LISTINO PREZZI

Il presente listino decorre dal **1 settembre 2024** ed annulla e sostituisce ogni precedente. I prezzi indicati, espressi in euro, sono al pubblico e da intendersi come consigliati. Le forniture ed i contratti conclusi con Meridiani s.r.l. saranno effettuati in base al listino in vigore alla data della conferma d'ordine e disciplinati dalle sottoelencate condizioni. Meridiani srl non autorizza la vendita dei propri prodotti on line tramite siti di e-commerce o di altra natura.

ORDINI

L'ordine si intende accettato da Meridiani s.r.l. soltanto al ricevimento da parte del cliente della conferma d'ordine, che avverrà entro un massimo di 10 (dieci) giorni lavorativi. L'invio dell'ordine costituisce da parte dell'acquirente la conoscenza e la relativa accettazione in toto delle condizioni generali di vendita.

Qualora la conferma d'ordine non rispecchi l'ordine originale, tali variazioni si considerano interamente e tacitamente accettate dal cliente trascorsi 5 (cinque) giorni lavorativi dal ricevimento della conferma d'ordine stessa.

Le variazioni sugli ordini già confermati potranno essere accettate da Meridiani s.r.l. solo se effettuate per iscritto nei 5 (cinque) giorni lavorativi successivi all'invio della conferma d'ordine da parte di Meridiani s.r.l.; salvo eventuali approvvigionamenti concordati per i quali sarà richiesto il risarcimento.

Se non diversamente specificato, l'ordine si intende destinato al territorio nel quale l'acquirente è ubicato.

Nel caso in cui l'acquirente effettui vendite dei prodotti fuori dal territorio in cui è ubicato senza preventiva comunicazione, si assumerà in via esclusiva ogni conseguenza al riguardo, liberando Meridiani da qualsiasi responsabilità civile o penale, impegnandosi in ogni caso al pagamento del corrispettivo. A tale scopo, l'acquirente si impegna a comunicare all'atto di trasmissione dell'ordine l'eventuale destinazione della merce fuori dal territorio nel quale è ubicato.

CONSEGNE

I termini di consegna riportati nella conferma d'ordine hanno valore puramente indicativo ed in ogni caso si riferiscono alla data di consegna allo spedizioniere o vettore, restano sospesi in caso di mancato pagamento e/o fino alla comunicazione da parte dell'acquirente dei dati per la corretta evasione dell'ordine. Meridiani s.r.l. non accetta penali o responsabilità per ritardata consegna.

La consegna/ritiro dei prodotti potrà essere rinviata - su richiesta dell'acquirente - per un massimo di giorni 15 (quindici) dalla data di consegna prevista in conferma d'ordine.

Decorso tale termine saranno addebitati all'acquirente i seguenti costi di stockaggio da saldare prima del ritiro della merce: € 8,50/mc per movimentazione + € 0,50/mc al gg per deposito.

TRASPORTI

Il trasporto dei prodotti aventi un valore complessivo superiore ad Euro 800,00 (prezzo netto) è effettuato a spese di Meridiani s.r.l. per i seguenti Paesi: Italia, Svizzera, Austria, Germania, Benelux, Francia, Spagna, Portogallo, Danimarca, Norvegia, Svezia, Finlandia, Irlanda e Gran Bretagna.

Per i restanti Paesi - europei ed extra europei - il trasporto è escluso e quindi il prezzo è da intendersi franco fabbrica Misinto (Italia); il relativo trasporto sarà a cura, spese e rischio dell'acquirente.

In caso di importo ordine netto inferiore ad Euro 800,00, Meridiani s.r.l. addebiterà i seguenti contributi spese di trasporto:

- per Italia, Austria, Germania, Benelux, Francia: Euro 80,00;

- per Svizzera, Spagna (isole incluse), Portogallo, Irlanda, Gran Bretagna: Euro 110,00;

Per Gran Bretagna saranno addebitati anche Euro 70,00 per le spese di sdoganamento.

- per Danimarca, Norvegia, Svezia, Finlandia: Euro 140,00.

Per spedizioni dei soli tessuti a taglio Meridiani s.r.l. addebiterà i seguenti contributi spese di trasporto:

- per Italia, Austria, Germania, Benelux, Francia: Euro 40,00;

- per Svizzera, Spagna (isole incluse), Portogallo, Danimarca, Norvegia, Svezia, Finlandia, Irlanda, Gran Bretagna: Euro 50,00.

Per Gran Bretagna saranno addebitati anche Euro 70,00 per le spese di sdoganamento.

La consegna della merce sarà effettuata solo all'indirizzo del committente segnalato sulla bolla di consegna, ulteriori movimentazioni sono escluse dalla copertura assicurativa.

Spetta al destinatario verificare il numero dei colli e lo stato dell'imballaggio prima del ritiro e fare le dovute riserve allo spedizioniere, essendo quest'ultimo responsabile di mancanze o avarie, che non potranno in alcun modo e per nessuna ragione essere imputate a Meridiani s.r.l..

Al ricevimento della merce apporre sempre la dicitura "con riserva" sul CMR fino a verifica dei colli; qualora all'apertura dei colli venissero riscontrati danni di trasporto gli stessi sono da segnalare entro il termine massimo di cinque giorni dal ricevimento della merce.

Vi segnaliamo che sugli imballi di alcuni articoli (in particolare prodotti in legno, vetri, marmi etc.) verrà applicato l'indicatore d'urto Shockwatch: etichetta adesiva in grado di rilevare e segnalare in maniera univoca urti dovuti ad un'errata movimentazione durante il trasporto o lo stoccaggio delle merci.

Attenzione: la presenza di una colorazione rossa dello Shockwatch segnerà un urto potenzialmente dannoso. Accettare la merce con riserva e verificare immediatamente il contenuto. I prodotti a cui è applicato l'indicatore d'urto sono evidenziati sui relativi documenti di trasporto.

Eventuali danni di trasporto - visibili al momento della ricezione - dovranno essere segnalati sul CMR e comunicati entro massimo giorni cinque dalla data di ricezione della merce. Tali segnalazioni dovranno essere corredate con foto fatte all'apertura del collo danneggiato e con il materiale dell'imballo ancora presente. Le merci dichiarate danneggiate dovranno essere a disposizione del trasportatore nel loro imballo originale per il ritiro.

Non verranno accettati reclami di prodotti sprovvisti dell'imballo originale e/o danneggiati da successive movimentazioni. Non verranno accettati reclami a consegna avvenuta all'utente finale.

Per trasporti di prodotti che necessitano di imballaggi speciali (con gabbie di legno o altro) Meridiani s.r.l. addebiterà all'acquirente il puro costo del materiale.

Sono tassativamente escluse le consegne a clienti privati.

PAGAMENTI

Le modalità di pagamento e i relativi termini sono indicati nella conferma d'ordine.

I pagamenti devono essere fatti alla Meridiani s.r.l.; non si riconoscono pagamenti fatti a terzi salvo autorizzazioni per iscritto della Meridiani s.r.l. stessa.

Meridiani s.r.l. si riserva il diritto di sospendere le forniture qualora le condizioni economiche dell'acquirente fossero tali da mettere in pericolo il conseguimento del pagamento. Nel caso vengano concordati pagamenti frazionati, il mancato rispetto anche di una sola scadenza comporterà la decadenza dal beneficio del termine e Meridiani s.r.l. potrà richiedere l'immediato versamento dell'intero importo.

I beni oggetto della compravendita rimangono di proprietà della Meridiani s.r.l. fino al completo pagamento ed incasso dell'intero importo vantato nei confronti dell'acquirente. In caso di mancato pagamento di tutto o di una parte del credito vantato, Meridiani s.r.l. avrà diritto di ottenere l'esecuzione coattiva dell'obbligazione di pagamento rimasta inadempita o in alternativa la risoluzione del contratto e l'eventuale restituzione dei prodotti ed il risarcimento dei danni.

Il cliente autorizza la Meridiani s.r.l. con l'invio dell'ordine di acquisto ad esercitare il diritto di riservato dominio in caso di inadempienza anche parziale.

L'acquirente non può sospendere, ritardare, trattenere o compensare i pagamenti neppure in caso di contestazione, reclamo o ritardo nella consegna da parte di Meridiani.

Meridiani avrà il diritto di imputare i pagamenti a saldo delle fatture più anteriori nel tempo, maggiorate dei costi e degli interessi di mora.

PRICE LIST

The current pricelist is valid from **1st September 2024** and cancels and replaces all previous ones. The remarked prices are in Euro and intended as suggested to the public. Supplies and contracts with Meridiani s.r.l. will be carried out on the basis of the valid list on the date of the order confirmation and will be disciplined by the conditions below. Meridiani does not authorize any online sale of its products through e-commerce or any internet sites.

ORDERS

The order is considered accepted by Meridiani s.r.l. only once the client receives the order confirmation, within 10 (ten) working days at the most.

The sent order implies the complete knowledge and acceptance of the general sales conditions.

Whenever the order confirmation contains changes to the original order, these changes are considered entirely and tacitly accepted by the client after 5 (five) working days from order confirmation receipt.

Changes to already confirmed orders can be accepted by Meridiani s.r.l. only if in writing and within 5 (five) working days from the mailing of the order confirmation and confirmed by Meridiani s.r.l.; except in case of agreed procurement for which compensation will be due.

Unless otherwise specified, the order is intended for the territory in which the buyer is located.

In case the buyer sells the products out of the region for which these products were meant by Meridiani without prior communication, only the buyer will bear the consequences by excluding Meridiani from any civil or penal liability commitment for these sales, as well as being committed to a full goods payment. For this reason, the buyer undertakes to communicate the eventual destination of the goods outside the territory in which it is located when placing the order.

DELIVERIES

Terms of delivery shown in the order confirmation have a merely guideline value and in any case they are referred to the date of delivery to the forwarding agent or carrier. Deliveries will be suspended until all outstanding payments have been settled and / or necessary information for the execution of the order have been received. Fines for delayed delivery responsibility are excluded.

The delivery/pick-up of goods can be postponed - on buyer's request - for 15 (fifteen days) max on the scheduled collection date remarked on our order confirmation.

After this deadline the following stocking costs will be charged and should be paid before goods' collection: € 8,50/m³ for handling + € 0,50/ m³ per day for stocking.

TRANSPORT

Transport for goods worth more than Euro 800 (net price before tax) is at Meridiani's expense for the following countries: Italy, Switzerland, Austria, Germany, Benelux, France, Spain, Portugal, Denmark, Norway, Sweden, Finland, Ireland and Great Britain. For all other countries - European and extra European - transport is excluded, therefore prices are ex works Misinto (Italy); transport is at client's expense and risk.

When transporting goods less than Euro 800 (eight hundred) worth, Meridiani s.r.l. will add the following contribution charges:

- to Italy, Austria, Germany, Benelux, France: Euro 80,00;
- to Switzerland, Spain (islands included), Portugal, Ireland, Great Britain: Euro 110,00;
To Great Britain Euro 70,00 extra will be debited for UK custom clearing duties.
- to Denmark, Norway, Sweden, Finland: Euro 140,00.

For transportation of fabric cuttings Meridiani s.r.l. will charge the following contribution charges:

- to Italy, Austria, Germany, Benelux, France: Euro 40,00;
- to Switzerland, Spain (islands included), Portugal, Denmark, Norway, Sweden, Finland, Ireland, Great Britain: Euro 50,00.
To Great Britain Euro 70,00 extra will be debited for UK custom clearing duties.

Delivery of goods will only reach the buyer's address as indicated on the delivery note; any other transport of the goods is not included in the insurance coverage.

It is up to the consignee to verify the number of items and to check the state of the package before accepting the goods. Any complaints must be made to the transporter in charge for anything missing and or defects which in no case can be attributed to Meridiani s.r.l.

When receiving goods always put the word "conditional" on CMR consignment note in order to be able to check the packages; in case any transport damages should be found at the opening of the packages, they should be reported no later than five days from the receipt of the goods.

We would like to remark you that on the cartons of some products (especially for wooden items, glasses and marbles...) the Shockwatch impact indicator will be applied: a label able to determine and remark if products have been dropped during transit or in storage.

Attention: Shockwatch indicator turns bright red when a potentially damaging impact occurs. In these cases, receive goods "under reserve" on the CMR consignment note and immediately check the contents. The products carrying this impact device are remarked on the relevant shipping note.

Any transport damages - already visible at the receipt of the packages - have to be indicated on CMR consignment note and reported no later than five days from the receipt of the goods.

These reports need to be supported with images taken at the opening of the damaged packages still showing the packing material. Goods claimed as damaged need to be made available, with their original packing, for the pick-up.

Claims for products without their original packing and / or damaged by any further handling of the goods will not be accepted. Claims remarked after delivery to end-clients will not be accepted.

For any transport requiring special packages (in wooden crates or other) Meridiani s.r.l. will charge the buyer the mere cost of the material.

Deliveries to end users are strictly excluded.

PAYMENTS

Means and terms of payment are given in the order confirmation.

Payments are to be made out to Meridiani s.r.l.; third party payments are not accepted unless previously authorized in writing by Meridiani s.r.l. itself.

Meridiani s.r.l. reserves the right to suspend supplies when buyer's economic conditions are such to put payments at risk, and in the case of agreed payment by instalments, missing even just one deadline will annul previous agreements and will give Meridiani the right to expect the immediate payment of the entire sum.

Products are property of Meridiani s.r.l. until the complete payment and cashing of the entire sum due by the buyer. In the case of a missed payment of all or even just a part of the due credit, Meridiani s.r.l. will have the right to obtain a forced obligation to pay the missing sum. Alternatively the contract will be revoked, goods returned and damage compensated. By sending out the purchase order the client authorizes Meridiani s.r.l. to exercise their rights of retention of title in any case of a non-fulfilment.

The buyer shall not have the right to suspend, delay, with hold or offset payments neither in case of disputes, complaints or delay in consignments by Meridiani s.r.l. Meridiani s.r.l. shall have the right to charge payments made to previous invoices, marked up by expenses and interest on arrears.

COURT OF COMPETENT JURISDICTION

OPEN AIR

Gli arredi per esterni, come qualsiasi materiale collocato all'aperto, anche se trattati con processi di finitura dedicati, sono destinati a subire nel tempo alterazioni di tipo cromatico e materiale, che sono dovute all'azione degli agenti atmosferici ed alle condizioni climatiche differenti per ogni area geografica (grado di umidità dell'aria, salinità, esposizione ai raggi U.V. e sbalzi termici).

Suggeriamo pertanto, per tutti i nostri prodotti openair, una collocazione ideale in verande e terrazzi coperti e/o semi coperti, comunque si sconsiglia l'esposizione diretta e prolungata alle intemperie.

La corretta manutenzione del prodotto rallenta e migliora i processi di alterazione dei vari materiali.

Per la manutenzione i prodotti devono essere lavati senza fare ricorso a detergenti aggressivi e devono essere asciugati rapidamente e accuratamente. Devono essere evitati i ristagni di acqua in qualsiasi parte del prodotto e si deve altresì evitare di urtare il prodotto provocando abrasioni che potrebbero incidere il trattamento protettivo effettuato sulle superfici dei materiali.

E altamente consigliato l'utilizzo delle "cover" impermeabili, così come la collocazione dei prodotti in ambienti protetti nel periodo in cui non vengono utilizzati in esterni.

LEGNO IROKO

Essenza pregiata proveniente da diverse zone dell'Africa centrale equatoriale, particolarmente indicata per gli utilizzi outdoor per la sua buona resistenza alle escursioni termiche, all'umidità e agli agenti atmosferici.

