EDITION 3-2026

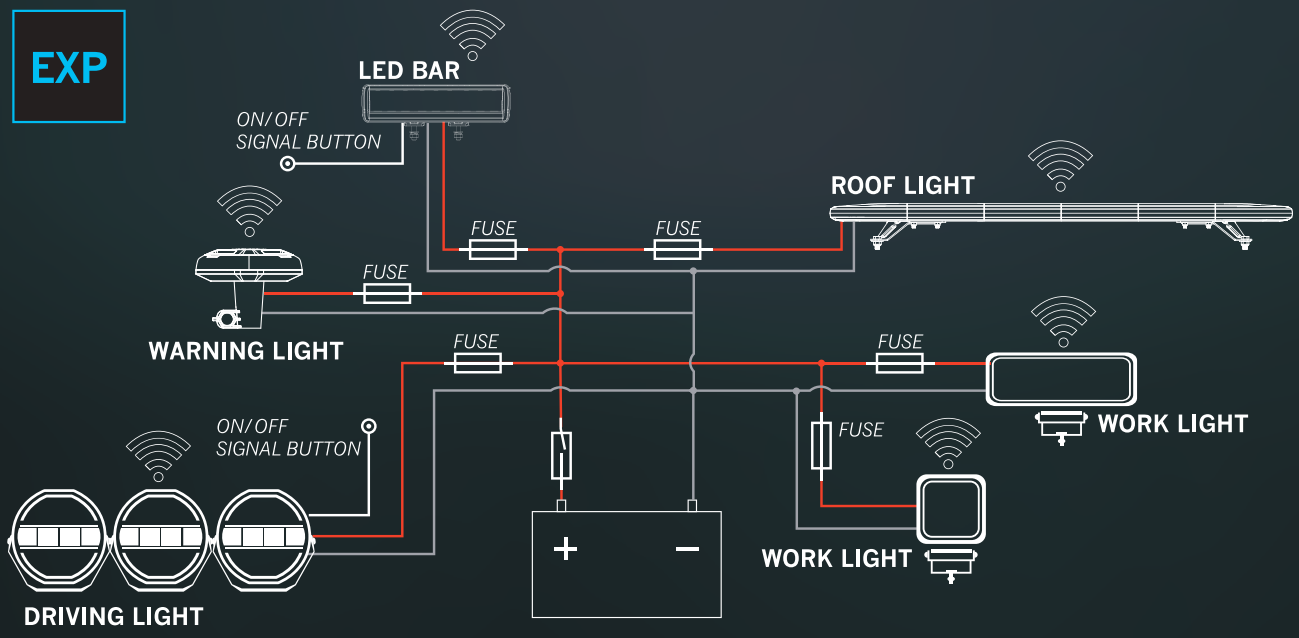

INTELLIGENT LIGHTING

POWERED BY SKYN1

- ✓ *ONE INTELLIGENT SYSTEM FOR ALL YOUR LIGHTS*
- ✓ *WIRELESS CONNECTION*
- ✓ *CONTROL WITH APP, BUTTON, OR WIRELESS CONTROL*
- ✓ *BLUETOOTH CONNECTION*

WHAT IS SKYN1?

Skyn1 brings all your lighting into one system. Connect your lights wirelessly, control them via app, button, or control, and get a solution where everything works together instantly. Choose the EXP wireless control or PXP relay box.

FROM COMPLEXITY TO COMPLETE CONTROL

A new way to control your lighting. Strands Skyn1 is an ecosystem where hardware and software work as one. Connect your lights to the PXP Force Box and quick buttons and get full control directly from your smartphone, fast and seamless. Or choose the EXP control box that automatically detects compatible Strands lights and assigns each function to dedicated buttons on the wireless control. Everything is synced, ready to use, and built to work together. One system, designed to move faster and work smarter.

