

THE MINDTRAP

ESCAPE ROOMS

World-Famous Escape Rooms Built for Business

Global Leadership

We design and build the most advanced, automated escape rooms in the world. With more than 300 active rooms built across 30 countries, our systems are proven to entertain players and make money for owners.

Why Our Rooms Are Different

✓ **Thematic Excellence:**

Exceptional, movie-grade set design built with tough, industrial-quality materials for ultimate player immersion.

✓ **Zero Padlocks:**

100% electronic games. Puzzles react instantly to player touch, weight, or actions.

✓ **2-Way Automation:**

Gives players a perfectly smooth game flow while giving staff automatic and effortless room management.

Big Profits in Small Spaces

Smart Space Design

Every family entertainment center (FEC) needs to make good money from its floor space while keeping labor costs low. The MindTrap rooms fit easily into any existing venue layout as a highly efficient revenue generator.

The Business Advantages

High Income per m^2:

Excellent hourly revenue inside a compact 25–45 m^2 footprint, much smaller than bowling or karting.

New Audiences:

Instantly attract high-spending adults, corporate team-building events, and teenagers.

Premium Pricing:

Escape rooms command one of the highest ticket prices per guest among indoor attractions.

Tough Construction Stunning Design

Made for Heavy Use

Beautiful artistry mixed with tough materials, built to handle large crowds every day without wearing down.

Our Factory Building Standards

- **Industrial Materials:**

Heavy-duty wood, composites, and metal frames built for total structural stability.

- **Studio-Level Textures:**

Hand-painted, commercial-grade coatings that look exactly like real, authentic stone, wood, and concrete.

- **Cinematic Detailing:**

Beautifully designed puzzle props and interactive set pieces built to amaze players while resisting heavy wear and tear.

Flexible Layouts for Your Floor Plan

Smart Space Configuration

The MindTrap layouts are custom-designed to fit neatly into your existing building space without wasting a single square meter. Connected to our automated networks, we can arrange the rooms back-to-back, side-by-side, or as a self-contained corner attraction.

Space and Location Guidelines

Single Room Size:

Requires an average of 25 to 35 square meters of floor space.

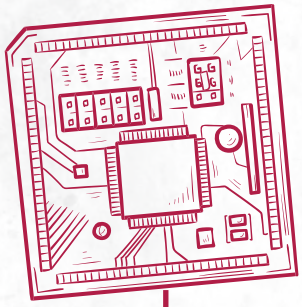

4-Room Cluster Size:

Fits perfectly inside a compact 200 to 250 square meter zone, including player hallways, shared facilities and the reception counter.

Easy Venue Integration:

Installs smoothly alongside your existing attractions and high-traffic customer areas.

Industrial Electronics. Zero Maintenance

The Electronic Backbone

Every MindTrap room runs on custom-designed, industrial electronic circuit boards (PCBs) built in-house for reliable performance and zero repair headaches.

High-End Hardware Features

Instant Reaction:

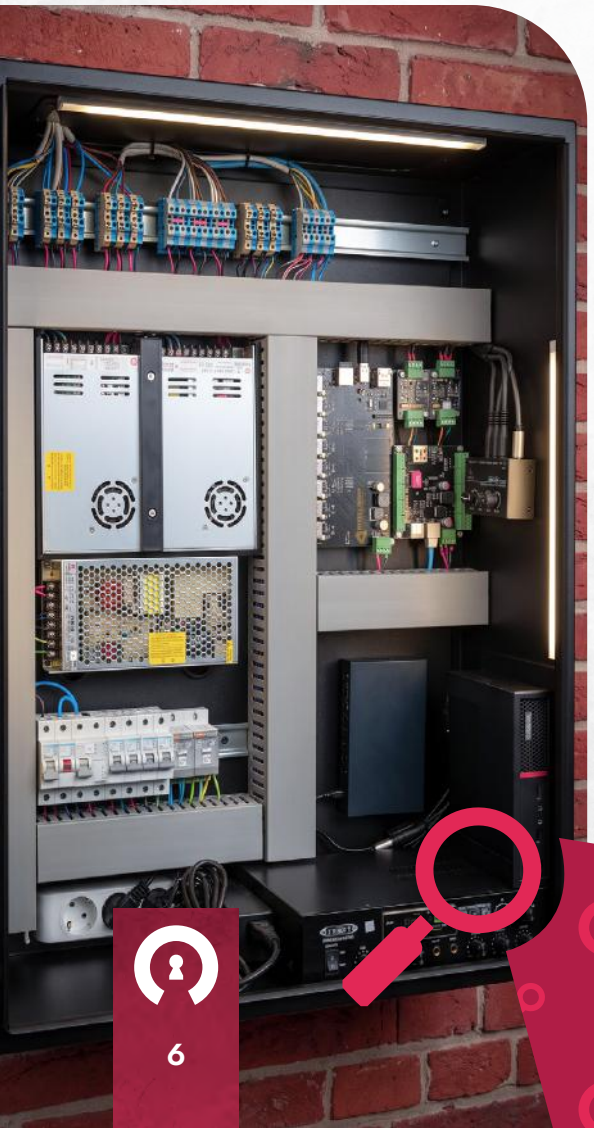

Customized microprocessors trigger the next game step with zero delay the exact moment a puzzle is solved.

Smart Hidden Sensors:

Motion detectors, weight sensors, and laser beams create reliable gameplay without moving parts that break.

Stable Wireless Links:

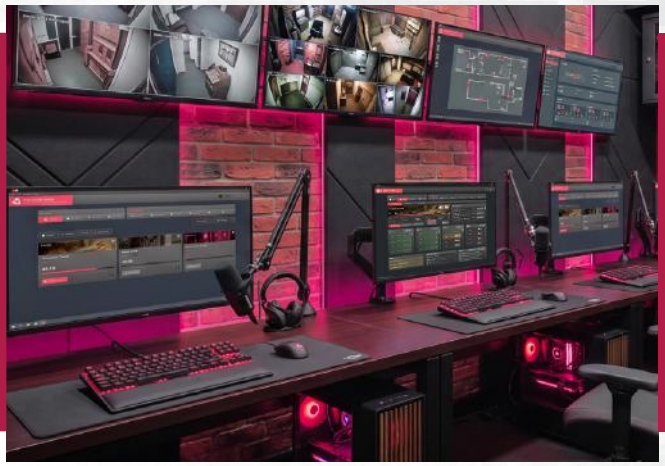

All game elements connect directly to the main server, eliminating messy, fragile wall wiring.

One Staff Member Four Escape Rooms

The Central Software HUB

Smart operating software connects your players, game props, and front-desk team into a single automated engine to save thousands in monthly payroll.

How the Automated System Works

Automatic Game Progression:

The system tracks player actions in real-time, instantly triggering sound effects, light changes, or door unlocks.

Smart Clue System:

Automatically plays audio clues if a team gets stuck, keeping players happy without staff intervention.

Central Desk Control:

A single employee at your reception desk can smoothly monitor, run, and operate up to 4 escape rooms at the same time.

Two Ways to Grow Your Business

Choose Your Path

We offer two distinct business models using the exact same high-quality escape room production. You choose the level of operational support and brand power that matches your business goals.

1. The MindTrap Partnership

Operate your business under our internationally recognized brand name. This is a complete, ready-to-run entertainment business system.

- **What you get:**

World-class games, our trademark logo, custom website, integrated booking platforms, in-store marketing & merch, ongoing marketing campaigns, and 24/7 emergency support.

2. Escape Room-Only

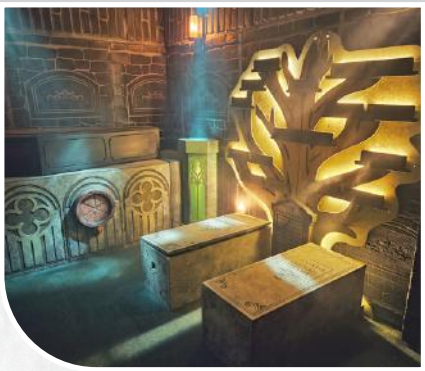

Buy our rooms as standalone experiences to add to your existing venue. You handle your own branding, marketing, and daily booking platforms.

- **What you get:**

The complete game scenario, all props, themed sets, and full technical support.

- **Installation flexibility:**

You can choose to have our expert crew assemble the rooms for you, or use your own local team with our manuals.

The Complete Business Launch Kit

THE MINDTRAP
ESCAPE ROOMS

More Than Just a Build

Aside from standalone attractions under your own label, you can also operate a fully branded MindTrap Partnership. We give you a complete business system. You get everything needed to market, launch, and run your new investment successfully.

Marketing and Operational Assets Included

Lobby and Signage Layouts:

Full design blueprints for your building's entrance, lobby, and hallways.