Il suo segno distintivo è la naturalezza, evidenziata da variazioni di colore, sfumature e tipiche venature del legno. Queste non sono da considerarsi difetti, bensì caratteristiche distintive che determinano l'unicità e la naturale bellezza del materiale.

L'esposizione agli agenti atmosferici può creare nel tempo una patina grigio-argentea sulla superficie del legno, frutto di un naturale processo di maturazione del materiale.

Il trattamento di verniciatura conferisce al supporto caratteristiche di idrorepellenza e protezione al viraggio del colore e alle muffe. Esso è idoneo solo per prodotti non esposti direttamente alle intemperie.

Manutenzione

Il massello di iroko necessita di una manutenzione semplice; residui di sporco possono essere asportati con l'ausilio di un panno umido e successivamente il legno può essere asciugato con un panno morbido.

Evitare ristagni di acqua e sostanze liquide che potrebbero danneggiare la superficie.

LACCATURA OPACA

La laccatura opaca liscia per esterni è realizzata con speciali vernici acriliche pigmentate, applicate su un fondo preparato con materiali sempre idonei per uso esterno.

Manutenzione

Per la pulizia dei prodotti laccati, si consiglia di utilizzare un panno morbido leggermente inumidito. Evitare l'utilizzo di detergenti aggressivi, liquidi corrosivi e spugne abrasive. Non esporre a fonti di calore diretto e non appoggiare corpi incandescenti.

ALLUMINIO

L'alluminio è un materiale particolarmente adatto all'uso outdoor grazie alle sue caratteristiche che lo rendono resistente alla corrosione se esposto agli agenti atmosferici, all'umidità e in località marine. La leggerezza è una delle proprietà più apprezzate di questo materiale. Le strutture in alluminio vengono finite tramite verniciatura a polvere poliestere adatta per esterni, nei colori white - micaceo.

Manutenzione

La pulizia deve essere effettuata con acqua e sapone neutro e si deve evitare di incidere o scalfire la superficie verniciata. Non si devono utilizzare inoltre prodotti corrosivi che potrebbero intaccare la vernice o alternarne il colore.

METALLO ZINCATO

Ottenuto tramite processo detto Sendzimir. Tale processo prevede un trattamento di zincatura superficiale mediante immersione in un bagno chimico, il quale deposita uno strato di zinco agendo da protettivo contro la corrosione.

Manutenzione

La pulizia deve essere effettuata con acqua e sapone neutro e si deve evitare di incidere o scalfire la superficie verniciata. Non si devono utilizzare inoltre prodotti corrosivi che potrebbero intaccare la vernice o alternarne il colore.

ACCIAIO AISI 316

L'AISI 316 è una lega d'acciaio austenitica, considerata tra le più resistenti fra quelle attualmente disponibili. Oltre al Carbonio, l'acciaio AISI 316 contiene Nichel, Cromo, Titanio, Niobio e Tantalio, elementi che gli permettono di garantire proprietà quali una un'elevata resistenza ad ogni fenomeno di corrosione, una grande facilità di pulizia e un elevato coefficiente igienico.

Grazie alle sue qualità, l'acciaio austenitico, nonostante il suo costo sia superiore a quello di altre tipologie, è un materiale assolutamente adeguato per utilizzo in ambito nautico e per la realizzazione di arredi per l'outdoor.

Manutenzione

L'acciaio può essere pulito con facilità utilizzando un panno morbido inumidito con acqua ed un sapone liquido a PH neutro. In nessun caso insistere sulle macchie con spugne abrasive o detergenti aggressivi.

VERNICI A POLVERE POLIESTERE

Gli arredi per esterni realizzati in acciaio e alluminio e metallo zincato vengono trattati con vernice opaca a polvere poliestere adatta per esterni, nei colori white - brick - putty - micaceo.

Manutenzione

I prodotti verniciati a polvere poliestere possono essere puliti con facilità utilizzando un panno morbido inumidito con acqua ed un sapone liquido a PH neutro. In nessun caso insistere sulle macchie con spugne abrasive o detergenti aggressivi per evitare di graffiare la superficie. Si deve altresì evitare di urtare il prodotto provocando abrasioni che potrebbero incidere il trattamento protettivo effettuato sulla superficie.

PIETRA LAVICA

Pietra lavica del vulcano Etna decorata a campo pieno con vetro recuperato da vecchi monitor TV e PC dismessi e trattata termicamente con un forno industriale a diversi cicli di cottura.

La pietra lavica vetrificata dopo questo trattamento risulta omogenea, liscia e lucida. Tale processo ne migliora le caratteristiche tecniche.

Colori disponibili: Red - Yellow - Grey - Asparagus.

Manutenzione

Per una corretta manutenzione ed una lunga durata consigliamo di procedere alla rimozione immediata di liquidi e macchie, di qualunque natura essi siano, utilizzando semplicemente un panno umido e morbido.

Per la normale manutenzione è sufficiente pulire le superfici con acqua e prodotti neutri. Evitare detergenti abrasivi, ammoniaci, candeggina, acido e agenti disincrostanti, compresi i "rimedi casalinghi" a base di limone, bicarbonato di sodio e simili.

Se la pietra è esposta costantemente ad acqua, è necessario pulire le superfici frequentemente in modo che il calcare o altro non abbiano la possibilità di estendersi e solidificarsi.

Non esporre a fonti di calore diretto e non appoggiare corpi incandescenti.

CEMENTO

Il cemento utilizzato per i prodotti Open Air di Meridiani non è un cemento tradizionale, ma un materiale innovativo brevettato con il nome di UHPC Ductal®, un cemento fibrorinforzato con caratteristiche tecniche certificate. Ogni elemento è frutto di una produzione industriale combinata con l'artigianalità degli operatori: il processo di finitura dei manufatti viene eseguito a mano garantendo l'unicità di ciascun pezzo.

La finitura grigio chiaro del cemento avviene tramite colorazione in massa che garantisce una maggior durata del colore nel tempo se sottoposto agli agenti atmosferici.

Non sono da considerarsi come difettosità eventuali striature di colore, micro-fori o la distribuzione disomogenea e irregolare della graniglia e delle fibre che emergono sulla superficiale del prodotto, ma caratteristiche proprie del materiale e del ciclo produttivo. Differenze di tonalità di colore, sono inevitabili in quanto dovute all'artigianalità della lavorazione. Non costituiscono difetto, ma sono ulteriore indice della qualità artigianale del prodotto. Tutti i piani della collezione Meridiani realizzati con questo materiale hanno un trattamento protettivo filmogeno, che protegge attraverso la creazione di una pellicola che conferisce idrorepellenza e buona resistenza alle macchie, a discapito di una minor resistenza al graffio. Le basi, invece, subiscono un trattamento protettivo ad assorbimento completo che li rendono più performanti al graffio e meno alle macchie.

Manutenzione

Per una corretta manutenzione ed una lunga durata consigliamo di procedere alla rimozione immediata di macchie e liquidi, di qualunque natura essi siano, utilizzando semplicemente uno straccio umido ed un panno morbido. Non utilizzare spazzole o spugne abrasive o detergenti acidi in quanto potrebbero intaccare in modo irreparabile la superficie del prodotto. Consigliamo l'utilizzo di prodotti per la pulizia a base cerosa utilizzati anche per il marmo oppure per macchie insistenti è possibile utilizzare soluzioni che contengono candeggina o ammoniacca diluite al 10%, cioè 1 parte di candeggina su 10 parti di acqua. Evitare ristagni di acqua e sostanze liquide che potrebbero danneggiare la superficie.

CORDA

Corde in polipropilene adatte ad uso esterno utilizzate anche nella nautica.

Le proprietà dei filati di polipropilene sono la tenacità, la resistenza all'abrasione e una buona resistenza all'azione degli agenti atmosferici.

I filati di polipropilene utilizzati per la realizzazione degli intrecci che caratterizzano i prodotti della collezione Open Air sono tinti in massa, antistatici, anti-muffa, anti-macchia, resistenti alla luce solare, alla salsedine e al cloro. Inoltre sono totalmente riciclabili.

Manutenzione

Le parti con intrecci in filato di polipropilene si puliscono facilmente con un panno morbido inumidito con acqua a bassa temperatura e un sapone a PH neutro. Una lunga esposizione al sole può causare nel tempo un viraggio del colore.

BATYLINE

Tessuto tecnico in poliestere rivestito in pvc, con cuciture termosaldate.

Tessuto ad elevato valore estetico di design e di comfort. Ottima stabilità dimensionale ed eccezionale resistenza alle condizioni esterne (UV, temperature, umidità, muffe, atmosfera marittima). Estrema resistenza agli strappi.

Rapidità di asciugamento grazie alla costruzione aperta. Una lunga esposizione al sole può causare nel tempo un viraggio del colore.

Manutenzione

Per una corretta manutenzione ed una lunga durata consigliamo di procedere alla rimozione immediata di macchie e liquidi, di qualunque natura essi siano, utilizzando semplicemente uno straccio umido ed un panno morbido. Non utilizzare spazzole o spugne abrasive o detergenti acidi in quanto potrebbero intaccare in modo irreparabile la superficie del prodotto.

IMBOTTITURE

Le imbottiture dei cuscini sono realizzate in poliuretano espanso e fibre poliestere anallergiche, materiali che garantiscono grande comfort ma possono subire nel tempo delle variazioni dimensionali dovute al normale corretto utilizzo. Le imbottiture Open Air sono dotate di fodere in tessuto tecnico idrorepellente.

Manutenzione

In caso di contatto con sostanze liquide o agenti atmosferici si consiglia sempre di rimuovere il rivestimento e asciugare l'imbottitura.

TESSUTI

I tessuti proposti per la collezione Open Air rispondono a requisiti specifici per l'utilizzo outdoor senza che ne venga compromesso l'aspetto, la mano e il colore. Hanno una buona resistenza alla luce del sole, alla salsedine, al cloro, agli acidi, alle creme solari, al sudore, alle macchie e all'usura. Per le caratteristiche specifiche e la manutenzione si prega riferirsi alle indicazioni riportate sui campionari e listini.

WATER PROOF COVER

Meridiani consiglia di proteggere gli arredi per esterni adottando le speciali fodere di protezione “water proof cover”, realizzate in tessuto tecnico impermeabile.

È buona norma accertarsi che i prodotti, i cuscini e le fodere “water proof cover” siano perfettamente asciutti prima di effettuare la copertura, per evitare l'accumulo di umidità e/o la formazione di macchie di muffa.

Le cover sono progettate e realizzate su misura per ogni singolo elemento. Il tessuto è realizzato appositamente per proteggere il mobile da pioggia, polvere, foglie ed escrementi vari nel periodo di non utilizzo. Le cuciture sono realizzate con un filo speciale water proof. Alla fine del processo di cucitura viene aggiunta un'ulteriore impermeabilizzazione con un prodotto spray silconico acquastop.

Alla base delle stesse è posta una coulisse che permette di chiudere la cover in modo che anche dal basso non possa entrare polvere.

Ogni singola cover è custodita in una sacca di TNT.

TAPPETI

Tappeti con struttura a maglia intrecciata realizzati assemblando tra loro trecce in polipropilene, dalle buone caratteristiche per l'uso in esterni, atossiche, anallergiche e riciclabili.

Tappeti tessili, che tendono a memorizzare e adattarsi alle superfici sottostanti.

Eventuali lievi variazioni di colore tra campione e tappeto fornito sono inevitabili, non danno diritto a reclami o resi.

Manutenzione

Le parti con intrecci si puliscono facilmente con un panno morbido inumidito con acqua a bassa temperatura e un sapone a PH neutro. Una lunga esposizione al sole può causare nel tempo un viraggio del colore.

I tappeti realizzati non richiedono una particolare manutenzione, per rimuovere la polvere utilizzare un panno morbido in microfibra, in caso di macchie utilizzare un panno morbido in microfibra inumidito con una soluzione di acqua a bassa temperatura e un sapone a PH neutro e risciacquare con acqua.

Non utilizzare panni in carta, spugne, prodotti abrasivi e spazzole con setole rigide le quali potrebbero portare a lesionare le fibre del polipropilene. Essendo la treccia un manufatto tessile si raccomanda di evitare lo sfregamento meccanico, i graffi e tutti gli usi impropri che potrebbero portare allo sfilacciamento delle trecce in polipropilene. Le trecce subiscono nel tempo alterazioni dovute a sollecitazioni d'uso che ne possono provocare il naturale allentamento.

Outdoor furniture, as any products placed outdoor, is subjected with time to color and material shading bound to exposure to atmospheric agents and different geographic locations (air humidity, salts, UV rays and temperature leaps), even if treated with proper suitable finish.

As a consequence, the ideal setting recommended by Meridiani for all our openair products is in covered or partially-covered verandas or terraces, anyway avoiding direct exposure to atmospheric agents.

A proper product maintenance reduces natural material aging.

For a proper maintenance products should be washed without using aggressive detergents and cleaned quickly and carefully. Avoid keeping stagnant water on the products, as well as hitting frames thus removing the protective finish from the surfaces.

Meridiani highly suggest covering the products with the special water-proof slipcovers, along with stocking them indoor during winter season.

IROKO WOOD

A precious wood that grows in several central equatorial African areas, it is mainly indicated for outdoor furniture, with its strong resistance to temperature changes, humidity and weather.

Its distinctive feature is the naturalness, highlighted by colour variations, shades and original veinings. These are not to be considered faults, rather distinctive features that determine the uniqueness and natural beauty of the material.

The exposure to atmospheric agents can gradually create a silver-grey patina on the wood surface, the result of a natural maturation process of the material.

The protective varnish that is applied adds a waterproof coating that also protects against color changes and mould. This particular coating protects the furniture against indirect exposure to adverse weather conditions.

Maintenance

Iroko hardwood requires only simple maintenance; dirt can be cleaned with a humid cloth and the wood can then be dried with a soft dry cloth.

Try to avoid leaving water or liquids on this wood, as they could stain it and damage the surface.

MATT LACQUER

The matt lacquer used for external furniture is made of special colored acrylic varnishes, that are applied on a base prepared with external use products.

Maintenance

We recommend the use of a soft humid cloth to clean the lacquered furniture. Avoid the use of strong detergents, corrosive liquids and abrasive sponges. Do not expose to direct heat or place any incandescent object on top of them.

ALUMINUM

Aluminium is a material particularly suitable for outdoor thanks to its characteristics that make it resistant to corrosion by adverse weather conditions, to humidity and in marine areas. Lightness is one the most appreciated features of this material. The aluminium structures are treated with a powdered polyester varnish, specifically created for outdoor use, in colours white - micaceo.

Maintenance

These products must be cleaned with neutral soap and water, paying special attention as not to scratch or damage the coating. Avoid using corrosive products as they could damage the coating or alter its color.

ZINC-COATED METAL

Made through Sendzimir process, which includes a surface zinc-coating treatment through immersion in chemical bath, creating a zinc-coated film that prevents corrosion.

Maintenance

These products must be cleaned with neutral soap and water, paying special attention as not to scratch or damage the coating. Avoid using corrosive products as they could damage the coating or alter its color.

AISI 316 STEEL

AISI 316 is an austenitic steel alloy that is considered one of the most resistant alloys available today. AISI 316 STEEL contains carbon, nickel, chrome, titanium, niobium and tantalum, creating a product with guaranteed high resistance to corrosion that is easy to clean and very hygienic.

Austenitic steel has many qualities, and although it has an elevated cost, it is perfectly suitable for any use in nautical environments and to create outdoor furniture.