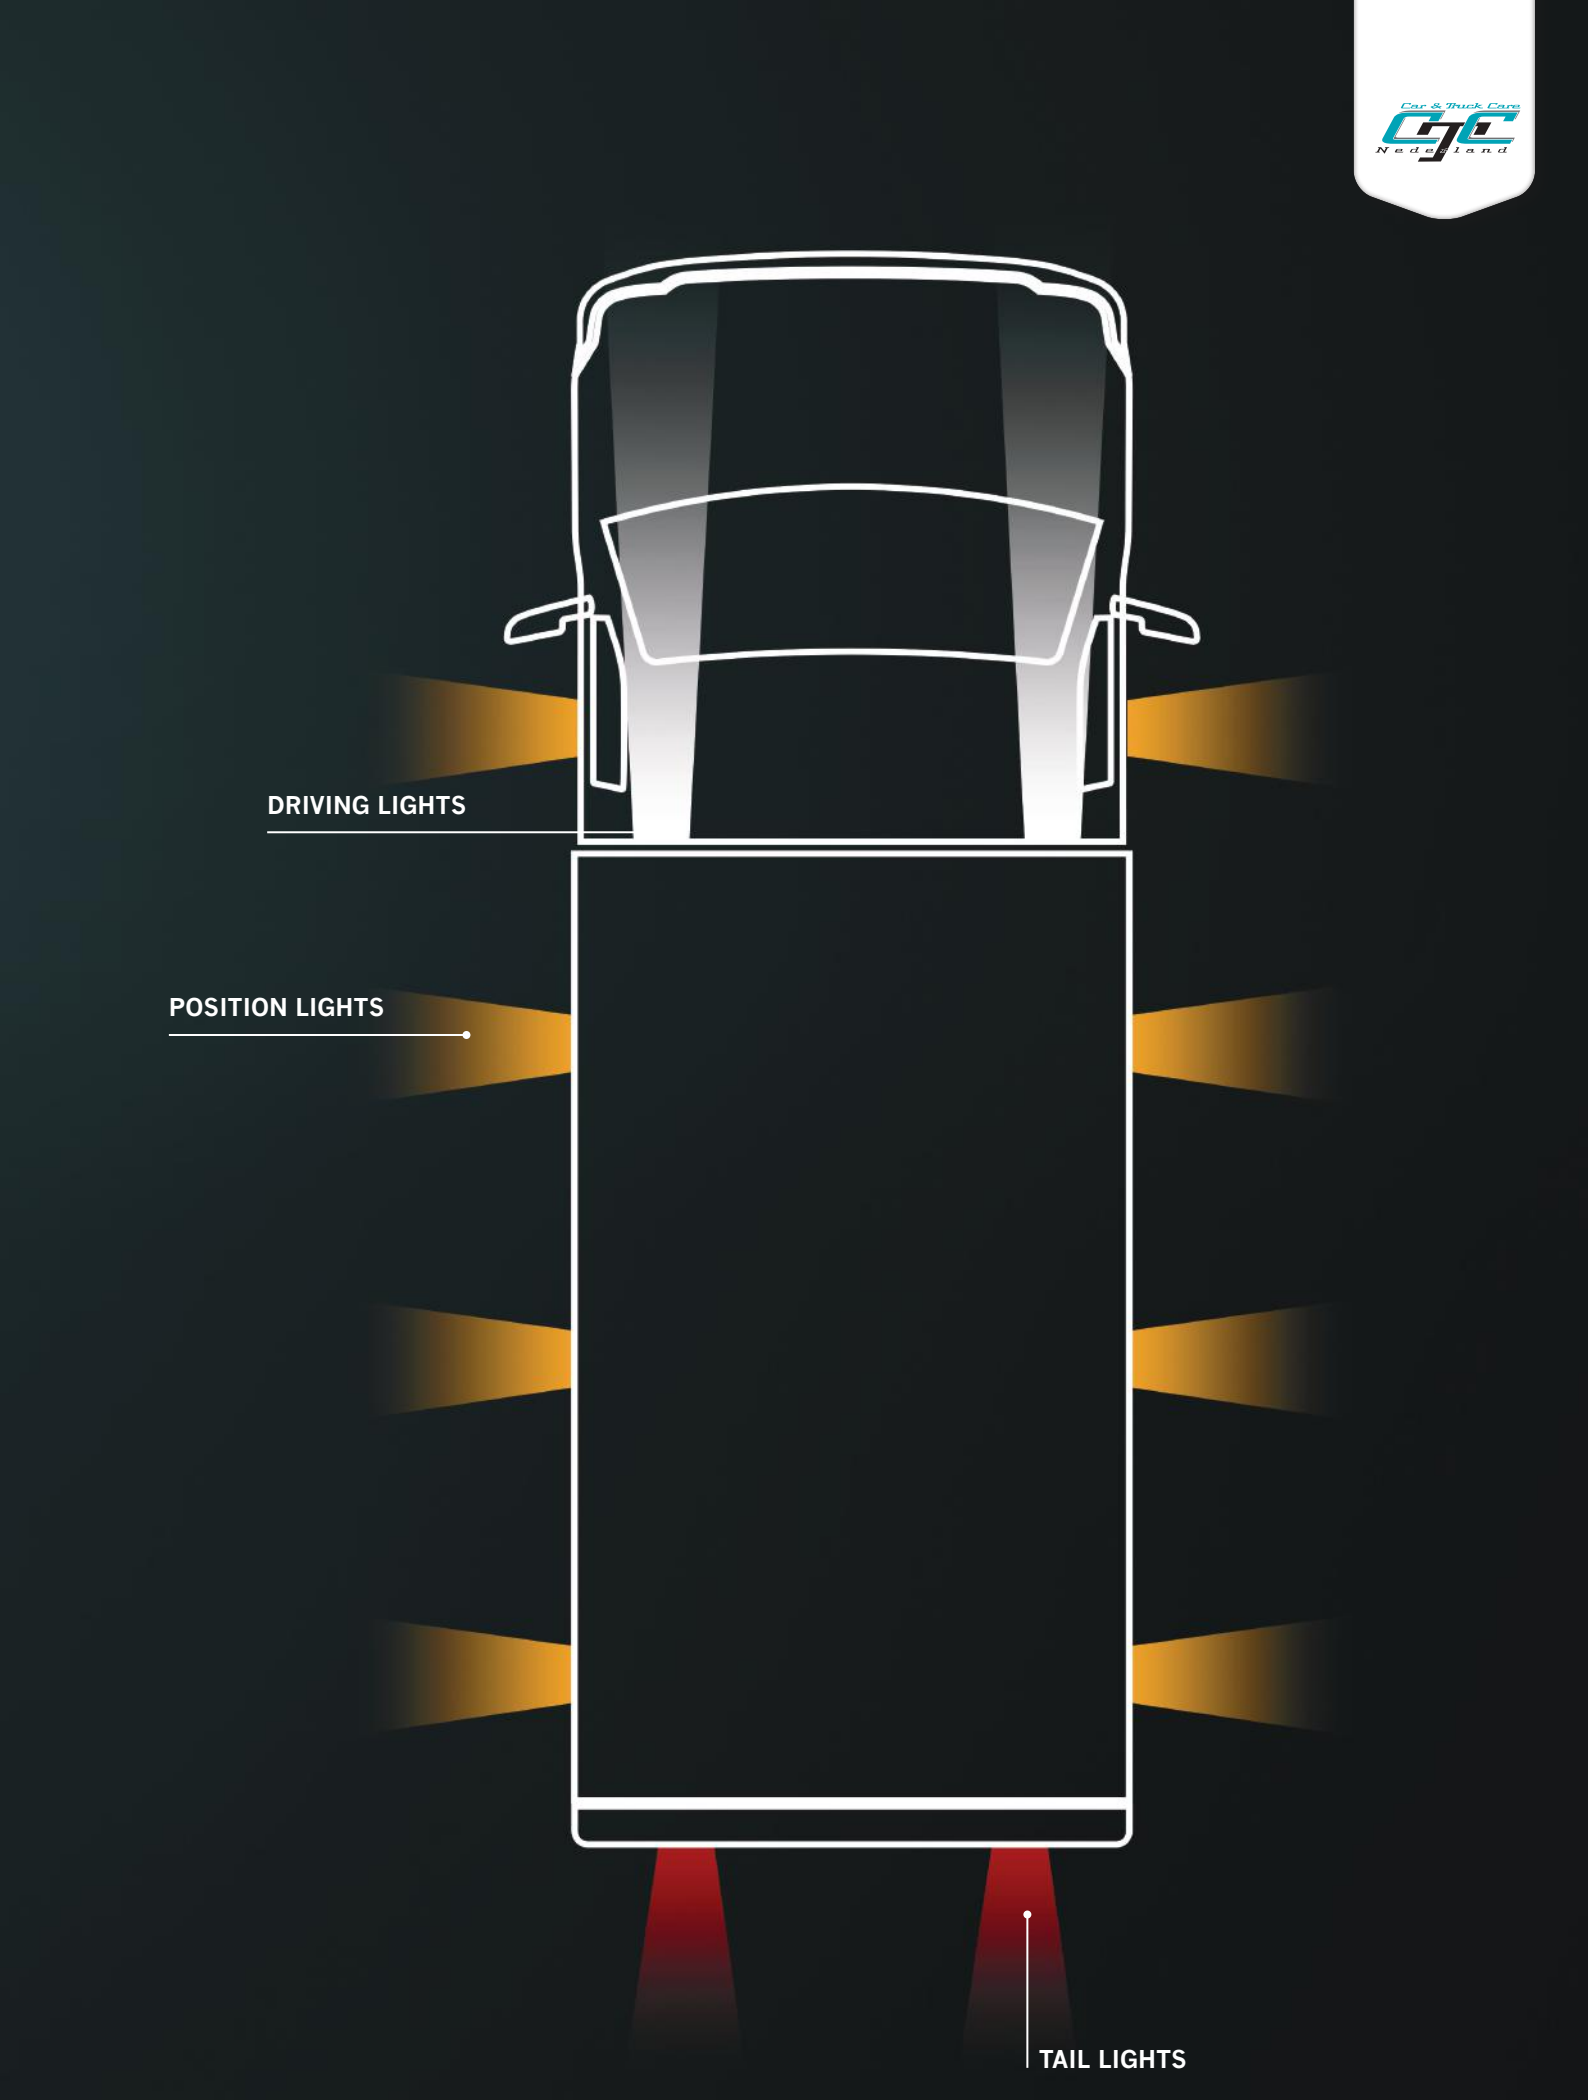

FROM MANUAL TO AUTOMATIC INSTALLATION

Skyn1 transforms the installation process from manual and complex to seamless and intuitive. Instead of managing multiple switches and separate solutions, all lighting is brought together into a single system, giving you full control and a clear overview of every function. The result is a customized setup that unifies and synchronizes everything, ready to use from the moment it is connected.

CONTROL ANY FUNCTION

The EXP control box features eight buttons that control up to 16 functions, giving users flexible control while keeping installation simple and efficient. EXP is ideal for standardized installations and any vehicles where speed and reliability matter. By reducing installation time and eliminating guesswork, EXP creates a seamless user experience focused on simplicity, efficiency, and complete control.

Bluetooth®

CONTROL ALL LIGHTS WITH ONE CONTROL

The EXP control features six buttons that control up to 12 functions, giving users flexible control while keeping installation simple and efficient. Only a positive and negative power connection is needed to get started, making EXP ideal for standardized installations, fleets, body builders, campers, 4x4 vehicles, and everyday work vehicles where speed and reliability matter.

- ✓ RECHARGABLE
- ✓ MAGNETIC

SKYN1 EXP

EXP

Bluetooth®

WIRELESS CONTROL

The SKYN1 EXP is a wireless control compatible with Skylord EXP lights. It automatically connects to the lights via Bluetooth and assigns them to the right button on the control. All you need to do is connect the lamp to the battery, then press and hold the Connect and appropriate function button on the control. Fast, smart, and easy.

AUTOMATIC CONNECTION

BLUETOOTH CONNECTION

CUSTOMIZE MORE

The control has two rows of buttons. For example, you can connect the work lights on the vehicle's left side to the upper button, and the right side work lights to the lower button. Or have one button for LED bars and one for driving lights.

