Values & Design Philosophy

We are committed to creating thoughtful work environments that inspire and improve everyday life.

That's why each collection is developed with a strong focus on functionality, refined materials, and carefully considered design and production choices. Our design approach is modular and purposeful — made as adaptable and multifunctional as possible.

This ensures enduring designs that adapt effortlessly to evolving interiors — or can be easily disassembled and repurposed thanks to a minimal material palette. It's our way of embedding circular thinking at the core.

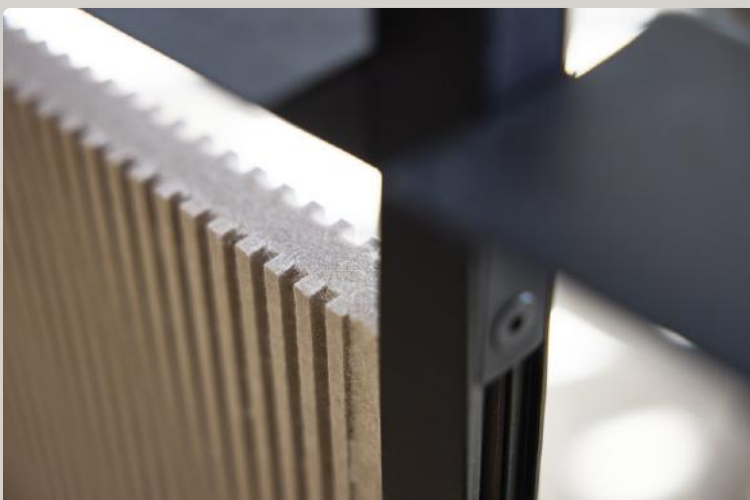

A flexible base makes countless variations

Extend Shelving System

Designed by **apto plus** in 2023, Extend is built around a simple idea: *a flexible foundation that can evolve with the space.*

At the core of Extend is a single vertical profile with integrated tracks. Shelves and modules can be positioned freely and adjusted to the preferred height, while acoustic felt and textile panels, planters and other functional elements can be added to shape the space.

Originally introduced as three series; *freestanding*, *ceiling-mounted* and *wall-mounted*. The system has since expanded to include deeper shelving configurations, providing considerably more room for storage and integrated cabinets. Through new applications, configurations and project-specific solutions, Extend continues to adapt to changing needs - organising, dividing and defining space.

Grounded

Extend Halo

A Subtle Glow

Extend Halo

Extend Halo is crafted in aluminium, reflecting the light with a subtle glow that brings character and understated exclusivity to the interior. The system adds a sense of lightness while maintaining a subtle presence. Extend Halo is wall-mounted and designed for interiors that call for something special.

Extend Halo

Extend 3D Free Standing

Openness & Order

Extend 3D Free Standing

Extend 3D Free Standing brings a sense of openness and order to the interior. Its freestanding design creates structure without closing off the space, while felt panels and planters can be added to shape the expression and level of transparency. Available in two standard colours with a curated selection of felt colours, the system can also be customised for projects that call for a more individual solution.

Clean Lines from Floor to Ceiling

Extend Ceiling Mounted

Extend Ceiling Mounted creates clean, continuous lines from floor to ceiling, bringing structure to the interior while maintaining an open and inspiring atmosphere. The system can be used to define spaces, improve acoustics, introduce greenery and create flexible room-within-a-room solutions.

