

GPT-6 Astra

The features you'll actually use

Astra is more than a chatbot

● GPT-6 Astra can:

- Think through complex tasks
- Use your computer
- Write and test code
- Create documents & presentations
- Handle multi-step workflows

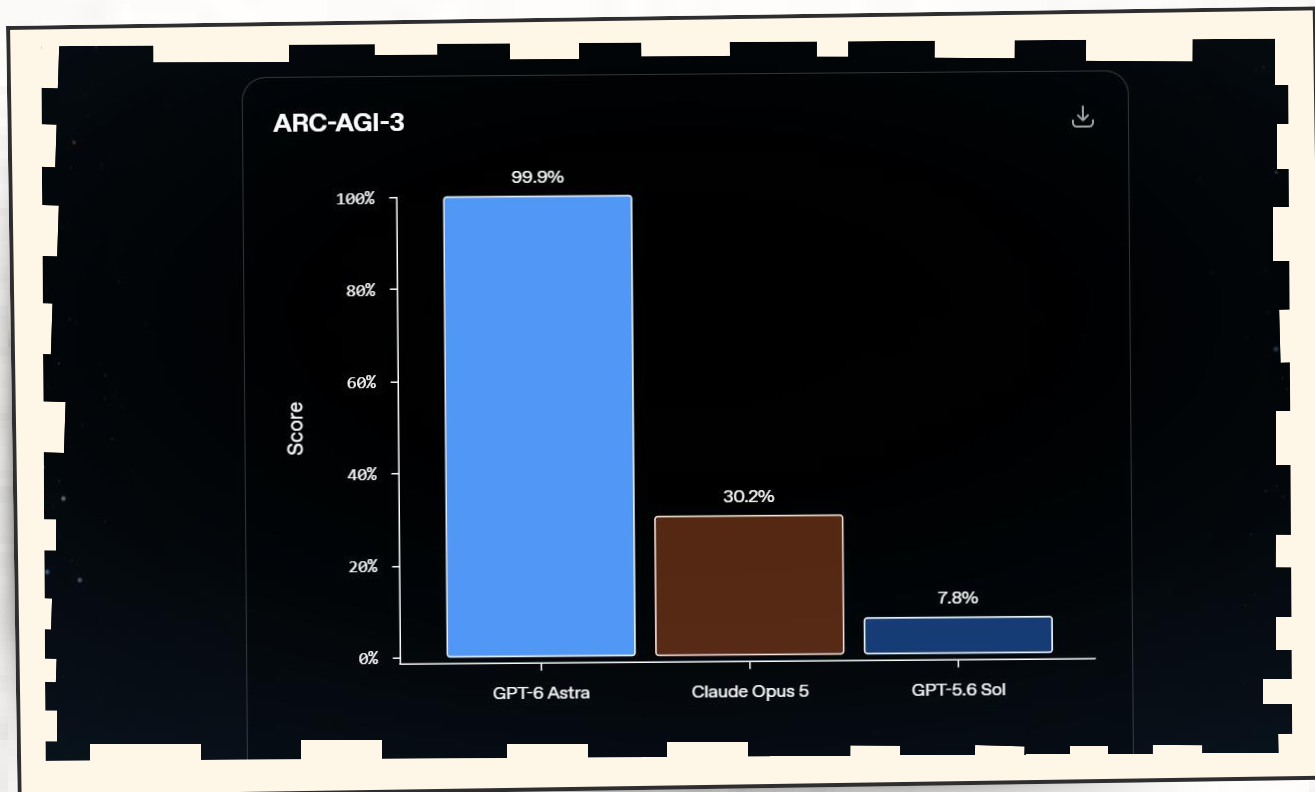

A **new generation** of intelligence

Use your computer

- Astra can interact with your screen
- **For example:**
 - Fill out forms
 - Update CRM records
 - Organize information