Maintenance

This steel can be easily cleaned with a soft humid cloth with liquid neutral soap. Never rub stains with abrasive sponges or aggressive detergents.

POLYESTER POWDER COATINGS

Our outdoor furniture is made of steel and aluminum and zinc-coated metal that is treated with a matt polyester powder varnish, suitable for outdoor, in colours white - brick - putty - micaceo.

Maintenance

All our products coated with polyester powder coatings can easily be cleaned with a soft humid cloth and neutral liquid soap. Never rub stains with abrasive sponges or aggressive detergents to avoid scratching the surface. It is also important to avoid damaging the product and its protective coating.

LAVA STONE

Lava stone from Etna volcano, decorated with recycled old-discarded TV and PC monitors glass and thermal treated in industrial oven at different cooking stages.

After this process, vitrified lava stone appear homogeneous, smooth and shiny; technical features are herewith improved.

Available colours: Red - Yellow - Grey - Asparagus.

Maintenance

For proper maintenance and a long last, remove immediately liquids and stains of whatever kind, using a damp soft cloth.

For ordinary maintenance, clean surfaces with water and neutral products. Avoid using abrasive detergents, ammonia, bleach, acid or descalers, including “home remedies” with lemon, baking soda, or similar.

In case the stone is constantly exposed to water, the surface must be frequently cleaned to avoid limescale or alike from creating or expanding.

Do not expose to direct heat sources and do not place hot objects on the surface.

CONCRETE

The concrete used for Meridiani Open Air products is not a traditional one, but an innovative material patented with the name UHPC Ductal®, a fiber-reinforced concrete with certified technical characteristics. Each element is the result of an industrial production combined with the craftsmanship of the single operator: the finishing process of the products is carried out by hand, so that each piece is unique.

The light grey finish of the concrete is made through mass coloration, that guarantees longer lasting colour over time if in bad weather conditions.

Any halos, micro holes or an irregular widespread of grits or fibers on the product's surface cannot be considered as fault, but as features of raw material and manufacture process. Some differences in colour shades may occur as bound to handcrafted production. Cannot therefore not be considered as fault, but features.

All the tops of the Meridiani collection that are made with this material are coated with a protective film that makes the material waterproof and stain resistant, even if less resistant to scratching. The bases instead undergo a protective treatment with complete absorption, which make them more resistant to resistant to scratching but less resistant to stains.

Maintenance

We recommend the immediate removal of stains or liquids, of all kinds, simply using a humid cloth and a soft towel. Do not use brushes or abrasive sponges or acid detergents as they could irreparably damage the product surface. We recommend the use of wax based detergents used for marble, and for stubborn stains use 10% bleach or ammonia solutions, with 1 part of bleach for 10 parts of water.

Try to avoid leaving water or liquids on this concrete, as they could stain it and damage the surface.

ROPE

Polypropylene fiber rope is used outdoors as well as in nautical environment.

The properties of polypropylene fiber are tenacity, resistance to abrasion and adverse weather conditions.

Polypropylene fiber rope is used for the wicker work that characterizes the Open Air collection products. They are mass colored, antistatic, mold proof, stain proof, resistant to UV rays, to salt, and chlorine. They are also 100% recyclable.

Maintenance

The polypropylene fiber rope parts of this furniture can easily be cleaned with a humid soft cloth and neutral soap. Color may bleach if left out in direct sunlight for any length of time.

BATYLINE

Technical fabric in polyester covered in pvc, with heat-sealed seams.

This material has an aesthetically beautiful design and is comfortable. It has excellent dimensional stability and exceptional resistance to adverse weather conditions (UV, temperature, humidity, mold, marine environment). It does not tear. It dries rapidly because of its open construction. Color may bleach if left out in direct sunlight for any length of time.

Maintenance

We recommend the immediate removal of stains or liquids, of all kinds, simply using a humid cloth and a soft towel. Do not use brushes or abrasive sponges or acid detergents as they could irreparably damage the product surface.

FILLING

The cushion filling is made of polyurethane foam and hypo-allergenic polyester fibers, materials that can guarantee great comfort but that can change dimensions in time because of normal correct use. The Open Air cushion paddings are covered with a waterproof technical material case.

Maintenance

If these products get wet, we recommend that the covers be taken off and the fillings be dried as soon as possible.

MATERIALS

The materials used for our Open Air collections have been chosen because they are in compliance with an outdoor use and will not alter their aspect or color. They are resistant to direct sunlight, seawater, bleach, acids, solar creams, perspiration, and usage. Please refer to the indications that can be found on samples and catalogues for specific characteristics and maintenance.

WATER PROOF COVER

Meridiani recommends that this outdoor furniture be stored with the “water proof cover” made of technical waterproof material.

It is important to make sure the products, cushions and “water proof covers” are perfectly dry before storage, to avoid the accumulation of humidity and/or the formation of mold stains.

Covers are designed and produced to measure for every single unit. The fabric has features to protect the product from rain, dust, leaves and droppings, when it's not in use. Seams are made with a special waterproof thread.

At the end of sewing process, an additional waterproof finish through a water-stop silicone spray is added.

A drawstring makes it possible to secure the cover in order to avoid dust passing from the bottom.

Every single cover is packed in a fabric bag.

RUGS

Rugs with woven structure made of plaits in polypropylene, suitable for outdoor use, non-toxic, anti-allergenic and recyclable.

Textile rugs that may memorize and adapt to surfaces underneath.

Possible differences in shades between sample and delivered rug may happen; this may not be considered as fault or claim.

Maintenance

Woven parts can be easily cleaned with a soft damp cloth with mild water and neutral soap. Long term exposure to direct sunlight may turn over time into colour shading.

These rugs do not require special maintenance: to remove dust use a soft cloth in microfiber; of case of stains, use a damp cloth with mild water and neutral soap, then rinse with water.

Do not use paper cloth, sponges, abrasive and hard brushes that may damage polypropylene fibers.

Being the plait a textile product, any mechanical rubbing should be avoided, as well as scratches and improper uses that may lead to fraying of polypropylene fibers. Plaits are subjected to changes over time due to a proper use that may lead to a natural loosening.

Wie jedes Material, das im Außenbereich ausgestellt wird, können die Outdoor-Möbel, trotz spezieller Oberflächenbehandlung, im Laufe der Zeit chromatische und materielle Veränderungen erleiden, die von den atmosphärischen Einflüssen und unterschiedlichen klimatischen Bedingungen eines jeden geografischen Gebiets (z.B. Grad der Luftfeuchtigkeit, Salzgehalt, UV-Bestrahlung und Temperaturänderungen) abhängig sind. Wir empfehlen daher, unsere Open Air Produkte überdacht im Außenbereich auszustellen.

Eine korrekte Pflege der Produkte verlangsamt die Alterungsprozesse der verschiedenen Materialien.

Zur Pflege empfehlen wir, keine aggressiven Reinigungsmittel zu verwenden und die Produkte schnell und sorgfältig zu trocknen. Wasserstau und Kratzer können die Schutzbehandlung der Materialoberfläche beeinträchtigen.

Die Verwendung einer wasserdichten „Abdeckung“ wird empfohlen sowie die Lagerung der Produkte in einer trockenen Umgebung, wenn diese im Außenbereich nicht verwendet werden.

IROKO HOLZ

Hochwertige Holzart aus verschiedenen Regionen Zentralafrikas und aufgrund der guten Beständigkeit bei Temperaturwechsel, Feuchtigkeit und Witterungseinflüssen besonders geeignet für den Außenbereich. Besonderes Merkmal ist seine Natürlichkeit. Farbabweichungen, Unterschiede in Farbschattierungen und Maserungen sind daher nicht als Mangel des Materials zu betrachten, sondern als spezielle Eigenschaft des Massivholzes und seiner natürlichen Einzigkeit.

Aufgrund von Witterung kann mit der Zeit durch den Reifungsprozess ein grau-silberner Film auf der Oberfläche entstehen.

Der Meridiani Schutzlack verleiht dem Produkt wasserabweisende Eigenschaften und schützt vor Farbabweichungen und Pilzbefall. Auch diese Produkte sollten immer überdacht stehen.

Pflege

Iroko-Massivholz erfordert keine aufwendige Pflege. Schmutzreste mit einem feuchten Tuch entfernen. Anschließend das Holz mit einem weichen Tuch trocknen. Rückstände von Wasser und Flüssigkeiten sind zu vermeiden.

LACKIERUNGEN MATT

Bei der Ausführung für den Außenbereich aus Lack matt werden spezielle pigmentierte Acryllacke auf outdoor-beständiges Untermaterial aufgetragen.

Pflege

Zur Reinigung der lackierten Elemente ein feuchtes, weiches Tuch verwenden. Aggressive Reinigungs- und Lösemittel sind zu vermeiden. Nicht direkter Hitze und glühenden Gegenständen aussetzen.

ALUMINIUM

Aluminium ist ein korrosionsbeständiges Material und daher besonders geeignet in Außenbereichen mit extremen atmosphärischen Witterungseinflüssen, hoher Luftfeuchtigkeit und salzhaltiger Luft.

Eine weitere sehr geschätzte Eigenschaft ist seine Leichtigkeit. Die Aluminiumstrukturen werden mit einer für den Außenbereich geeigneten Polyesterpulverbeschichtung versehen und sind in den Farben white - micaceo.

Pflege

Zur Reinigung neutrale Seifenlauge verwenden. Aggressive Reinigungs- und Lösemittel sind zu vermeiden. Eventuelle Kratzer können die Schutzschicht der Strukturen zerstören.

VERZINKTES METALL

Es wird durch ein als Sendzimir bekanntes Verfahren gewonnen. Bei diesem Verfahren wird die Oberfläche durch Eintauchen in ein chemisches Bad verzinkt, wodurch sich eine Zinkschicht ablagert, die als Schutzschicht gegen Korrosion dient.

Pflege

Zur Reinigung neutrale Seifenlauge verwenden. Aggressive Reinigungs- und Lösemittel sind zu vermeiden. Eventuelle Kratzer können die Schutzschicht der Strukturen zerstören.

EDELSTAHL AISI 316

AISI 316 ist ein Edelstahl der neben Kohlenstoff auch Nickel, Chrom, Titan, Niobium und Tantal, enthält, und somit ein Material, das eine hohe Korrosionsbeständigkeit auszeichnet.

Dank seiner Eigenschaften ist Edelstahl für Außenbereiche und insbesondere für den Einsatz in Meeresnähe geeignet.

Pflege

Zur Reinigung ein weiches Tuch und neutrale Seifenlauge verwenden. Aggressive Reinigungs- und Lösemittel sind zu vermeiden.

POLYESTER PULVERLACKE

Die Outdoor-Möbel aus Edelstahl und Aluminium und verzinktem Metall werden mit matten Polyester-Pulverlacken in den Farben White - Brick - Putty - Micaceo lackiert, die für den Außenbereich geeignet sind.

Pflege

Zur Reinigung ein weiches Tuch und neutrale Seifenlauge verwenden. Aggressive Reinigungs- und Lösemittel sind zu vermeiden.

LAVASTEIN

Lavastein aus dem Vulkan Ätna wird mit Glas aus alten, ausgedienten Fernseh- und PC-Monitoren verziert und in einem Industrieofen in mehreren Brennvorgängen wärmebehandelt.

Das verglaste Lavagestein sieht nach diesem Verfahren homogen, glatt und glänzend. Außerdem werden die technischen Eigenschaften des Lavasteins verbessert.

Verfügbare Farbe: Red - Yellow - Grey - Asparagus.

Pflege

Für eine richtige Pflege und ein dauerhaftes Leben sollen Flecken und Flüssigkeiten, inklusive Wasser, sofort mit einem weichen nassen Tuch entfernt werden.

Die Oberfläche nur mit Wasser und neutrale Spülmittel reinigen.

Scheuernde Reinigungsmittel, Ammoniak, Bleichmittel, Säuren und Entkalkungsmittel, einschließlich Zitronen, Backpulver und ähnliche "Hausmittel" sind zu vermeiden.

Wenn der Stein ständig mit Wasser in Berührung kommt, sind die Oberflächen häufig zu reinigen, damit sich Kalk oder andere Stoffe nicht ausbreiten und verfestigen können.

Setzen Sie den Stein keinen direkten Wärmequellen aus und stellen Sie keine glühenden Gegenstände darauf.

BETON

Meridiani verwendet für ihre Open Air-Produkte keinen traditionellen Beton, sondern ein innovatives Material, das unter dem Namen UHPC Ductal® patentiert wurde. Es handelt sich hierbei um einen faserverstärkten Beton mit besonderen technischen Eigenschaften.

Jedes Produkt ist das Ergebnis einer industriellen Produktion kombiniert mit der Handarbeit des Verarbeiters: Die Produkte werden von Hand endgefertigt, um die Einzigartigkeit jedes einzelnen Stücks zu garantieren.

Die hellgraue Oberfläche des Betons entsteht durch das Durchfärben der Masse. Vorgehensweise, die auch unter aggressiven atmosphärischen Einflüssen eine länger anhaltende Färbung garantiert.

Halos, Poren oder unregelmäßige Verteilung von Sand und Fasern auf der Produktoberfläche sind nicht als Mangel zu betrachten, sondern als Eigenschaften des Werkstoffs und Herstellungsverfahrens. Eventuelle Farbabweichungen sind Folge der handwerklichen Verarbeitung des Produkts und daher kein Mangel.

Alle Beton-Platten der Meridiani-Kollektion werden mit einem wasserabweisenden Schutzfilm ausgestattet. Dieser bietet eine zusätzliche gute Fleckenbeständigkeit auf Kosten einer etwas geringeren Kratzfestigkeit. Die Unterstruktur wird dagegen einer vollständigen absorbierenden Schutzbehandlung unterzogen, die diese kratzfester jedoch weniger fleckresistent macht.

Pflege

Rückstände von Wasser und anderen Flüssigkeiten sind zu vermeiden. Flecken umgehend mit einem weichen feuchten Tuch beseitigen. Aggressive Reinigungs- und Lösemittel sind zu vermeiden.

Wir empfehlen wachshaltige Reinigungsmittel, die auch für Marmoroberflächen benutzt werden. Bei beharrlichen Flecken Mischungen von Bleichmittel oder Ammoniak-Lösung 10% mit Wasser im Verhältnis von 1:10 verwenden.

KORDEL

Kordeln aus Polypropylen eignen sich hervorragend für den Outdoor-Bereich und werden aufgrund seiner Reißfestigkeit, geringen Abnutzung und Witterungsbeständigkeit auch in der Bootsindustrie verwendet.

Polypropylen-Fasern sind durchgefärbt, und haben antistatische und schmutzabweisende Eigenschaften. Zusätzlich sind sie schimmelresistent und beständig gegen Witterungseinflüsse, UV-Strahlung, Salz und Chlor. Die Kordeln sind 100% recyclebar.

Pflege

Polypropylen-Kordeln mit einem weichen Tuch und Seifenlauge reinigen. Intensive UV-Strahlung kann auf Dauer zu Farbabweichungen führen.

BATYLINE

Technischer Stoff aus mit PVC überzogenem Polyester und thermoverschweißten Nähten. Ästhetisch mit hohem Designanspruch verbunden mit maximalem Komfort zeichnet sich das Material durch eine hohe

Reißbeständigkeit aus. Zusätzlich ist es schimmelresistent und beständig gegen Witterungseinflüsse, UV-Strahlung, Salz und Chlor.

Da Batyline keine Feuchtigkeit absorbiert, trocknet es schnell. Intensive UV-Strahlung kann auf Dauer zu Farbabweichungen führen.