Extend Hub | Shelves

Extend Hub | Alcove

Extend Hub | Drawers

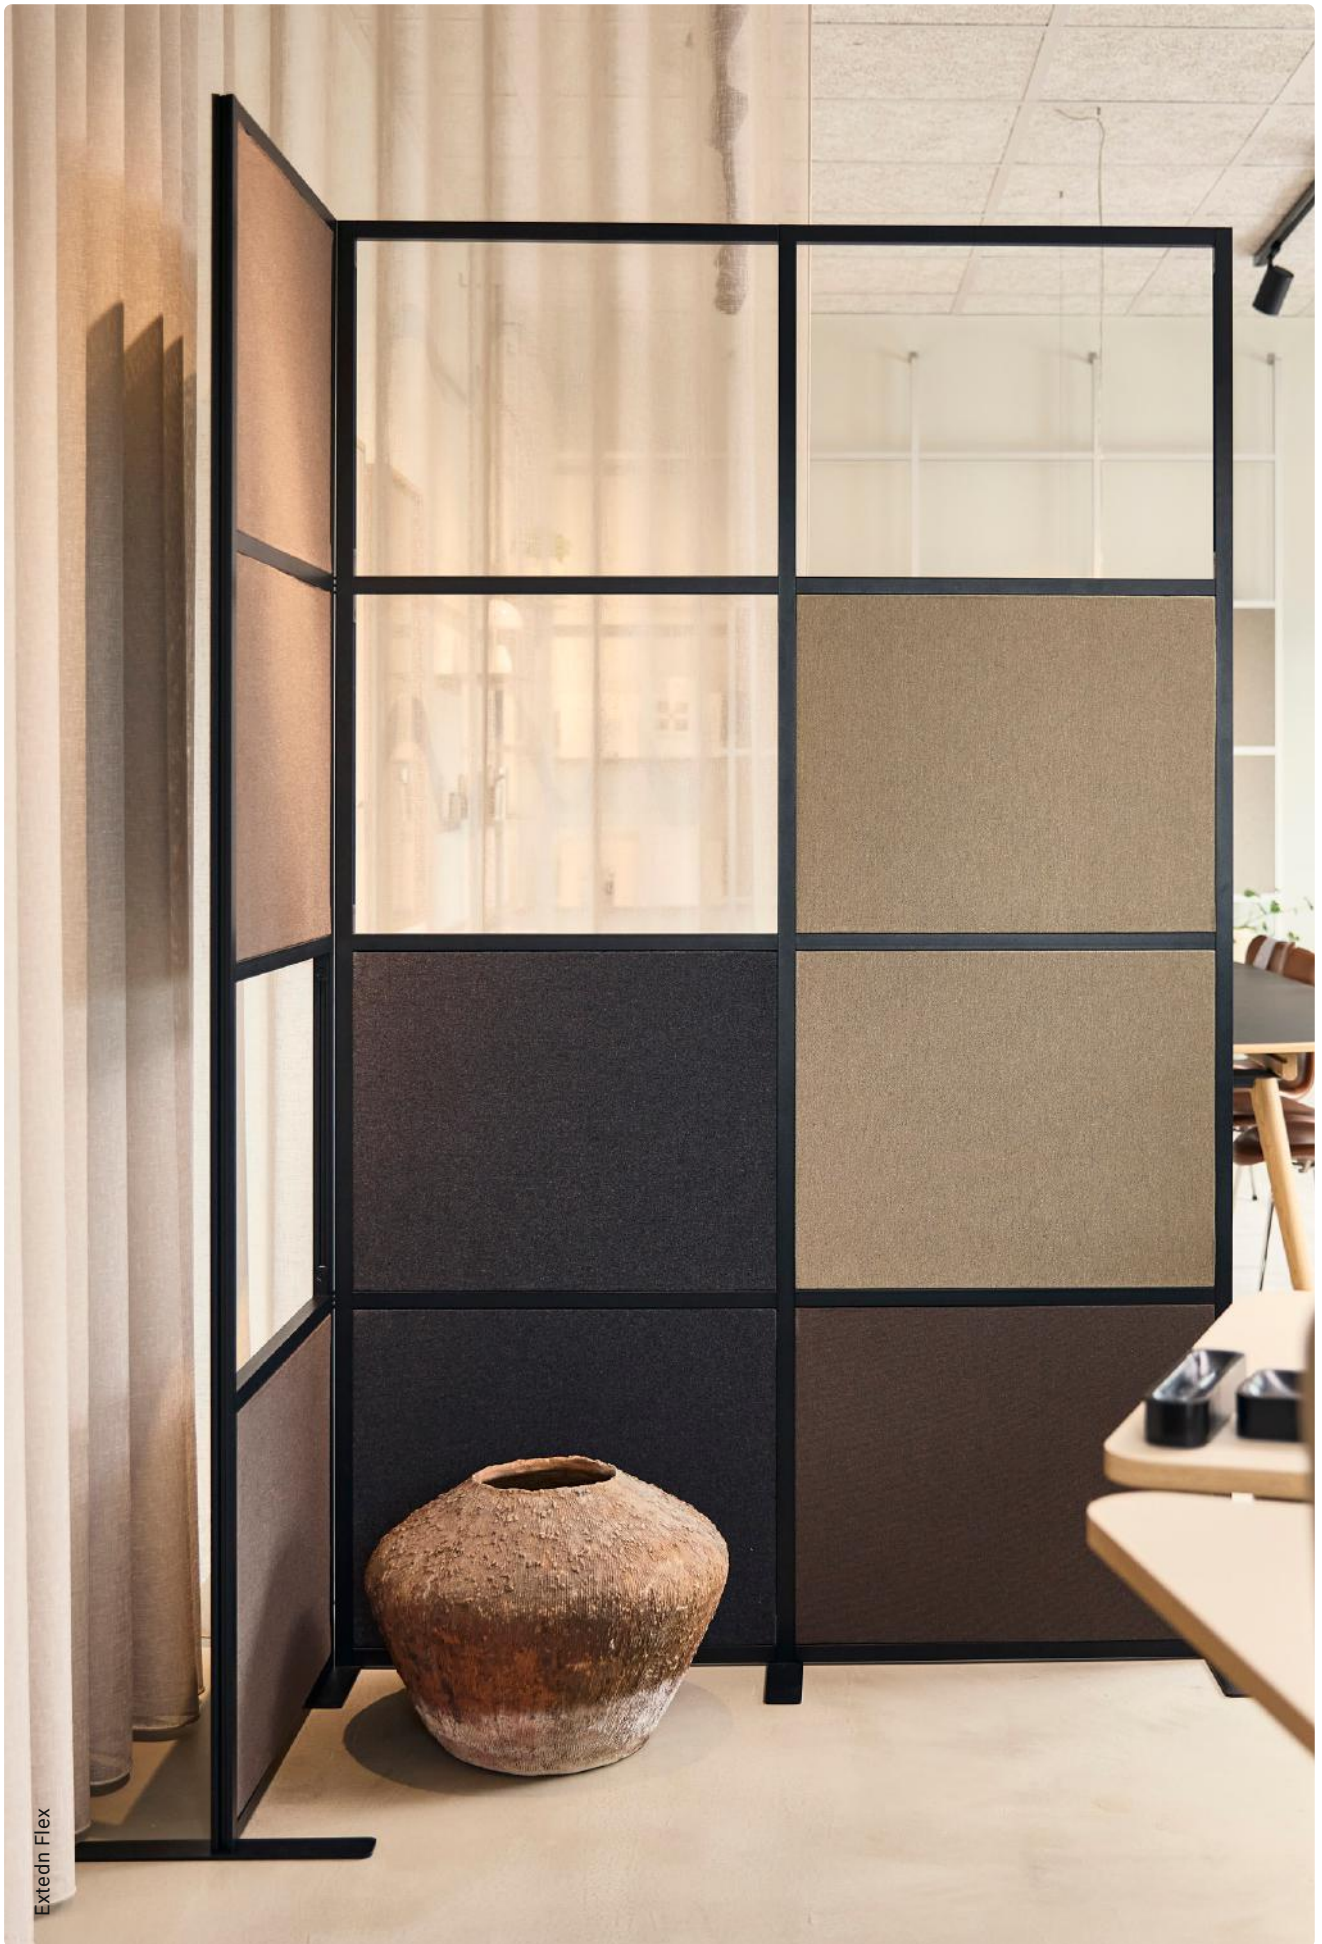

Extend Hub | Desk

Extend Hub

Extend Hub brings together four functional modules: an alcove, drawers, a desk and open shelving. Designed with schools and libraries in mind, it can stand freely within the interior and create inviting spaces within the space. Both the front and back serve a purpose, making Extend Hub the most spacious and multifunctional model in the Extend collection.

Extedn Flex

Extend Flex

Extend Flex is a more simple and flexible room divider that is easy to move, reshape and adapt. It is ideal for reception areas, office zoning and creating smaller spaces within larger interiors. Multiple sections can be connected and arranged in anything from a straight line to a flowing, curved formation.

Crafting Custom Solutions with Purpose

Beyond the Catalogue

Our catalogue offers standard products designed to enhance workplace wellbeing in an aesthetic and functional way.

But our true strength lies in custom solutions. These projects grow from dialogue, take shape at the drawing board, and are refined through prototyping and testing. We approach each task with curiosity, care and full commitment.

Hover Table | Cable Tray Screen | Monitor arm w. Gas

A Unique Take on the Team Table

Hover Table

The design strips away everything unnecessary while retaining the essential functions of a workstation. Each workspace can be adjusted independently using its own height-adjustable column. The table can stand alone in its simplest form or be configured with screens, cable trays and other accessories as needed.

Its distinctive floating form brings users together around a shared centre while still creating space for focus and individual ways of working.

Hover Table | Cable Tray Screen | Monitor arm | Gas

Openness Meets Privacy

Lattice Table

Lattice Table creates an inviting setting for learning, conversation and collaboration. Designed to bring people together while maintaining a sense of enclosure, it is particularly well suited to schools and learning environments where shared ideas and individual focus often exist side by side.

Lattice Table | AI School Environment

Lattice Table | Four People | Counter

Made for Learning Together

The table accommodates four to six people and features a distinctive steel lattice canopy that can be softened with hanging plants. Felt side panels with precisely cut slats create a shifting sense of transparency: viewed from one angle, the table feels sheltered and private; from another, it appears lighter and more open.

Lattice Table can be wall-mounted or positioned as a freestanding table, making it easy to integrate into different spaces and layouts. It is available in two heights: a standard table height of 750 mm and a counter height of 900 mm.

