DESIGN

Parklets

Parklets help transform streets from car-dominated environments into welcoming spaces for people. By repurposing parking spaces, these impactful installations create places where communities can sit, relax and connect with their surroundings.

Parklet ranges

Balustrade parklet

The Balustrade Parklet is a simple, flexible design that transforms parking spaces into welcoming public areas.

You can introduce seating and other elements to create your own people-focused space.

[Download product spec](#)

Planter parklet

Our Planter Parklet adds lush greenery through integrated planters.

This parklet is ideal for softening hard urban environments while still providing a flexible public space.

Available in steel and timber

All available in our
standard RAL colours

Tree parklet

The Tree Parklet is designed to integrate street trees into a vibrant public space.

The parklet provides seating, shade and greenery while enhancing the streetscape and providing diverse wildlife habitats.

Available in steel and timber

Pergola parklet

The Pergola Parklet adds structure and shelter with an overhead pergola frame that can support lighting, climbing plants or seasonal decorations.

It creates a comfortable and characterful outdoor space that encourages people to sit, meet and linger.

Folding Benches

Armrests

Vinyl Branding

Steel Artwork

Types of Parklets

Community parklet

Hospitality parklet

Solar parklet

Mobility hubs

School parklet

Bike parklet

Community Parklets

Parklets create vibrant spaces for the local community. Many residents in urban areas lack an outdoor space or a garden.

These Parklets provide them with the opportunity to meet, socialise with their neighbours and enjoy nature surrounded by greenery.

Hospitality Parklets

These Parklets allow hospitality to provide additional outdoor space to increase the number of customers they can cater for. Businesses can use their own furniture or have seating built in, and they can utilise that space as they want. To give protection from pollution and noise, green screens can also be integrated alongside additional planters.

Solar Parklets

A solar parklet are public community space built over a repurposed street parking or loading bay. They feature integrated panels on its roof structure to generate renewable energy on-site, powering useful amenities like USB device charging points, low-energy lighting, and green roofs that help boost biodiversity.

Mobility Hubs

A mobility hub is a multifunctional space that integrates green infrastructure with active travel options like bike parking and e-scooter docks. Standard features can include rain gardens, green screens, seating, digital or physical signage, community noticeboards, wayfinding and climate resilient planting.

School Parklets

These parklets provide spaces for parents and visitors to rest. They can include features such as educational games, boards with interesting facts, magnetic games, graphics and more. Parklets can be used as modal planters to slow down the busy traffic and create greener and safer environments around schools for the benefit of children and parents.