Pflege

Rückstände von Wasser und Flüssigkeiten sind zu vermeiden. Flecken und Flüssigkeiten umgehend mit einem weichen feuchten Tuch beseitigen. Aggressive Reinigungs- und Lösemittel sind zu vermeiden.

POLSTERUNGEN

Die Polsterungen der Kissen bestehen aus PU-Schäumen und antiallergischen Polyesterfasern. Diese Materialien garantieren einen hohen Sitzkomfort, können jedoch im Laufe der Zeit durch die normale Nutzung im Tollerranzbereich liegenden Maßänderungen unterliegen.

Open Air Polsterungen sind mit wasserdichten Bezügen ausgestattet.

Pflege

Um nach Witterungseinflüssen das Trocknen der Polster zu beschleunigen, sollte zu diesem Zweck die Housse von den Polstern entfernt werden.

STOFFE

Die Stoffe der Open Air Kollektion entsprechen den hohen Anforderungen für einen Einsatz im Außenbereich, die garantieren, dass Aussehen, Haptik und Farbe unbeeinträchtigt bleiben. Zusätzlich sind sie schimmel- und fleckenresistent und beständig gegen Witterungseinflüsse, UV-Strahlung, Salz und Chlor, Säuren, Sonnenschutzmittel und Schweiß.

Alle weiteren Eigenschaften und Pflegehinweise können den Mustern und der Auflistung aller Stoffe in der Preisliste entnommen werden.

WASSERDICHTHE SCHUTZHÜLLEN

Meridiani empfiehlt die Abdeckung der Outdoor-Möbel bei Nichtgebrauch mit den speziellen passgerechten Schutzhüllen aus wasserdichtem technischem Stoff.

Vor dem Abdecken ist sicherzustellen, dass die Produkte, die Kissen und die wasserfesten Abdeckungen vollkommen trocken sind, um die Ansammlung von Feuchtigkeit und/oder die Bildung von Schimmel zu vermeiden.

Die Bezüge sind auf das Maß des jeweiligen Produktes abgestimmt und schützen somit gut vor Regen, Staub, Laub, Tierkot usw. Die Nähte sind mit einem speziellen Faden ausgeführt, der die Nahtlöcher abdichtet. Zusätzlich wird eine Silikonschicht auf die Nähte aufgetragen

Dank einer Kordel wird der Bezug am Boden geschlossen, um den Eintritt von Feuchtigkeit und Schmutz zu vermeiden. Jeder Bezug wird in seiner Aufbewahrungstasche geliefert.

TEPPICHE

Outdoor- Teppiche aus geflochtenen Polypropylen-Kordeln, geeignet für die Außennutzung, sind atoxisch, antiallergisch und recyclefähig. Teppiche, die sich aufgrund ihrer Struktur jedem Untergrund anpassen.

Kleine Farbabweichungen zwischen Muster und geliefertem Teppich sind unvermeidlich und nicht als Mangel zu betrachten.

Pflege

Zur Reinigung ein weiches Mikrofaser Tuch und neutrale lauwarme Seifenlauge verwenden. Aggressive Reinigungs- und Lösemittel sind zu vermeiden.

Intensive UV-Strahlung kann auf Dauer zu Farbabweichungen führen.

Die Verwendung von Schwämmen und harten Bürsten sowie starkes Reiben können die Polypropylen-Fasern beschädigen und das Lösen der Kordeln verursachen.

Les articles pour l'extérieur comme tous les produits laissés en plein air, même si traités par des procédés de finition délicats, vont se modifier d'un point de vue chromatique et matériel. Ces changements sont dû aux agents atmosphériques et aux conditions climatiques différentes pour chaque zone géographique (pourcentage d'humidité dans l'air, salinité, exposition aux rayons ultraviolets, écarts de température).

Pour cette raison, nous suggérons pour tous nos produits Open Air un placement sous vérandas et terrasses couvertes ou semi-couvertes. En tous cas, nous déconseillons l'exposition directe et prolongée aux intempéries.

L'entretien correct du produit ralentit et améliore le procès d'altération des différents matériaux.

Pour un entretien correct, on doit laver les produits sans utiliser des détergents agressifs et on doit les essuyer avec soin très rapidement. Il ne faut pas que de l'eau stagne sur aucune partie du produit et on doit éviter de heurter le produit et provoquer des abrasions qui pourraient endommager le traitement protecteur effectué sur la surface des matériaux.

Nous suggérons très fortement d'utiliser des "covers" imperméables, ainsi que de placer les produits à l'abri pendant les mois dans lesquels ils ne sont pas utilisés.

BOIS D'IROKO

Bois précieux provenant de différentes régions d'Afrique équatoriale centrale, particulièrement adapté pour une utilisation en extérieur en raison de sa bonne résistance aux variations de température, à l'humidité et aux agents atmosphériques.

Pour sa caractéristique naturelle, il présente des variations de coloris, nuances et veinures du bois.

Cela ne doit pas être considéré comme un défaut, mais au contraire comme une caractéristique prisée de la unicité et beauté du bois massif.

L'exposition aux agents atmosphériques peut créer avec le temps une pellicule gris argentée sur la surface du bois, résultat du processus naturel de maturation de l'iroko.

Le vernis protecteur appliqué donne au support caractéristiques hydrofuges et le protège contre tout changement de couleur et contre la dégradation fongique. Ce traitement est adapté à une exposition indirecte aux intempéries.

Entretien

L'entretien dont a besoin l'iroko massif est très simple ; les résidus de saleté peuvent être enlevés avec un chiffon humide, puis le bois peut être séché avec un chiffon doux.

Éviter la stagnation d'eau et de substances liquides qui pourraient endommager la surface.

L'emplacement idéal pour tous ces meubles est dans une véranda et sur des terrasses couvertes et semi-couvertes. Lorsqu'ils ne sont pas utilisés en outre, il est recommandé de les recouvrir d'une housse imperméable spéciale en tissu technique hydrofuge.

LAQUE MAT

Le laquage mat et lisse pour extérieur est réalisé avec des peintures acryliques pigmentées spéciales, appliquées sur un apprêt préparé avec des matières elles aussi adaptées à une utilisation en extérieur.

Entretien

Pour le nettoyage des articles laqués, il est conseillé d'utiliser un chiffon doux légèrement humidifié. Éviter d'utiliser des détergents agressifs, des liquides corrosifs et des éponges abrasives. Ne pas exposer ces surfaces à des sources de chaleur directes et ne pas y poser de corps incandescents.

Les meubles laqués sont optimaux pour être utilisés dans les vérandas et sur les terrasses couvertes et semi-couvertes, en évitant une exposition totale à la lumière du soleil et aux autres agents atmosphériques. Lorsqu'ils ne sont pas utilisés en outre, il est recommandé de les recouvrir d'une housse imperméable spéciale en tissu technique hydrofuge.

ALUMINIUM

L'aluminium est un matériau particulièrement indiqué pour l'utilisation à l'extérieur, grâce à ses caractéristiques qui le rendent résistant à la corrosion si exposé aux agents atmosphériques, à l'humidité et près de la mer. La légèreté est une des caractéristiques plus appréciées de ce matériau. Les structures en aluminium sont réalisées avec une peinture à base de poudre polyester pour l'extérieur, dans les couleurs white - micaceo.

Entretien

Le nettoyage doit être effectué à l'eau et au savon neutre. Ne pas rayer ou graver la surface peinte. Ne pas utiliser de produits corrosifs qui pourraient altérer la peinture ou changer sa couleur.

MÉTAL ZINGUÉ

Crée par le processus Sendzimir, qui implique un traitement de galvanisation du surface par immersion dans un bain chimique, qui dépose une couche de zinc agissant comme protecteur contre la corrosion.

ACIER AISI 316

L'AISI 316 est un alliage d'acier austénitique, considéré comme l'un des plus solides parmi ceux actuellement disponibles. En plus du carbone, l'acier AISI 316 contient du nickel, du chrome, du titane, du niobium et du tantale. Ces éléments garantissent des propriétés telles qu'une résistance élevée à la corrosion, un nettoyage facile et une grande hygiène.

Son coût est certes plus élevé que les autres types d'acier, mais grâce à ses qualités, l'acier austénitique est un matériau particulièrement approprié pour une utilisation dans le domaine nautique et pour la fabrication de mobilier d'extérieur.

Entretien

L'acier peut être facilement nettoyé à l'aide d'un chiffon doux humidifié avec de l'eau et du savon liquide de pH neutre. N'insistez en aucun cas sur les taches avec des éponges abrasives ou des détergents agressifs.

PEINTURES EN POUDRE DE POLYESTER

Les meubles d'extérieur en acier, aluminium et en métal zingué sont peints avec de la peinture en poudre de polyester indiquée pour l'utilisation à l'extérieur, dans les couleurs white - brick - putty - micaceo.

Entretien

N'insistez en aucun cas sur les taches avec des éponges abrasives ou des détergents agressifs pour éviter de rayer la surface. Évitez de heurter le meuble : cela pourrait causer des abrasions abimant le traitement de protection de la surface.

PIERRE DE LAVE

Pierre de lave du volcan Etna décorée avec verre recyclé des vieux moniteurs TV et PC mis au rebut, et traitée thermiquement dans un four industriel avec différents cycles de cuissons.

Après le traitement, la pierre de lave vitrifiée apparaît homogène, lisse et brillant, avec caractéristiques techniques améliorées. Couleurs disponibles: Red - Yellow - Grey - Asparagus.

Entretien

Pour un entretien correct et une longue durée, nous conseillons d'éliminer immédiatement les taches et les liquides de toutes natures en utilisant un chiffon souple et humide.

Pour l'entretien standard il est suffisant de nettoyer les surfaces avec de l'eau et des produits neutres. Ne pas utiliser des matériaux abrasifs, ammoniac, eau de Javel, acides et agents détartrants – compris les « remèdes de maison » à base de citron, bicarbonate de soude, etc.

Si la pierre est toujours exposée à l'eau, il est nécessaire de nettoyer fréquemment les surfaces afin que le calcaire ou d'autres substances n'aient pas la possibilité de s'étendre et de se solidifier.
Ne pas exposer à des sources directes et ne pas placer d'objets incandescents.

BÉTON
Le béton utilisé pour les produits Open Air Meridiani n'est pas un ciment traditionnel, mais un matériau innovant couvert par des brevets et il s'appelle UHPC Ductal, un béton renforcé de fibres qui a des caractéristiques techniques certifiées. Chaque produit est le résultat d'une production industrielle associée à l'artisanalité des ouvriers : le procédé de finition des produits est effectuée à main et pour cette raison chaque produit est unique. La finition couleur gris clair du béton est le résultat d'une teinture dans la masse qui garantit une durée plus longue de la couleur, si exposé aux agents atmosphériques. Halos, micro-trous ou la distribution pas homogène de sable ou fibres sur la surface du produit ne sont pas à considérer comme un défaut, mais plutôt comme des caractéristiques même du matériel et de la production artisanale du produit. Différences de nuance de couleur ne sont pas à considérer comme des défauts, mais sont caractéristiques même du produit qu'expriment le meilleur d'une production artisanale. Tous les plateaux de la collection Meridiani réalisés avec ce matériau ont un traitement filmogène de protection, qui protège grâce à la création d'une pellicule qui donne au produit des caractéristiques hydrofuges et une bonne résistance aux taches, mais avec une moindre résistance aux égratignures. En revanche, pour les bases est prévu un traitement protecteur qui rend le matériau plus performant aux égratignures et moins aux taches.

Entretien
Pour un bon entretien et une longue durée de vie, nous recommandons d'éliminer immédiatement les taches et les liquides, quelle que soit leur nature, en utilisant un simple chiffon humide et un chiffon doux. N'utilisez pas de brosses, d'éponges abrasives ou de détergents acides, car ils pourraient endommager irrémédiablement la surface. Nous conseillons d'utiliser les produits de nettoyage à base de cire également utilisés pour le marbre. Pour les taches tenaces, il est possible d'utiliser des solutions contenant de l'eau de Javel ou de l'ammoniaque diluées à 10%, soit 1 dose d'eau de Javel pour 10 doses d'eau. Évitez la stagnation d'eau et de substances liquides qui pourraient endommager la surface. Les articles en béton sont optimaux pour être utilisés dans les vérandas et sur les terrasses couvertes et semi-couvertes, en évitant une exposition totale à la lumière du soleil et aux autres agents atmosphériques. Lorsqu'ils ne sont pas utilisés en outre, il est recommandé de les recouvrir d'une housse imperméable spéciale en tissu technique hydrofuge.

CORDE
Cordes en fibre de polypropylène, adaptées à une utilisation en extérieur, également utilisées dans la navigation. Les fils en fibre de polypropylène, sont solides, résistants à l'abrasion et aux agents atmosphériques. Les fils en fibre de polypropylène, utilisés pour fabriquer les tissages qui caractérisent les articles de la collection Open Air sont teints dans la masse, antistatiques, anti-moisissure, antitaches, résistants à la lumière du soleil, à l'eau salée et ou chlorée. Ils sont de plus entièrement recyclables.

Entretien
Les parties avec des tissages en fils de fibre de polypropylène, se nettoient facilement avec un chiffon doux humidifié avec de l'eau basse température et du savon de pH neutre. Avec le temps, une longue exposition au soleil peut provoquer un changement de couleur.

BATYLINE
Tissu technique en polyester recouvert d'une couche de PVC, avec coutures thermofixées. C'est un tissu design avec une grande valeur esthétique et un haut niveau de confort. Ses dimensions restent stables et sa résistance aux conditions extérieures (UV, température, humidité, moisissures, air marin) est exceptionnelle. Très résistant contre les déchirures. Séchage rapide grâce au tissage à armure ouverte. Avec le temps, une longue exposition au soleil peut provoquer un changement de couleur.

Lorsque les articles contenant du Batyline ne sont pas utilisés en outre, il est recommandé de les recouvrir d'une housse imperméable spéciale en tissu technique hydrofuge.

REMBOURRAGE
Le rembourrage des coussins est en mousse de polyuréthane expansé avec fibres de polyester hypoallergéniques. Ces matières garantissent un grand confort, mais à force d'utilisation, même normale, ses dimensions peuvent varier. Les rembourrages Open Air sont recouverts de housses en tissu technique hydrofuge.

Entretien
En cas de contact avec des substances liquides ou avec des agents atmosphériques, il est toujours conseillé d'enlever le rembourrage et de le faire sécher.

TISSUS/MATERIAUX
Les tissus proposés pour la collection Open Air répondent à des exigences spécifiques pour que leur utilisation en extérieur ne modifie par leur aspect, leur texture et leur couleur. Ils résistent bien à la lumière du soleil, à l'eau salée, au chlore, ainsi qu'aux acides, aux crèmes solaires, à la sueur, aux taches et à l'usure. Pour les caractéristiques spécifiques et l'entretien, veuillez-vous référer aux instructions figurant sur les échantillons et dans les catalogues de prix.

WATER PROOF COVER
Meridiani recommande de protéger les meubles d'extérieur avec les « housses imperméables » spéciales fabriquées avec un tissu technique imperméable. Il est conseillé de s'assurer que les meubles, les coussins et les housses « imperméables » soient parfaitement secs avant de les recouvrir, afin d'éviter l'accumulation d'humidité et/ou la formation de taches de moisissure. Les housses water proof ont été créés sur mesure pour chaque élément. Le tissu est réalisé exprès pour protéger les meubles de la pluie, poussière, feuilles et excréments des animaux quand les produits ne sont pas utilisés. Les coutures sont réalisées avec un fil spécial, résistant à l'eau. Après le procédé de couture, l'utilisation d'un produit spray de silicone « acquastop » donne une imperméabilisation supplémentaire. Les housses water proof ont un cordon de serrage qui permet de bien fermer les housses afin que la poussière ne puisse endommager les produits ni par-dessus, ni par-dessous. Chaque housse water proof est emballée dans un sac en TNT.