Flexible Durable Recycled

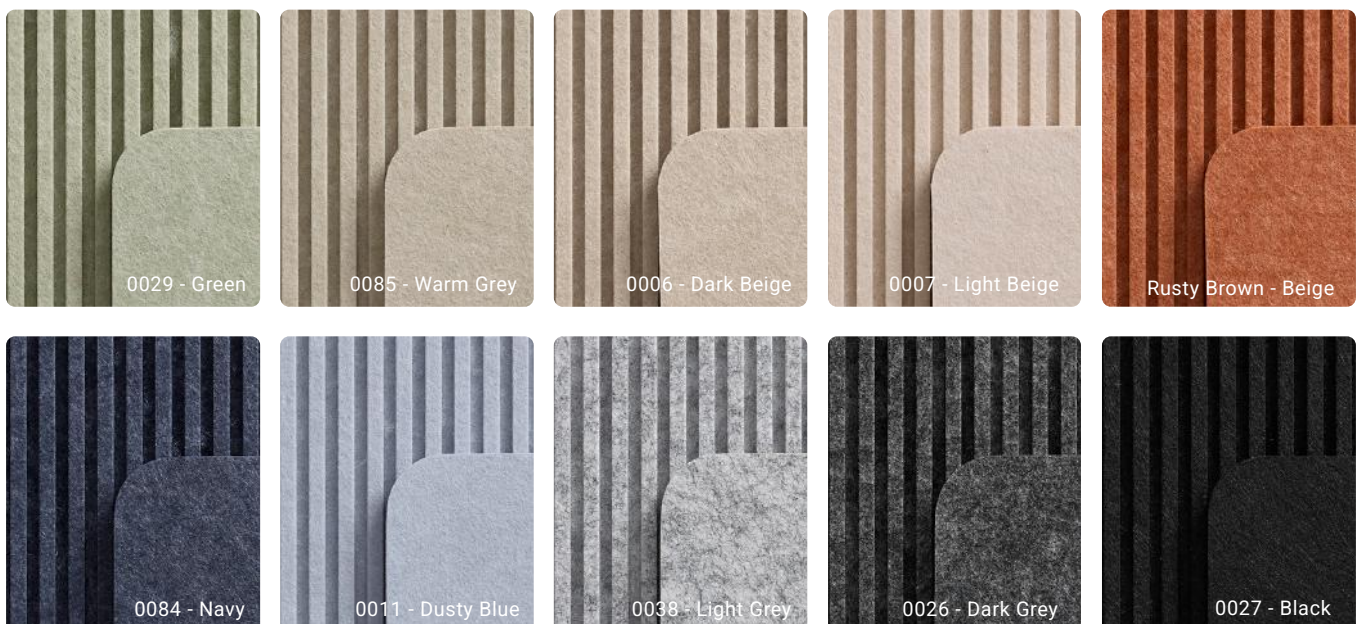

About the felt and colors

Our felt is made from a minimum of 70% recycled plastic, offering a more sustainable alternative to conventional interior solutions. To reduce CO₂ emissions, all felt products are designed for flat packing and efficient transportation.

Felt combines flexibility with durability. Its soft, textile-like surface creates a warm and welcoming atmosphere, enhances room acoustics, and contributes to a harmonious overall aesthetic.

We offer a carefully curated selection of standard colours. For bespoke colour requirements or project-specific needs, we recommend contacting our sales team for guidance.

Standard Colours

Note: Differences between colour samples and the final product may occur. The colour samples in this collection are intended as a guide only. Lighting conditions and shadows can influence the perception of felt colours.

Wooden Frame Artworks

Framing Creativity

Wooden Frames

Designed to bring warmth, texture and function to the wall, our Wooden Frames combines natural wood with a range of carefully considered surfaces and designs.

Choose between abstract felt Artworks, five playful motifs from the Animals series, a Pin Board or an elegant Glass Board for writing and visual communication. Each option is framed by wood, giving the collection a warm and cohesive expression across workplaces, learning environments and shared spaces.

Our felt designs are cut in-house, allowing us to create customised compositions, shapes and colour combinations for individual interiors.

Walls With Character

Felt Wall

Floor-to-ceiling felt transforms the wall into a warm and tactile feature while helping to soften sound and improve the acoustic experience of the space. Logos, lettering and illustrations can be integrated directly into the felt, turning each wall into a distinctive expression of the interior and its identity.

Toobox

Custom Storage Box

Felt Storage Options

The unique qualities of felt make it possible to combine a soft expression with a strong, structured form. Its tactile surface adds warmth and a residential feel to the interior, while the wide range of colours allows it to complement different settings.

Our felt boxes are designed for simple, flexible storage. They fit naturally into some of our shelving systems but can also be carried easily and used wherever needed.

Adapt it to Your Needs

Adapt Board

The concept behind the Adapt Board is to create a beautiful and functional organizational system that can be customized to suit individual needs. Every detail has been thoughtfully considered—from the soft, rounded edges and felt-covered back panel to the cable outlets and the smooth movement of the modules. The board features an organizational system that accommodates eight different modules, as well as an integrated cable tray.

Extedn Flex

Multi Clamp

Clamp is a collection designed to organize, shield and structure the workplace – without compromising on aesthetics.

With a strong grip on the tabletop or shelf, products are easily mounted without tools. The solutions can be moved and adjusted as needed.

A circular design approach that fits into changing and dynamic environments.

Clean & Ergonomic

Table Hook

Clean Desk - Clear Minds

Setting up a desk to look professional, with clean lines and hidden cables, can be a challenge. At the same time, there are increasing demands for ergonomic solutions to ensure employees can work comfortably without strain.

We offer custom solutions and professional screen systems, tailored to the number of monitors required.