You give it the goal, it **handles the steps**

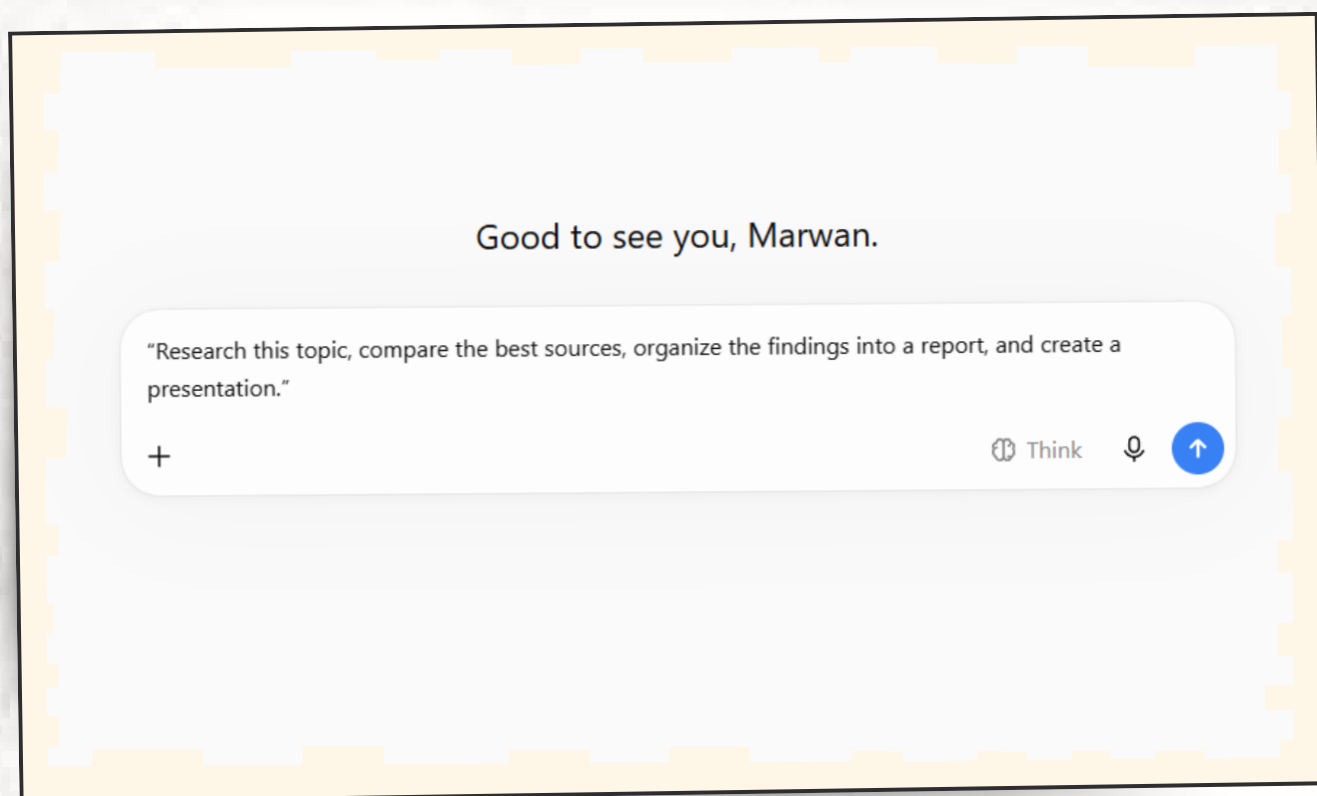

Give it a real task

- Instead of: "Write me a report"

Try:

"Research this topic, compare the best sources, organize the findings into a report, and create a presentation."