TAPIS
Tapis avec structure tressée en polypropylène. Indiqués pour l'extérieur, pas toxiques, non allergisants et recyclables. Tapis textiles qui s'adaptent aux surfaces au-dessous. Des éventuelles variations de coloris entre échantillon et coloris du tapis livré sont inévitables, mais elles ne donnent aucun droit à des réclamations ou des retours.

Entretien
Pour le nettoyage de la structure tressée on peut utiliser un simple chiffon doux humide avec de l'eau tiède et un détergent neutre. Avec le temps, une longue exposition au soleil peut provoquer un changement de couleur. Pour l'entretien des tapis, enlevez poussière en utilisant un chiffon doux en microfibre humide avec de l'eau tiède et un détergent neutre. Après rincez avec de l'eau. Évitez l'utilisation des chiffons en papier, éponges, produits abrasifs ou des brosses raides que peuvent endommager les fibre en polypropylène. Etant la tresse textile, évitez de frotter mécaniquement ou de griffer pour éviter un effrangement des fibres en polypropylène. Dans le temps et l'usage la structure tressé se peut desserrée.

Los productos para exteriores, como cualquier otro material colocado outdoor, aunque tratados con procesos de perfeccionamiento específicos, están destinados a sufrir con el tiempo alteraciones de tipo cromático y material, debidas a la acción de los agentes atmosféricos y a las condiciones climáticas diferentes para cada área geográfica (grado de humedad, salinidad, exposición a los rayos U.V. y cambios térmicos).

Sugerimos por esta razón, para todos nuestros productos Openair, **una colocación ideal en porches y terrazas cubiertos y/o parcialmente cubiertas, se desaconseja en todo caso la exposición directa y prolongada a las intemperies. El correcto mantenimiento del producto ralentiza y mejora los procesos de alteración de los diferentes materiales.**

Para un correcto mantenimiento de los productos hay que limpiarlos sin utilizar detergentes agresivos y secarlos rápidamente y esmeradamente.

Hay que evitar estancamientos de agua en cualquiera parte del producto y además hay que evitar frotar el producto causando abrasiones que pudieran dañar la superficie tratada de los materiales.

Es muy recomendable el empleo de las fundas impermeables, así como la colocación de los productos en entornos protegidos o en interior cuando no se van a utilizar.

MADERA DE IROKO

El iroko es una esencia fina de madera proveniente de diferentes zonas de África ecuatorial central cuya buena resistencia a las variaciones de temperatura, a la humedad y a los agentes atmosféricos hace que sea particularmente adecuada para uso exterior.

Su característica distintiva es su naturaleza, remarcada por cambios de color, matiz y vetas de madera. Estas variaciones no han de considerarse como defectos del material, sino que son precisamente lo que constituye la originalidad y naturaleza de esta madera.

La exposición a los agentes atmosféricos puede crear con el tiempo una capa gris-plata en la superficie, efecto de un proceso natural de maduración de la madera.

El barnizado protector le confiere características de repelente al agua y la protege contra cambios de color y degradación por hongos. Este tratamiento también es adecuado para una exposición indirecta del material a la intemperie.

Mantenimiento

El mantenimiento del iroko macizo es bastante fácil; los residuos de suciedad se logran eliminar con un paño húmedo y luego se puede secar la madera con un paño suave.

Es aconsejable evitar estancamientos de agua y sustancias líquidas que podrían dañar la superficie.

La ubicación ideal, para todos nuestros productos, es en verandas y terrazas cubiertas y semicubiertas. Además, cuando los productos no estén en uso, es recomendable cubrirlos con la “cubierta impermeable” especial de tejido técnico repelente al agua.

LACADO MATE

El lacado mate liso para uso en exteriores se lleva a cabo con pinturas acrílicas pigmentadas especiales, aplicadas sobre un fondo preparado con materiales adecuados para uso exterior.

Mantenimiento

Para limpiar los productos lacados, recomendamos usar un paño suave un poco húmedo. Evite el uso de detergentes agresivos, líquidos corrosivos y esponjas abrasivas. Procure no exponer los productos a fuentes de calor directas ni colocar cuerpos incandescentes sobre ellos.

Estos productos están concebidos para verandas y terrazas cubiertas y semicubiertas, es decir sin exposición total a la luz del sol y a otros agentes atmosféricos. Además, cuando no estén en uso, es recomendable cubrirlos con la “cubierta impermeable” especial de tejido técnico repelente al agua.

ALUMINIO

Al aluminio es un material muy apto para uso exterior por sus características que lo hacen resistente a la corrosión de la intemperie, incluso en ambientes marinos y a la humedad. Su ligereza es la característica más apreciada. Las estructuras en aluminio son al final lacadas con pintura en polvo de poliéster específica para uso en exteriores, en los colores white - micaceo.

Mantenimiento

Estos productos se pueden limpiar con agua y jabón neutro, procurando no incidir ni rayar la superficie pintada. Además, hay que evitar el uso de productos corrosivos que puedan dañar la pintura o alternar su color.

Los productos de aluminio en nuestras colecciones están concebidos para verandas y terrazas cubiertas y semicubiertas, es decir sin exposición total a la luz del sol y a otros agentes atmosféricos. Además, cuando no estén en uso, es recomendable cubrirlos con la “cubierta impermeable” especial de tejido técnico repelente al agua.

METAL REVESTIDO CON ZINC

Obtenido por proceso Sendzimir. Este proceso consiste en un tratamiento de galvanizado superficial mediante inmersión en baño químico, que deposita una capa de zinc que actúa como protector de la corrosión.

Mantenimiento

Estos productos se pueden limpiar con agua y jabón neutro, procurando no incidir ni rayar la superficie pintada. Además, hay que evitar el uso de productos corrosivos que puedan dañar la pintura o alternar su color.

ACERO AISI 316

La aleación AISI 316 es una aleación de acero austenítico, que se considera una de las más fuertes entre las que tenemos disponibles hasta hoy. Además del carbono, el acero AISI 316 contiene níquel, cromo, titanio, niobio y tántalo, elementos que le permiten garantizar propiedades como la alta resistencia a la corrosión, la facilidad de limpieza y un alto coeficiente de higiene.

Gracias a sus cualidades, el acero austenítico, aunque su coste es mayor que el de otros tipos de acero, es un material absolutamente adecuado para productos en el sector náutico y para la producción de muebles de exterior.

Mantenimiento

El acero se puede limpiar fácilmente con un paño suave humedecido con agua y un jabón líquido de pH neutro. Bajo ninguna circunstancia hay que insistir frotando las manchas con esponjas abrasivas o detergentes agresivos.

Estos productos están concebidos para verandas y terrazas cubiertas y semicubiertas, es decir sin exposición total a la luz del sol y a otros agentes atmosféricos. Además, cuando no estén en uso, es recomendable cubrirlos con la “cubierta impermeable” especial de tejido técnico repelente al agua.

BARNICES DE POLVO DE POLIÉSTER

Los muebles de exterior en acero, aluminio y metal revestido con zinc metal son barnizados con pintura en polvo de poliéster específica para uso en exteriores, en los colores white - brick - putty - micaceo.

Mantenimiento

Los productos barnizados con pintura de polvo de poliéster permiten una limpieza fácil con un paño suave humedecido con agua y un jabón líquido de pH neutro. Bajo ninguna circunstancia hay que insistir frotando las manchas con esponjas abrasivas o detergentes agresivos puesto que podrían dañar la superficie. También hay que evitar golpes que podrían causar abrasiones en el producto y dañar el tratamiento protector en la superficie.

PIEDRA DE LAVA

Piedra de lava del volcán Etna decorada con vidrio reciclado de viejos monitores de TV y PC desechados, y después tratada térmicamente en horno industrial con diferentes ciclos de cocción.

Después de este tratamiento, la piedra de lava queda homogénea, lisa y brillante. Este proceso mejora sus características técnicas. Colores disponibles: Red - Yellow - Grey - Asparagus.

Mantenimiento

Para un correcto mantenimiento y larga duración, proceder a quitar pronto manchas y líquidos de toda forma con un paño suave húmedo.

Para un mantenimiento habitual, solo limpiar superficies con agua y productos neutros. Evitar productos agresivos, amoníaco, lejía, ácidos y desincrustantes, incluidos los “remedios caseros” a base de limón, bicarbonato de sodio y similares. Si la piedra está constantemente expuesta al agua, es necesario limpiar las superficies con frecuencia para que la cal u otras sustancias no se extiendan y solidifiquen.

No exponer a fuentes de calor directas y no colocar objetos incandescentes encima.

CEMENTO

El cemento para los productos Open Air de Meridiani no es un cemento tradicional, sino un material innovador patentado como UHPC Ductal®, un cemento fibro-reforzado con características técnicas certificadas. Cada elemento llega de una producción industrial, junta a una artesanal: el proceso de acabado final está hecho a mano, asegurando la unicidad de cada pieza.

El color gris claro del cemento llega de la coloración en masa, que garantiza la durabilidad del color original incluso tras la exposición del producto a agentes atmosféricos.

Halos, micro huecos o una irregularidad en la arenilla y en las fibras sobre la superficie del producto no se pueden considerar defectos sino características del material y del proceso productivo. Por su trabajo artesanal, diferencias en el color son posibles. Éstas no se pueden considerar defectos, sino características de la calidad artesanal del producto.

Todos los sobres de la colección Meridiani en cemento tienen una película protectora que forma una superficie repelente al agua y resistente a manchas; al contrario tienen meno resistencia a arañazos. En cambio, las bases sufren un tratamiento protector para que sean más resistente a arañazos y menos a manchas.

Mantenimiento

Para un mantenimiento adecuado y una larga vida útil del producto, recomendamos eliminar cualquier mancha y líquido de la superficie de manera inmediata, independientemente de su naturaleza y origen. Para ello, se puede utilizar simplemente un paño húmedo y un paño suave para secar. No utilice cepillos, esponjas abrasivas ni detergentes ácidos, ya que pueden dañar irreparablemente la superficie del producto. Recomendamos el uso de productos de limpieza a base de cera como los que se utilizan para el mármol. Para manchas insistentes es posible utilizar soluciones que contengan lejía o amoníaco diluidos al 10%, es decir, 1 parte de lejía en 10 partes de agua. Evite el estancamiento de agua y sustancias líquidas en la superficie.

Estos productos están concebidos para verandas y terrazas cubiertas y semicubiertas, es decir sin exposición total a la luz del sol y a otros agentes atmosféricos. Además, cuando no estén en uso, es recomendable cubrirlos con la “cubierta impermeable” especial de tejido técnico repelente al agua.

CUERDA

Utilizamos cuerdas de polipropileno para uso exterior como las que se emplean en el sector náutico.

Las propiedades de los hilados de polipropileno son su dureza, resistencia a la abrasión y buena resistencia a la intemperie.

Los hilados de polipropileno utilizados para hacer los que empleamos para los productos en la colección Open Air están teñidos en masa, son antiestáticos, anti-moho, anti-manchas, resistentes a la luz solar, a el agua salina y al cloro. Además son totalmente reciclables.

Mantenimiento

Las partes con trenzados de hilados de polipropileno se limpian fácilmente con un paño suave humedecido con agua templada o fría y un jabón de pH neutro. Una larga exposición al sol puede causar un cambio de color con el tiempo.

BATYLINE

Tejido técnico de poliéster recubierto de PVC, con costuras termofijadas.

El Batyline es un tejido con un alto valor estético de diseño y comodidad. Tiene una excelente estabilidad en su forma y tamaño y demuestra una resistencia excepcional a las condiciones exteriores (UV, temperatura, humedad, moho, atmósfera marítima). Además, presenta una resistencia extrema al desgaste. Secado rápido debido a su construcción abierta. Una larga exposición al sol puede causar un cambio de color con el tiempo.

Mantenimiento

Para un mantenimiento adecuado y una larga vida útil del producto, recomendamos eliminar cualquier mancha y líquido de la superficie de manera inmediata, independientemente de su naturaleza y origen. Para ello, se puede utilizar simplemente un paño húmedo y un paño suave para secar. RELLENO

Los cojines están rellenos de espuma de poliuretano y fibras de poliéster hipoalergénicas, materiales que garantizan una gran comodidad pero que con el tiempo pueden sufrir cambios en su forma debido simplemente al uso correcto y normal del producto. Los rellenos de Open Air están forrados en tela técnica repelente al agua.

Mantenimiento

En caso de contacto con sustancias líquidas o agentes atmosféricos siempre es aconsejable quitar el acolchado y secar el relleno al aire libre.

TELAS

Los tejidos propuestos para la colección Open Air cumplen con los requisitos específicos para su uso en exteriores sin comprometer su apariencia, su mano y su color. Tienen buena resistencia a la luz solar, a la sal, al cloro, a los ácidos, al protector solar, al sudor, a las manchas y al desgaste. Para sus características específicas y mantenimiento, por favor, consulte las instrucciones en los muestrarios y en la lista de precios.

WATER PROOF COVER

Meridiani aconseja proteger los muebles de exterior con la funda especial “cubierta impermeable”, hecha de tejido técnico impermeable.

Es una buena práctica asegurarse de que los productos, cojines y fundas impermeables estén perfectamente secos antes de cubrirlos, para que no acumulen humedad y para que no se formen manchas de moho.

Las fundas son hechas a medida para cada elemento. El tejido técnico protege el producto de la lluvia, polvo, hojas y guano mientras que no sean utilizados. Las costuras están realizadas con un hilo especial impermeable. Al terminar el proceso de costuras se añade un producto spray impermeable con silicona.

En el fondo de la funda hay un cordón que permite cerrarla para que el polvo no pase abajo.

Cada funda llega con una bolsa en tela.

ALFOMBRAS

Alfombras con estructura entretejida en trenzas de polipropileno; apropiadas para uso a exterior, no tóxicas, antialérgicas y reciclables.

Alfombras textiles que se adaptan a las superficies debajo.

Ligeras variaciones de color entre el muestrario y la alfombra enviada son inevitables y no dan derecho a reclamaciones o devueltas.

Mantenimiento

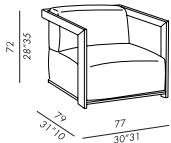

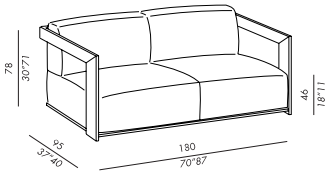

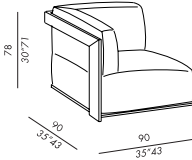

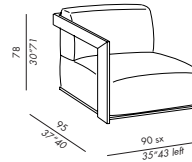

El entretejido se limpia con un paño suave húmedo con agua tibia y detergente neutro. Una larga exposición al sol puede causar un cambio de color con el tiempo.

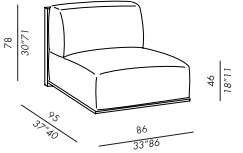

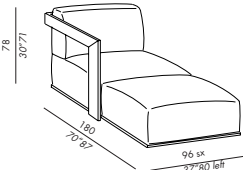

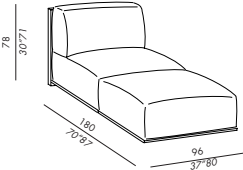

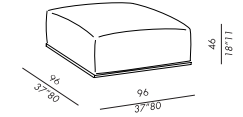

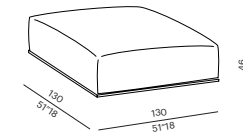

Para el mantenimiento, quitar el polvo con un paño suave en microfibra; para quitar manchas, usar un paño suave en microfibra húmedo con agua tibia y detergente neutro. Después enjuagar con agua.