Future Flex & Slim Tray

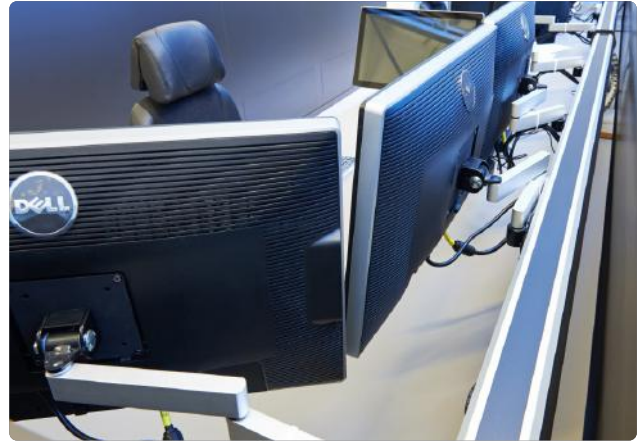

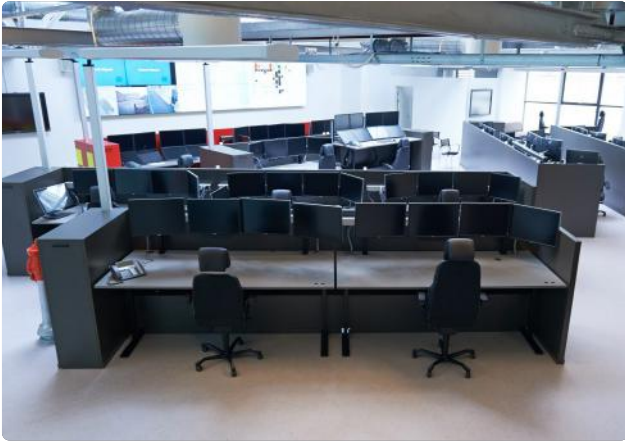

Controller Table & Controller Table Split

Monitor Solution, w. Actuator

Display Solutions for Stability and Clarity

At the main fire station in Copenhagen, the Greater Copenhagen Fire and Rescue Service handles complex administrative tasks, often using up to eight monitors at each workstation.

With multiple monitors, stability and flexibility are essential. Each screen should be easy to adjust without compromising ergonomics or the overall visual expression.

Power I Custom Monitor Solution
Project with **Danske Commodities**
& **Holmris B8**

Power – A Custom Monitor Solution

Power is a custom display solution designed to arrange large screens vertically in a precise semicircle. Four profiles and a curved metal plate form a stable structure, while the screens can be adjusted laterally to create a close and precise alignment along the desired curve. Cables are concealed behind the plate and routed through the integrated profiles, maintaining a clean and minimal appearance.

Power is just one example of the many custom monitor solutions developed by **apto plus**. These solutions are particularly suited to data-driven organisations and work environments where monitoring, overview and access to multiple sources of information are essential.