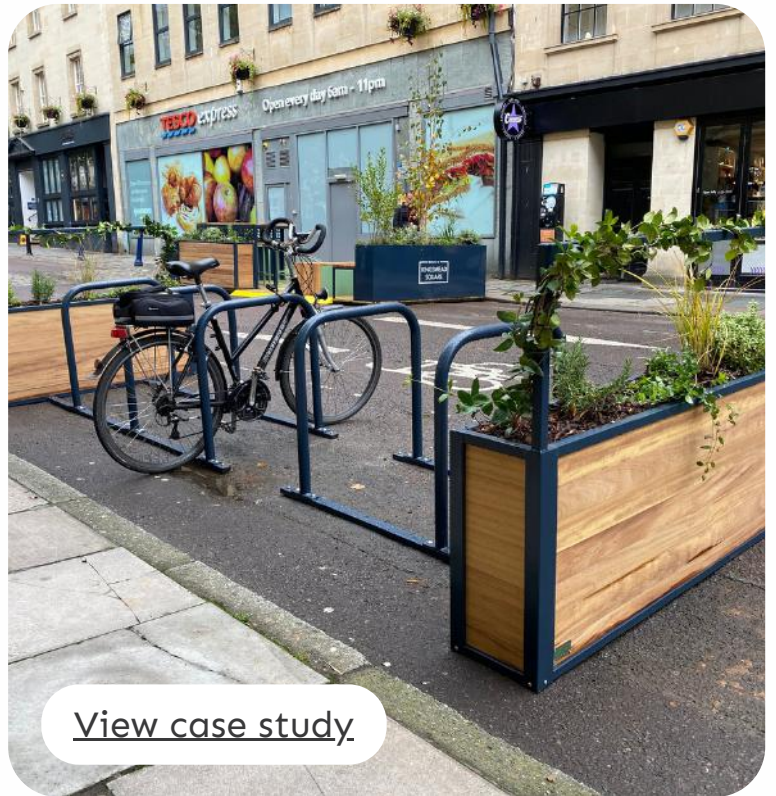

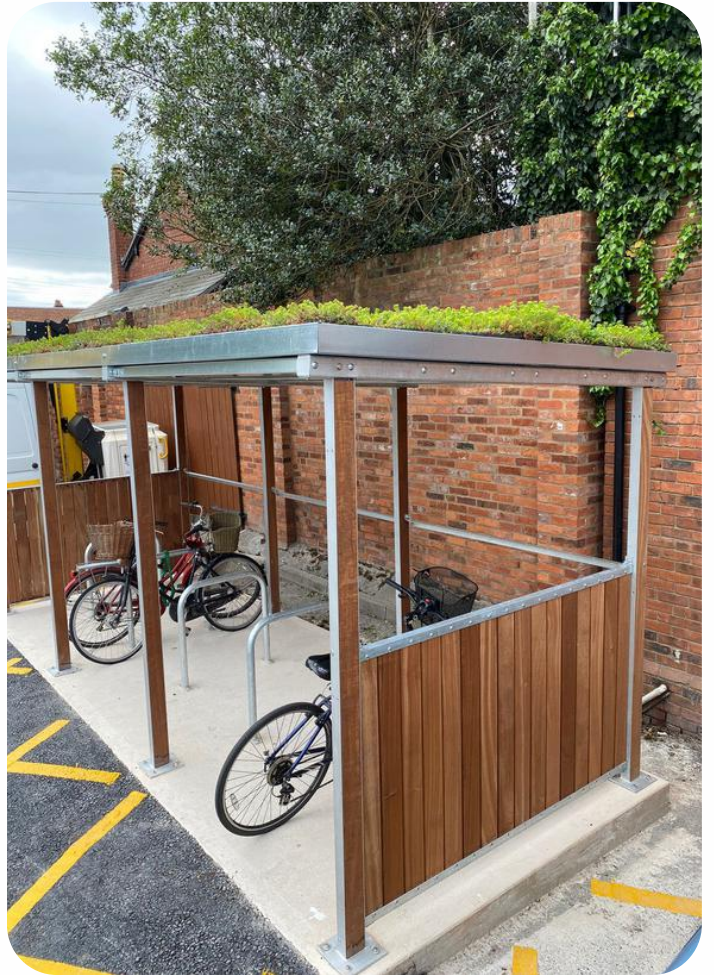

[View case study](#)

Bike Parklets

These bring cycle parking and some nature to the busy streets. By replacing car parking spaces with attractive street furniture they promote cycling and sustainable travel. The Parklet can combine bike corrals and planters to be arranged in any layout and customised for a particular site to facilitate multiple bike parking and larger cargo bikes.

