Crown & Bridge Remover Fully Automatic With 9 Tips - Gun Pattern

The API Automatic Crown & Bridge Remover Kit is a precision-engineered instrument designed for safe and efficient removal of crowns and bridges. Featuring a unique Turkey pattern mechanism with a 5-step push button gun system, it delivers controlled force application while minimizing patient discomfort. Built from high-quality stainless steel and supplied with 9 interchangeable tips, it ensures versatility across different clinical scenarios.

- ✓ Fully automatic gun-type mechanism for controlled and efficient crown removal
- ✓ 5-step push button pattern allows gradual and precise force application
- ✓ Includes 9 interchangeable tips for versatility across clinical cases
- ✓ Designed for safe removal of crowns and bridges with minimal patient discomfort
- ✓ Made from high-quality stainless steel for durability and reliability
- ✓ High resistance to wear and corrosion for long-term clinical use
- ✓ 100% rust-free construction ensures consistent performance
- ✓ Autoclavable handle and tips for infection control compliance
- ✓ Adjustable tip mechanism for better adaptability during procedures
- ✓ Ergonomic design ensures firm grip, easy handling, and better control
- ✓ Smooth surface finish allows easy cleaning and maintenance
