About Us

SETO Inc. was founded in 1982 by producers with extensive experience in various sectors of agriculture. Initially focused on seed breeding and trading, the company served as the Turkish representative of the Netherlands-based Enza Zaden for 24 years, until 2007.

Kimta Inc., established in 1977 by the same shareholders, operated for many years in the crop protection and fertilizer sectors. The company represented Finland-based Kemira in Türkiye for 15 years and, in 2006 alone, imported and sold 10,000 tons of water-soluble fertilizers. Following Kemira's decision to withdraw from the fertilizer industry, Kimta accelerated the development of its own production infrastructure. During this period, the production facilities currently owned by SETO Inc. were established.

In 2009, the operations of SETO Inc. and Kimta Inc. were consolidated under the SETO Inc. brand, forming the company's current corporate structure.

The company operates on a 9,059 m² site located in the Antalya Organized Industrial Zone (AOSB), Phase II, where its modern production facilities are equipped with advanced infrastructure. Through continuous investments, the facilities have achieved an annual production capacity of approximately 38,000 tons of solid/powder fertilizers and 20,900 tons of liquid fertilizers, resulting in a total annual capacity of 58,900 tons.

Production is carried out across six main product categories:

- Liquid Chemical Fertilizers
- Liquid Organic Fertilizers
- Liquid Organo-Mineral Fertilizers
- Solid Chemical Fertilizers
- Solid Organic Fertilizers
- Solid Organo-Mineral Fertilizers

SETO Inc. offers nearly 200 registered and licensed plant nutrition products in both liquid and solid forms, approved by the Republic of Türkiye Ministry of Agriculture and Forestry. With a sales and technical team consisting primarily of agricultural engineers, the company provides comprehensive technical support to growers in the field.

A rigorous quality control system is implemented throughout every stage of the production process. For products planned in response to market demands, preliminary trials are conducted by experienced chemical engineers in the company's laboratory. Based on the results obtained, formulations are optimized to ensure both the most suitable nutrient composition for plants and cost-effective production planning.

Following the completion of packaging selection, label design, and product registration procedures, products enter the mass production phase. Samples taken from all raw materials used in production are analyzed in laboratory conditions and subjected to strict quality control procedures. During manufacturing, authorized and experienced technical personnel ensure the accurate implementation of formulations. Post-production analyses verify compliance with quality standards, after which the products are approved and prepared for shipment.

With its accumulated expertise, strong production capabilities, and commitment to quality, SETO Inc. is dedicated to helping farmers transform their hard work into high yields and superior-quality harvests.

A close-up photograph of a hand holding dark soil against a sunset background. The hand is in the foreground, with soil clumped in the palm. The background shows a blurred landscape with hills under a sky with warm, orange and yellow clouds from a setting or rising sun.

"It helps the fruit grow and boosts the harvest..."

Thanks to its high potassium content, this NK fertiliser solution enhances fruit quality, colour and firmness in plants. It helps the plant manage its water balance and meet its nutritional requirements during the ripening stage.

It ensures the plant's rapid and consistent development through potassium.

Guaranteed Content	%(w/w)
Total Nitrogen (N)	5
Urea Nitrogen (NH ₂ - N)	5
Water-soluble potassium oxide (K ₂ O)	30
Density	1,4

Supports fruit
quality, color and
ripeness

Supports resilience,
increases yield and
quality

Helps regulate
the plant's water
balance

Optimizes nutrient
uptake and increases
stress tolerance

*‘A powerful and cost-effective solution
for abundant flowering...’*

This NP fertiliser solution provides technical support for the early growth stages and root development processes in plants through its phosphorus and zinc content.

It supplies the nutrients required during the flowering and fruit-setting stages of the plant.

Guaranteed Content	%(w/w)
Total Nitrogen (N)	7
Urea Nitrogen (NH ₂ - N)	7
Water-soluble phosphorus pentoxide (P ₂ O ₅)	18
Water-soluble zinc (Zn)	5
pH Range	2 - 3
Density (gr/cm ³)	1,25

Supports flowering
and fruit set

Supports root
development
technically

Strengthens
the early development
process

Optimizes the plant
nutrient
balance

'Calcium Nitrate Solution for high-quality and durable products'

It is a calcium nitrate solution that technically supports the structural strength of plant tissues and cell wall integrity through foliar application. Whilst meeting the plant's calcium requirements, it contributes to the basic nutrient cycle and developmental processes thanks to the nitrate nitrogen it contains.

Guaranteed Content	%(w/w)
Total Nitrogen (N)	9
Ammonium Nitrogen (N - NH ₄)	0,5
Nitrate Nitrogen (N-NO ₃)	8,5
Water-Soluble Calcium Oxide (CaO)	16
pH Range	5 - 6

Supports the integrity of the cell wall

Strengthens plant tissues technically

Meets calcium requirements

Supports growth processes

TETRA ZINC-B

Bor (B), Mollb  en (Mo) ve   inko (Zn-Sulfat)
Sıvı Mikro Bitki besin Maddeleri Karıřımı

'Liquid micro-plant nutrient mixture'

TETRA ZINC B helps to resolve issues such as stunted growth, curling and wrinkling of young leaves, reduced flowering and fruit set, and weakened development, which may arise as a result of zinc, boron and molybdenum deficiencies in plants.

TETRA ZINC B accelerates new cell formation and supports fruit set and development. The presence of zinc, boron and molybdenum promotes the formation of substances such as auxins in the plant.

Due to TETRA ZINC B's high buffering capacity, zinc, boron and molybdenum exert a balanced effect, preventing phytotoxic effects in plants. It contributes to the more controlled and loss-free retention of nitrogen in the soil. It can be used on its own, particularly on fruit trees, after harvest.

Guaranteed Content	%(w/w)
Water-Soluble Boron (B)	0,5
Water-Soluble Molybdenum (Mo)	0,002
Water-Soluble Zinc (Zn)	4

Provides zinc, boron
and molybdenum
deficiency

Supports fruit set
and development

Accelerates
the formation of
new cells

Supports balanced
micronutrient
supply

TERRA MASTER®

NITROGEN FERTILISER SOLUTION

‘Soil Acidifier...’

TERRA MASTER® contains a high proportion of water-soluble sulphur trioxide (SO_3). The product does not crystallise, even in very cold conditions. Consequently, it is used entirely in a homogeneous form. The entire product reacts with the soil, dissolving the macro- and micro-nutrients bound within it and making them available to the plant. It clears drip irrigation pipes blocked by limescale in the water and aerates the soil; if there are damaged or diseased roots in the soil, it does not cause any scorching or burning of the roots.

Guaranteed Content	%(w/w)
Total Nitrogen (N)	21
Ammonium Nitrogen ($\text{NH}_4\text{-N}$)	2
Urea Nitrogen ($\text{NH}_2\text{-N}$)	19
pH Range	1 - 1,5

Solves soil-bound nutrients

Cleans clogging in drip irrigation pipes

Supports soil aeration

Does not cause burning or scouring in the roots

TOTAL UAN[®] 32

NITROGEN FERTILISER SOLUTION

32-0-0

'A reliable source of nitrogen at every stage...'

TOTAL UAN 32[®] is a product that combines ammonium, nitrate and urea nitrogen. It is a liquid nitrogen solution designed to minimise nitrogen loss and is suitable for all types of drip, sprinkler and foliar applications. As it is in liquid form, it ensures safe fertilisation without causing drying out or burning of the plant.

TOTAL UAN 32[®] takes effect quickly due to its high nitrogen content and stimulates plant growth. It is an ideal nitrogen source for plants under conditions of insufficient rainfall, low humidity, or extreme heat or cold.