No utilizar paños de papel, esponjas, productos abrasivos o cepillos rígidos que puedan dañar las fibras de polipropileno. Siendo la trenza un producto textil, no frotar o rascar para evitar que las fibras de polipropileno se desteejen.

INFORMAZIONI TECNICHE

TECHNICALS REMARKS - TECHNISCHE AUSKÜNFTE

INFORMATIONS TECHNIQUES - INFORMACIONES TÉCNICAS

I tessuti possono variare di tonalità da una partita all'altra. L'azienda non si assume responsabilità in caso di eventuali differenze di colore nell'accompagnamento di elementi acquistati in tempi diversi, nè può garantire l'esatta corrispondenza di colore e finissaggio tra il campionario ed il tessuto utilizzato per il rivestimento del prodotto. Specialmente per i tessuti scuri o con tonalità molto sature è possibile una perdita di colore per sfregamento. Nei tessuti cinigliati o velluti (specialmente in seta) questo fenomeno è ancor più visibile, perchè si attua uno schiacciamento dell'inclinazione del pelo: questa caratteristica non è assolutamente contestabile.

Se i tessuti non sono stati prelavati - servizio a richiesta solo per i tessuti Meridiani - si consiglia unicamente il lavaggio a secco. Si informa inoltre che i tessuti prelavati, possono presentare variazioni nella tonalità del colore e/o sfumature che non sono comunque da ritenersi difetti ma caratteristiche del tessuto stesso.

Per motivi tecnici il prelavaggio può essere effettuato fino ad un massimo di 14 metri lineari (15,31 yarde) per taglio.

Velluti / Ciniglie

I velluti e le ciniglie, per la loro caratteristica di essere tessuti a pelo, possono dar luogo ad aloni, ombreggiature ed effetti di non uniformità nel colore.

Questa peculiarità non può essere considerata come un difetto ma, piuttosto, come una caratteristica del tessuto stesso.

Per eliminare il possibile schiacciamento del pelo dal tessuto in alcune zone del prodotto ed il relativo effetto cromatico si consiglia di trattare le superfici con una spazzola morbida e del vapore. Questo intervento consente di ripristinare l'originale aspetto del velluto.

Vi preghiamo di riferirvi ai campioni dei tessuti solo come riferimento generale.

Meridiani si riserva il diritto di ruotare il verso del montaggio di alcuni tessuti per esigenze specifiche di ciascun prodotto.

Fabrics may show shade variations from batch to batch. MERIDIANI decline any responsibility in case of any colour and finishing difference for items purchased at different times and cannot guarantee the exact shade correspondence between the swatches of the sample set and the fabrics used for the actual covers. Especially for dark fabrics, a loss of colour is possible due to rubbing. In velvets and chenille (especially if in silk), this might be more visible, due to the pile crushing: this must be considered a distinctive feature of the fabric not a fault, and cannot be claimed.

If fabrics have not been pre-washed - service available upon request for MERIDIANI textile collection only - dry cleaning only is recommended. Pre-washed fabrics may show unevenness in colour and/or shades which must be considered as a characteristic of the natural fibres and yarns.

For technical reasons pre-washing can be carried out for fabric cuts not longer than 14 metres (15,31 yarde).

Velvets / Chenille

Velvets and chenille are pile fabrics which, due to the particular type of weaving, may show unevenness in colour and shade.

This peculiarity cannot be regarded as a defect rather as a characteristic of the fabric.

In order to remove pile crushing and relating shade difference, it is recommended to steam the cover and brush lightly the surface. This will bring the velvet back to its original look.

MERIDIANI advises to consider fabric samples as a general reference only.

Meridiani reserves the right to rotate the fabrics direction for specific needs of each product.

Stoffe können je nach Charge leichte Farbunterschiede aufweisen, daher lehnt Meridiani s.r.l. mögliche Reklamationen aufgrund von Abweichungen der Stofffarbe bei zeitlich voneinander abweichenden Lieferungen von Polstermöbeln ab. Gleiches gilt für Farbabweichungen bei Stoffmustern und gelieferten Bezugstoffen. Besonders bei dunkleren oder gesättigten Farben ist ein Farbverlust durch Reibung möglich. Bei Chenille oder Velours (insbesondere aus Seide) ist dieses Phänomen aufgrund des Drucks auf den Flor verstärkt sichtbar: Diese Eigenschaft bietet keine Reklamationsgrundlage.

Bei waschbaren Stoffen gilt, dass ausschließlich von Meridiani s.r.l. vorgewaschene Stoffe waschbar sind. Anderenfalls ist nur eine Trockenreinigung möglich. Gegen Berechnung können ausnahmslos Meridiani Stoffe vorgewaschen werden. Vorgewaschene Stoffe können Farbabweichungen oder Schattierungen aufweisen, die keine Mängel darstellen.

Aus technischen Gründen ist es nicht möglich, Stoffschnitte von über 14 Metern Länge (15,31 Yard) vorzuwaschen.

Velours / Chenille

Velours und Chenille können aufgrund Ihres Flors Halos, Schattierungen und Farbabweichungen aufweisen. Diese Charakteristiken sind nicht als Mängel, sondern als besondere Eigenschaften von Flormaterialien einzustufen.

Zur Aufrichtung des Flors und Entfernung von Schattierungen, den Stoffbezug z. B. mit einem Bügeleisen dämpfen und währenddessen mit einer weichen Bürste bearbeiten.

Dies verhilft dem Velours zu seinem ursprünglichen Aussehen.

Unsere Stoffmuster gelten nur als generelle Richtlinie.

Meridiani behält sich das Recht vor, die Montagerichtung der Stoffe nach den spezifischen Anforderungen jedes Produkts zu drehen.

Les nuances des coloris tissus peuvent être différentes d'un lot et l'autre. La société décline toute responsabilité en cas de différences de teinte entre des produits non commandés au même moment. En outre la société ne peut pas garantir la correspondance parfaite entre la couleur et l'aspect de l'échantillon et ceux du matériau utilisé pour la confection/réalisation du produit. Surtout pour les tissus foncés ou avec des teintes très saturées est possible une perte de couleur par frottement. Pour les chenilles et les velours (surtout brillants) ce phénomène est encore plus visible, car il y a un écrasement de l'inclination du poil: cette caractéristique n'est pas contestable. Si les tissus n'ont pas été prélavés - service sur demande seulement pour tissus Meridiani - nous recommandons uniquement le nettoyage à sec. Nous informons également que les tissus prélavés peuvent présenter des changements de nuance, qui ne peuvent pas être considéré comme un défaut, mais plutôt comme des caractéristiques même du tissu. Pour des raisons techniques, nous pouvons prélever maximum 14 mt (15,31 yard) de tissu par coupe.

Velours / Chenilles

Les velours et les chenilles, étant des tissus à poil, peuvent montrer des halos, des ombres, et des variations de coloris.

Cette caractéristique ne peut pas être considérée comme un défaut mais plutôt comme une caractéristique même du tissu.

Pour éliminer l'écrasement du poil de velours ainsi que son effet chromatique, il est recommandé de traiter la surface avec une brosse douce et de la vapeur. Ça permettra de restaurer l'aspect originel du velours.

Nous vous prions de considérer les échantillons comme des références indicatives uniquement.

Meridiani se réserve le droit de faire pivoter le sens de montage des tissus en fonction des besoins spécifiques de chaque produit.

Los tejidos pueden sufrir cambios de tonalidad de una partida a otra. Meridiani no se asume responsabilidades en caso de diferencias de color al combinar elementos comprados en tiempos diferentes, ni puede garantizar la perfecta correspondencia de color y acabado entre el muestrario y el tejido utilizado para revestir el producto entregado. Sobre todo para las telas oscuras es posible que se pierda color por frotamiento. En las telas de chenilla o terciopelo (sobre todo in en seda), este es más visible, como hay un aplanamiento del sentido del pelo: esta característica no es un defecto y no es contestable.

Si los tejidos no han sido prelavados - servicio a petición sólo por los tejidos Meridiani - sólo se recomienda el lavado en seco. Se informa también que los tejidos prelavados pueden presentar variaciones en la tonalidad de color que no se pueden considerar como defectos sino características de la tela misma.

Para razones técnicas, se pueden pre lavar cortes de no más de 14 metros lineares (15,31 yard).

Terciopelo Y Chenilla

Terciopelos y chenilla, siendo tejidos con pelo, pueden presentar características como efectos a manchas, efectos claro/oscuro que no deben ser considerados defectos sino una peculiaridad del tejido mismo.

Para sacar la apariencia aplastada al terciopelo y la diferencia en color relacionada, se aconseja vaporizar el revestimiento y cepillarlo con cepillo suave.

Esto va a restaurar el terciopelo a su estado suave original.

Las muestras de telas solo sirven como referencia general.

Meridiani se reserva el derecho de girar la dirección de montaje de las telas según las necesidades específicas de cada producto.

Las muestras de madera y de resina sólo sirven como referencia general.

METALLI

Metallo naturale verniciato trasparente

La finitura è realizzata mediante applicazione al metallo di una vernice trasparente, quindi non coprente, con funzione di protettivo del metallo stesso. Tale finitura lascia quindi a vista tutte le lavorazioni del prodotto quali: satinatura e finitura con saldatura a vista, pertanto eventuali striature o differenze di tonalità del colore (a seconda anche del punto di vista) non sono da considerarsi difetti, ma caratteristiche del prodotto stesso.

Metallo verniciato

Finitura opaca nei colori black - white è realizzata mediante applicazione al metallo di vernici coprenti. Finitura ottone bronzato - il trattamento delle superfici in metallo avviene mediante l'applicazione di vernici coprenti (lacche) per il fondo color ottone, segue l'applicazione di una patina di finitura che viene poi lavorata manualmente per conferire alla superficie l'effetto bronzato/anticato. Ogni prodotto è pertanto simile ma unico e irripetibile. Finitura acciaio platinato - il trattamento delle superfici in metallo avviene mediante l'applicazione di vernici coprenti (lacche) per il fondo color acciaio, segue l'applicazione di una patina di finitura che viene poi lavorata manualmente per conferire alla superficie l'effetto platinato. Ogni prodotto è pertanto simile ma unico e irripetibile.

Ottone bronzato

Finitura artigianale che consiste nell'ossidazione dell'ottone che viene successivamente spazzolato a mano e verniciato trasparente opaco. Detto trattamento crea delle "graffiature" con tonalità variabili. Essendo una lavorazione manuale, può essere suscettibile di variazioni di tonalità e omogeneità tra prodotti realizzati in momenti diversi.

Acciaio platinato

Finitura artigianale che consiste in una spazzolatura manuale con successivo trattamento di pigmentazione dell'acciaio inox lucido, in grado di conferire particolari effetti cromatici colore platino dalle diverse tonalità. La finitura viene poi protetta con una verniciatura trasparente lucida. Quest'ultimo trattamento può lasciare piccoli segni e irregolarità sulla superficie. Tali imperfezioni devono quindi essere considerate caratteristiche intrinseche del prodotto stesso e non difetti.

Acciaio orbitale

Finitura artigianale realizzata per indoor. La sua realizzazione prevede diverse fasi: ossidazione dell'acciaio inox, spazzolatura manuale per creare l'effetto "graffiato", verniciatura trasparente protettiva. Essendo una lavorazione manuale, può essere suscettibile di variazioni di tonalità e omogeneità tra prodotti realizzati in momenti diversi.

Acciaio inox

Finitura artigianale realizzata per indoor. Prevede la spazzolatura manuale dell'acciaio AISI 304. Essendo una lavorazione manuale, può essere suscettibile di variazioni di tonalità e omogeneità tra prodotti realizzati in momenti diversi.

Manutenzione

Per la normale pulizia delle superfici, utilizzare un panno morbido umido. Non usare nel modo più assoluto detersivi aggressivi, prodotti abrasivi e/o solventi che possono alterare irreversibilmente le superfici. Non lasciare altresì contenitori bagnati sul fondo: asciugare subito la superficie in caso di ristagno di liquidi.

VETRO

Vetri

In vetro extralight temperato retroverniciato nei colori delle lacche opache.

Specchi

Superfici a specchio realizzate con procedimenti e tecniche artigianali. Ogni lastra viene singolarmente sottoposta a specifici trattamenti per ottenere un manufatto che non può e non deve rispettare l'uniformità di un oggetto industriale, ma esprimere il meglio di una produzione artigianale. Nell'ambito della stessa lastra sono riscontrabili sfumature e tonalità di colore diverse. Le lastre antichizzate possono rappresentare leggere ossidazioni ed opacità che ne enfatizzano l'effetto tipico degli specchi antichi e non costituiscono difetti ma peculiarità. Ogni prodotto è pertanto simile ma unico e irripetibile.

Finiture: ottone bronzato - black & white - old silver - crystal mirror.

Manutenzione

Per la normale pulizia delle superfici, utilizzare un panno morbido umido o imbevuto di alcol. Non usare nel modo più assoluto detersivi aggressivi, prodotti abrasivi e/o solventi che possono alterare irreversibilmente le superfici.

MARMO

I marmi sono lastre di materiali rocciosi naturali di origine sedimentaria e quindi possono variare di aspetto da lastra a lastra e presentare piccole imperfezioni, venature, piccoli fori o disuguaglianze delle superfici come pure differenze di venature o tonalità.
Tali imperfezioni devono quindi essere considerate caratteristiche intrinseche del prodotto stesso e non difetti.
La finitura prevede un procedimento di lucidatura a piombo che dona alla superficie maggiore lucentezza e durata e l'applicazione in superficie di prodotti idro e oleorepellenti.
Il lato rovescio delle lastre può presentare una superficie non regolare o una rete di supporto strutturale non eliminabile.
I marmi hanno scarsa resistenza alle sostanze calcaree e acide che, anche in piccole quantità, possono intaccarne le superfici e penetrare nei pori del materiale formando macchie non eliminabili.
Non esistono prodotti che possano proteggere le superfici.
E' disponibile (su richiesta e con sovrapprezzo) un trattamento di laccatura poliestere (lucida o opaca) che però modifica l'aspetto naturale del prodotto. Attenzione, per la movimentazione non usare ventose.
La finitura opaca per i marmi nei colori scuri (ove disponibile), può presentare sulla superficie un aspetto non omogeneo (aloni chiari e scuri) legato al tipo di materiale e non considerabile difetto.
Il travertino è un tipo di roccia sedimentaria calcarea che può presentare diverse colorazioni. Sono tipiche del travertino le piccole cavità (fori) presenti nella struttura semicompatta. È frequente incontrarvi impronte fossili di animali e piante. Questa pietra naturale è utilizzata sin dall'antichità nell'edilizia come materiale da costruzione e ornamentale.
Per i travertini è disponibile la finitura opaca con o senza stuccatura. Verrà comunque applicato il trattamento protettivo.
Le quarziti rappresentano un'alternativa molto interessante ai marmi e ai graniti. Hanno infatti una conformazione minerale e strutturale simile a quella del granito, ma offrono una varietà di colori e una gamma di venature molto simile a quella del marmo. Le quarziti provengono principalmente dal Brasile. Dalla natura hanno ricevuto in dono colore e lucentezza, che si declinano in disegni e colori unici e imprevedibili, per ogni singola lastra.

