HILL ANGUS FARM

High Growth and Calving Ease Bulls Available

Performance tested bulls produced on silage based diets

Tag 4118 — LOW BIRTHWEIGHT WITH GREAT EPDs

Sired by EXAR Lifeline 2621B, 4118 had a birthweight of 45 lbs, along with an excellent EPD profile including high EPDs for WW, YW, Marbling, $B, and $C. Tag 4118 was an embryo transfer calf that had a very low birthweight coupled with a low producing recip mother. Indications are that his calves potentially would perform well above his record.

Tag 224 — CALVING EASE WITH GREAT PERFORMANCE

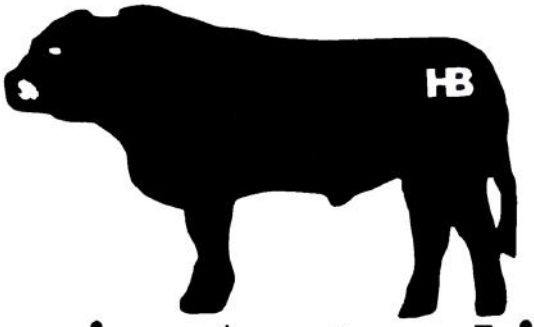

A son of the popular Genex Sire, DB Iconic G95, has BW EPD of 1.8, actual birthweight 84 lbs. Preweaning performance — actual weaning weight 790 lbs, adjusted weight of 743 lbs, marbling EPD 1.31, $B 168, $C 275.
