WHY THIS TOPIC MATTERS

When Delays Happen, What can Actually be Recovered?

Penalties and liquidated damages are among the most disputed issues in construction and infrastructure projects.

The challenge is not only understanding the contract provisions, but also:

- Determining what is enforceable;**
- Interpreting different contract forms correctly;**
- Managing certification requirements;**
- Navigating disputes before arbitrators, adjudicators and the courts.**

**A practical understanding can
significantly influence project outcomes
and dispute resolution strategies.**

WHAT YOU'LL LEARN

Key Questions the Panel will Address

- How do FIDIC, NEC, JBCC and JCT contracts approach penalties and liquidated damages?
- How important is the choice of governing law?
- Does the role of the Certifier differ across contracts and jurisdictions?

Gain practical guidance from experienced practitioners who have worked across multiple international legal systems.

REAL INSIGHTS FROM GLOBAL EXPERTS

The Panel will share valuable insights

- **Real-world examples of successful and unsuccessful claims;**
- **Lessons from dispute resolution processes;**
- **Insights from South Africa, England and Wales, and other international jurisdictions;**
- **Practical perspectives for parties, advisors and dispute resolvers.**

Designed for anyone involved in construction contracts, claims, arbitration, adjudication or project delivery.

MEET THE PANEL
