

Camden

Reframing Sustainability

Who is Camden?

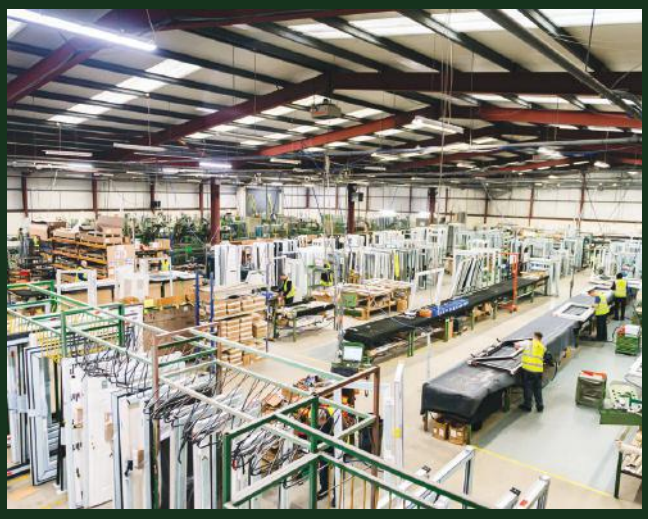

- Family-established business founded in 1983
- Operating through 5 manufacturing facilities and a dedicated recycling plant, spanning 455,000sq ft
- Employs 480+ staff based in County Antrim, Northern Ireland
- Award-winning, accredited organisation
- Committed to skills development and sustainability initiatives through partnerships with local schools

What makes us different?

- A sustainability-led manufacturer operating a fully integrated, closed-loop system with 80% recycled materials and on-site recycling and glass production.
- All windows, doors, and glass are designed and manufactured in-house in Northern Ireland, creating a streamlined one-stop-shop that removes third-party delays and improves delivery speed.
- Lean manufacturing, a skilled workforce, and continuous innovation drive efficiency, reduce lead times, and enhance quality, supported by Camden Direct a 24/7 digital ordering platform that simplifies customer access and improves flexibility.

Camden

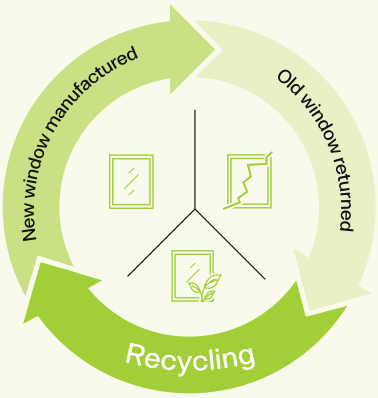

REGLA Optimax plus

Sustainable practices

At Camden, we're committed to reducing our environmental footprint through innovative manufacturing, energy efficiency and circularity.

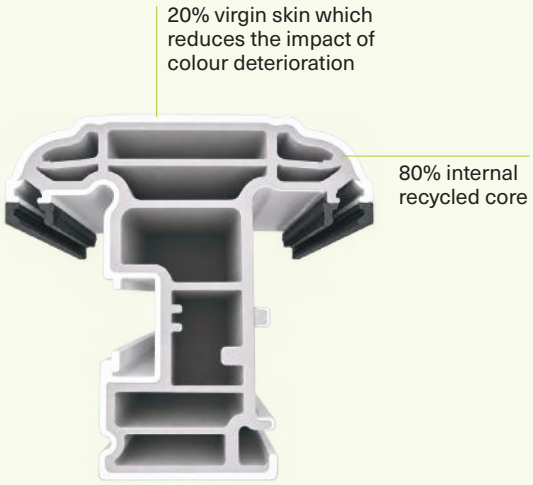

We recycle up to 150 tonnes of post-consumer uPVC frames every week, reprocessing the material on-site and returning it directly into production. 80% of our internal profile core is made from recycled PVC, with a 20% virgin PVC outer skin to help minimise colour deterioration from weather and time.

Our approach:

- Reduces landfill waste
- Lowers embodied carbon
- Reduces reliance on virgin materials
- Supports ESG goals

At Camden, we turn recycled PVC into high-performance products, making sustainability part of our process, not just our promise.

ZERO

Recycling Process

01.
Collection & Recovery

Camden collects post-consumer uPVC frames and brings valuable material back into our manufacturing process. Our recycling facility helps divert approximately 150 tonnes of waste from landfill every week.

