

MALMO™
LUXURY VINYL FLOORING

malmoflooring.com

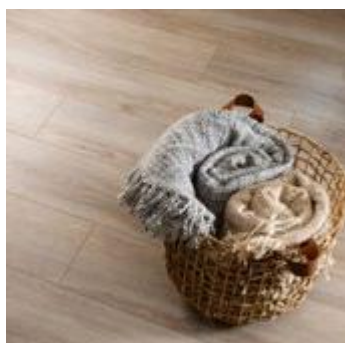

Klara | MA25

Front cover image Torsk | MAL0009

Malmo™ luxury vinyl flooring provides a stylish solution that brings beauty and elegance to any space.

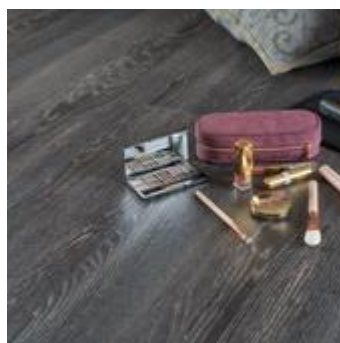

With plank, herringbone, chevron and tile effects across a colour palette that includes classic oak through to on-trend greys and deep walnut, the range offers click installation across the Rigid Senses and Rigid Comfort collections.

RIGID *Senses*

The Rigid Senses collection replicates the look and feel of real wood like never before.

The Registered Embossed texture is perfectly in line with the visual pattern of the woodgrain, combining the beauty of wood with the easy installation of Rigid Vinyl LVT.

RIGID *Comfort*

The Rigid Comfort collection offers a choice of stylish wide plank, narrow plank and tile formats.

Wide plank designs are perfect for use in large open plan spaces, whilst narrow planks cleverly create a sense of space in smaller areas.

FOUR FLAGSHIP DECORS

NEW style, same decors. The Malmo™ Chevron range has launched in the same best-selling decors as some of the well established and successful Herringbone range. From the warm chocolate brown tones of Braxen, through the cooler tones of Mal and Torsk, to the clean grey of Faren - the Malmo Chevron range has something for every space.

Mal | MAL0007

Torsk | MAL0009

ENHANCE YOUR SPACE

The wood grain effect of Malmo™ flooring becomes even more striking when arranged in a chevron pattern. Each board reflects light from a slightly different angle, adding depth and highlighting the unique character of the flooring.

HERRINGBONE

TIME-HONoured DESIGN

Faren | MAL0001

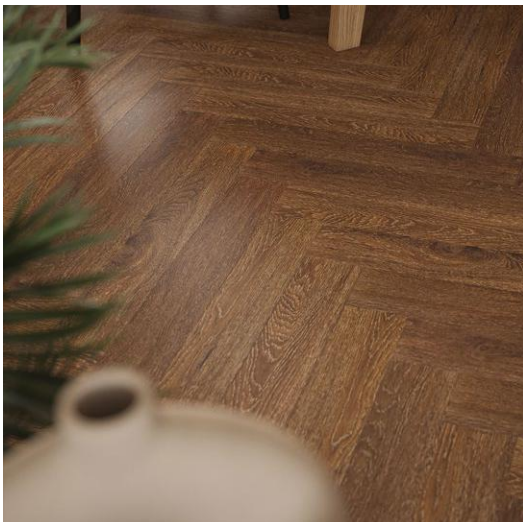

MALMO[™]
LUXURY VINYL FLOORING
Senses

THE TEST OF TIME

HERRINGBONE has stood the test of time and remains a staple of effective interior design.

Originally used in Roman roads and later adopted across European parquet flooring, the pattern has carried its reputation for durability and elegance through centuries of use.

Like chevron, herringbone enhances the sense of space and directs the eye through an interior. What distinguishes Malmo™ Senses Herringbone is the painted V-groove that accentuates each individual plank, adding a level of detail and craftsmanship that sets it apart.

You get the same great features with all of the Senses range including:

Built in underlay - time and money saved when using Malmo™, the underlay is included!

25 year warranty - for peace of mind throughout the lifetime of your floor.

Registered Embossed surface - realistic woodgrain texture that matches the grain of the decor.

Suitable for underfloor heating - compatible with encased water pipe systems.

HERRINGBONE

Plank size: 125mm x 600mm x 5.5mm

Pack size: 1.5m²

Our Rigid Senses Herringbone range has a Registered Embossed surface that perfectly recreates the authentic look and feel of wood.

