GOLDEN ROCK COLLECTION

TECHNICAL SPECIFICATIONS

Structure in wood covered with high density polyurethane.
Suspension by means of zig-zag springs frame. Seat cushions in 35 kg polyurethane foam covered with protective case and internal divisions, filled with duck feathers and down. Back cushions have a protective case and internal divisions, filled with hollow silicone fiber. Feet in beech wood, varnished in oak, walnut or wenge. Cover completely removable.
Included two 45x45 cm cushions filled with hollow silicone fiber.

Golden Rock collection is composed of three main elements, sofa, armchair and pouff. This collection allows adding different modules to create a custom configuration.

CONFIGURATIONS

CATEGORY

Modular sofa and unlimited configurations.

MATERIALS

Wooden pine structure with beech applications, high density foam (from 30 to 60 kg/m³), compartmented silicone hollow fiber backing (anti-mite and anti-allergy), seat cushions with feather filling and suspension with metal frame of steel springs of 3,8 mm.

Natural varnished beech wood legs, oak, walnut or wenge. All pieces of collections are risen from the ground 15 cm in order to facilitate cleaning.

COMPOSITION

The collection allows infinite configurations and many possibilities to adapt to any space and project. Sofa, one arm module or armless, chaise longue and corner unit.

FINISHES

The entire collection can be made with fabrics and leathers from any manufacturer or fabric designer. If preferred, it can be manufactured with the client's own fabric for greater customization.

PRODUCTION PROCESS

The entire collection is made in a traditional way. Details and finishes are pampered so that the result is a unique and exclusive piece, designed and adapted for a specific space, project and client.

STOCK

All our products are designed and manufactured on demand, from the structure to the thread, so the estimated delivery time is 5 weeks.

Modular sofa and unlimited configurations.

MATERIALS

Wooden pine structure with beech applications, high density foam (from 30 to 60 kg/m³), compartmented silicone hollow fiber backing (anti-mite and anti-allergy), seat cushions with memory foam filling and suspension with metal frame of steel springs of 3,8 mm. Natural varnished beech wood legs, oak, walnut or wenge.

COMPOSITION

The collection allows infinite configurations and many possibilities to adapt to any space and project. Sofa, one arm module, chaise longue and corner unit.

FINISHES

The entire collection can be made with fabrics and leathers from any manufacturer or fabric designer. If preferred, it can be manufactured with the client's own fabric for greater customization.

PRODUCTION PROCESS

The entire collection is made in a traditional way. Details and finishes are pampered so that the result is a unique and exclusive piece, designed and adapted for a specific space, project and client.

STOCK

All our products are designed and manufactured on demand, from the structure to the thread, so the estimated delivery time is 5 weeks.

GEMS

GEMS

**GEMS designs
and manufactures
its own products to
achieve the
greatest comfort.**

GEMS

Our motto: Be the **Tailors of the sofa**. Just as a tailor makes a haute couture dress, at GEMS we **design and manufacture** the sofa that adapts to each person to guarantee **the greatest comfort and well-being**.

The sofa is one of the main elements of a **HOME**, not only is the star of a space, but also is the atmosphere. For this reason, at GEMS we take care of all the details, generating a **quality, sustainable, comfortable upholstery with high durability** over time.

It is our mission and at the same time our challenge to provide our clients a better **QUALITY OF LIFE and HAPPINESS** through a meticulous and professional elaboration of all our products.

However, each person is different, and that is why at GEMS we strive so that each piece is unique and exclusive, and responds to the preferences of each user. In this way, we manage to create that personalized space where the client feels comfortable and has its needs covered. In this way, a greater state of well-being and happiness is achieved.

In 1983 GEMS began its activity as a designer and manufacturer of quality sofas and armchairs.

HISTORY

GEMS was born in 1983, in Cerdanyola del Vallès (Barcelona), by the hand of Tomás and Antonio.

As a result of effort and good work, in **1989 GEMS** made the decision to move its manufacturing headquarters to **Terrassa (Barcelona)**, where it has new and improved facilities that allow it to develop its activity in a more agile way, and optimize its processes.

The new GEMS factory (current location of the facilities) will have 2.000 m² to continue the same tradition when it comes to manufacturing all its products, in a completely artisanal way, and at the same time it will increase its production capacity that will allow it to continue reaping successes.

In the early 1990s, GEMS expanded its horizons and started its **export** activities. GEMS proposals were presented at the main European **Furniture Fairs**. The Company began to make itself known in cities such as **Valencia, Cologne, Milan, Paris and London**.

Today, GEMS BARCELONA has established itself as one of the leading national brands in the sector and has the collaboration of renowned **designers and architects**, with whom it develops its **sofas, armchairs, chaise longues, chairs and headboards** collections, for the absolute comfort and well-being of the client.