Guaranteed Content	%(w/w)
Total Nitrogen (N)	32
Ammonium Nitrogen (NH ₄ -N)	8
Nitrate Nitrogen (NO ₃ -N)	8
Urea Nitrogen (NH ₂ -N)	16

Provides reliable nitrogen support in every application.

Maintains nitrogen losses at a minimum level.

Supports quick plant movement in a short time.

Works effectively under adverse weather conditions.

ECFERTILIZER
Üre Amonyum Nitrat Gübre Çözeltisi

NITRO

N30

'You should try it to see the power of nitrogen...'

Containing all three forms of nitrogen, NITRO N30® plays a vital role in plant growth and development in all environments and conditions; its compatibility with drip irrigation systems and foliar applications, as well as its suitability for use in open fields, are among its key features.

Guaranteed Content	%(w/w)
Total Nitrogen (N)	30
Nitrate Nitrogen (NO ₃ -N)	7,5
Ammonium Nitrogen (NH ₄ -N)	7,5
Urea Nitrogen (NH ₂ -N)	15

Supports healthy plant growth strongly.

Contains three different nitrogen forms.

Works compatibly with drip irrigation systems.

Can be used safely in open field applications.

‘Your unique shield when feeding your plant!’

NOVACROP® is an effective copper solution that both nourishes your plants and forms a powerful protective shield. By boosting the plant’s natural defences, it provides effective resistance against harsh conditions and damage.

By preventing potential economic losses at every stage, from seedling planting through to growth, it guarantees healthy and safe production in your fields at all times.

Guaranteed Content	%(w/w)
Water-Soluble Copper (Cu)	3
pH Range	4 - 5

Protects plants while they are being fed.

Strengthens the natural defense mechanism.

Builds resistance against adverse conditions.

Supports healthy and reliable production processes.

EC FERTILIZER

L-MANGANESE

'Strong Manganese Protection'

This product, which contains a high concentration of manganese, can be applied both via foliar spraying and through drip irrigation systems. As its structure does not bind to other elements, it is readily absorbed by the plant.

It corrects manganese deficiency in plants and stimulates chlorophyll and sugar production.

Guaranteed Content	%(w/w)
Water-Soluble Manganese (Mn)	9
pH Range	3 - 4

Helps reduce manganese deficiency.

Can be applied as foliar or fertigation.

Easily absorbed by the plant.

Actively supports chlorophyll formation.

FERTI® K-CORE

POTASYUM TIYOSÜLFAT

*'Ideal ripeness, eye-catching fruit:
the key to a perfect harvest'*

This is a special potassium thiosulphate solution that provides the high levels of potassium and sulphur required by plants during the ripening stage. The sulphur and potassium it contains contribute to harvest quality by supporting protein synthesis and the transport of nutrients within the plant.

Designed entirely for easy soil application...

Guaranteed Content	%(w/w)
Water-Soluble Potassium Oxide (K_2O)	25
Water-Soluble Sulphur Trioxide (SO_3)	42

Supports the establishment period strongly.

Contains high potassium and sulfur.

Supports protein synthesis.

Contributes to crop quality.

‘For balanced growth...’

TRAZOL® is a product that slows down cell division in plants in proportion to the dose applied. This product should be used during warm periods. If used during cold winter periods, it is recommended that the dose be split into smaller applications. **TRAZOL®** does not cause stunting in plants or make them appear stressed.

Guaranteed Content	%(w/w)
Total Nitrogen (N)	5
Urea Nitrogen (N-NH ₂)	5
Water-soluble phosphorus pentoxide (P ₂ O ₅)	5
Water-soluble potassium oxide (K ₂ O)	5
pH range	2,5 - 3,5

Special formula that supports balanced plant growth.

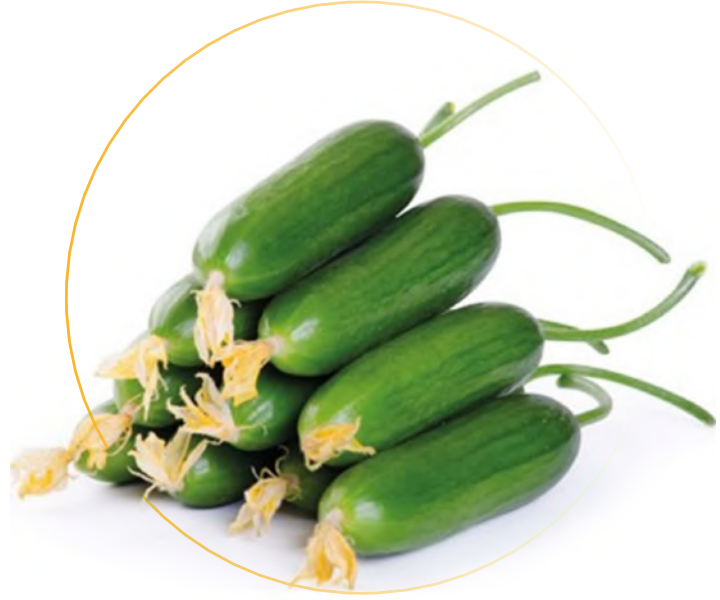

Slows excessive cell proliferation in a controlled manner.

Suitable for applications during hot weather conditions.

Does not cause plant stress or tissue tightening.

'Promotes safe and healthy growth.'

TOTAL K 12®, thanks to the potassium it contains, aids enzyme activity, photosynthesis and the transport of plant nutrients and photosynthetic products; it increases protein content and dry matter, regulates turgor, and prevents water loss and wilting in plants. It enhances the plants' ability to transport nutrients.

It strengthens the cell wall. It renews root cells. It promotes the formation of healthier fruit, flowers and vegetables. In particular, it facilitates the uptake of zinc.

Guaranteed Content	% (w/w)
Water-soluble Potassium Oxide (K_2O)	12
pH range	10 - 11

Supports photosynthesis and enzyme activity.

Reduces water loss in the plant.

Helps strengthen the cell wall.

Promotes the development of healthy fruits and flowers.

'Put an end to structural defects in plants...'

Say goodbye to hollow fruit, cracked stems and deformities! NOVABOR®, a boron source enriched with a special ethanolamine additive, rapidly repairs structural issues in your plants. By strengthening cell walls and preventing fungal growth, it ensures flawless physical development and guarantees that you will always harvest plump, high-value produce from your fields.

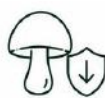

Guaranteed Content	%(w/w)
Water-Soluble Boron (B)	12
pH Range	8 - 8,5

Helps correct structural disorders.

Strengthens cell walls to enhance plant protection.

Helps reduce the risk of fungal diseases.

Supports the development of full, high-quality produce.

‘Uninterrupted growth, unlimited energy...’

It is a liquid fertiliser solution that provides the nitrogen, phosphorus and potassium required for balanced plant nutrition. Whilst contributing to key developmental processes and energy transfer within the plant, its high potassium content supports the fruit and tissue ripening stages.

Guaranteed Content	%(w/w)
Total Nitrogen (N)	8
Ammonium Nitrogen (NH ₄ -N)	1
Nitrate Nitrogen (NO ₃ -N)	3
Urea Nitrogen (N-NH ₂)	4
Water-soluble phosphorus pentoxide (P ₂ O ₅)	4
Water-soluble potassium oxide (K ₂ O)	12

Supports balanced plant nutrition.