Create better presentations

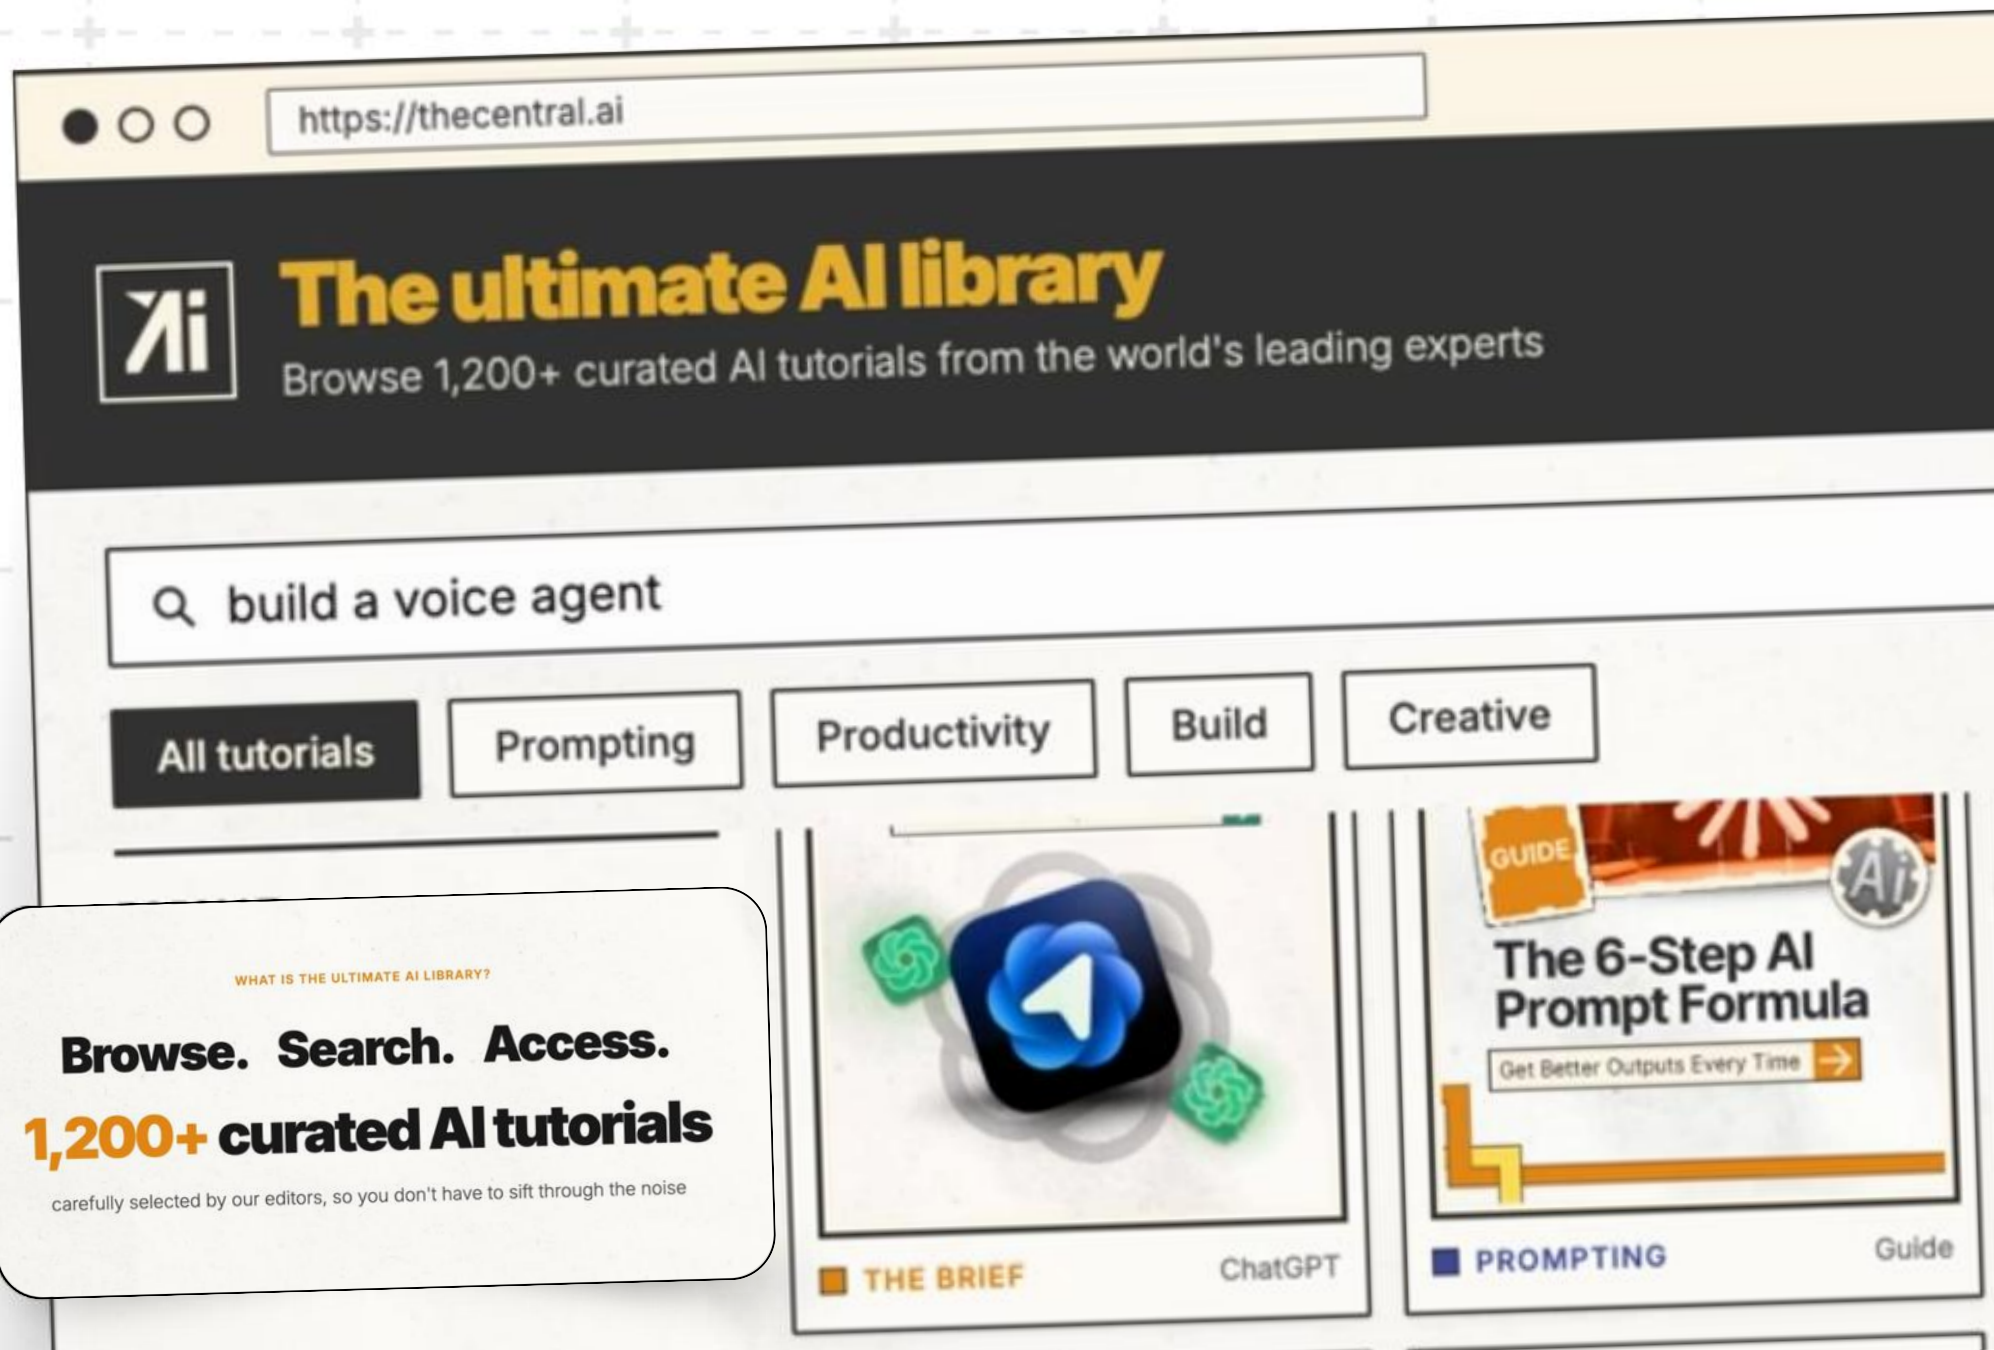

- Astra is trained to work with:
 - Existing templates
 - Brand styles
 - Structured narratives
- It can produce a more usable first draft