Online Booking System:

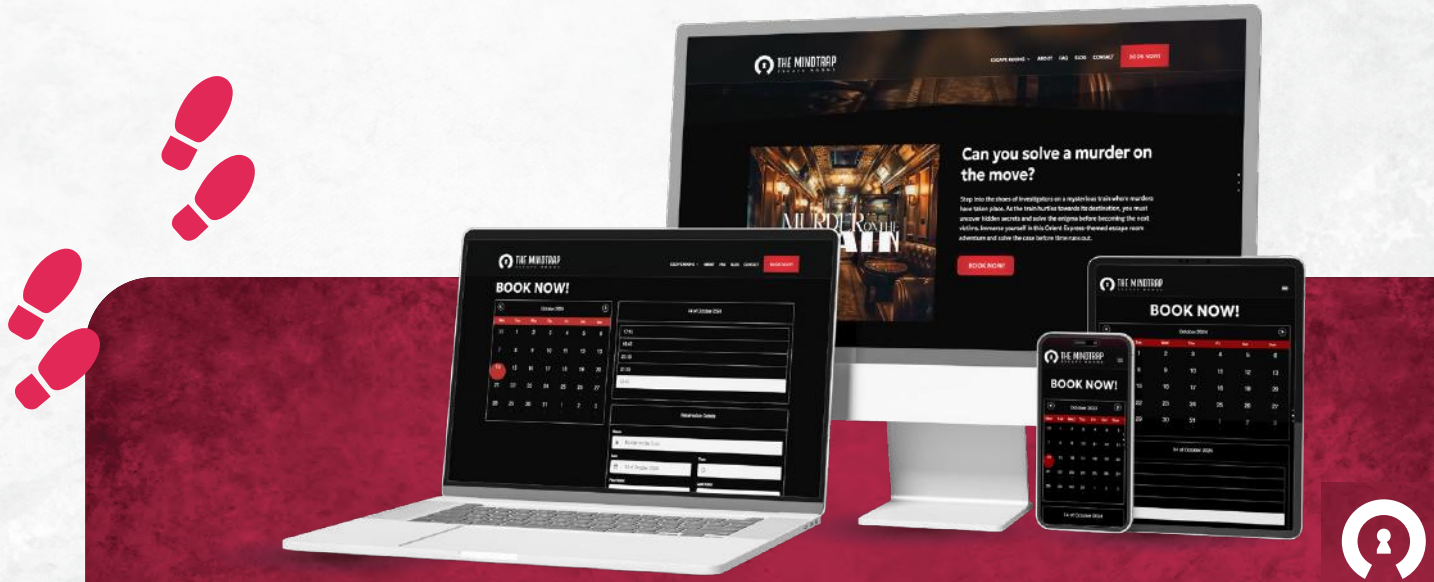

Fast, mobile-friendly website with an integrated calendar and player database (CRM).