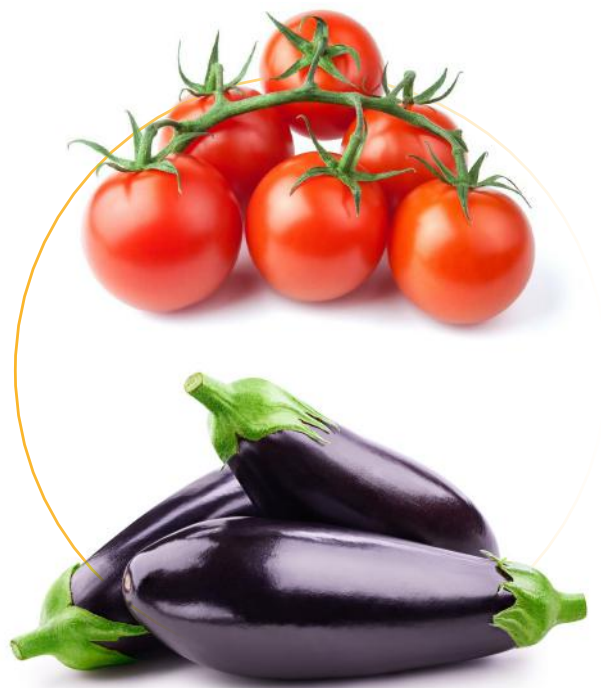

Contributes to energy transfer processes.

Strongly supports fruit ripening.

Provides strength with its high potassium content.

NOVACROP CU 10

*‘Copper in its purest form,
 the fastest boost for your plant...’*

Thanks to this product, which offers the purest and most reliable form of copper, plants absorb copper quickly and effectively, achieving the desired results in the shortest possible time.

NOVACROP® CU 10 is a 10% free copper solution specially formulated for your plants. Thanks to a unique complex formed by naturally occurring molecules derived from various sources, all centred around copper, the transfer of copper to your plants occurs with exceptional strength and speed. This special formula, which instantly and fully meets your plants’ copper requirements, guarantees a safe and rapid effect in your production at all times.

Guaranteed Content	%(w/w)
Water-Soluble Copper (Cu)	10
pH Range	4 - 6

Supports rapid copper uptake.

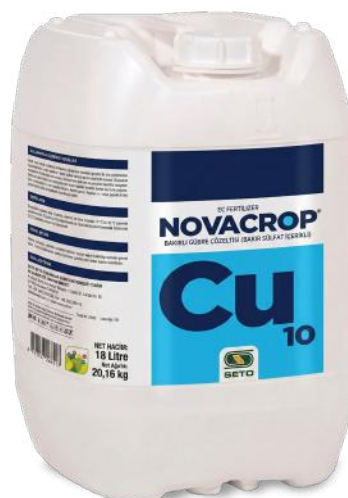

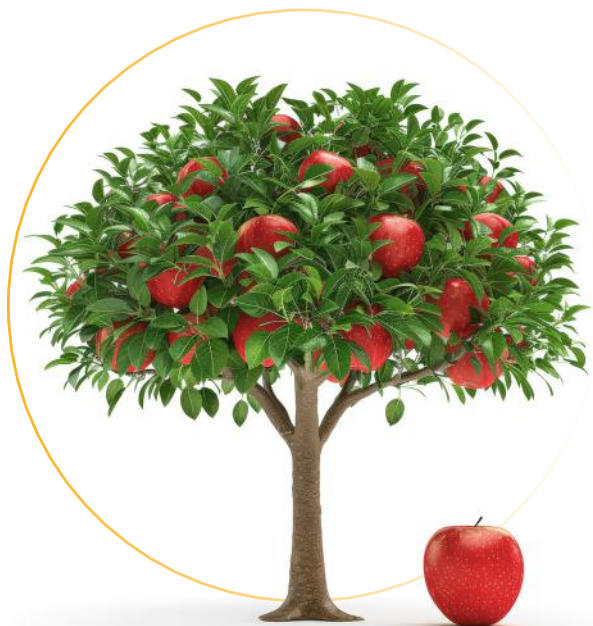

Ensures efficient copper transport within the plant.

Fully meets the plant's copper requirement.

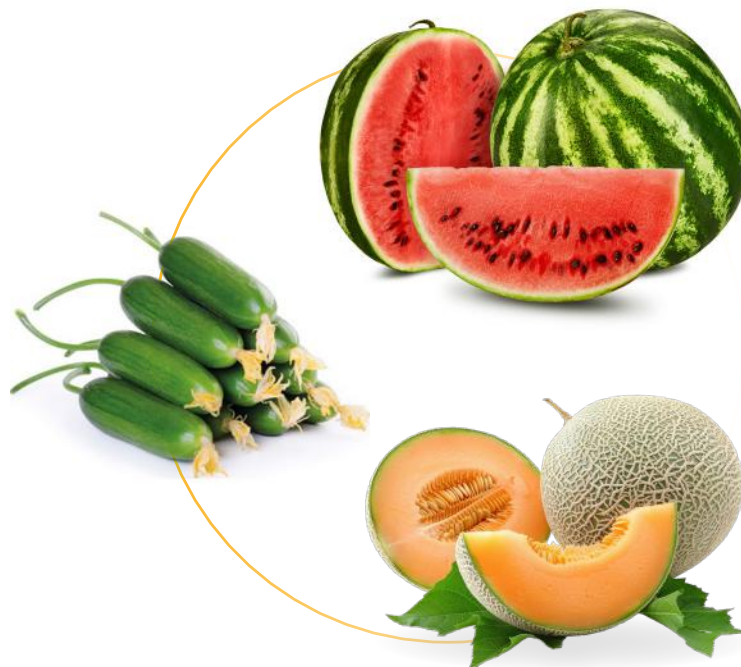

Provides safe and rapid action.

'The safest and most effective way for your plant to absorb zinc...'

Developed to meet your plants' zinc requirements in the safest and most effective way, **NOVACROP® ZN 10** is a 10% free zinc solution.

This unique formula, centred on zinc and composed of micronised molecules derived from various sources, ensures that zinc is absorbed by your plants in a much safer and more effective manner. By rapidly addressing your plants' zinc deficiency, it provides the strongest support for healthy and productive growth in your fields.

Guaranteed Content	%(w/w)
Water-Soluble Zinc (Zn)	10
pH Range	4 - 6

Ensures rapid correction of zinc deficiency.

Provides safe and effective zinc support.

Supports the healthy growth process.

Supports productive plant growth.

SETO VITALEX[®] POWER AA

Liquid Organic Fertiliser Containing
Amino Acids of Animal Origin

‘Powerful and maximum efficiency’

SETO VITALEX[®] POWER AA is a product in which organic nitrogen, free amino acids and short- and long-chain peptides are balanced in optimal proportions. It is derived from animal protein. Thanks to its special collagen protein, it strengthens cell walls with its high water-holding capacity, thereby protecting the plant from drought, cold and excessive heat stress.

SETO VITALEX[®] POWER AA can be used in drip and sprinkler irrigation water or applied foliar. Due to its very high solubility, it is rapidly absorbed by plants through both roots and leaves and is transported to all parts of the plant (roots, stem, leaves, fruit, etc.).

Guaranteed Content	%(w/w)
Total Organic Matter	50
Organic Carbon	12
Organic Nitrogen (N)	8
Free Amino Acids	8
pH Range	4 - 6

Helps strengthen
cell walls.

Protects the plant
from heat and
cold stress.

Rapidly absorbed
through roots and
leaves.

Rapidly transported
within the plant.

'To grow the fruits with the highest nutritional value...'