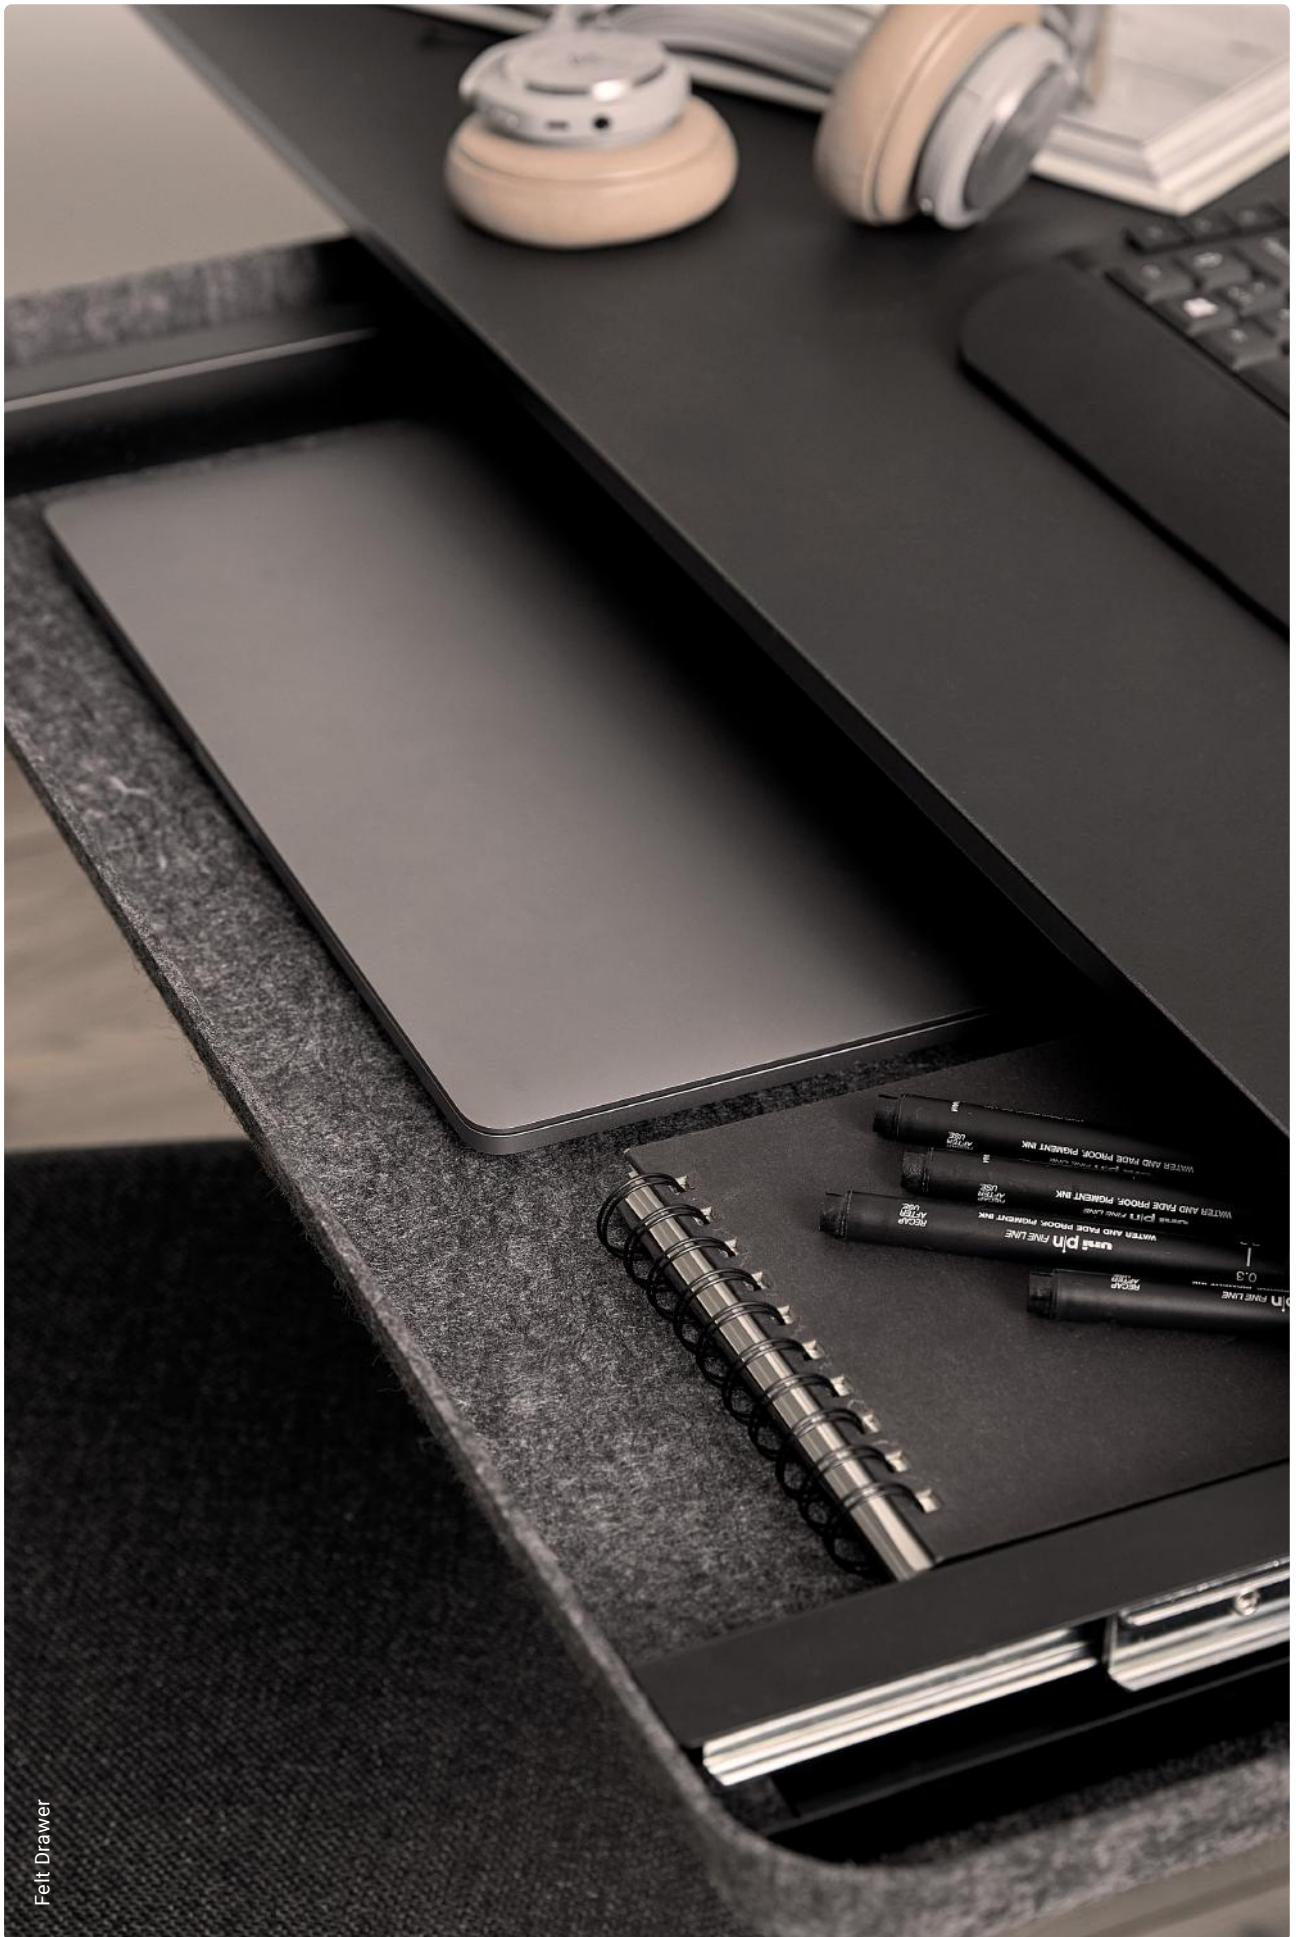

Cable Tray Felt

Softly Shaped - Thoughtfully Made

A soft form

apto plus moulded felt drawer brings soft, organic curves to a clean and considered design. Concealed ball-bearing runners preserve its refined appearance, whether open or closed, making the drawer a discreet and elegant addition beneath the desk.