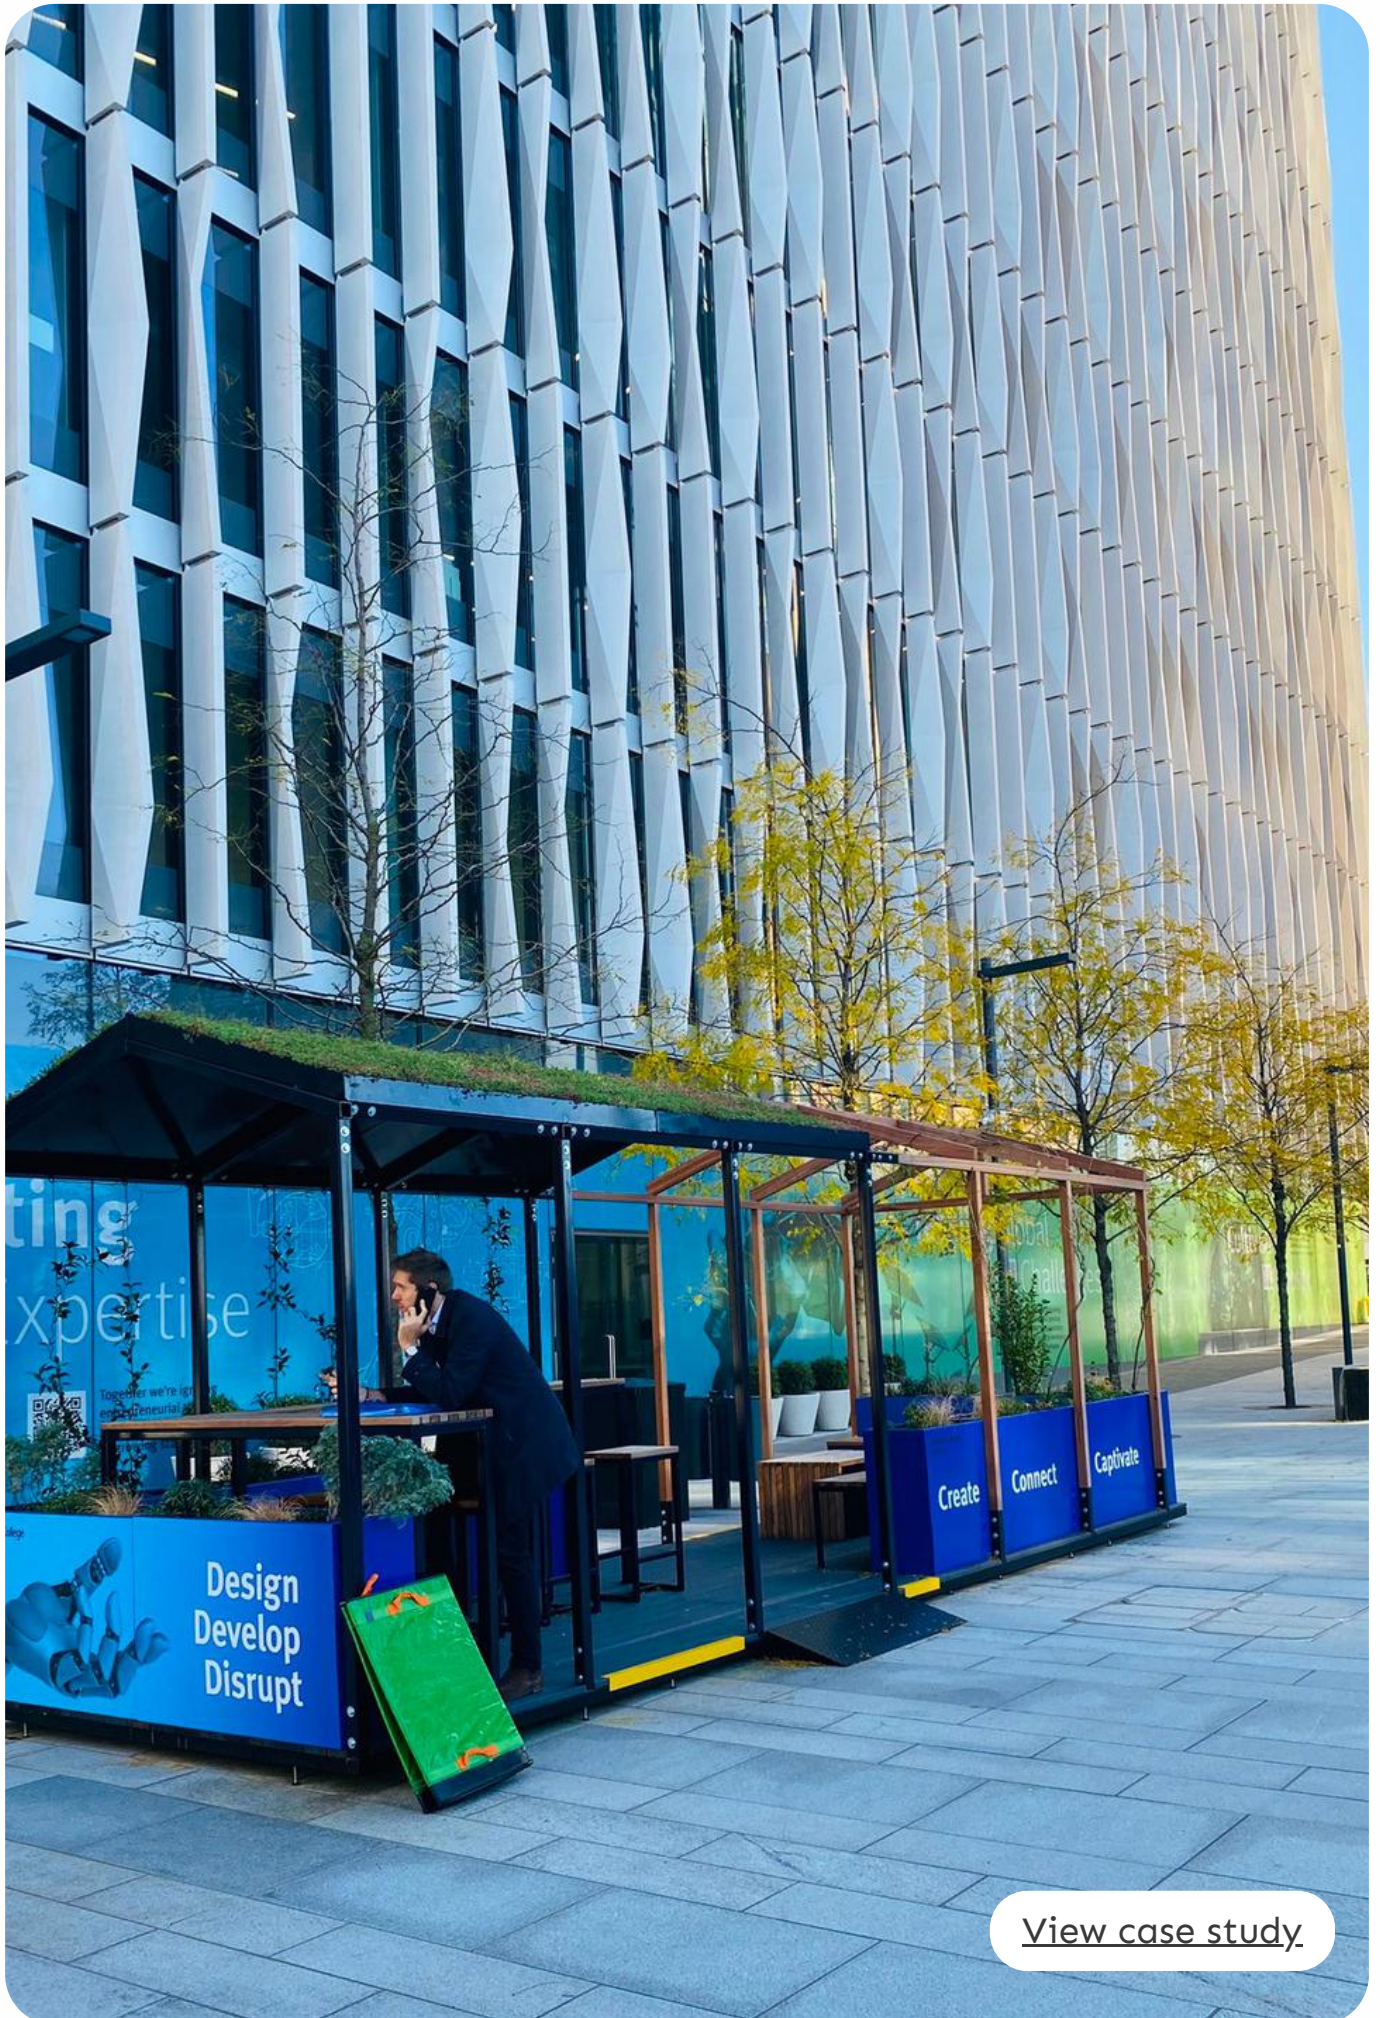

Study Hubs

These Parklets allow students to work, socialise with each other and hold meetings surrounded by greenery. Can include solar technology so students can charge their devices, green roofs for rainwater absorption and university branding