Produced using animal-derived amino acids, this product strengthens cell walls thanks to its balanced composition and high water-retention capacity, thereby preventing the plant from succumbing to heat, cold or drought stress.

SETO ZEMAX can be used in drip and sprinkler irrigation systems or via foliar application. Due to its very high solubility, it is rapidly absorbed by plants through both roots and leaves and is transported to all parts of the plant (roots, stem, leaves, fruit, etc.).

Guaranteed Content	%(w/w)
Total Organic Matter	50
Organic Carbon	16
Organic Nitrogen (N)	5
Free Amino Acids	8
pH Range	6,5 - 8,5

Helps strengthen cell walls.

Protects the plant from heat and cold stress.

Rapidly absorbed through roots and leaves.

Rapidly transported within the plant.

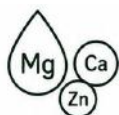

‘Adding value to your field...’

SETO VITALEX® 4.0 is a product developed for field crops. It is a liquid organic fertiliser enriched with plant-derived amino acids, designed for use from emergence to harvest. Thanks to the special carrier bioactive substances it contains, it reaches target tissues (grains, seeds, leaves, etc.) suffering from mineral deficiency quickly and effectively.

By extending the senescence (cell ageing) cycle in field crops, it helps the plant produce more dry matter and protein. It ensures the plant remains healthy and resilient. It contributes to the development of roots and flowers. It readily provides the vital energy the plant requires throughout its life cycle.

Guaranteed Content	%(w/w)
Total Organic Matter	30
Organic Carbon	10
Organic Nitrogen (N)	3
Water-Soluble Potassium Oxide (K ₂ O)	3
Free Amino Acids	4
pH Range	3,5 - 5,5

Delivers minerals to the tissues where deficiency is observed.

Helps the formation of strong and healthy tissue.

Enables minerals to reach the plant in an effective manner.

Supports root and flower development.

SETO VITALEX[®]

Liquid Organic Fertiliser Containing
Plant-Derived Amino Acids

8-0

'It safeguards the development of your fruit'

SETO VITALEX[®] 8-0 is a product developed specifically for fruit trees. When plant nutrients are supplied via SETO VITALEX[®] 8-0, they are able to form chemical bonds with special (L)-form amino acids. As a result, the plant nutrients acquire a neutral charge and do not exhibit antagonistic properties. They are completely utilised by the plants.

Furthermore, thanks to the special carrier bioactive substances contained within SETO VITALEX[®] 8-0, they reach the target tissues (buds, leaves, shoots, fruit, etc.) suffering from mineral deficiency quickly and effectively. By preventing the premature onset of the senescence cycle in fruit trees caused by excessive stress conditions, it helps the plant to produce more dry matter and Brix.

Guaranteed Content	%(w/w)
Total Organic Matter	30
Organic Carbon	15
Organic Nitrogen (N)	3
Water-Soluble Potassium Oxide (K ₂ O)	3
Free Amino Acids	8
pH Range	3 - 5

Supports strong development of fruits.

Efficiently transports essential nutrients within the plant.

Delivers observed mineral deficiency in the plant.

Increases yield and brix.

'It gives your vegetables vitality and health'

This product has been developed for greenhouse and open-field vegetable crops. When plant nutrients are applied alongside SETO VITALEX® 18 - 0, they are able to form chemical bonds with specific (L)-form amino acids. As a result, the plant nutrients acquire a neutral charge and do not exhibit antagonistic properties.

They are fully utilised by the plants. Furthermore, thanks to the special carrier bioactive substances contained within SETO VITALEX® 18 - 0, they reach target tissues (flowers, leaves, fruit, etc.) suffering from mineral deficiency quickly and effectively.

Guaranteed Content	%(w/w)
Total Organic Matter	35
Organic Carbon	15
Organic Nitrogen (N)	3
Water-Soluble Potassium Oxide (K ₂ O)	1
Free Amino Acids	18
pH Range	3,5 - 5,5

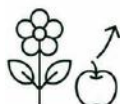

Supports strong development of fruits.

All nutrients are fully consumed by the plant.

Mineral deficiencies are visible to the eyes.

Supports flower and fruit development.

ST RADI FORCE

PLANT-BASED LIQUID
ORGANIC FERTILISER

'Promotes rapid and healthy root development'

ST RADI FORCE® promotes rapid and uniform root development, healthy root formation, and enables plants to utilise nutrients in the soil more effectively. It can be used on all plants at any stage of growth. It improves the biological structure of the soil, thereby increasing microbial activity.

By increasing the soil's cation exchange capacity, it enhances the effectiveness of plant nutrients.

Guaranteed Content	%(w/w)
Total Organic Matter	35
Organic Carbon	15
Total Nitrogen (N)	2
Water-Soluble Potassium Oxide (K ₂ O)	3
pH Range	5 - 7

Promotes rapid and healthy root development.

It promotes healthy root formation.

It helps to boost microbial activity.

It enhances the effectiveness of nutrients.

TERRA GRAND®

PLANT-BASED
LIQUID ORGANIC FERTILISER

'The added value brought to your land'

TERRA GRAND® is a raw material-grade product. Thanks to its high organic matter content, it meets the needs of both the plant and the soil. TERRA GRAND® can be used with ease in sprinkler, drip irrigation and foliar applications to enhance the effectiveness of all types of fertilisers and plant nutrition products. In particular, no nitrogen sources—such as urea or nitrate nitrogen—that could cause plant burn have been added, especially during the growth phase. TERRA GRAND® improves soil fertility and structure, contributing to the formation of stable humus. It can significantly enhance the roots' ability to utilise the soil. In foliar applications, TERRA GRAND® supports increased photosynthesis, balanced development of the foliage, and promotes growth, Brix levels and colour development during the fruiting stage.

Guaranteed Content	%(w/w)
Total Organic Matter	45
Organic Carbon	15
Total Nitrogen (N)	4
Water-Soluble Potassium Oxide (K ₂ O)	2
pH Range	4 - 6

It helps to improve soil fertility.

It strongly supports the process of photosynthesis.

It promotes colour development and growth in fruit.

It increases the roots' uptake of nutrients.

TERRA HUMICA[®]

LIQUID

‘Stronger, healthier plants.’

TERRA LIQUID HUMICA[®], with its humic and fulvic acid content, ensures that added nutrients are utilised effectively and prevents nutrient loss. It breaks down compacted soil structures to promote root development and regulates the physical and chemical properties of the soil.

TERRA LIQUID HUMICA[®] dissolves very rapidly in the soil. It enhances seed germination and root development. It is recommended to commence application of TERRA LIQUID HUMICA[®] prior to the tuber, bulb, pod, grain, and flower bud formation and fruit development stages in field crops and ornamental plants. Flowers and fruits on plants treated with TERRA LIQUID HUMICA[®] appear more vibrant and glossy.

Guaranteed Content	%(w/w)
Total Organic Matter	15
Total (Humic + Fulvic) Acid	15
Water-Soluble Potassium Oxide (K ₂ O)	3
pH Range	7 - 9

It strongly promotes root development.

It improves the physical structure of the soil.

It helps to speed up seed germination.

It enhances the vitality of flowers and fruit.

