HILL ANGUS FARM

High Growth and Calving Ease Bulls Available

Performance tested bulls produced on silage based diets

Tag 4118 – LOW BIRTHWEIGHT WITH GREAT EPDs

Sired by EXAR Lifeline 2621B, 4118 had a birthweight of 45 lbs, along with an excellent EPD profile including high EPDs for WW, YW, Marbling, \$B, and \$C. Tag 4118 was an embryo transfer calf that had a very low birthweight coupled with a low producing recip mother. Indications are that his calves potentially would perform well above his record.

Tag 224 – CALVING EASE WITH GREAT PERFORMANCE

A son of the popular Genex Sire, DB Iconic G95, has BW EPD of 1.8, actual birthweight 84 lbs. Preweaning performance – actual weaning weight 790 lbs, adjusted weight of 743 lbs, marbling EPD 1.31, \$B 168, \$C 275.

OGEECHEE
PREEMINENT 521
(21398437)

Double digital CED, top 1% CW, Marb, RE, \$F, \$G, \$B and \$C speak volumes about this young donor's potential. She's sired by B&B Preeminent. Her \$C of +489 ranks her as the #3 \$C non-parent female in the breed. The opportunity is there for her and her progeny to produce pounds of gold with a CW of +100 and Marbling of +2.45! Offering 1/2 interest in her and a half sister, both out of the highly valued Ogeechee FB Grid Maker 17150.

Marb: +2.45 • RE: +175 • \$B: +318 • \$C: +489

Historic markets should be the incentive seedstock producers need to dig deep and make prudent genetic decisions. Progressive registered and commercial beef producers recognize the difference in "playing the numbers" game versus practicing the discipline to produce elite Angus cattle with the multi-trait excellence to perform in any environment. Take advantage of the most elite offering of registered Angus females to sell this spring.
