ELEVATING HERVAC WITHIN INDUSTRIAL INNOVATION

The FRIGAIR KWAZULU-NATAL Pavilion at KITE

The dedicated FRIGAIR Pavilion creates a focused HERVAC hub within the broader exhibition floor.

This pavilion enables HERVAC suppliers to:

- Engage with plant managers, engineers, and facilities executives.
- Demonstrate how HERVAC integrates with smart manufacturing and energy efficiency.
- Position solutions within large-scale infrastructure and processing projects in the KZN region.
- Connect directly with decision-makers in food production, warehousing, and marine sectors.

For visitors, this means:

- A concentrated HERVAC solution area.
- Easier comparison of technologies.
- Clear integration between HERVAC performance and industrial productivity.

Why FRIGAIR at KITE matters

45+ years of industrial impact.
A legacy that delivers.

TWO INDUSTRIES.
ONE INDUSTRIAL
ECOSYSTEM.

Why HERVAC belongs at KITE

The FRIGAIR presence introduces:

- Energy-efficient HERVAC systems.
- Compliance and regulatory technologies.
- Refrigeration and ventilation innovation.
- Sustainable facility solutions.

FRIGAIR has connected the **HERVAC** supply chain since 1980. Its inclusion at KITE introduces energy-efficient systems, compliance technology, refrigeration innovation, and sustainable facility solutions in the KZN Market.

***At KITE, HERVAC is not peripheral:
it is performance-critical.***