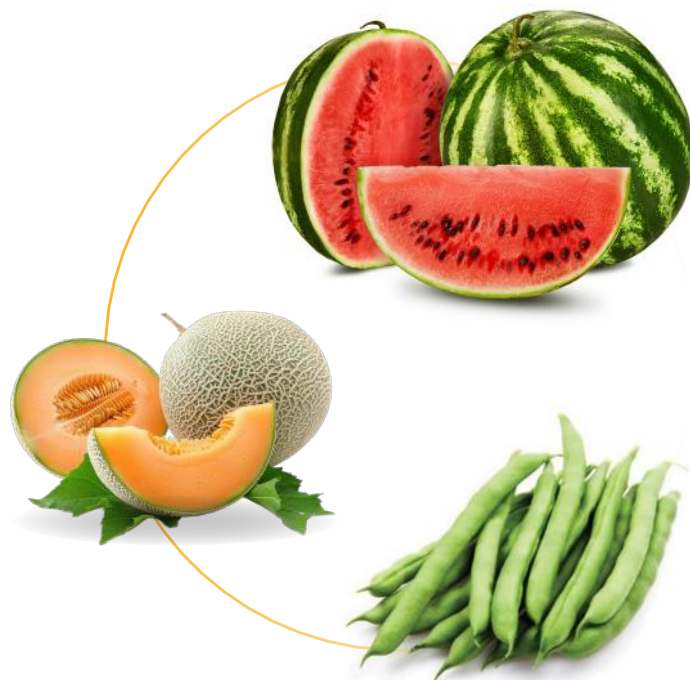

PLANTA MASS[®]

PLANT-BASED
LIQUID ORGANIC FERTILISER

‘Your soil-friendly, yield-focused natural solution’

With its entirely plant-based and water-soluble formulation, PLANTA MASS[®] is a natural liquid organic fertiliser that rapidly boosts your soil’s fertility. Thanks to its special components, which leach out of the soil only minimally, it minimises nutrient loss and creates a lasting, stable humus structure in your soil. This natural formula, which improves the physical structure of the soil, provides your plants with a healthy, robust and productive growing environment.

Guaranteed Content	%(w/w)
Organic Matter	35
Organic Carbon	15
Total Nitrogen (N)	2
Water-Soluble Potassium Oxide (K ₂ O)	3
pH Range	5,5 - 7,5

It helps to improve
soil fertility.

It minimises
nutrient losses.

It supports the
formation of
a sustainable
humus structure.

It promotes
healthy and
vigorous growth.

SETO ALGA MASTER

LIQUID SEAWEED

'Organic power from the sea to your fields'

SETO ALGA MASTER is a liquid seaweed extract containing alginic acid, organic matter and 100% water-soluble potassium oxide. It acts as an effective aid to plants throughout all stages of development, from root growth to fruit set. By promoting the plant's photosynthetic capacity and root development, it enhances the formation of fine roots.

SETO ALGA MASTER is an extremely effective fertiliser used to alleviate stress conditions caused by frost, extreme heat, salinity, fungal damage or incorrect application, as well as in situations where the plant requires additional energy.

Guaranteed Content	%(w/w)
Organic Matter	20
Water-Soluble Potassium Oxide (K ₂ O)	4
Alginic Acid	0,4

It strongly supports root development.

It helps to increase photosynthetic capacity.

It promotes the formation of fine roots.

It provides resistance to stressful conditions.

‘Protect your plants against harsh conditions!’

SEROTONEX®, a special liquid organic fertiliser that helps manage stress caused by environmental factors, maximises your plants’ natural defences. With its rich botanical content, it creates a natural shield against harsh conditions, quickly alleviating the stress your plants experience. It provides the strongest support to ensure your crops always enjoy a resilient, healthy and stress-free growth process!

Guaranteed Content	%(w/w)
Total Organic Matter	20
Organic Carbon	6
Organic Nitrogen (N)	2
Free Amino Acids	6,5
pH Range	3 - 5

It strengthens the plant's natural defences.

Reduces the effects of environmental stress.

Provides protection against harsh conditions.

Supports healthy, stress-free development.

Organo-mineral Liquid Fertilisers

- Total Cal AA
- K-SOL (5-0-20)
- Radi Master
- Seto Verim (5-0-20)
- Triple Maxx (7-7-7)
- Canolex
- Maxi Bloom 15
- Maxi Bloom 20

'Specialised calcium transporter'

TOTAL CAL AA® is a plant nutrition product that resolves calcium-related issues in plants within a very short time, rapidly supplying and initiating the calcium required at the plant's growth and development points. Amino acids that promote stomatal opening have been added to the formulation. Thanks to these amino acids, the stomata open even in humid conditions. Transpiration begins in the plant. Calcium is also transported via water movement.

TOTAL CAL AA® protects the plant's health and strongly balances its development during fruit development, flower bud formation, petal shedding, seed set, the onset of flowering, tuber formation, stem (head) development, tillering, and the stem elongation phase. It has been observed that the fruit of plants treated with TOTAL CAL AA® is brighter, firmer and richer in aroma.

Guaranteed Content	%(w/w)
Total Organic Matter	10
Total Nitrogen (N)	10
Organic Nitrogen (N)	0,5
Ammonium Nitrogen (N-NH ₄)	1
Nitrate Nitrogen (N-NO ₃)	8,5
Water-Soluble Calcium Oxide (CaO)	16
Free Amino Acids	3,5
pH Range	3 - 5

It quickly remedies calcium deficiency.

It supports balanced plant growth.

It helps to improve fruit quality.

It produces brighter and firmer fruit.

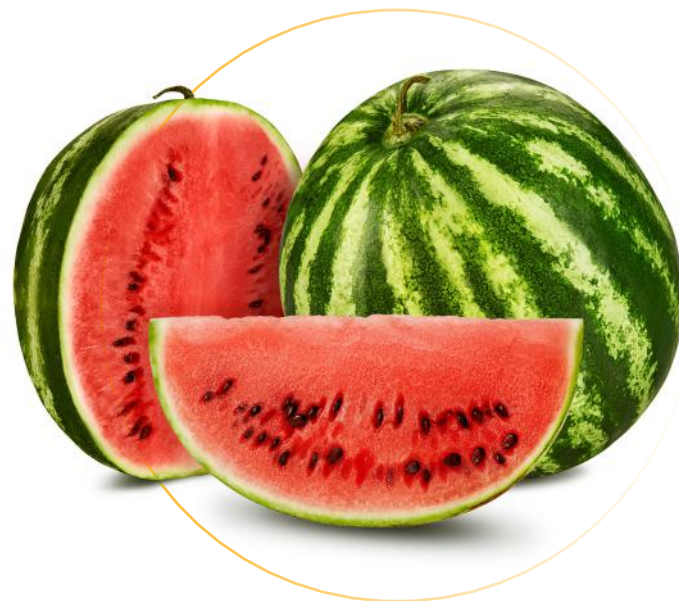

K-SOL®

5 - 0 - 20

'Larger fruits, longer shelf life'

This liquid organo-mineral fertiliser supports plants' energy balance and fruit development thanks to its organic matter content and high potassium content. The magnesium and various trace elements in its formula strengthen the plant's nutrient cycle, helping it to undergo a healthy ripening process.

Guaranteed Content	%(w/w)
Total Organic Matter	20
Total Nitrogen (N)	5
Nitrate Nitrogen (N-NO ₃)	5
Water-Soluble Potassium Oxide (K ₂ O)	20
Water-Soluble Magnesium (MgO)	2
Water-Soluble Boron (B)	0,02
Water-Soluble Copper (Cu)	0,02
Water-Soluble Iron (Fe)	0,03
Water-Soluble Manganese (Mn)	0,03
Water-Soluble Zinc (Zn)	0,1
pH Range	2 - 4

It strongly promotes fruit development.

It helps maintain the plant's energy balance.

It supports a healthy ripening process.

It helps extend shelf life.