MR1: marmo Belgian Blu (provenienza Belgio) finitura opaca - marmo Bianco Carrara Gioia (provenienza Italia-Carrara) finitura lucida o opaca - marmo Marrone Emperador Dark (provenienza Spagna) finitura lucida o opaca - marmo Grigio Grey Stone (provenienza Iran) finitura lucida - marmo Nero Marquinia (provenienza Spagna) finitura lucida - marmo Statuario Black (provenienza Italia-Toscana) finitura lucida o opaca - marmo Valentine Grey (provenienza Spagna) finitura lucida o opaca - marmo Verde Alpi (provenienza Italia-Valle d'Aosta) finitura lucida o opaca.

MR2: marmo Breccia Medicea (provenienza Italia-Toscana) finitura lucida o opaca - marmo Calacatta Black (provenienza Italia-Toscana) finitura lucida o opaca - marmo Calacatta Oro (provenienza Italia-Carrara) finitura lucida o opaca - quarzite Copacabana (provenienza Brasile) finitura lucida o opaca - marmo Giallo Siena (provenienza Italia-Toscana) finitura lucida o opaca - marmo Kenya Black (provenienza Cina) finitura lucida o opaca - marmo Red Jasper (provenienza Sudan) finitura lucida o opaca - marmo Rosso Levante (provenienza Italia-Liguria) finitura lucida o opaca - marmo Sahara Noir (provenienza Tunisia) finitura poliestere lucida o opaca - marmo Verde Antigua (provenienza Iran) finitura lucida o opaca - travertino Navona (provenienza Italia-Lazio) finitura lucida o opaca (con/senza stuccatura) - travertino Noce (provenienza Italia) finitura opaca (con/senza stuccatura) - travertino Rosso (provenienza Iran) finitura opaca (con/senza stuccatura) - travertino Titanium Light (provenienza Iran) finitura opaca (con/senza stuccatura).

MR3: quarzite Emerald Green (provenienza Brasile) finitura lucida o opaca - quarzite Super White (provenienza Brasile) finitura lucida o opaca.

Manutenzione

Per una corretta manutenzione ed una lunga durata consigliamo di procedere alla rimozione immediata di liquidi e macchie, di qualunque natura essi siano, utilizzando semplicemente un panno umido e morbido.
Per la normale manutenzione è sufficiente pulire le superfici con acqua e prodotti neutri, non usare assolutamente solventi, materiali abrasivi o liquidi aggressivi.

METALS

Metal

“metal” finish: a transparent, not-coating, varnish is sprayed in order to protect the material.

This finish shows the various workings of the product such polishing and welded joints visible. For this reason any streaks or changes in colour (which might be visible according to the light and the point of view) are not to be considered as defects, rather as characteristics of the product.

Varnished

Black - white matt finish: coating paints with a matt finish applied to metal.

Bronzed brass finish: coating paints with (lacquers) colour brass are applied to metal surfaces; a finishing patina is then manually applied to give to the surface a bronzed brass effect. Each product is thus similar but unique and unrepeatable.

Platinum steel finish: coating paints (lacquers) colour platinum are applied to metal surfaces; a finishing patina is then manually applied to give to the surface a platinum steel effect. Each product is thus similar but unique and unrepeatable.

Bronzed brass

Handcrafted process. It consists in the oxidation of brass, which is then manually brushed and finished with the application of a transparent varnish. This treatment creates “scratched” effects with changeable shades. Being an handcrafted process, it may be susceptible to variances in colour and homogeneity, among products realized in different moments.

Platinum Steel

Handcrafted finish for indoor. It consists of a manual brushing with a subsequent pigmentation treatment of polished stainless steel, able to give particular platinum color effects with different shades.

The finish is then protected with a glossy transparent varnish. This last treatment can leave small marks and irregularities on the surface. These imperfections must therefore be considered intrinsic characteristics of the product itself and not defects.

Orbitale steel

Handcrafted process for indoor use consisting in different phases: oxidation of steel, manual brushing to create a “scratched effect”, finishing with a protective transparent varnish. Being a manual process, it may vary in shades and homogeneity among products manufactured in different times.

Stainless steel

Handcrafted process for indoor use consisting in a manual brushing of Steel AISI 304. Being a manual process, it may vary in shades and homogeneity among products manufactured in different times.

Maintenance

For daily cleaning of surfaces use a soft damp cloth. Do not use aggressive detergents, abrasive products and/or solvents that may irreversibly alter the surfaces. Do not leave liquids or wet containers on the surface: in case of standing water, dry the surface thoroughly.

GLASS

Tops in tempered extralight back-painted glass - all matt lacquer colours.

Mirror

Mirrored surfaces made with artisan procedures and techniques. Each glass sheet is individually treated so as to obtain a handmade product that cannot and must not meet the uniformity of an industrial item rather express an artisanal production at its best.

Each glass sheet may present different colour shades. Antiqued glass sheets may show a slight oxidation and opacity, typical of these mirrors, that are not to be considered as defects, rather as its peculiar characteristics. Each product is thus similar but unique and unrepeatable.

Finishes: bronzed brass - black & white - old silver - crystal mirror.

Maintenance

For daily cleaning of surfaces use a soft damp cloth or moistened with alcohol. Do not use aggressive detergents, abrasive products and/or solvents that may irreversibly alter the surfaces.

MARBLE

Marbles are slabs of natural rock materials of sedimentary origin varying from slab to slab, that can show therefore small imperfections and micro holes, as well as differences in veins and shades. These peculiarities must be therefore considered as distinctive features of the material and cannot be treated as defects. The finish includes a lead polish that gives the surface more shine and durability, as well as an application on the surface of water and oil repellent products. The rear side of the slabs may have an irregular surface or a not removable structural net. Marbles are sensitive to acidic and calcareous substances that can corrode the surface even in small quantities and soak into the pores thus creating spots that cannot be removed. It is available (under request and with surcharge) a special polyester lacquered treatment (glossy or matt) that changes the natural aesthetic of the material. Attention: by handling, do not use suction cups. The matt finish for the darker marbles (where available), can highlight a not homogeneous (light and dark halos) bound to the material and which cannot be therefore considered a fault or defect. Travertine is a type of calcareous sedimentary rock that can have different colours. Small cavities (holes) in the semi-compact structure are typical of travertine. Fossil footprints of animals and plants are frequently to be found. This natural stone has been used in construction since ancient times as a building and ornamental material. Travertines with matt finish is available with or without stucco. The protective treatment will still be applied. Quartzites are a very interesting alternative to marble and granite. They have a mineral and structural conformation similar to granite but offer a variety of colours and a range of veining very similar to marble. Quartzites come mainly from Brazil. From nature they are gifted with colour and gleam, both expressed in unique and unpredictable designs and colours in each single slab.

Manteinance

For a proper maintenance and a long-lasting product we advice to immediately remove any liquid or stains using a damp and soft cloth. For a daily maintenance, clean the surface with water and neutral products; never use solvent, abrasive or aggressive detergents.

METALLE

Metall roh transparent lackiert

Diese Metalloberfläche wird realisiert durch die transparente, nicht deckende Lackierung des Metalls. Für die Reinigung ein weiches feuchtes Tuch benutzen. Aggressive Reinigungsmittel, die die Oberfläche beschädigen können, vermeiden. Bitte beachten: Flüssigkeiten, Ränder und Flecken auf der Oberfläche umgehend abwischen. Es wird die Verwendung von Untersetzern empfohlen.

GLAS

Platte aus gehärtetem Glas in allen matt verfügbaren Lackfarben lackiert.

Spiegel

Manuell mit speziellen Techniken verspiegelte Oberflächen Jede Glasscheibe wird einzeln von Hand bearbeitet. Da es sich nicht um ein industriell hergestelltes Produkt handelt, ist jede Glasscheibe einzigartig und kann unterschiedliche Farbnuancen zeigen. Leichte Zeichen von Oxidation und Undurchsichtigkeit sind weitere typische Eigenschaften für diese Spiegel sind und stellen daher keine Mängel dar.

Ausführungen: messing bronziert - black & white - old silver - crystal mirror.

Pflege

Für die Reinigung ein weiches mit einer Mischung aus Alkohol und Wasser befeuchtetes Tuch benutzen. Aggressive Reinigungsmittel, die die Oberfläche beschädigen können, vermeiden.

MARMOR

Marmor ist ein Naturgestein und aus diesem Grund sieht jede Platte leicht anders aus. Marmor kann deswegen beim selben Material verschieden Maserungen, Mikrolöcher, verschiedene Farbnuancen oder Ungleichheiten in der Oberfläche ausweisen. Solche Unterschiede sind Merkmale des Produktes und können daher nicht als Defekte betrachtet werden. Die Verarbeitung sieht eine Polierung vor, wodurch die Oberfläche an Glanz und Härte gewinnt. Ferner wird die Oberfläche mit einem Produkt behandelt, welches leicht wasser- und öl-abweisend wirkt. Die Unterseite der jeweiligen Platten kann unregelmäßig oder mit einer nicht entfernbaren Netzstruktur zur Verstärkung versehen sein. Marmor ist ein empfindliches, kalkhaltiges und demzufolge weiches Material, welches gegen Säuren und Kalkstein nicht beständig ist. Flüssigkeiten, auch in kleinen Mengen, die die Oberfläche berühren und in die Poren eindringen können demzufolge Flecken verursachen, die nicht immer zu entfernen sind, vor allem wenn nicht sofort entfernt. Es gibt keine Mittel, die die Oberflächen 100% schützen können, außer eine Behandlung, die aus einer Polyesterlackierung besteht (hochglanz oder matt). Solche Behandlung (auf Anfrage und gegen Aufpreis) ändert aber das natürliche Aussehen des Produktes. Vorsicht, bei Bewegung keinen Saugnapf verwenden. Die Oberfläche bei der Mattausführung der dunkleren Marmor (falls erhältlich) kann unregelmäßig sein und dunklere und hellere Wolken/Halos aufweisen, die von dem Material abhängen und können ebenfalls nicht als Defekt betrachtet werden. Travertin ist eine Art von kalkhaltigem Sedimentgestein, welches verschiedene Farben haben kann. Kleine Hohlräume (Löcher) in der halbkompakten Struktur sind typisch für Travertino. Fossile Fußabdrücke von Tieren und Pflanzen sind häufig vorzufinden. Dieser Naturstein wird seit dem Altertum als Bau- und Ziermaterial verwendet. Matt lackierter Travertino ist auch mit Verkittung erhältlich. Eine Schutzbehandlung wird dennoch durchgeführt. Quarzite sind eine sehr interessante Alternative zu Marmor und Granit. Sie haben eine Mineral- und Strukturbeschaffenheit, die der von Granit sehr ähnlich ist, bieten aber eine Vielfalt an Farben und eine Maserung, die der von Marmor sehr ähnelt. Quarzite stammen hauptsächlich aus Brasilien. Von der Natur haben sie ein ausgeprägtes Farb- und Glanzvermögen erhalten, das sich in einzigartigen und unvorhersehbaren Motiven und Farben für jede einzelne Platte ausdrückt.

Pflege
Für eine richtige Pflege und ein dauerhaftes Leben sollen Flecken und Flüssigkeiten, inklusive Wasser, sofort mit einem weichen nassen Tuch entfernt werden. Die Oberfläche nur mit Wasser und neutrale Spülmittel reinigen. Keine Bürste, Schwämme oder Schleifmittel benutzen, die die Oberfläche beschädigen können, indem diese matt und wolkig werden.

MÉTALS

Métal
Le finition “métal” est une finition réalisée en appliquant au métal un vernis transparent, donc non couvrant, avec fonction de protection du métal même.
Cette finition laisse alors voir toutes les marques du produit obtenues pendant la préparation tels: le polissage et la finition avec soudage visible. Par conséquent, d’éventuelles stries ou différences de nuance de couleur - en fonction de la perspective - ne sont pas à considérer comme des défauts, mais sont caractéristiques même du produit.

Varnished
Finition “varnished” black ou white: réalisée par application sur le métal de peintures couvrantes mates.
Finition bronzed brass: le traitement des surfaces en métal se fait par l’application de peintures couvrantes (laques) pour le fond couleur laiton, suivi par l’application d’une patine de finition qui est ensuite travaillé manuellement pour donner à la surface l’effet laiton bronzé. Chaque produit est donc similaire mais unique et irremplaçable
Finition platinum steel: le traitement des surfaces en métal se fait par l’application de peintures couvrantes (laques) pour le fond couleur platinum, suivi par l’application d’une patine de finition qui est ensuite travaillé manuellement pour donner à la surface l’effet platinum steel. Chaque produit est donc similaire mais unique et irremplaçable.

Laiton finition bronze
Finition artisanale issue de l’oxydation du laiton qui est ensuite brossé et fini manuellement par un vernis transparent mat. Ce traitement crée des stries sinueuses de différentes profondeurs. En étant un travail manuel, il peut être susceptible de changements de ton et homogénéité entre produits réalisés dans différents moments.

Platinum steel
Finition artisanale pour l’intérieur, réalisée par un brossage et ensuite un traitement de pigmentation de l’acier inox brillant, qui permet de créer effets chromatiques de couleur platine en différentes tonalités. Le procédé est terminé avec une vernie protective transparente brillante qui peut laisser des petites marques et irrégularités sur la surface. Ces imperfections doivent être considérées comme caractéristiques du produit même et pas des défauts.

Orbital acier
Finition artisanale pour l’extérieur. Sa réalisation comporte plusieurs étapes: l’oxydation de l’acier inoxydable qui est ensuite brossé manuellement pour créer des stries sinueuses et puis fini par un vernis transparent protectif. En étant un travail manuel, il peut être susceptible de changements de ton et homogénéité entre produits réalisés dans différents moments.

Inoxydable acier
Finition artisanale pour l’intérieur. Sa réalisation vient du brossage de l’acier AISI 304. En étant un travail manuel, il peut être susceptible de changements de ton et homogénéité entre produits réalisés dans différents moments.

Entretien
Pour le nettoyage des surfaces, utilisez un chiffon doux humide. Ne pas utiliser des détergents agressifs, abrasifs et/ou des solvants qui peuvent altérer irréversiblement les surfaces. Ne pas laisser de récipients humides en contact direct. Sécher immédiatement la surface, après tous contacts de liquides.

VERRE

Plateau en verre extralight trempé retro-laqué - tous couleurs de laqué mate.

Miroirs
Surfaces en miroirs réalisées avec procédés et techniques artisanales. Chaque plaque est soumise individuellement à des traitements spécifiques pour obtenir un article qui ne peut pas et ne doit pas répondre à l’uniformité d’un objet industriel, mais d’exprimer le meilleur d’une production artisanale.
Sur la même plaque sont présentes des nuances et des tons de couleur différentes. Les plaques vieilles peuvent présenter une légère oxydation et opacité qui soulignent l’effet typique des miroirs anciens et ne constituent pas des défauts mais des particularités. Tous produits sont donc similaires mais uniques et irremplaçables.
Finitions: bronzed brass - black & white - old silver - crystal mirror.

Entretien
Pour le nettoyage des surfaces, utilisez un chiffon doux humide ou imbibé d’alcool. Ne pas utiliser des détergents agressifs, abrasifs et/ou de solvants qui peuvent altérer irréversiblement les surfaces.

