Architecture is an immersive and multi-sensory experience, seamlessly blending sight, touch, sound, smell, and even taste to create spaces that resonate with our emotions and memories. It is a holistic practice that goes beyond mere structure, engaging all our senses to craft environments that evoke feelings, memories and connections. Through thoughtful design, architecture harmonizes natural light, tactile materials, ambient sounds, pleasant aromas and spatial dynamics to create a symphony of sensory stimuli. This intricate interplay transforms buildings from functional shelters into living, breathing spaces that enrich our lives and leave a lasting impact on our senses.

I want to be part of making this possible.

KEEP WALKING

“CITIES HAVE THE CAPABILITY OF PROVIDING SOMETHING FOR EVERYBODY, ONLY BECAUSE, AND ONLY WHEN, THEY ARE CREATED BY EVERYBODY” JANE JACOBS

“FIRST LIFE, THEN SPACES, THEN BUILDINGS - THE OTHER WAY AROUND NEVER WORKS” JAN GEHL

In this restaurant project, community design is my main focus. I focused on creating a welcoming space that fosters social interaction and a sense of belonging. Sustainability was a key theme, ensuring that the design minimized environmental impact while maximizing comfort and aesthetics. I selected ecofriendly materials, optimized natural light, and incorporated energy-efficient systems to create a harmonious balance between functionality and environmental responsibility. The layout was designed to encourage community engagement, with open seating areas and communal tables that invite conversation and connection. By prioritizing these principles, I aimed to create a restaurant that not only serves delicious food but also strengthens the community.

To ensure a cohesive and engaging urban experience, I prioritized connectivity with the surrounding community, incorporating public spaces and accessible amenities. The layout was meticulously planned to optimize natural light, ventilation, and occupant comfort, creating an apartment that not only stands tall but also enriches its surroundings.

In planning the design of this apartment, I focused on creating a structure that seamlessly integrates aesthetics, functionality and sustainability while catering to the needs of the urban environment. The design incorporates eco-friendly materials and energy-efficient systems to minimize environmental impact, as well as smart technologies for optimal performance.