RADI MASTER®

NP Liquid Organo-Mineral Fertiliser

'Fertiliser containing an organic rooting agent'

RADI MASTER® is a specially formulated, plant-based organo-mineral fertiliser. It promotes rapid and uniform root development, healthy root formation, and enables the plant to utilise nutrients in the soil more effectively. By strengthening the root structure, it encourages the plant to develop in a stronger and more robust manner. It increases tillering in crops where tillering is important, such as cereals, carnations and lawns.

Formulated with organic rooting agents, **RADI MASTER®** promotes rapid growth of the plant both above and below ground. It makes the plant's roots resistant to all fungal and nematode effects in the soil. It also influences the development of lateral and tap roots.

Guaranteed Content	%(w/w)
Total Organic Matter	20
Total Nitrogen (N)	4
Ammonium Nitrogen (N-NH ₄)	1,5
Urea Nitrogen (N-NO ₂)	2,5
Total Phosphorus Pentoxide (P ₂ O ₅)	7
Water-Soluble Phosphorus Pentoxide (P ₂ O ₅)	7
Free Amino Acids	3
pH Range	3,5 - 5,5

Promotes rapid and uniform root development.

Encourages healthy root formation.

Contributes to the plant's vigorous growth.

Supports fibrous and tap roots.

SETO VERİM 5.0.10

'Long life in the field, high yield at harvest'

SETO VERİM 5.0.10 acts as a booster for other plant nutrients when used in foliar, drip and sprinkler irrigation applications. It can be used to promote fruit growth and ensure uniform ripening following fruit set. It can also be used alternately during the flowering period.

SETO VERİM 5.0.10 is a highly effective product containing high levels of organic matter, which enhances microbial activity in the soil where it is applied and has a significant impact on water retention capacity and aeration. It improves soil structure and promotes root development.

Guaranteed Content	%(w/w)
Total Organic Matter	30
Total Nitrogen (N)	5
Nitrate Nitrogen (NO ₃ -N)	1
Urea Nitrogen (NH ₂ -N)	2
Organic Nitrogen	2
Water-Soluble Potassium Oxide (K ₂ O)	10
Free Amino Acids	2
pH Range	4 - 6

It strongly promotes fruit growth.

It contributes to a regular ripening process.

It increases microbial activity in the soil.

It helps to support root development.

EC FERTILIZER

TRIPLE MAXX (7-7-7)

'Consistent and robust nutritional support at every stage of your plant's growth!'

TRIPLE MAX 7.7.7 helps grains and fruits achieve a more vibrant appearance through drip irrigation, sprinkler irrigation and foliar applications. It has a synergistic effect on all physiological processes that increase protein, Brix and dry matter content, depending on the plant species. It plays a supporting role in achieving quality characteristics in fruit by maintaining the necessary balance of phosphorus (P) and potassium (K) in the plant prior to harvest.

TRIPLE MAX 7.7.7 rehabilitates excessively saline and degraded soils, making them suitable for cultivation. It softens the soil structure and facilitates ploughing, enhances the soil's ability to retain macro- and micro-nutrients, and helps protect against erosion.

Guaranteed Content	%(w/w)
Total Organic Matter	18
Total Nitrogen (N)	7
Ammonium Nitrogen (NH ₄ -N)	1
Nitrate Nitrogen (N-NO ₃)	2
Urea Nitrogen (NH ₄ -N)	3,5
Organic Nitrogen	0,5
Water-Soluble Potassium Oxide (K ₂ O)	7
Water-Soluble Phosphorus Pentoxide (P ₂ O ₅)	7
Free Amino Acids	2
pH Range	2,5 - 4,5

Helps to improve fruit quality.

Supports protein and Brix development.

Maintains the balance of phosphorus and potassium.

Improves and strengthens soil structure.

'Superior protection, unrivalled durability'

This liquid organo-mineral fertiliser technically facilitates plants' energy cycle and nutrient uptake through the free amino acids and organic matter it contains. Thanks to the nitrogen, phosphorus and zinc components in its formula, it helps ensure the uninterrupted continuation of essential biochemical processes within the plant.

Prevents economic loss and boosts resistance.

Guaranteed Content	%(w/w)
Total Organic Matter	10
Total Nitrogen (N)	3
Nitrate Nitrogen (N-NO ₃)	1,5
Urea Nitrogen (NH ₄ -N)	1
Organic Nitrogen (N)	0,5
Total Phosphorus Pentoxide (P ₂ O ₅)	7
Water-Soluble Phosphorus Pentoxide (P ₂ O ₅)	7
Water-Soluble Zinc (Zn)	2
Free Amino Acids	2
pH Range	3 - 5

It facilitates the uptake of nutrients.

It supports the plant's energy cycle.

It enhances key biochemical processes.

It helps to reduce economic losses.

MAXI BLOOM¹⁵

NP Liquid Organo-Mineral Fertiliser

'Excellent flowering, upright growth'

It plays a key role in the flowering and fruit set stages, which are fundamental to healthy and high-quality fruit development. A pioneer in flower and fruit set quality.

Guaranteed Content	%(w/w)
Total Organic Matter	10
Total Nitrogen (N)	3
Urea Nitrogen (NH ₃ -N)	3
Total Phosphorus Pentoxide (P ₂ O ₅)	15
Water-Soluble Boron (B)	0,05
Water-Soluble Copper (Cu)	0,01
Total Iron (Fe)	0,07
Water-Soluble Manganese (Mn)	0,05
Water-Soluble Molybdenum (Mo)	0,01
Water-Soluble Zinc (Zn)	2
pH Range	1 - 3

Provides strong support during the flowering process.

Helps to increase fruit set.

Ensures healthy fruit development.

Delivers high fruit set performance.

MAXI²⁰ BLOOM[®]

NP Liquid Organo-Mineral Fertiliser

*'Compelling content, seamless purchasing,
the secret to flawless growth...'*

The high phosphorus content promotes flowering in plants and enhances fruit set. The organic matter and free amino acids it contains help the plant to continue growing even during difficult periods, whilst strengthening the root system.

A leader in flower and fruit set quality.

Guaranteed Content	%(w/w)
Total Organic Matter	13
Total Nitrogen (N)	5
Urea Nitrogen (NH ₂ -N)	5
Total Phosphorus Pentoxide (P ₂ O ₅)	20

EC FERTILIZER FERTI FERRO

Fe EDDHA 6%

'High-Resolution Iron'

FERTI FERRO is applied in cases where growth and development retardation caused by iron deficiency in plants is clearly evident. The plant's greening is rapid and long-lasting.

FERTI FERRO is preferred due to its wide pH range. It contains the ortho-ortho form of Fe EDDHA 6%, a specialised form of the iron required for plant growth. Its high purity ensures high efficacy in drip irrigation applications. It has high solubility.

Guaranteed Content	%(w/w)
Water-Soluble Iron (Fe)	6
Iron (Fe) Chelated with EDDHA	6
pH Range in Which the EDDHA Chelate is Stable	3 - 9

It rapidly corrects iron deficiency.

It promotes rapid greening of plants.

It is effective across a wide pH range.

High performance in drip irrigation.

Iron Chelate - EDDHA

FERRUM

‘Give your plant the power of iron...’

FERRUM, with its 6% EDDA chelated formulation, is a superior fertiliser that strongly supports your plants’ iron uptake, even in highly alkaline and calcareous environments. Remaining stable across a wide pH range of 3–10, it rapidly restores plants and corrects nutrient deficiencies. It is your most reliable solution for growing lush, healthy plants even in challenging soils!