3 YEARS FUNCTION WARRANTY

strands® -lighting division

Prices for information purpose only. As we currently face regular price increases, please visit our website for up-to-date prices.

CUSTOMIZE YOUR SETUP

When using the control, you can change any light function: switching between XP and E-mode, changing position light color, switching warning light patterns, and more. The control has two rows of buttons. Making it possible, for example, to connect the work lights on the vehicle's left side to the upper button, and the right side work lights to the lower button.

DESIGNED FOR CONTROL, DRIVEN BY PASSION.

This is the next step in Strands' passion journey. With Skyn1, we move you beyond individual products and into a complete system where everything works together. It's a smarter, more connected way to control vehicle lighting, built for today's and tomorrow's demands. This is where we're heading, toward solutions that give you wireless control, simpler installation, and a more seamless experience every time you step into your vehicle.

WIRELESS LIGHTS WITH SKYN1 EXP

The Skylord EXP is part of the SKYN1 EXP lighting range, designed for faster, cleaner, and more intuitive vehicle installations. Using Bluetooth, the driving light automatically connects to the EXP control, where its functions are automatically detected.

7'' VOLTAGE 109W

SIBERIA SKYLORD 7''

EXTREME LIGHT OUTPUT FOR DEMANDING DRIVING CONDITIONS

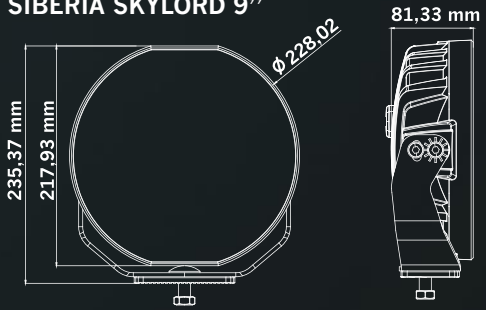

The Skylord EXP 9" is engineered to deliver exceptional visibility in the toughest driving conditions. Combining a powerful long-distance beam pattern with dual operating modes, it offers road-legal performance for everyday driving and maximum output when extra illumination is needed. In Xperience mode, it produces an impressive 13,300 lumens with a beam reach of up to 785 meters, providing outstanding visibility well ahead of the vehicle. The optimized beam pattern and crisp 5700 K color temperature work together to enhance contrast, improve visibility, and give drivers the confidence to see farther and react sooner.

SURFACE AND POLE MOUNT

The EXP Warning Light Beacon is available in both pole- and surface-mount versions, giving you the flexibility to choose the installation that best suits your vehicle. The surface-mount model stands out with an innovative mounting solution that requires only a single mounting screw, compared to the three screws typically used on traditional beacons. The result is a cleaner installation, a sleeker appearance, and a modern design that complements the beacon's smooth, screw-free housing.

DAY AND NIGHT MODE

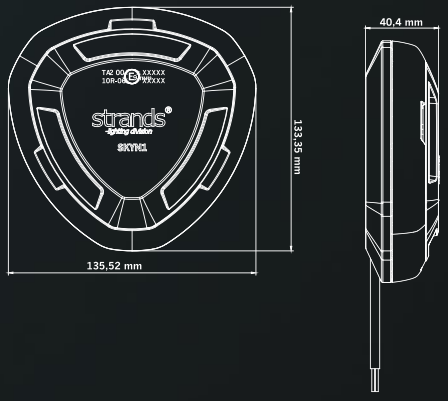

Eight flash patterns, with dedicated day and night modes, ensure effective visibility whenever the situation demands it. The beacon can be connected with multiple units to create a complete warning light setup tailored to your vehicle and application.

CONSUMPTION 60W

E-APPROVED

Approved for R65 Class 2, it provides the flexibility required for a wide range of professional uses. This beacon is EMC protected CISPR25 class 3, guaranteeing there will be no electrical disturbance.