In 2004 GEMS inaugurated a Showroom in the center of Barcelona, where the latest creations of sofas, armchairs, chairs, chaise longues and headboards are present.

SHOWROOM

In 2004 GEMS decided to take a new step forward and inaugurated its **first Showroom** in the center of the city of Barcelona. A space where you can see the details and finishes of several of the pieces offered by the brand. This fact was decisive in its growth and a few years later, GEMS moves its Showroom to a key location for the interior design and decoration world, in the heart of the city of Barcelona, where it continues to operate today.

With an industrial air, preserving some of the original elements of the estate such as its walls or ceilings, with the characteristic "Catalan volta", the new Showroom has become an **emblematic space** where you can find the products that GEMS offers, by the hand of expert advice that is present at all times to accompany the client. The sofas, armchairs, chairs, chaise longues and headboards that can be found at GEMS BARCELONA share the same name: COMFORT.

Made with the latest fabrics collections from Designers Guild, Ralph Lauren, Güell Lamadrid, Romo, Gastón y Daniela, Gancedo, Missoni, Elmo Leather, Sørensen Leather, Armura, Crevin, etc., GEMS upholstery uses fabrics and materials from leading firms.

You can also find in GEMS **limited collections** made by prestigious designers, architects and interior designers, **from exclusive international firms**.

GEMS uses a personalized comfort system for the elaboration of its products.

PRODUCTS

The GEMS BARCELONA factory located in **Terrassa** stands as a large-scale **atelier**. There, all the products are crafted individually, with the **utmost care and detail**.

The **design team** is in permanent communication with the production area, which allows to follow up on each and every one of the orders and thus ensure that they are faithful to their design, and at the same time in accordance with the client's wishes.

GEMS boasts a **personalized comfort system** so that each product it manufactures adjusts to the needs of those who are going to enjoy it. This system constitutes a notably differentiating element with respect to other companies in the sector, **by not standardizing the product** it allows to be **adapted** to the individual preferences and tastes of each customer.

In this way, the GEMS product is characterized by being able to have an immense **variety of finishes**, either due to its size, its composition or the fabric chosen for its upholstery.

**GEMS certifies that
all its sofas,
armchairs, chairs,
chaise longues and
headboards
collections are made
with materials
certified by the
European Union.**

QUALITY

GEMS products comply with all **EU regulations** (Quality, Guarantee, Environment and International Homologation). Home and contract products exceed the British Standard and EU Fireproofing regulations.

RECOGNITION

In its **more than 35 years** history, GEMS has been awarded various recognitions, nationally and internationally, among which can be highlighted the "Honorable Mention" at the Valencia International Furniture Fair, the "Special Mention to a Trendsetting Product" at the Cologne Fair, or the "**Best Sofa Award**" at the 100% Design Fair in London.

GEMS offers infinite possibilities to choose fabrics or leathers, with full flexibility to suit the customer's preferences.

MATERIALS

The internal structure of the pieces that GEMS sells is made of **pine wood** with beech applications, covered with **high-density foam** (from 30 to 60 kg / m³). The suspension of the parts consists of metal frames with 3.8 mm zigzag steel springs.

The seat cushions are made of high-density foam and the customer can choose the level of hardness according to his preferences. The choice is also between a viscoelastic or feather coating.

For the back cushions, siliconized hollow fiber is used and they are covered with compartmentalized anti-mite and anti-allergenic covers. The legs are made of varnished beech wood, at the customer's discretion, in natural, oak, walnut or wenge.

FINISHES

The GEMS BARCELONA collections can be made with **fabrics and leathers** from any manufacturer or textile editor. There is also the option, if preferred, to manufacture them with **fabrics provided by the customer** to achieve greater **customization**.

GEMS works and collaborates with the main textile manufacturers and distributors nationally and internationally.

**Internationally
recognized
designers and
architects have
collaborated on
some of the GEMS
collections.**

COLLABORATIONS

GEMS BARCELONA's furniture is designed by its internal team and, for certain collections, GEMS has had the opportunity to collaborate with different national and international renowned designers and architects, such as **Gemma Bernal** (designer of the "Transit", "Great", "Quo", "T-Line", "Tom" and "Lobby" collections), **Ramon Isern** (designer of the collections "Don", "Tender", "Club", "Plus" and "Space"), **GCA Architects** (designers of the "Fergi", "Kronos", "Suite", "Apta", "Tana", "Safos", "Ramis", "Rodes" and "Tosca" collections), **Lázaro Rosa-Violán** (designer of the "Michelin" family, made up of the "Ferdinand", "Miller", "Martin", "Collins", "Taylor", "Smith", "Carrol" and "Jack" collections), **Estudio Carrillero** (designers of the "Tubo", "Foglie" and "Luna" collections), **Antonio Vaillo** (designer of the "Bilong" and "Islero" collections), **Antonio Saturnino** (designer of the "Programas", "Practic", "Angelo", "Dido", "Rul·la", "Ibis", "Altea" and "Lis"), **Estudi PH-5** (designers of the "Egara" collection), **Lluís Codina** (designer of the "Volga", "Rocco" and "Noa" collections), **Josep Teruel** (designer of the "Malta" collection), **Jaume Torras** (designer of the "Teo" and "Pep" collections) and **Xavier Bruset** (designer of the "Moon" collection).