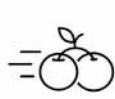

Guaranteed Content	%(w/w)
Water-Soluble Iron (Fe)	6
Iron (Fe) Chelated with EDDHA	6
pH Range in Which the EDDHA Chelate is Stable for (Fe)	3 - 9

Powerful iron supplementation for alkaline soils.

Stable across a wide pH range.

Rapidly remedies iron deficiency.

Promotes healthy, green growth

ACTIMORE

MICRO-PLANT NUTRIENT MIXTURE
GENERATIVE ENHANCER

'Micro Support, Macro Efficiency!'

This is a micro-nutrient mixture that meets plants' trace element requirements through the water-soluble boron, molybdenum and zinc sulphate it contains. The product provides technical support for key biochemical processes within the plant, such as pollen formation, nitrogen metabolism and enzyme activation.

Guaranteed Content	%(w/w)
Water-Soluble Boron (B)	4
Water-Soluble Molybdenum (Mo)	10
Water-Soluble Zinc (Zn)	5
pH	6 - 7

It strongly promotes pollen formation.

It accelerates enzyme activation.

It meets the requirement for trace elements.

It supports plant metabolism.

500 ml

‘All micronutrients in a single formula’

It is a comprehensive trace element blend formulated to address micronutrient deficiencies in plants. By supporting chlorophyll formation and the photosynthesis process within the plant, it contributes to healthy leaf development and a vigorous plant structure.

A Balanced Solution for Trace Element Deficiencies in Plants

Guaranteed Content	%(w/w)
Water-Soluble Boron (B)	1
Water-Soluble Copper (Cu)	0,5
Water-Soluble Iron (Fe)	4
Water-Soluble Manganese (Mn)	3
Water-Soluble Zinc (Zn)	4
pH Range	3 - 4

It rapidly corrects micronutrient deficiencies.

It strongly supports chlorophyll formation.

It stimulates the photosynthesis process.

It promotes healthy leaf development.

FertiGold Micro 10 kg'lık ambalajda satılmaktadır.

MICRONAT

EC FERTILIZER
MIKRO PLANT NUTRIENT MIX

‘Draw the plant’s strength from the soil...’

With its boron, copper, iron, manganese, molybdenum and high zinc content, it is a rich blend that fully meets all the plants’ micronutrient requirements. By supporting chlorophyll formation and photosynthesis within the plant, it prevents leaf yellowing and helps the plant to be more productive during the flowering and fruit-setting stages.

An Economical Solution to Trace Element Deficiencies in Plants

Guaranteed Content	%(w/w)
Water-Soluble Boron (B)	0,5
Water-Soluble Copper (Cu)	0,5
Water-Soluble Iron (Fe)	6
Water-Soluble Manganese (Mn)	3
Water-Soluble Molybdenum (Mo)	0,02
Water-Soluble Zinc (Zn)	6
pH Range	4 - 4,5

Fully meets micronutrient requirements.

Powerfully supports chlorophyll formation.

Helps prevent leaf yellowing.

Supports flowering and fruit set.

5 kg

EC FERTILIZER

PLANTA TE+Mix®

MIKRO PLANT NUTRIENT MIX

'Feed them a balanced diet, help them grow strong...'

PLANTA TE+Mix® safely and effectively provides the micronutrients your plants need for their development, addressing both single and multiple nutrient deficiencies. With its balanced blend of iron, zinc, manganese, boron, copper and molybdenum, it completely prevents deficiency symptoms from appearing in your plants. It is your strongest ally in the field for a healthy growth process.

An effective trace element that is safely absorbed!

Guaranteed Content	%(w/w)
Water-Soluble Boron (B)	1
Water-Soluble Copper (Cu)	1
Water-Soluble Iron (Fe)	7
Water-Soluble Manganese (Mn)	5
Water-Soluble Molybdenum (Mo)	0,02
Water-Soluble Zinc (Zn)	7
pH Range	3 - 3,5

It quickly corrects micronutrient deficiencies.

It strongly supports healthy growth.

It maintains trace element balance.

It ensures safe and effective nutrition.

5 kg 1 kg

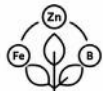

'The power that adds value to your plant!'

FERTICHEM® 20.20.20 + ME is a premium-quality powdered fertiliser specifically designed for foliar application, providing your plants with exceptional added value. It has a very wide range of applications, from greenhouses to open fields, and from fruit trees to ornamental plants. With its balanced NPK formula and rich micro-nutrients, it provides maximum support for the growth and development of your plants.

Guaranteed Content	%(w/w)
Total Nitrogen	20
Nitrate Nitrogen (N-NO ₃)	5,5
Ammonium Nitrogen (N-NH ₄)	4,1
Urea Nitrogen (N-NH ₂)	10,4
Water-Soluble Phosphorus Pentoxide (P ₂ O ₅)	20
Water-Soluble Potassium Oxide (K ₂ O)	20
Water-Soluble Boron (B)	0,01
Water-Soluble Copper (Cu)	0,006
Water-Soluble Iron (Fe)	0,06
Water-Soluble Manganese (Mn)	0,04
Water-Soluble Molybdenum (Mo)	0,001
Water-Soluble Zinc (Zn)	0,04

Provides a balanced NPK supply.

Supports growth with micro-nutrients.

Takes effect quickly via foliar application.

Offers a wide range of applications.

1 kg

EC FERTILIZER

PLANTA BOR®

'The unrivalled power of boron in advanced agriculture'

PLANTA BOR®, which brings global standards in agricultural productivity to your fields, maximises your crops' potential with its rich, 20 per cent, fully water-soluble formulation. Trusted by leading agricultural nations, this special formula delivers maximum effectiveness even at low doses, whilst offering unrivalled ease of application in mixtures. Your innovative solution for flawless growth in your fields!

Guaranteed Content	%(w/w)
Water-Soluble Boron (B)	20
pH Range	8 - 8,5

Provides a high boron content.

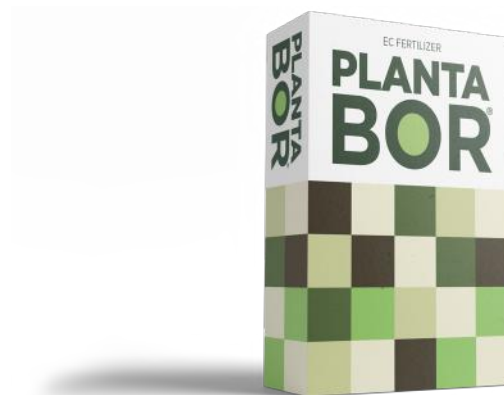

Maximum effect at a low dose.

Fully water-soluble formulation.

Powerfully supports plant growth.

NP-CONTAINING SOLID ORGANOMINERAL FERTILISER

CALLUS®

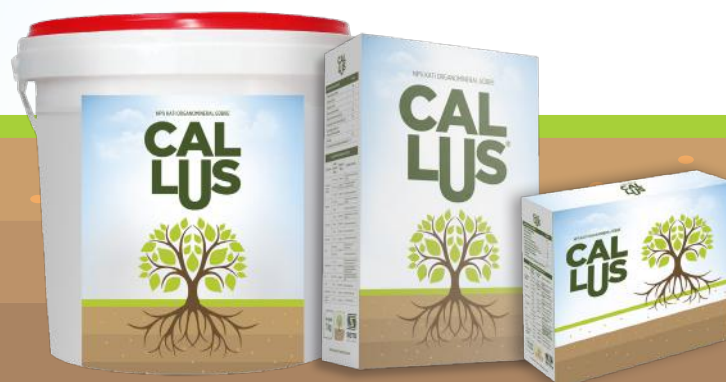

‘Strong roots that anchor us to the earth...’