Rigid Senses Herringbone gives classic styling with a smart, modern twist.

FREQUENTLY ASKED QUESTIONS

Everything you need to know about Malmo™ Rigid LVT flooring.
If you can't find the answer you're looking for, please see the website www.malmoflooring.com or contact sales@malmointernational.com

WHAT IS RIGID VINYL FLOORING (SPC)?

Rigid vinyl flooring is a type of vinyl flooring with a solid core made from stone plastic composite (SPC) that makes it stable, durable, and waterproof.

IS MALMO FLOORING WATER-PROOF?

Malmo™ planks and tiles are 100% waterproof, making them ideal for kitchens, bathrooms, utility rooms and other areas of the home where moisture is a concern.

CAN IT BE INSTALLED OVER EXISTING FLOORING?

Yes. Malmo™ can be installed over existing hard floorcoverings so long as they are smooth, level and sound. Never lay a Malmo™ floor over existing vinyl flooring or textile floor coverings.

IS IT SUITABLE FOR UNDERFLOOR HEATING?

Yes, Malmo™ flooring can be used with embedded water based systems so long as their thermostat measures the ground temperature to ensure it doesn't exceed 27°C.

DO I NEED TO USE UNDERLAY?

Malmo™ rigid vinyl flooring comes with a built-in underlay saving you time and money. The underlay is formulated specially for the flooring it's attached to so no additional underlay should be used in the installation.

HOW DURABLE IS MALMO?

With proper care, SPC flooring is built for long-term use in both domestic and busier settings, thanks to its rigid core and protective wear layer that protects against scratches, scuffs and daily wear and tear.

IS IT SUITABLE FOR HOMES WITH PETS?

Absolutely. Malmo™ flooring is scratch resistant, waterproof, and easy to clean making it an excellent choice for pet owners.

WHAT WARRANTY IS INCLUDED?

Malmo™ Rigid LVT comes with up to a 25 year domestic warranty and a 10 year commercial warranty for complete peace of mind.

WHAT IS REGISTERED EMBOSSED?

Available in our Rigid Senses collection, Registered Embossed (EIR) means the texture is perfectly aligned with the printed design, replicating the look and feel of real wood.

WHAT IS 5G CLICK?

5G Click flooring is designed to lock together without glue, nails or adhesive. The short end of each plank locks into position through the use of a flexible insert that snaps into a groove, giving an audible click and a secure connection on both sides.

WHAT IS A FLOATING FLOOR?

A floating floor isn't fixed to the subfloor with glue or nails. Instead, the planks lock together via a click system to form one surface that rests on top of the subfloor. Because it's not fixed down, a floating floor needs a small expansion gap around the edges of the room and fixed objects to allow for expansion and contraction.

ENVIRONMENTAL RESPONSIBILITY

At Malmo™ we take our social and environmental responsibilities very seriously. We're committed to creating a safe and sustainable environment, and undertake a number of measures to ensure a positive contribution on the world we live in.

MANUFACTURE

At all stages of production - from raw material preparation and processing, through to product manufacture, packaging and transportation - we aim to use minimal amounts of energy (from renewable sources), and keep emissions to the lowest possible levels.

We follow three main principles regarding our waste output – in order of importance, these are:

1. REDUCE

2. REUSE

3. RECYCLE

Any unavoidable waste that is produced in the manufacturing process is repurposed for production of the bottom and middle layer of the product.

Our packaging is sustainably sourced and can be reused (wooden pallets) or recycled (cardboard).

DO NO HARM

No toxic chemicals or hazardous substances are emitted during the manufacture, installation or life cycle of Malmo™ products.

Our LVT flooring is incredibly hardwearing and low maintenance, offering a significant usage lifespan backed with up to 25 years warranty. Designed to last, it also requires no repair or upkeep that involves oils, chemicals, sanding or other product usage or potential chemical emissions.

PHthalate FREE

Phthalates are used as plasticisers for many products, including flooring, to make plastics more flexible. This flexibility is a fundamental characteristic of LVT flooring, however Malmo™ is completely phthalate free, instead using the same safe plasticisers used in food containers and young children's toys. This ensures healthier living spaces, and enables our customers to achieve higher standards of sustainability.

**SUSTAINABILITY IS A MALMO™ CORE
VALUE, AND AS SUCH ALL OUR
PRODUCTS ARE AWARDED WITH
GREENGUARD, FLOORSCORE, ISO9001
AND ISO14001 CERTIFICATION.**
