CAP COMPONENTS

CROWN

The Crown of a cap is the top part that sits on the head. It's made of triangular pieces (panels) sewn together to form a round shape. A crown can be either structured or unstructured.

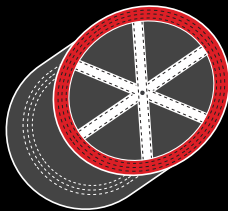

PANEL

The panels of the cap are the different pieces of material, sewn together, to construct the cap. Number of panels can range between 5 & 6 panels depending on the style of cap/hat.

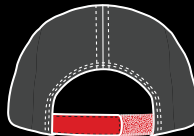

BRIM, VISOR / PEAK

The peak (visor/bill) of a cap is the horizontal part that shields the face from the sun. Typically made of PVC plastic, it's sewn into the fabric to maintain its curve.

SWEATBAND

The sweatband runs along the inside of the cap or hat & insures that perspiration is absorbed.

CLOSURE

Closures are found at the back of a cap or hat. Fitted caps are sewn closed, while adjustable caps have various closures.