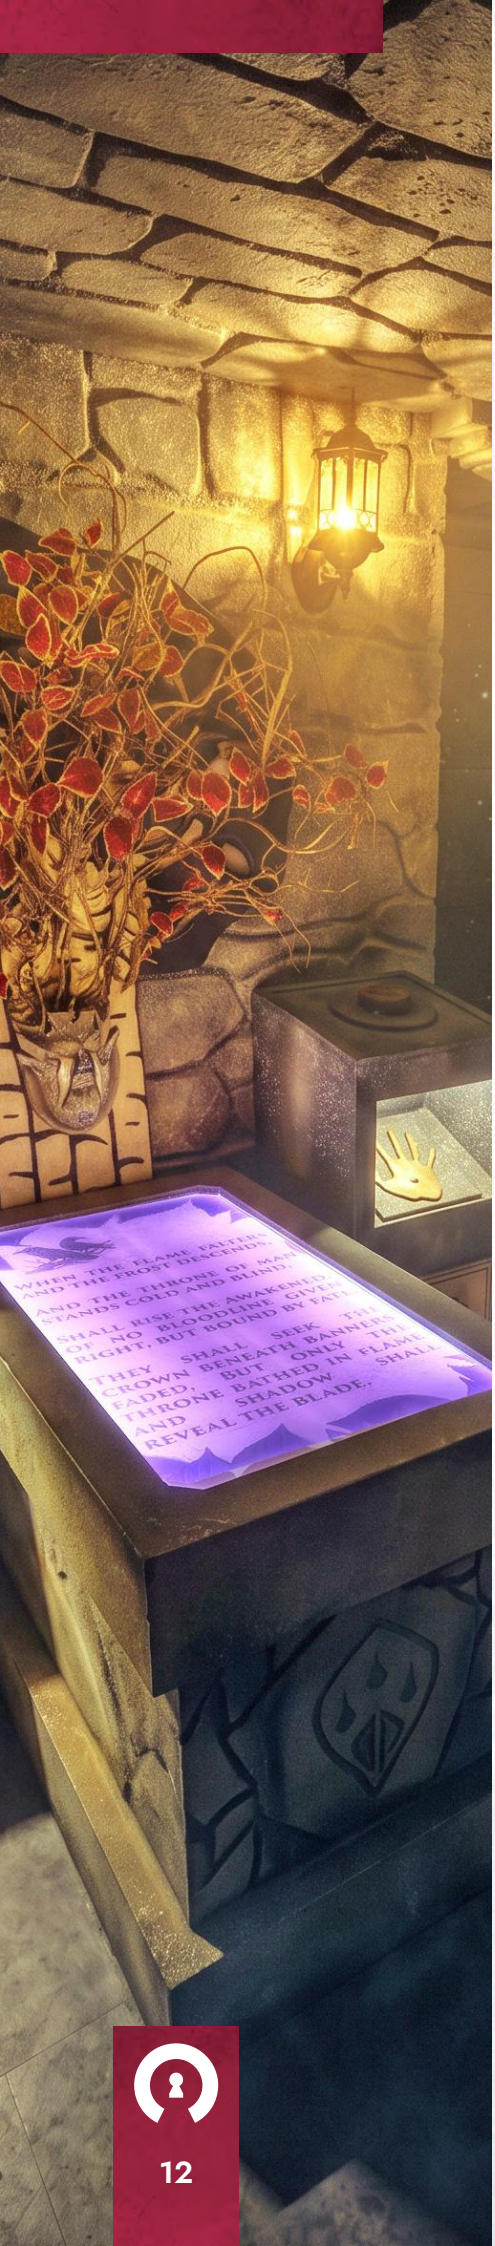

Creative Media Library:

High-definition video trailers, social media graphics, and poster designs.

Staff Playbooks:

Step-by-step training manuals and daily workflows for smooth operations.

Ongoing Support Schemes

Operating a non-MindTrap Escape Room?

If you buy an Escape Room-Only solution, we strongly recommend you to obtain one of the two support solutions below. We are worldwide known for our excellent live support tools, an investment that can save you thousands, especially during busy days.

- **What it covers:**

Priority access to our online digital ticketing system (support.iegroup.gr), immediate remote software troubleshooting, and direct discounts on physical replacement parts sent from our factory.

- **Without a support plan:**

Technical assistance is limited, response times are slower, and any required troubleshooting or on-site engineer visits are billed separately at standard hourly rates.

Quickstart
5 Steps to Launch

Launching a new attraction or upgrading your venue follows a simple 5-step process. We handle design, manufacturing, and installation from start to finish.

1 Send Your Floorplan

What You Do: Send us your space drawing (CAD file or PDF) with room size, ceiling height, and door locations.

What We Do: Our engineers check your space and draw the entry, exit, and emergency walking paths.

What You Get: A complete check report showing how your space will be used.

2 Layout & Proposal

What We Do: Our design team creates a 3D visual model of your venue to show how the games fit and how guests move.

What You Get:
- 3D pictures showing how your venue will look when finished.
- Hourly guest capacity calculation.
- Clear, fixed price quote with no extra fees.

What You Do: Review the 3D pictures, ask for any changes, and approve the plan.

3 Contract & Factory Build

What Happens: The contract is signed and your deposit is confirmed.

What We Do: Production starts in our factory in Greece. We build frames, paint themed walls, assemble hardware, and program the software.

What Your Local Team Does: We send your contractor simple drawing guides for wall locations, floor leveling, and power plug spots.

4 Shipping & Fast Setup

What We Do (Shipping): All pre-wired parts are packed safely in wooden boxes and shipped to your venue address.

What We Do (On-Site Setup): Our technical team arrives at your venue, builds the physical frames, routes wires, plugs in sensors, and tests all safety features.

What You Provide: Unloading staff (porters), a forklift or pallet jack to unload boxes, waste bins for packaging, and local hotel rooms for our crew

5 Staff Training & Opening

What We Do: We train your staff, show them how to turn the system on and off, set up software licenses, and help you open.

What You Get:

- Simple staff operation manuals and guides.
- Access to your central admin dashboard and scoreboard software.
- A spare parts box with extra sensors, boards, and common wear items.

The Result: Your doors open, your staff is fully trained, and your venue starts taking paying guests!

Project Deliverables

What Comes in Your Factory Order

This master table consolidates all physical, digital, and operational deliverables across our five product lines.