MARBRE

Les plaques de marbres sont des matériaux rocheux naturels d'origine sédimentaire, donc leur aspect peut varier d'une plaque à l'autre et elles peuvent présenter de petites imperfections, des veines, des micro-trous ou des inégalités de surface, ainsi que des différences de veines et de nuances.
Ces imperfections sont à considérer comme des caractéristiques du produit même et non pas comme des défauts.
La finition prévoit un polissage au plomb qui donne à la surface plus d'éclat et de durabilité et l'application sur la surface de produits hydrofuges ainsi que oléofuges.
Le verso des plaques peut présenter une surface irrégulière ou un support structurel qui ne peut pas être éliminé.
Les marbres ont une faible résistance aux substances calcaires et acides qui, même en petites quantités, peuvent affecter les surfaces, pénétrer dans les pores du matériau et former des taches pas éliminables.
Ils n'existent pas de produits qui peuvent protéger les surfaces.
Un traitement de laquage polyester (mat ou brillant) est aussi disponible (réalisable sur demande avec un surcoût) qui cependant va modifier l'aspect naturel du produit. Attention, pour le mouvement pas utiliser ventouses.
La finition mate pour les marbres en couleurs foncés (ou disponible), peut montrer sur la surface un aspect pas homogène (auréoles clairs et foncés).
Le travertin est un type de roche sédimentaire calcaire qui peut présenter différentes couleurs. Les petites cavités (trous) présentes dans la structure semi-compacte sont typiques du travertin. On peut souvent rencontrer des empreintes fossiles d'animaux et de plantes. Cette pierre naturelle est utilisée depuis l'antiquité dans la construction comme matériau de construction et d'ornement.
La finition mate des travertins est disponible stuquée et pas stuquée. Il y a toujours l'application sur la surface de produits protectifs.
Les quartzites représentent une alternative très intéressante au marbre et au granit. En effet, ils ont une conformation minérale et structurale similaire à celle du granit, mais offrent une variété de couleurs et une gamme de veines très proche au marbre. Les quartzites proviennent principalement du Brésil. De la nature, ils ont reçu la couleur et la luminosité, qui se déclinent en dessins et couleurs uniques et imprévisibles, pour chaque dalle.

Entretien

Pour un entretien correct et une longue durée nous vous conseillons d'éliminer immédiatement les taches et les liquides de toutes natures en utilisant un chiffon souple et humide.
Pour l'entretien standard il est suffisant de nettoyer les surfaces avec de l'eau et des produits neutres; ne pas utiliser absolument des solvants, des matériaux abrasifs ou des liquides agressifs

METALES

Metal
El acabado “metal” es un acabado realizado mediante la aplicación al metal de una pintura transparente que no cobre sino tiene sólo función protectora del metal mismo. Este acabado deja visibles todas las elaboraciones del producto, o sea: satinado y acabado con soldadura visible, por eso. Por tanto, eventuales rayados o diferencia de tonalidad del color (que varía según donde lo se mira) no se pueden considerar defectos sino características del producto mismo.

Varnished
Acabado “varnished” black - White: realizado por la aplicación al metal de una barniz con acabado mate.

Acabado bronzed brass: tratamiento de las superficies de metal con pinturas opacas (lacas) para el fondo de color latón; sigue la aplicación de una pátina que se trabaja de forma manual para dar a la superficie el efecto latón bronceado. Cada producto es por lo tanto similar pero único e irrepetible.

Acabado platinum steel: tratamiento de las superficies de metal con pinturas opacas (lacas) para el fondo de color platinum; sigue la aplicación de una pátina que se trabaja de forma manual para dar a la superficie el efecto platinum steel. Cada producto es por lo tanto similar pero único e irrepetible.

Latón bronceado
Acabado artesanal que consiste en la oxidación del latón, cepillado a mano y pintado con laca transparente mate. Dicho acabado crea ‘rasguños’ con tonalidades variables. Siendo una elaboración manual, puede ser susceptible de variaciones de tonalidad y homogeneidad entre productos realizados en momentos diferentes.

Platinum steel
Acabado artesanal para uso indoor. Consiste en una cepilladura manual y enseguida un proceso de pigmentación del acero inox brillo, capaz de crear particulares efectos cromáticos color platino en diferentes tonos. Debido al barnizado del metal, este último proceso puede dejar pequeños signos e irregularidades en correspondencia de la superficie. Estas imperfecciones tienen que ser consideradas como características del producto y no como defectos.

Orbital Acero
Acabado artesanal para exterior. Su realización implica varias fases: oxidación del acero inoxidable, cepillado a mano para crear un efecto rascado y en final pintado con barniz transparente protector. Siendo un proceso manual, puede tener variaciones de tonalidad y homogeneidad entre productos realizados en momentos diferentes.

Acero inoxidable
Acabado artesanal para interior. Consiste en una cepilladura manual del acero inoxidable AISI 304. Siendo un proceso manual, puede tener variaciones de tonalidad y homogeneidad entre productos realizados en momentos diferentes.

Mantenimiento
Para la limpieza habitual utilizar un pañuelo suave húmedo. Evitar el uso de productos agresivos, abrasivos y/o solventes que puedan alterar las superficies de una forma irreversible. No exponer la superficie a objetos húmedos: en caso de que haya sido expuesta a algún tipo de humedad secar de inmediato.

VIDRIO

Cristal temperado extralight retrobarnizado - todos colores de laca mate.

Espejo
Superficies de espejo realizadas con técnicas artesanales. Cada hoja se somete a tratamientos específicos de forma individual para obtener un artículo que no puede y no debe cumplir con la uniformidad de un objeto industrial, sino expresar lo mejor de una producción artesanal. Dentro de la misma hoja se encuentran diferentes matices y tonos de color. Las hojas envejecidas pueden presentar oxidación y opacidad típicas de los espejos antiguos y eso no constituye un defecto sino una peculiaridad. Cada producto es por lo tanto similar pero único e irrepetible.

Acabados bronzed brass - black & White - old silver - crystal mirror.

Mantenimiento
Para la limpieza habitual utilizar un pañuelo suave húmedo. Evitar el uso de productos agresivos, abrasivos y/o solventes que puedan alterar las superficies de una forma irreversible.

MÁRMOL

Mármoles son losas de rocas naturales de origen sedimentaria y por tanto pueden cambiar de losa en losa y presentar pequeñas imperfecciones, micro agujeros o irregularidades de las superficies, también diferencias en vetas o tonos. Estas imperfecciones tienen que ser consideradas como características del producto y no como defectos. Este acabado incluye ser pulido a plomo, dando a la superficie más brillo y duración, como una aplicación sobre la superficie de productos resistentes al agua y aceite. El reverso de las losas puede tener una superficie irregular o una red de apoyo estructural que no puede ser eliminada. Los mármoles tienen baja resistencia a las sustancias calcáreas y ácidas que pueden - también en pequeña cantidad - corroer las superficies y penetrar en los poros creando manchas que no se pueden quitar. No existen productos que pueden proteger las superficies. Hay un acabado de laca poliéster, mate o brillo (disponible bajo consulta y con cargo adicional) que pero modifica el aspecto natural del producto. Atención, no utilizar ventosas para desplazar los productos. El acabado mate de los mármoles en los colores oscuros (donde disponible), puede presentar en la superficie un aspecto que no es homogéneo (halos claros y oscuros); eso no es un defecto, sino está relacionado al tipo de material. El travertino es un tipo de roca sedimentaria calcárea que puede presentar diferentes colores. Las pequeñas cavidades (agujeros) presentes en la estructura semi-compacta son típicas del travertino. Es común encontrar huellas fósiles de animales y plantas. Esta piedra natural se ha utilizado desde la antigüedad en la construcción como material de construcción y ornamental. El acabado mate de los travertinos está disponible enfoscado o no. Siempre hay la aplicación de productos protectores. Las cuarcitas representan una alternativa muy interesante al mármol y al granito. De hecho, tienen una conformación mineral y estructural similar a la del granito, pero ofrecen una variedad de colores y una gama de vetas muy similar a la del mármol. Las cuarcitas provienen principalmente de Brasil. De la naturaleza recibieron color y brillo, que se declinan en diseños y colores únicos e impredecibles, para cada losa.

Mantenimiento

Para un correcto mantenimiento y una larga duración se aconseja eliminar pronto manchas o líquidos por un pañuelo húmedo y suave. Para un mantenimiento diario limpiar las superficies con agua o detergentes neutros; evitar el utilizzo de solventes, abrasivos o líquidos agresivos.

I materiali delle imbottiture possono essere naturali (miscele di piume d'oca e anatra 100% vergini e non rigenerate, depolverizzate e sterilizzate), schiume di poliuretano espanso flessibile con elevate caratteristiche di resilienza, traspirabilità e anallergici o in ovatte di fibre poliestere, anallergiche e antimuffa.

I materiali delle imbottiture - siano essi naturali o sintetici della miglior qualità - non possono rimanere invariati nel tempo e sono soggetti alle tolleranze d'uso dovute al normale e corretto utilizzo.

I cuscini seduta dei divani sono realizzati con una portanza standard selezionata da Meridiani - modello per modello - e quindi ogni prodotto risulterà essere diverso anche per effetto della costruzione stessa (struttura, cinghiatura ecc.).

Per la tipologia di costruzione delle imbottiture vedi pagine seguenti.

Per i modelli con sistema A2 a richiesta possono essere realizzati più soffici (soft) o più rigidi (firm) senza supplemento.

Manutenzione

Per una corretta manutenzione tutti i cuscini (soprattutto quelli in piuma) devono essere regolarmente sprimacciati - ovvero battuti a mano - per riportarli alla loro forma originaria. La frequenza di tali interventi dipenderà comunque dalla natura e dal grado di utilizzo dell'imbottito.

The materials used for paddings can be of natural origin (blends of goose and duck feathers, 100% virgin, unregenerate, dusted and sanitized), hypoallergenic polyurethane foams characterized by high resilience and breathability, or hypoallergenic, anti-mould polyester fibers.

The best quality materials of the paddings - either natural or synthetic ones - cannot maintain a permanent shape over time and are subject to tolerances due to the normal and proper use.

MERIDIANI choose a standard firmness for the seat cushions of each model; for this reason and due to the manufacturing - frame, belting etc. - differences may be noticed when comparing different seating systems.

For the various types of padding see following pages.

For the A2 models it is possible to make the cushions softer or firmer without any surcharge and under request - no surcharge.

Maintenance

For a proper maintenance all cushions (especially the ones in feathers) need to be regularly fluffed: beat them by hand to restore their original shape. The frequency of such actions, however, will depend on the nature and use of upholstery.

Die Polsterungen können natürlich (Mischung von Gans und Ente Daunen, 100% rein und nicht regeneriert, entstaubt und sterilisiert), flexible PU-Schäumen mit hoher Kerbfähigkeit, Luftdurchlässigkeit oder anallergische Polyesterfaser gegen Schimmel.

Jede Polsterung - ob die aus Natur- oder Kunststoffe höchster Qualität besteht - nimmt durch Benutzung Gebrauchsspuren bzw. Verformungen an.

Die Sitzkissen von Meridiani Sofas sind für eine mittlere Tragfähigkeit geschaffen, individuell für jedes einzelne Modell entwickelt. Jedes Produkt wird mit dem ihm eigenen notwendigen Aufbau versehen (Gestell, Gürtel, usw.).

Für Anbaudetails der Polsterungen schauen Sie die folgenden Seiten.

Nach Anfrage und ohne Mehrpreis können die Modelle mit System A2 weicher (soft) oder fester (firm) durch Bemerkung auf der Bestellung bestellt werden ohne Aufpreis ohne Aufpreis.

Pflege

Für eine richtige Pflege müssen die Kissen (besonders die aus Polsterdaunen) regelmäßig von Hand beidseitig aufgeklopft und gestaucht werden. Die Häufigkeit der Pflege hängt von der Benutzung ab.

Les matériaux de rembourrage peuvent être naturels (mélanges de plumes d'oie et de canard 100% vierges et non régénérées, dépoussiéré et stérilisées), des mousses de polyuréthane expansés flexibles avec haute résilience, transpirantes et anallergiques ou bien en ouate et fibre de polyester anallergique anti-moisissure.

Les matériaux de rembourrage - soit naturels soit synthétiques de la meilleure qualité - ne restent pas intacts dans le temps et sont sujets à la tolérance d'une utilisation normale et d'un usage correct.

Les coussins d'assise des canapés sont réalisés avec une portance standard sélectionné par Meridiani - modèle par modèle - et donc chaque produit sera différent même par la construction (structure, sangles etc.).

Pour la typologie de construction des rembourrages voir pages suivantes.

Pour les modèles avec le système A2, sur demande et sans aucune surcout, les coussins d'assise peuvent être réalisés plus souples (version soft) ou plus durs (version firm) en l'indiquant sur la commande sans supplément.

Entretien

Pour un bon entretien, tous les coussins (surtout ceux en plumes) doivent être battus à la main régulièrement - pour qu'ils reprennent leur forme originale. La fréquence de ces interventions dépendra en tous cas de la nature et de l'utilisation même du produit rembourré.

Los materiales de los rellenos pueden ser naturales (mezcla de plumas de oca y pato 100% vírgenes y no regeneradas, quitadas del polvo y esterilizadas), espumas en poliuretano espanso flexible con características de elasticidad, transpirabilidad y antialérgico o en fibra poliéster, antialérgicos y anti moho.

Los materiales de los rellenos - sean naturales o sintéticos de la mejor calidad - sufren cambios en el tiempo y por el uso normal y correcto.

Los cojines asientos de los sofás están realizados con una resistencia a la compresión "estándar" seleccionada por Meridiani para cada modelo. Cada producto resultará entonces ser diferente también por efecto de la construcción misma (estructura, correas, etc..).

Para la características de los rellenos véase las páginas siguientes.

Los modelos con sistema A2, a petición y sin suplemento, se pueden realizar más suaves (soft) o más rígidos (firm), indicándolo en el pedido sin suplemento.

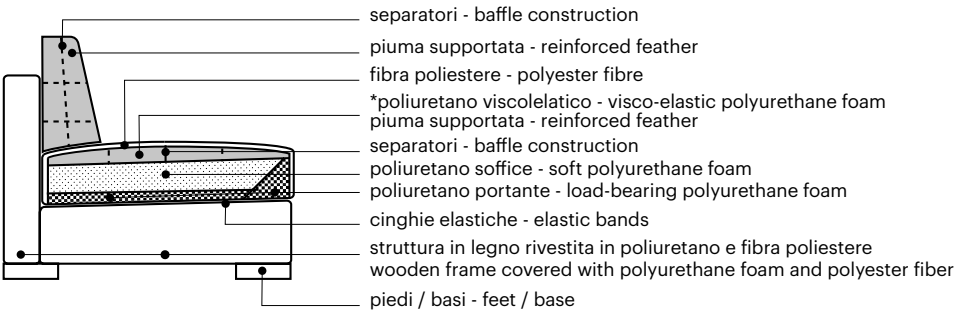

Mantenimiento

Para un mantenimiento correcto de los cojines (sobre todo los en plumas) aconsejamos acudirlos regularmente - o seagolpearlo a mano - a fin de recuperar su forma original. La frecuencia de tal acción será dada por el grado de uso de los mismos.

I cuscini o le componenti in “piuma supportata” sono costituiti da una miscela di piume non rigenerate di oca e anatra (100% vergini, depolverizzate e sterilizzate), lastrine di poliuretano e fibra poliestere. Costruzione a camere separate che non permette alla miscela di muoversi all’interno del cuscino.
Cushions, or part of them, in “reinforced feathers” are constructed of a blend of small feathers (goose and duck feathers, 100% virgin, unregenerate, dusted and sanitized), polyurethane cuts and polyester fibre. Box wall construction: channels are filled with feather blend individually and once sealed the blend cannot move into other channels.