Production

GEMS
BARCELONA

04

GEMS manufactures its entire collection made to measure, with excellent finishes and using the most select materials for its elaboration.

DESIGN

GEMS BARCELONA's furniture is designed by its internal team and, for certain collections, GEMS has contracted the services and collaborations of different **designers and architects** recognized **nationally and internationally**.

GEMS offers a **personalized comfort system** so that each product adjusts to the preferences of each client. **Custom manufacturing** allows adapting each project and configuring the product so that it adapts to the desired space and style.

**The materials
used for the
manufacture are of
high quality and
respectful with the
environment.**

MANUFACTURING

All the materials used in the manufacture of GEMS products are local and regional and meet all quality and guarantee specifications at the national and European level.

All structures in GEMS products are made of **Flanders pine wood** with **beech** inserts at certain points to reinforce the structure. All the wood used comes from sustainable forests where the trees consumed are replaced and are PEFC and FSC certified.

The **suspension** is made of a 3.8 mm thick zigzag **steel spring** frame, which gives the structure greater rigidity and makes it unalterable over time.

The entire structure is covered with high-density foam, variable from 30 to 60kg/m³. The adhesive product used in the production is water-based, without petroleum-based solvents.

The **seat** cushions are made of **high-density foam** and the level of hardness can be chosen from soft, medium or firm (medium is used as standard). The client can also opt for a memory foam or a feather cushion.

The **back cushions** are made up of a compartmentalized protective cover in anti-mite and anti-allergenic fabric, filled with **silicone hollow** fiber (acrylic, anti-allergenic and recyclable).

The legs are made of solid beech wood, and can be varnished in natural, oak, walnut or wenge color.

**GEMS certifies
a guarantee on all
its products, both
their structure and
their finishes.**

WARRANTY

Wood Structures - Warranty of 10 or more years. Solid wood from sustainable forests is used, so the sofa can be reupholstered over and over again and the structure will be unalterable over time.

Suspension - 10-year or lifetime warranty. The 3.8mm zigzag steel spring frame reinforces the structure and guarantees the unalterable suspension over time.

Seat cushions - 5-year warranty. High-density foam has high durability.

Back cushions - 5-year warranty. The hollow fiber used in the manufacture has an exceptional and constant recovery coefficient over time, so, with minimal maintenance, the cushion will always be in perfect condition.

Fabric - Depending on the manufacturer, the warranty ranges from 2 to 5 years and covers manufacturing defects.

**The fabric
chosen for the
manufacture
makes the piece
unique and
exclusive.**

UPHOLSTERY

The GEMS BARCELONA collections can be made with **fabrics and leathers** from any manufacturer or textile editor. There is also the option, if preferred, to manufacture them with **fabrics provided by the customer** to achieve greater **customization**. GEMS works and collaborates with the main textile manufacturers and distributors nationally and internationally.

Alonso Mercader, Aquaclean, Armura, Athenea, Aura, Avdelaura, Chivasso, Crevin, Cuoium, Curtidos Gracia, Elastron, Elmo Sweden, Euro Spradling, Fibreguard, Froca, Gancedo, Gastón y Daniela, Güell Lamadrid, Houles, Interleather, Jab Anstoetz, James Malone, Javier Barrio, Les Creations, Lino Gris, Ontario, Osborne & Little, Primula Rossa, Ralph Lauren, Romo, Sanderson, Sorensen Leather, Taycor, Textil Roig, The Isle Mill, Tuva Textil, V&N, Villa Nova, Yutes and Zinc are some examples, so you can always consult the series corresponding to the fabric collection that best fits the project.

At GEMS we design unique and exclusive pieces for each project and client.

PROJECTS

GEMS collaborates with architects and interior designers to develop the determined and designed products in each project, so that they are comfortable, durable, of quality and of design, and become unique and exclusive pieces. The projects in which GEMS collaborates range from a small renovation of a living room, to large projects (libraries, museums, restaurants, hotels, etc.).

Within the GEMS catalogue there is a wide variety of collections with different styles and finishes, and they can be configured and adapted to the needs of the project (armchair, sofa, sofa with one arm, sofa without arms, corner sofa, chaise longue, etc.).