AUTOMATIC BLUETOOTH CONNECTION

Compatible with the SKYN1 EXP system, this light connects wirelessly via Bluetooth for a faster, cleaner, and more intuitive installation. When paired with the EXP control box (Part No. 2607907851S1), functions are automatically identified and assigned to the correct controls, eliminating unnecessary setup and reducing installation time.

UP TO 1 LUX @ 1 KM

Depending on the selected operating mode, the LED bar can be used in E-approved E-mode or in Xperience mode. The largest 40" version delivers up to 31,500 actual lumens and reaches 1 lux at 1,207 meters in Xperience mode, offering extraordinary visibility when conditions demand maximum performance.

INTELLIGENT INSTALLATION WITH EXP

The Skylord EXP LED Bar is more than a powerful auxiliary light—it is part of the Skyn1 EXP ecosystem. Designed exclusively for use with an EXP control, it communicates directly with the system via Bluetooth and is automatically recognized upon installation.

INTELLIGENT LIGHTING

POWERED BY SKYN1

- ✓ *ONE INTELLIGENT SYSTEM FOR ALL YOUR LIGHTS*
- ✓ *WIRELESS CONNECTION*
- ✓ *CONTROL WITH APP, BUTTON, OR WIRELESS CONTROL*
- ✓ *BLUETOOTH CONNECTION*

WHAT IS SKYN1?

Skyn1 brings all your lighting into one system. Connect your lights wirelessly, control them via app, button, or control, and get a solution where everything works together instantly. Choose the EXP wireless control or PXP relay box.

FROM COMPLEXITY TO COMPLETE CONTROL

A new way to control your lighting. Strands Skyn1 is an ecosystem where hardware and software work as one. Connect your lights to the PXP Force Box and quick buttons and get full control directly from your smartphone, fast and seamless. Or choose the EXP control box that automatically detects compatible Strands lights and assigns each function to dedicated buttons on the wireless control. Everything is synced, ready to use, and built to work together. One system, designed to move faster and work smarter.

FROM MANUAL TO AUTOMATIC INSTALLATION

Skyn1 transforms the installation process from manual and complex to seamless and intuitive. Instead of managing multiple switches and separate solutions, all lighting is brought together into a single system, giving you full control and a clear overview of every function. The result is a customized setup that unifies and synchronizes everything, ready to use from the moment it is connected.

