Bots4Business

October 2026
Newsletter #4

Bots4Business comes to an end.

The platform stays open to you

INTRO

After two years of work, the Bots4Business project closed on 30 September 2026. Six partners from Austria, Croatia, France, Ireland, Italy and Spain have produced free materials that help VET professionals and small and medium-sized enterprises start using artificial intelligence in everyday work, rather than only reading about it.

FINAL MEETING IN ZAGREB

The partnership met for the last time on 17 September 2026 in Zagreb, hosted by Callidus. We went through all the project results, confirmed the final steps to closing, and agreed how the materials remain available after the project ends. The day closed with a demonstration of the platform and a discussion on where partners see the greatest benefit for their own users.

PROJECT PARTNERS

- **BFI Burgenland** (Austria)
- **Future in Perspective** (Ireland)
- **Callidus** (Croatia)
- **Postal3** (Spain)
- **Confimi Industria Basilicata** (Italy)
- **Infinitivity Design Labs** (France)

Co-funded by the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Project number : 2024-1-AT01-KA220-VET-000245796

Bots4Business

WHAT THE PROJECT LEAVES BEHIND

- **A continuing professional development programme** for VET professionals, in nine modules.
- **A training programme for small and medium-sized enterprises**, and a **MOOC** for workforce AI skills.
- **The Business Case Library**, with real examples of AI use in small companies.
- **Transition Pathways**, setting out the steps for introducing AI into a business.
- **Policy and Practice Recommendations**, with the executive summary available in the partner languages.

AN INVITATION

If you run a training organisation, work with entrepreneurs, or are looking for a starting point for AI in a small company, open the platform and begin with a single module. The materials may be freely used and adapted after the project ends.

THE PLATFORM IS FREE AND OPEN

All materials are available on the project platform, at no cost and with no commitment. Registration is free, the modules can be taken at your own pace, and a certificate of completion is issued at the end.

The materials are in English and in the partner languages, so they can also be used in your own programmes and in-house training.

Co-funded by the European Union