Desk Trays

Our drawers and trays are designed to meet one essential need: discreet, functional storage for office supplies and devices — always within reach, yet never in the way.

They're made to fit a wide range of desks. With over 64 variations across models, sizes and colours, there's a solution for every workspace.

Support at Every Stage

We are Here to Support Your Project

Whether you are working on a complete interior concept or a smaller project based on selected standard solutions, we are here to offer professional guidance from the first idea to the final result.

Through close collaboration with dealers and clients, we turn ideas and requirements into considered solutions that work in practice. From design support and project guidance to digital tools, drawings and visual resources, we provide what you need to move your project forward.

The three partners in apto plus

We are - Driven & Welcoming

apto plus has been one of Denmark's leading designers and manufacturers of office accessories for the modern workplace since 1997. Originally known as PJ Production, but from 2025, the company offers much more than just desk and office accessories. This led to the decision to rebrand and rename the company, making our brand more visible and reflecting the values we stand for.

The word "**apto**" is derived from Portuguese and means change and adaptability, while "**plus**" represents quality, relationships, collaboration, and positivity.

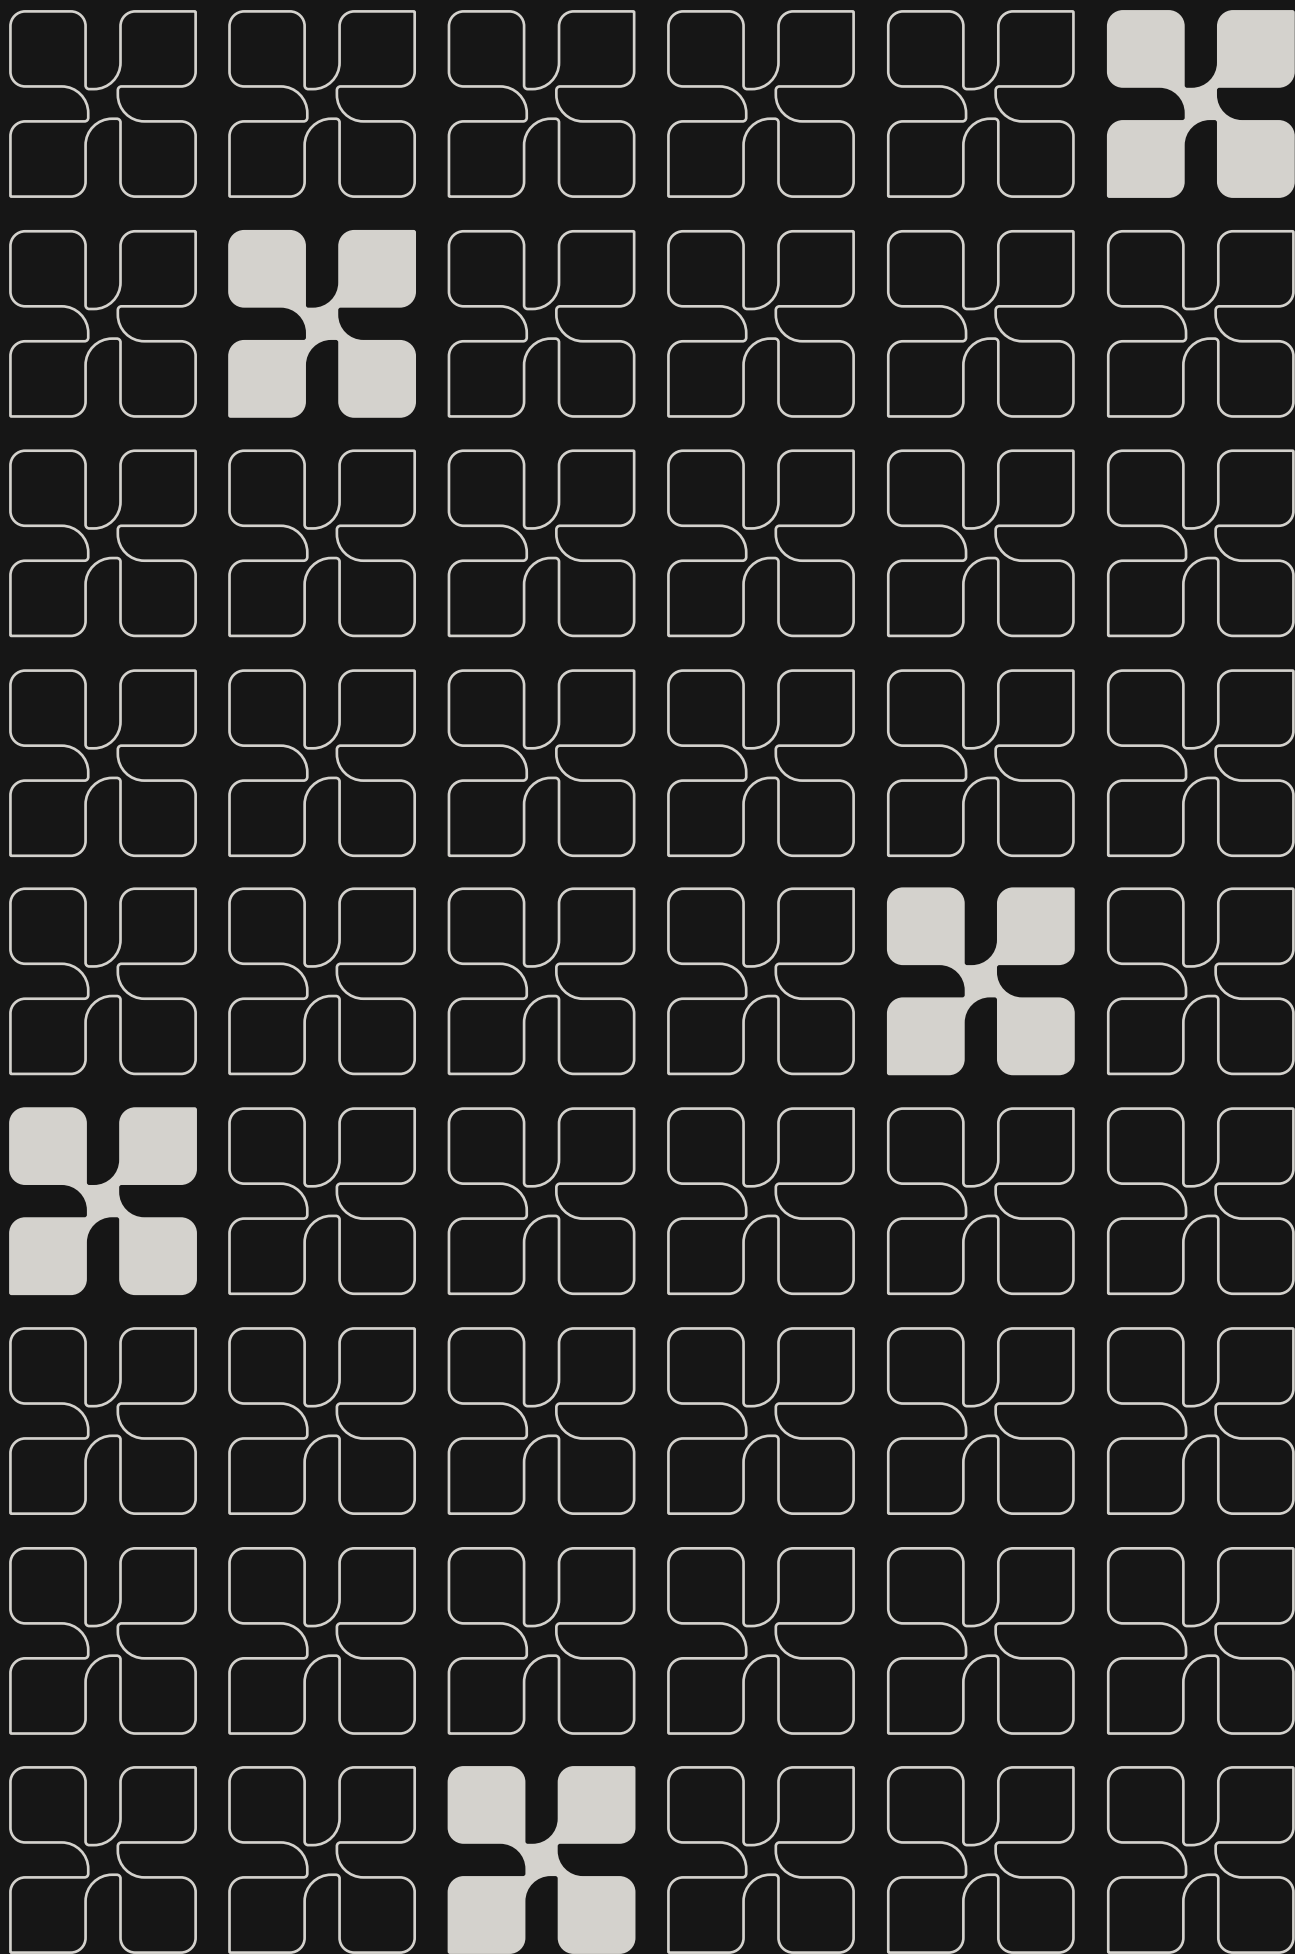

Today, **we design interior solutions for dynamic environments**, creating a comprehensive experience

within the space, tailored both aesthetically, modularly, and functionally.

As a Danish company with ambitious international goals, we create bespoke solutions for both small and large projects—efficiently optimizing our customers' workflows.

We take pride in the fact that several of our employees have been part of the company for more than ten years. These long-term relationships help us build strong partnerships—based on continuity, trust, and meaningful dialogue across multiple projects.