SKYN1 APPLICATION

- ✓ *CONTROL ANY LIGHT WIRELESSLY*
- ✓ *USE WITH SKYN1 APP*
- ✓ *QUICK BUTTONS*

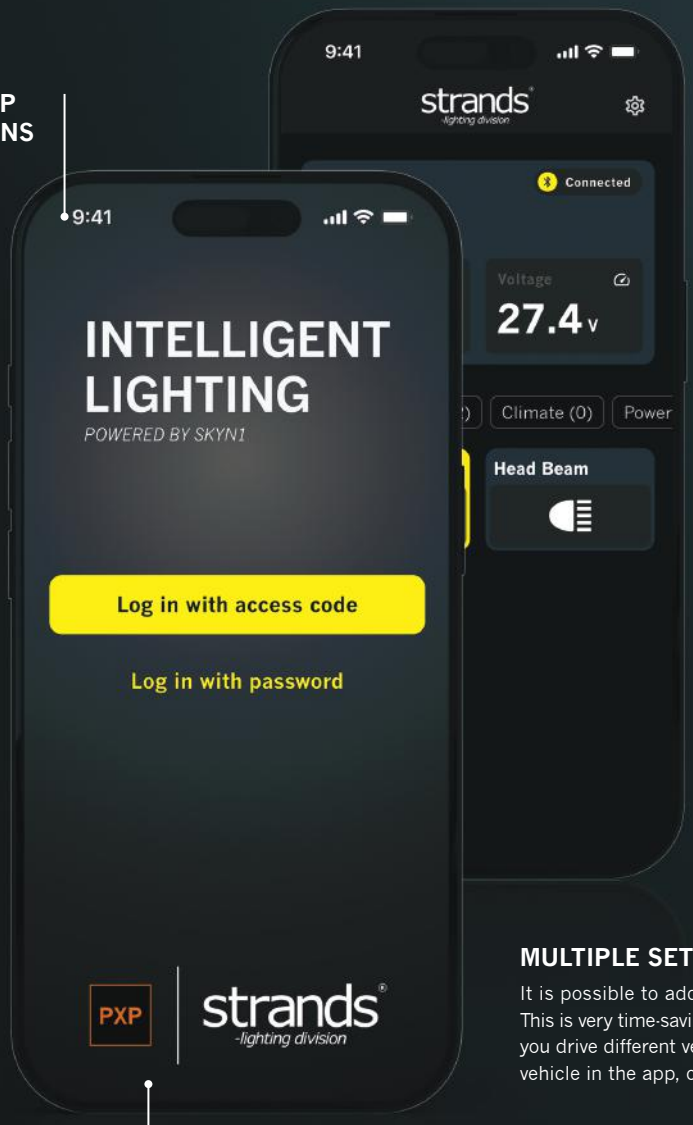

SKYN1 PXP

PXP

SKYN1 APP

The SKYN1 app is designed for use with the PXP Force Box and Buttons. Connect the lights you want to control to the Force Box. Open the app, add your vehicle, and connect to the Box and Buttons. In the app, connect the desired function to a button, such as position lights, work lights, or any other function. This system enables you to turn any lights and any setup into a wireless one, or a unified setup with easy-to-reach, clearly labeled buttons. For a clear overview, you can use the SKYN1 app on a tablet in the cabin. The SKYN1 app is available for iOS and Android.

CONTROL WITH APP AND QUICK BUTTONS

MULTIPLE SETUPS

It is possible to add more vehicles to the app. This is very time-saving if you have a work situation where you drive different vehicles every day. Just find the right vehicle in the app, connect, and you're ready to go.

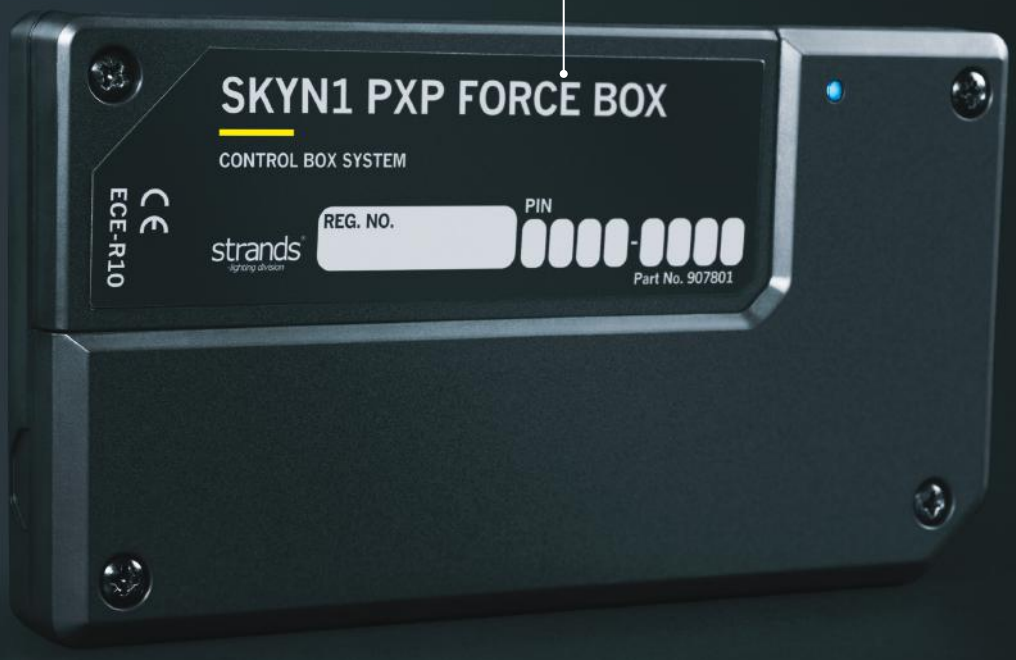

WORKS FOR APPLE AND ANDROID
