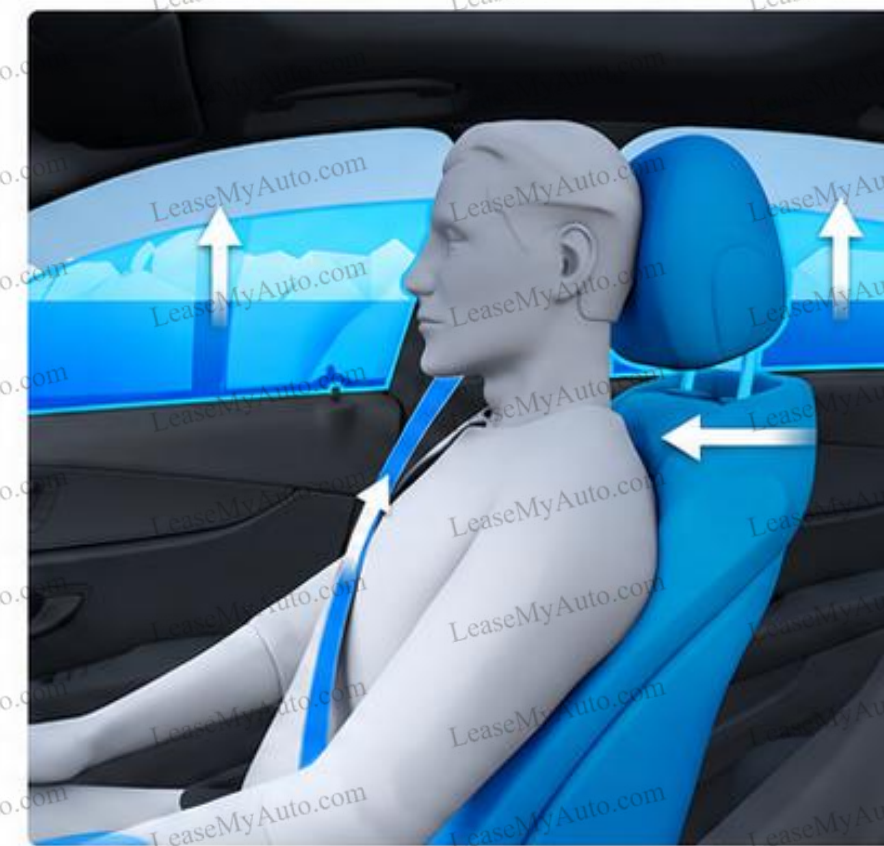

Smarter cruising

Standard DISTRONIC® can adapt your cruising speed to stop-and-go traffic, posted speed limits, even an upcoming turn in your navigation route. Active Steering Assist is included, too.

Smoother maneuvers

Signal for a lane change when cruising, and with that single tap your GLS can help check for an opening and deftly execute the move on your behalf.

Proactive protection

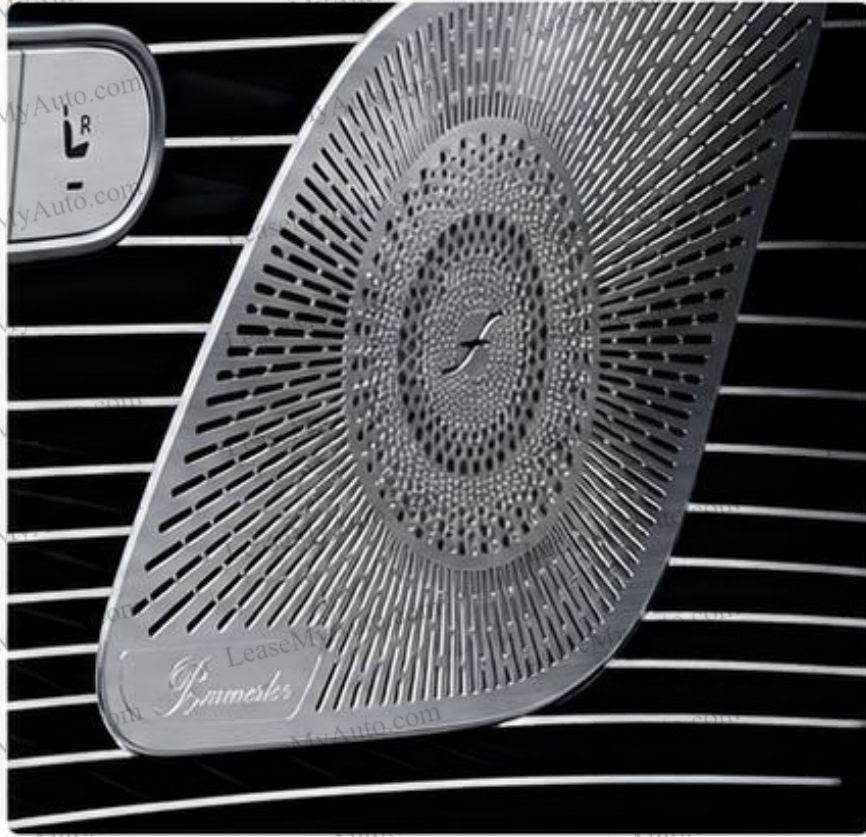

A GLS can start to protect you before a collision occurs. PRE-SAFE® can adjust the front seats and seat belts, close the sunroof, and even prepare your hearing, in the seconds before impact.

TECH HIGHLIGHTS

Reconfigurable readouts

Twin side-by-side displays, each 12.3 inches, keep info close at hand and in view. One lets you reconfigure the gauges and readouts. The other is a multimedia touchscreen.

Surround sound

Renowned for fine home audio, Burmester® has created two surround sound systems for the GLS: with 13 standard speakers and Dolby Atmos®, or a 29-speaker High-End 3D option.

Cable-free charging

No need to plug in your phone to charge it or enjoy Apple CarPlay® and Android Auto, all standard. USB-C ports abound, too, and you can add wireless charging to the second row.

Adaptive air suspension

Standard AIRMATIC® offers multimode damping, adjustable ride height, and 4-wheel level control that can automatically adjust for passengers and cargo.