PROJECT 2 - BELLEVUE BUNGLOW

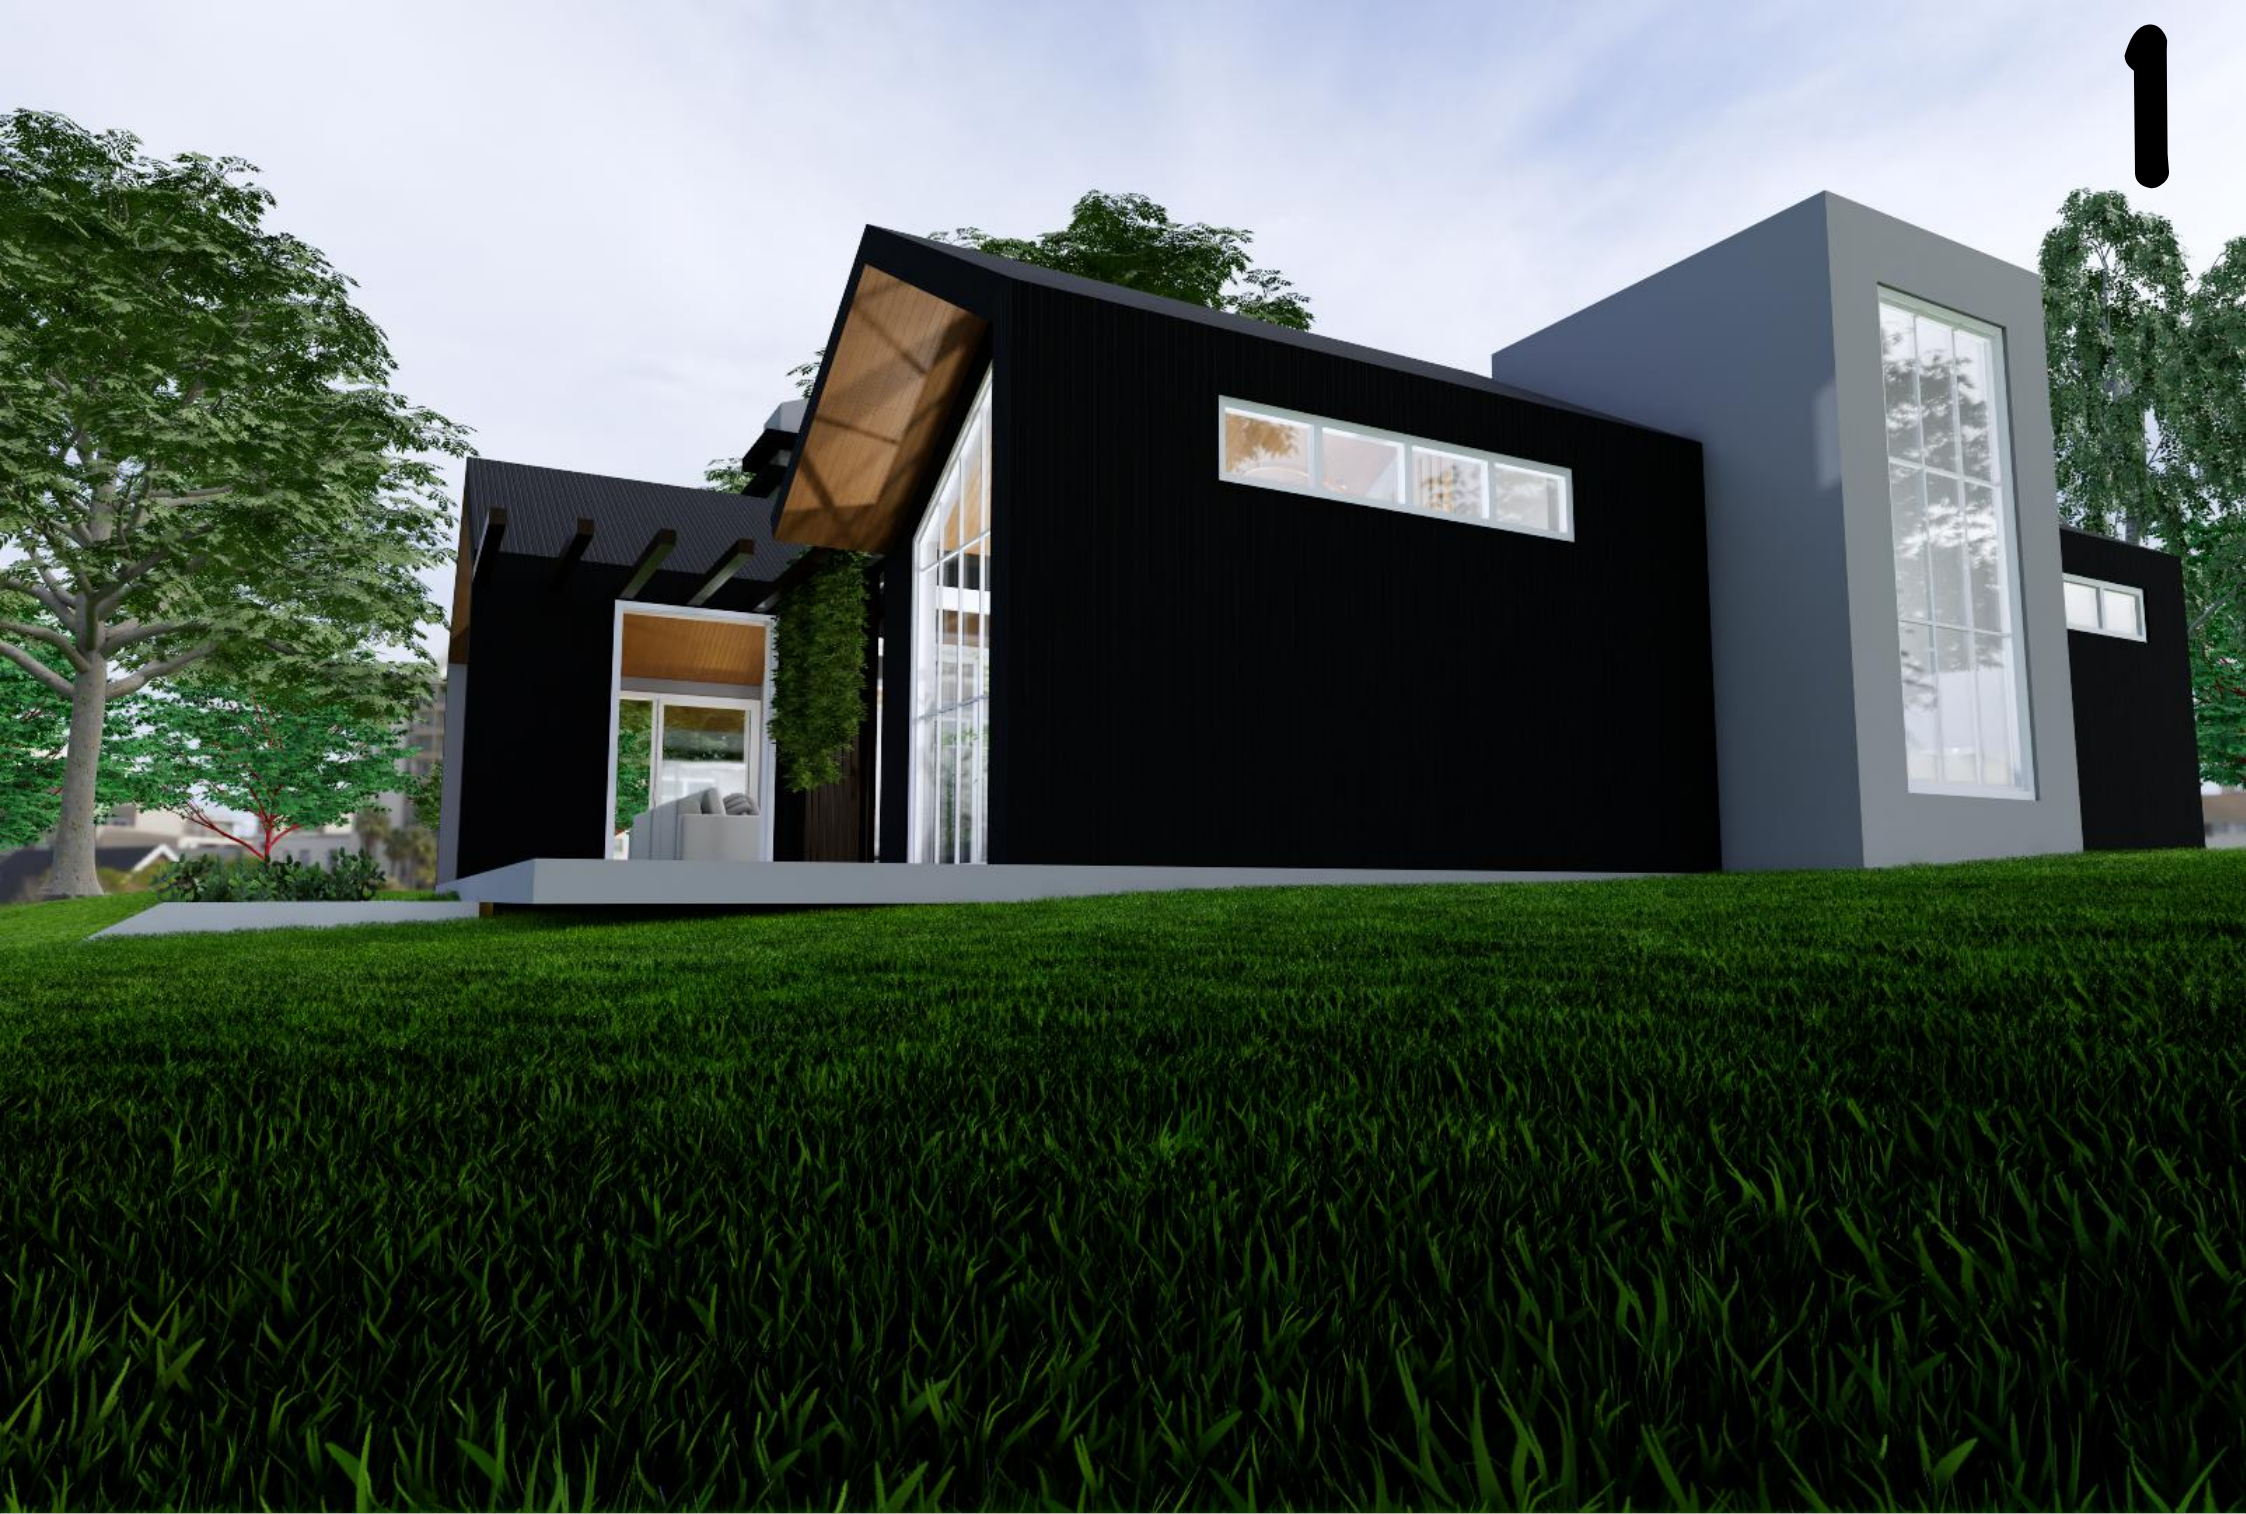

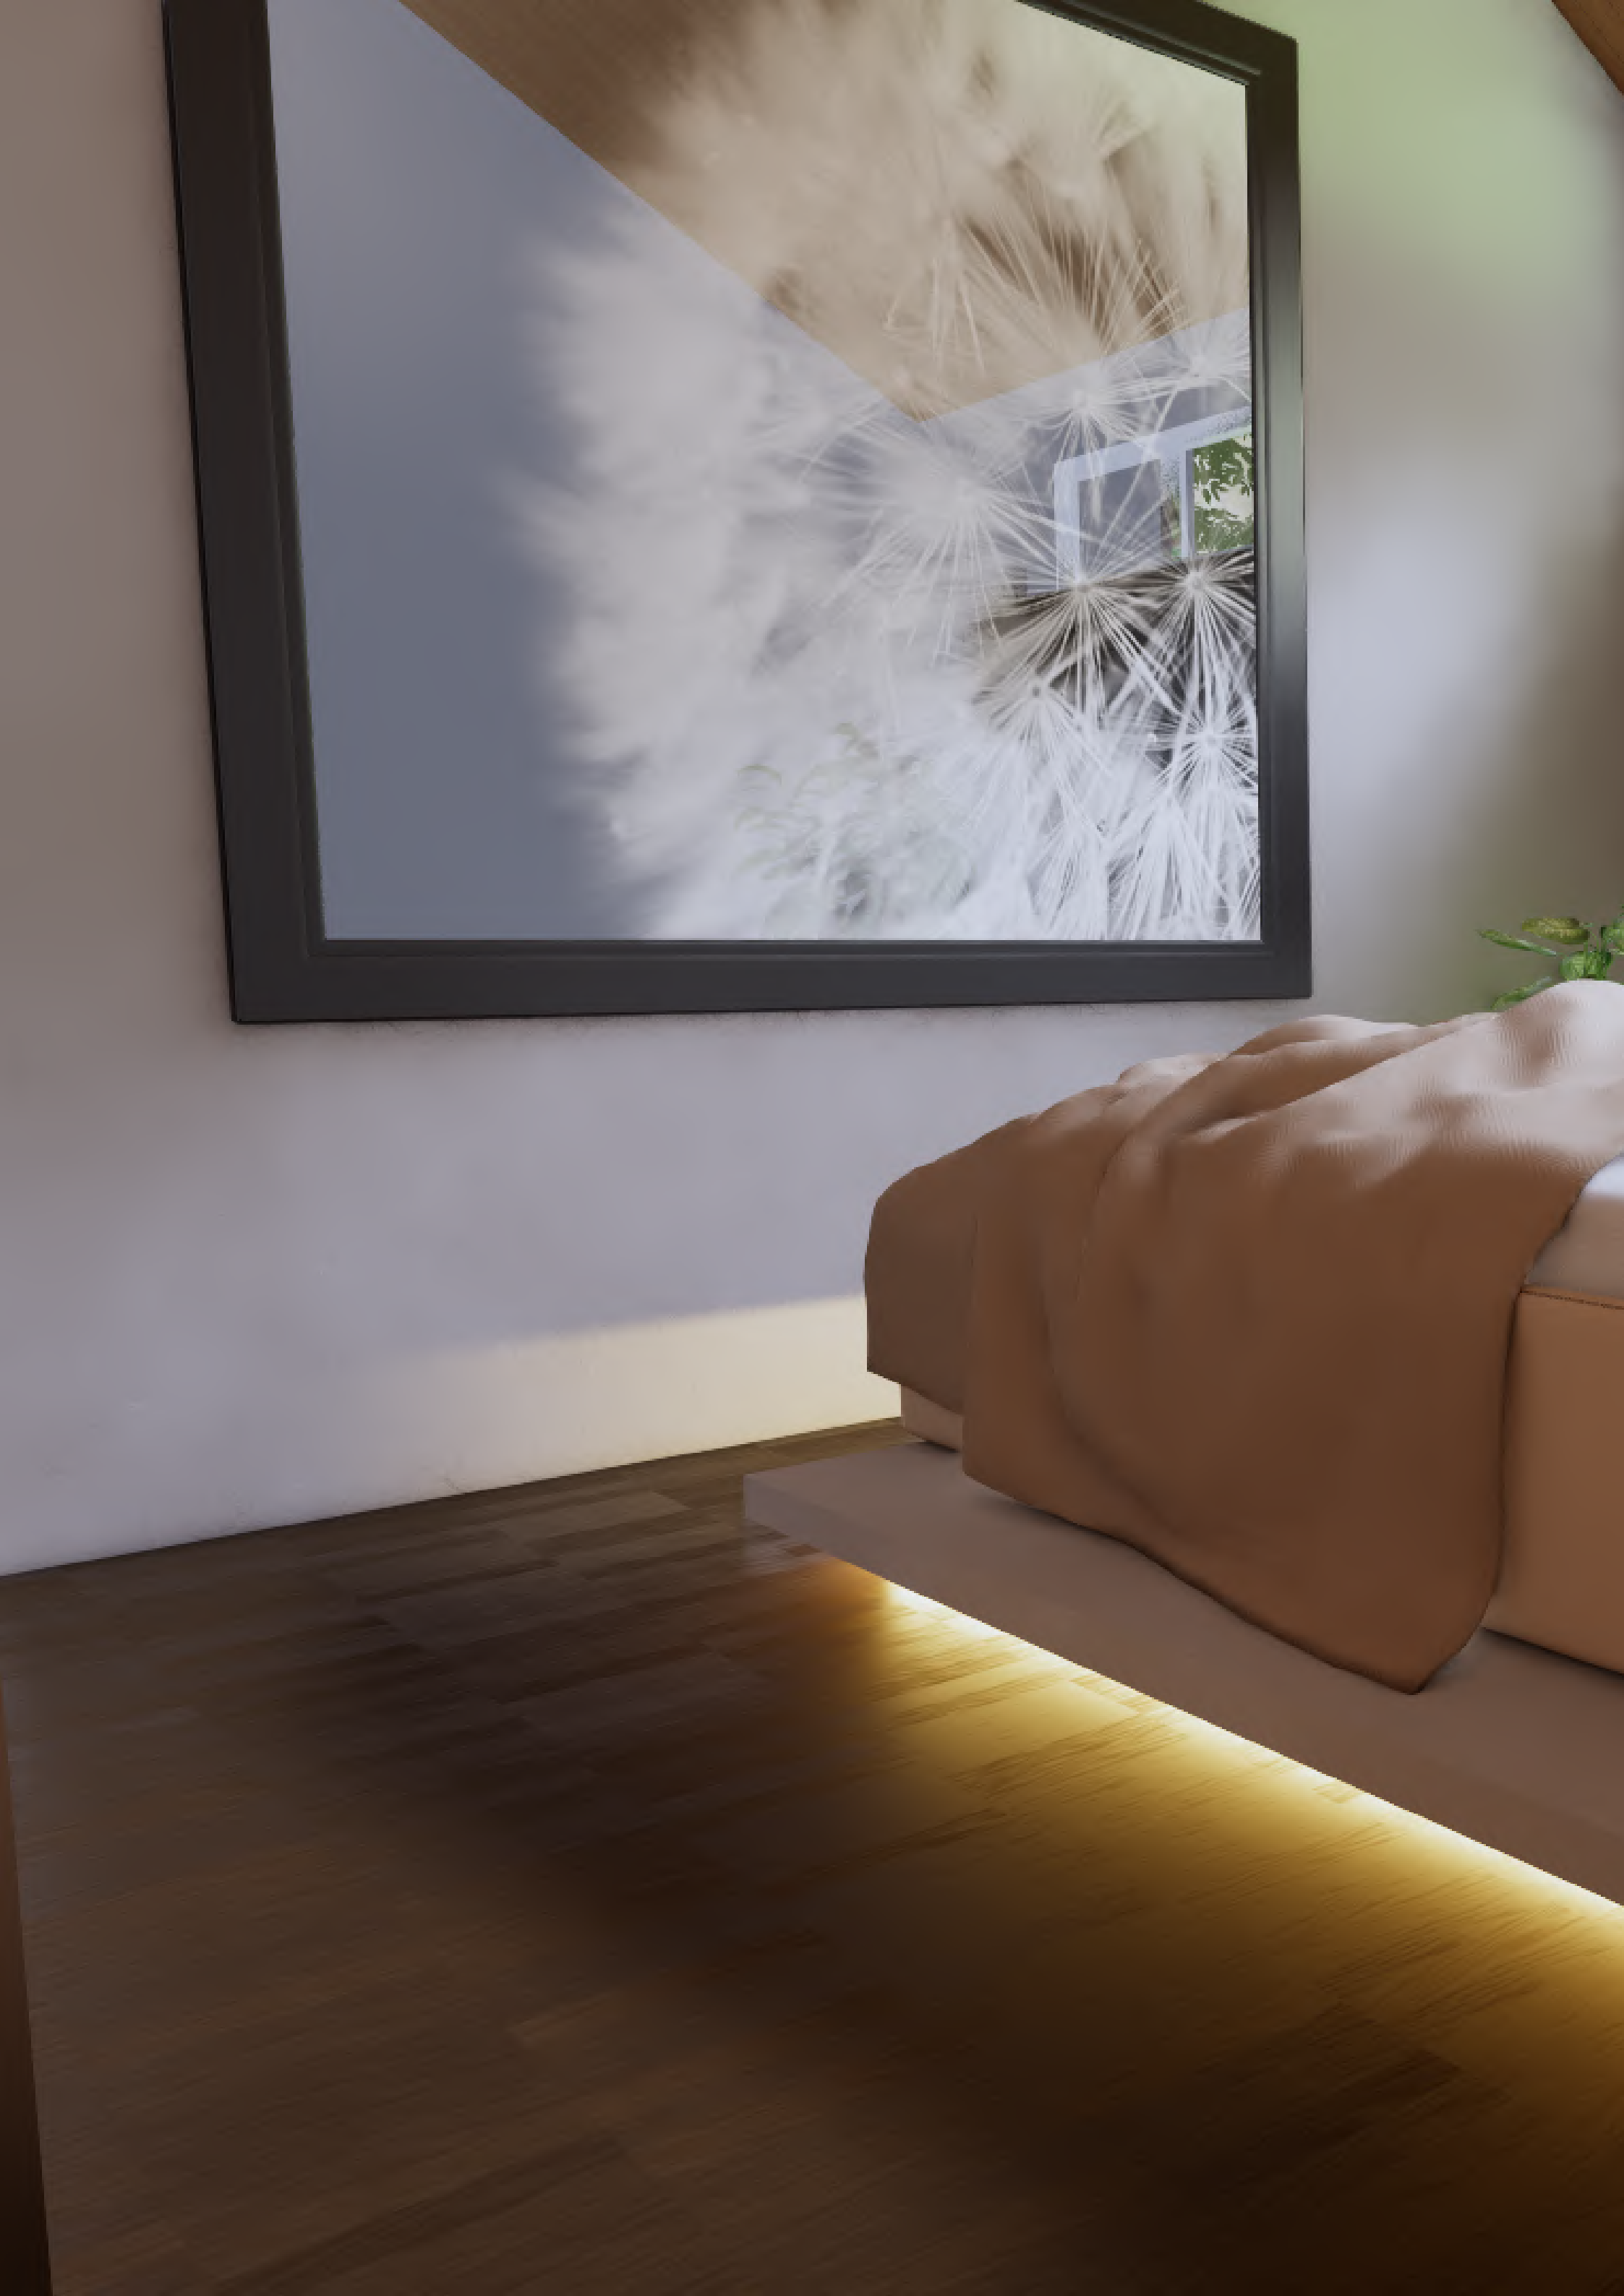

"LESS IS MORE" MIES VAN DER ROHE
 "SIMPLICITY IS THE ULTIMATE SOPHISTICATION" LEONARDO DA VINCI

In this project, I have accentuated on simplicity in architecture by crafting a design that is clear, functional, and resonate with beauty without unnecessary complexity.

This approach prioritizes functionality, ensuring that every element serves a purpose and contributes to the overall efficiency and practicality of the space. It has involved the use of natural materials, such as wood, stone, and glass, which enhance the design's purity and interaction with light and space. Clarity is maintained through clean lines and straightforward forms, creating an uncluttered and visually appealing layout. This holistic approach creates spaces that are not only aesthetically pleasing but also meaningful, sustainable and deeply engaging to the senses.