Deliverable Category	THE MINDTRAP ESCAPE ROOMS	ESCAPE ARCADE	AGENT FACTORY	The MiND golf	Social Lanes
Physical Construction & Props	Scenic wall panels, themed doors, props, set decorations	Scenic wall panels, interior doors, props, set decorations	Industrial mission frames, thematic walls, in-game mechanisms	Complete courses, commercial turf, solid borders, lane props	Handcrafted timber tracks, grass carpet, floral arches, mechanical obstacles

Production Roadmap

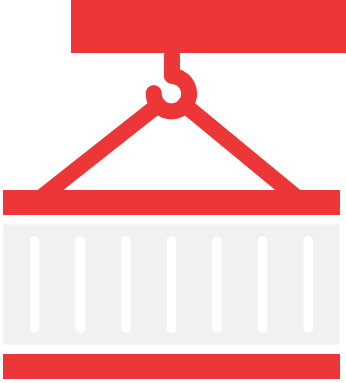

Timeline from plan to operation

Manufacturing timelines vary by product line, but all follow shared layout, shipping, and setup schedules.

*Shipping estimates are based on EU delivery. Non-EU and overseas destinations require additional time for ocean freight and customs processing.

Import Tariffs, Customs & Financial Optimization

Clearing Customs Outside the European Union

All physical components are engineered and manufactured in our central factory in Greece (EU). For clients importing products outside the EU, our itemized billing structure helps minimize import tariffs legally and transparently.

How Tariff Exemption Works:

Physical materials (timber, steel, plastic, turf) are subject to local import taxes outside the EU. However, **software logic, layout engineering, CRM software, brand IP, and game scenarios represent roughly 50% of the total invoice value.** In most non-EU countries, these digital and design assets are **tariff-exempt**.

How We Support Your Customs Broker:

Itemized Commercial Invoices: We separate physical goods from digital software licenses and engineering fees.

HS Code Classification: Every shipment includes standardized Harmonized System tariff codes for fast customs processing.

Customs Documentation: Full packing lists, certificates of origin, and freight manifests are provided prior to vessel arrival.

Operational & Technical FAQs

Clear Answers for Venue Operations

1. How many staff members are needed to run these attractions?

Our attractions are engineered for high central automation.

Escape Arcade & Social Lanes:
0 staff required (100% self-service or unstaffed).

Escape Rooms, Agent Factory & MindGolf:
1–2 staff members can easily oversee an entire multi-attraction zone thanks to automated RFID check-in, self-resetting puzzles, and central hint software.

2. What happens if hardware or tech breaks after launch?

Every product includes a **1-year hardware warranty** and a dedicated **Spare Parts Kit** containing backup sensors, boards, and key wear items. For networked products, our Greece-based engineering team provides remote cloud diagnostics to troubleshoot issues instantly.

3. How complex is daily maintenance?

- **Software-Driven Products (Agent Factory, Escape Rooms, MindGolf):** Automated system resets require minimal to zero manual prop repositioning between games. Daily startup takes 5 minutes via the central dashboard.
- **Mechanical & Modular Products (Social Lanes, Escape Arcade):** Heavy-duty timber, commercial turf, and tethered props eliminate electronic failure points and require basic cleaning only.

4. Can we update software or game content later?

Yes. Cloud updates continuously push software improvements, new game modes, and seasonal scoring tweaks. Scenario refreshes can be deployed remotely without changing physical room structures.

Getting Started FAQs

Clear Answers for Investment & Delivery

5. What are the standard payment terms?

Our milestone structure is:

50% Deposit: Secures layout engineering, CAD plans, and factory production start.
30% Factory Dispatch: Paid on the day manufacturing is finished and leaving our facility.
10% Turnkey Handover: On the day installation, safety testing, and training are complete.
10% Post-Launch: Paid 30 days after your venue opens for live operation.

6. What site preparation is required from our side?

In short, you handle basic venue prep: building the walls, completing the electrical work, and preparing the space per our technical plans. Proper completion of these tasks is **critical for a correct and on-schedule installation**. Visit **iegroup.gr/liabilities** for your full commitments.

7. Can we expand our venue with additional attractions later?

Yes. All systems share a standardized central platform. You can start with 9 Social Lanes or 10 Agent Factory missions and expand your footprint as your venue revenue grows.

Ready to Start Your Project?

Send your DWG/CAD floorplan and target capacity goals to our team.
You will receive a custom 3D spatial layout, capacity analysis,
and itemized proposal within ***5* business days.**