WHAT IS THE ULTIMATE AI LIBRARY?

Browse. Search. Access.

1,200+ curated AI tutorials

carefully selected by our editors, so you don't have to sift through the noise

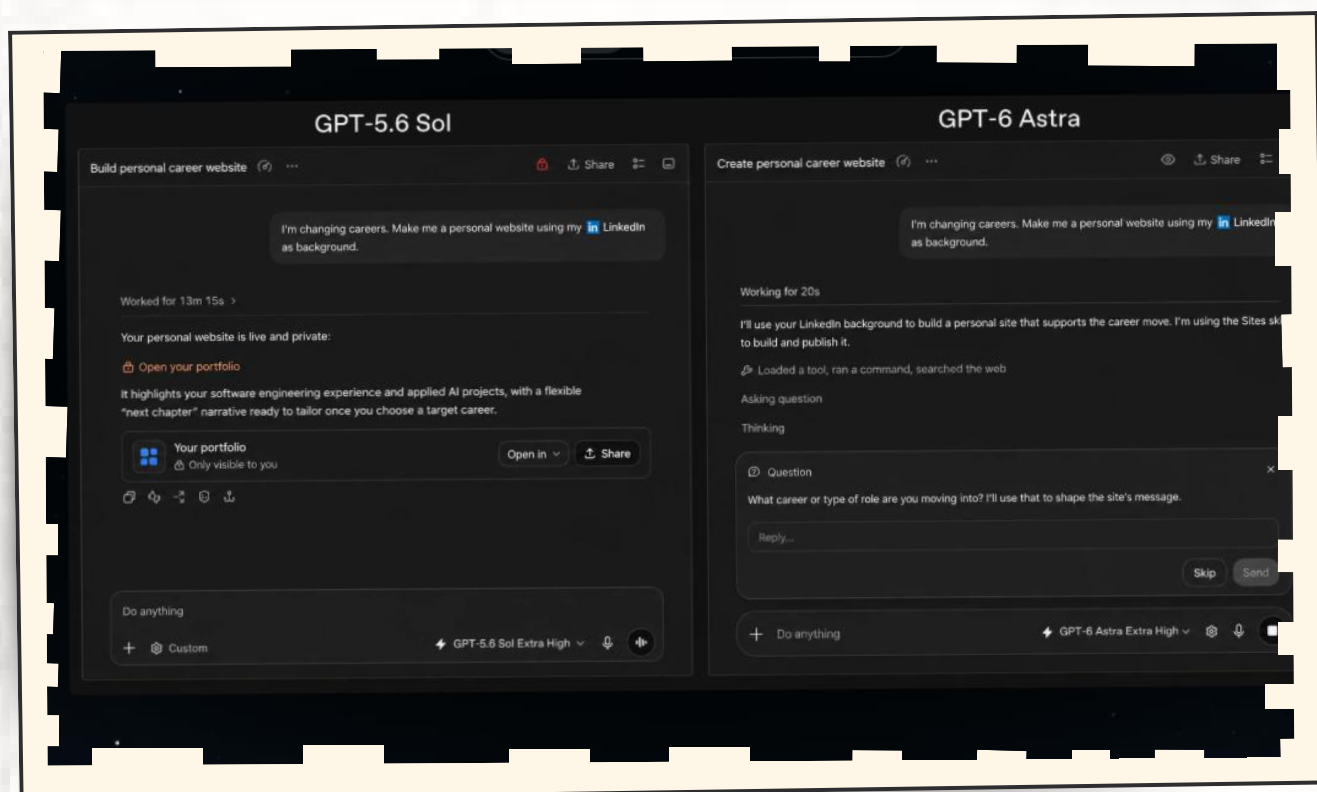

Build websites & apps

- Astra can help create websites, web apps, games, frontend experiences

Prompt:

"Build a landing page for my AI newsletter."