This organo-mineral fertiliser contributes to plant nutrition through its organic matter, phosphorus and zinc content. It helps to support the root zone and promote balanced growth during the plant's developmental stages.

It anchors your plant to the soil with strong root

Guaranteed Content	%(w/w)
Total Organic Matter	30
Total Nitrogen (N)	6
Organic Nitrogen (N)	1
Ammonium Nitrogen (N-NH ₄)	5
Total Phosphorus Pentoxide (P ₂ O ₅)	30
Water-Soluble Phosphorus Pentoxide (P<O ₅)	30
Water-Soluble Zinc (Zn) (Fully chelated with EDTA)	2
pN Range	2 - 4

CALLUS® is available in packs of 500 g, 1 kg and 5 kg.

‘Recharge the earth’s energy...’

NOVA K-HUMATE®, a premium-quality product containing high levels of organic matter, potassium, humic and fulvic acids, effectively revitalises your soil. Thanks to its powerful chelating properties, it facilitates the uptake of nutrients in the soil. Revitalise your soil with this unique potassium humate formula and take the first step towards high-yield, healthy and bountiful production!

Guaranteed Content	%(w/w)
Total Organic Matter	35
Humic + Fulvic Acids	65
Water-Soluble Potassium Oxide (K ₂ O)	8
pH Range	8-10

It effectively combats soil fatigue.

It facilitates nutrient uptake.

It revitalises the soil.

It strongly supports productive yields.

ATLANTIS® SEAWEED POWDER

‘Strong and Healthy Growth...’

ATLANTIS SEAWEED POWDER® is a solid seaweed product containing high levels of alginic acid, organic matter and 100 per cent water-soluble potassium oxide. It acts as an effective aid to plants throughout all stages of development, from root growth to fruit set. It promotes strong and healthy plant growth.

Guaranteed Content	%(w/w)
Organic Matter	45
Water-Soluble Potassium Oxide (K ₂ O)	12
Alginic Acid	2
EC dS/m	45
pH Range	9 - 11

Supports strong root development.

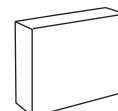

Promotes fruit size.

Is effective throughout all stages of development.

Ensures healthy growth in plants.

400 gr

ATLANTIS SEAWEED POWDER® is sold in 400 g packs.

Soil Conditioners: pH Reducers

Terra Desal •

Terra Down •

Terra Nit •

TERRA DESAL

‘Active desalination system’

Salinity develops in greenhouses and open fields as a result of incorrect fertilisation. This leads to yield losses in production. Soil salinity begins to increase due to over-irrigation and one-sided fertilisation practices. Over time, these soils become barren and unproductive, and it becomes more difficult for plants to utilise water.

This leads to root burn, stunted fruit development and growth deficiencies in plants. Flowering, shoot growth and fruit development slow down. Therefore, if a calcium compound is applied to soil containing excessive amounts of exchangeable sodium resulting from incorrect fertilisation, the soil’s physical condition improves as the calcium displaces the sodium from the soil colloids. Consequently, as the soil becomes better aerated and water moves more easily through it, plants are able to thrive.

Guaranteed Content	%(w/w)
Water-Soluble Calcium (CaO)	7,28
Organic Matter	10
Organic complexing agents, Complexing agents: Sulphonic acids, Polycarboxylic acids (mono- and poly-groups)	30
pH Range	1,5 - 2
The pH operating range within which the product is stable	1 - 9

Actively reduces soil salinity.

Helps prevent root burn.

Physically improves soil structure.

Supports healthy plant growth.

‘Active water conditioner, pH regulator’

TERRA DOWN regulates the pH of the water used. By lowering the pH of the solution, it ensures that the mixture is better absorbed by the leaves and roots. By lowering the pH of the prepared mixture, it ensures that the mixture and microelements such as iron, copper, boron and zinc are better absorbed by the leaves and roots.

It increases the uptake of beneficial nutrients by the plant. Healthy plants are produced as a result of the increased availability of nutrients to the roots and leaves.

Guaranteed Content	%(w/w)
pH Range	1 - 2

Regulates the pH
of the water used.

Significantly
increases nutrient
uptake.

Supports the
absorption of
micro-nutrients.

Promotes
healthy plant
growth.

TERRA NIT

Nitrik Asit

'pH Reducer'

TERRA NIT is used to clear blockages that develop over time in drip pipes in areas irrigated using the drip irrigation method. **TERRA NIT** also acts as a plant fertiliser due to its significant nitrate nitrogen content.

Guaranteed Content	%(w/w)
pH Range	1 - 2

Clears blockages
in drip pipes.

Lowers the pH of
irrigation water.

Supplies nitrate
nitrogen.

An effective
solution for drip
irrigation.

‘A comprehensive solution with easily accessible foods...’

Developed to meet your plants’ nutritional needs as quickly as possible, FERTISOIL is a high-quality, water-soluble NPK fertiliser containing readily available nutrients. Produced using high-quality, highly soluble raw materials, this range can be safely applied in all types of drip and sprinkler irrigation systems and on all plant varieties, offering a definitive solution to your various needs. Readily available NPK with every watering!

FERTISOIL® is sold in 25 kg packs.

An easily absorbable NPK formulation

Suitable for all irrigation systems

The perfect solution for a range of needs

‘Complete NPK power at every stage...’

FERTIMIX is a range of high-quality, fully water-soluble NPK fertilisers that you can use with confidence at the very start and at every stage of your plant's growth. Thanks to its acidic composition, it fully meets additional nutrient requirements even in alkaline soils and hard water conditions. It delivers maximum performance in drip and sprinkler irrigation systems. Effective at every stage, even under challenging conditions...

A formula
that dissolves
completely in
water

High
performance
in hard water

An effective
solution for
alkaline soils

FERTIMIX® is sold in

Total Nitrogen (NTOTAL)	27
Nitrate Nitrogen (NO ₃ -N)	9
Ammonium Nitrogen (NH ₄ -N)	18
Water-soluble phosphorus pentoxide (P ₂ O ₅)	5
Ammonium citrate and water-soluble phosphorus pentoxide (P ₂ O ₅)	5

Strongly supports
vegetative growth

Strengthens
roots and stems

Promotes early
flowering

PREMIUM SOLO®,
is available in 25 kg packs.

NAVIGATOR

NAVIGATOR® N21 DCD

AMMONIUM SULPHATE (DCD) WITH INHIBITOR

‘A guide to the quality of your plant...’

It is a slow-release, crystalline form of ammonium nitrogen containing a DCD (dicyandiamide) inhibitor, which can be applied to the soil surface on all plant species. The combined application of nitrogen and sulphur accelerates the uptake of phosphorus and micronutrients from the soil. DCD also delays the conversion of ammonium into ammonia.

NAVIGATOR® N46 NBPT

UREA (WITH UREASE INHIBITOR)

‘The path to high productivity...’

Urea is generally a fertiliser applied to the soil surface. During the nitrification process, 25 per cent of the applied nitrogen is leached away from the root zone in the form of NO_3 . Furthermore, although the timing of application and climatic conditions vary, nitrogen losses in the form of NH_3 can reach up to 80 per cent. Urea coated with NBPT (n-butyl thiophosphoric triamide) delays the conversion to ammonia by two weeks. This allows the plant to take up the nitrogen in the form of ammonium before the urea is converted into a gaseous state.

NAVIGATOR®,
is available in 25 kg packs.

Minimises
nitrogen loss

Technology
that delays urea
conversion

Rapid uptake by
the plant