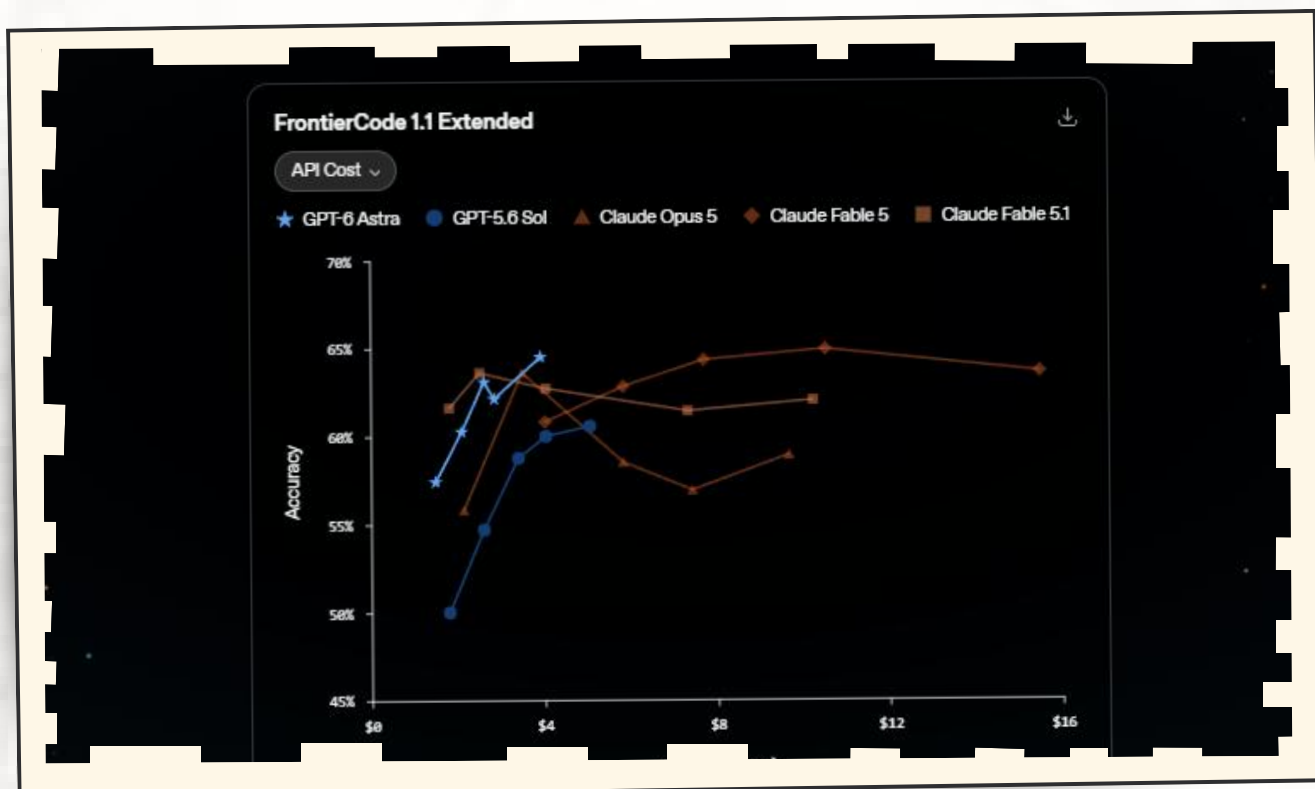

Test the result, not just generate the code

Coding gets more powerful

- Astra is designed for complex software work
- **You can use it to:**
 - Build features
 - Debug problems
 - Run tests
 - Refactor code
 - Work through large codebases

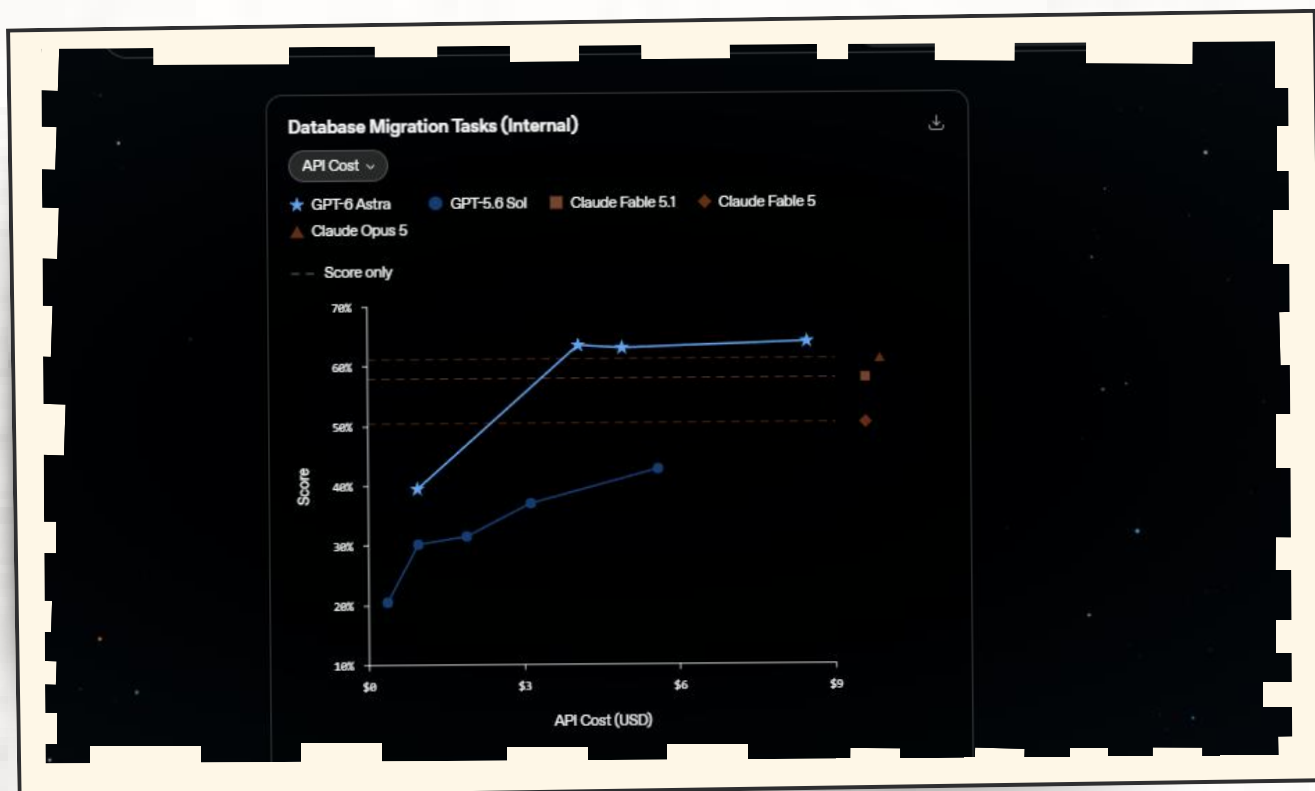

Less “give me code”
More **“help me finish this”**

It handles long tasks better

- Long AI conversations often lose context
- Astra introduces a better approach in Codex:
 - Requirements
 - Test results
 - Previous attempts
 - Important decisions

Astra handle long context in **better way**

How to use Astra

- Don't give it tiny tasks, give it outcomes
- Goal → Context → Constraints → Output
- That's where Astra becomes useful

Prompt example:

"Research 10 LinkedIn content opportunities for AI creators, identify the strongest 3, and turn them into carousel outlines."