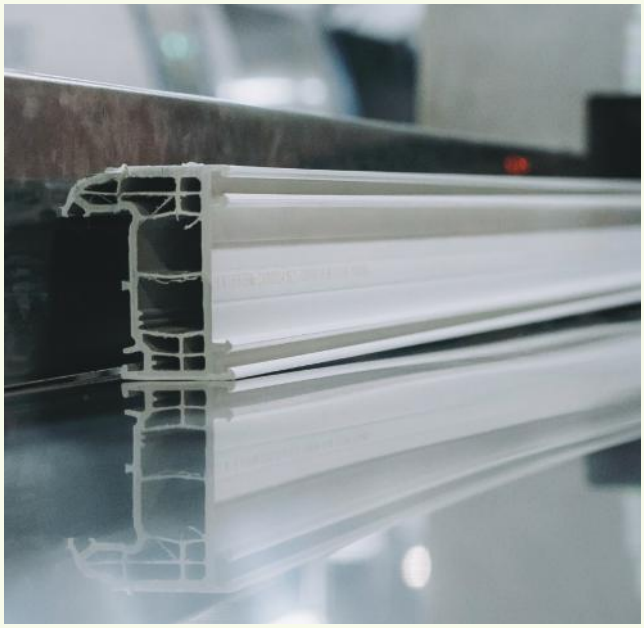

02.
Processing & Separation

Recovered frames are crushed and granulated to make the material ready for processing. Metals, foils and other components are separated from the uPVC, leaving clean material ready for recycling.

03.
Material Refinement

The uPVC granules are then milled into a fine recycled powder through pulverisation. This creates a consistent material that can be used again in new Camden products.

04.
Extrusion/ Frame Rebuild

Using up to 80% recycled material, Camden extrudes new profiles for high-quality window and door frames. Rubber seals are added and foils can then be applied to create the required colour and finish.

Fully unified delivery system

We have developed a fully unified delivery system so that we can provide our customers with the most efficient and reliable service possible.

In 2018, we introduced a fully unitised delivery system using cushioned protective transport cages and MOFFETT truck mounted forklifts to ensure your order is not only delivered on time, but in perfect condition.

Regional hubs across Ireland and the UK mean our people are on hand to provide on the ground support to our customers and ensure things run that little bit smoother.

Cushioned Transport Cages

Lorry Mounted Forklifts

Multiple UK & Ireland Locations

Extensive fleet

At Camden, we have full control of our delivery system. With our extensive fleet of trucks, we pride ourselves on the ability to consistently meet your delivery requirements and work to competitive turnaround times.

We have developed a fully unified delivery system so that we can provide our customers with the most efficient and reliable service possible.

Corporate Social Responsibility (CSR)

Charity of the year

Each year, Camden supports a charity that is close to the hearts of our employees, raising vital funds through a variety of fundraising activities.

People

Throughout the year, Camden supports its people through wellbeing initiatives, health workshops, social events, and employee support services. We are committed to ensuring our employees — the heart of our business — feel valued, supported, and proud to work at Camden.

Community

Camden is proud to support the local community through school initiatives such as CV clinics, interview skills workshops, and STEM projects.

Our future plan is to bring our passion for recycling into local parks and beaches through clean-up and litter-picking initiatives, while continuing to push boundaries internally by strengthening our recycling efforts and sustainable practices.

We take CSR seriously!

Windows

At Camden, performance and security are built into every window. From energy efficiency and weather protection to robust hardware and enhanced security features, our windows are designed to deliver reliable performance for years to come.

Performance & Efficiency

Proven Quality
High-quality manufacturing, backed by a 15-year performance guarantee.

Energy Efficient
Excellent U-values help reduce heat loss and improve thermal performance.

Weatherproof
Effective drainage and sealed chambers provide protection from the elements.

Multi-Chamber Profiles
Designed to improve thermal performance and reduce energy loss.

Sleek Design
Concealed gaskets create clean lines and a streamlined finish.

Safety & Security

Secure by Design
Internally glazed and rigorously quality checked for added security.

Espagnolette Locking
Multi-point locking delivers reliable security as standard.

Heavy-Duty Hinges
Strong, durable hinges support larger and heavier glazing.

Triple Strap Locking
Three-point locking provides enhanced strength and stability.

Safety Hinges
Restrict opening to improve safety and help prevent injury.

Enhanced Glazing
Toughened and laminated glass options provide additional protection.

Flush Sash

Classic Style. Modern Performance.

- True flush exterior for a clean, contemporary finish
- Timber-inspired detailing for heritage and period properties
- Ideal for character homes and conservation-style projects
- Clean sightlines with a premium, crafted appearance
- Combines traditional aesthetics with modern uPVC performance

Casement

Versatility. Everyday Installation.

- Our most versatile window style for a wide range of projects
- Multiple opening configurations to suit different applications
- Suitable for new build, replacement and refurbishment
- Straightforward, familiar installation format
- Wide range of configurations for different property styles and requirements

Tilt & Turn

Elegant. Versatile. Functional.

- Dual-opening design for ventilation and easy cleaning
- Opens inwards — ideal where external access is restricted
- Practical solution for upper-floor applications
- Large opening area for increased ventilation
- Modern European styling with a clean, streamlined appearance

French

Traditional Style. Enhanced Opening.

- Double-opening configuration creates a wider ventilation area
- Central meeting stile provides a classic symmetrical appearance
- Ideal for period properties and traditional-style homes
- Creates a strong visual connection between inside and outside
- Particularly suited to larger openings and statement elevations

Shaped

Statement Windows. Bespoke Design.

- Made-to-measure shapes for non-standard openings
- Ideal for architectural features and character properties
- Options for arches, angles and other bespoke configurations
- Helps replicate or complement existing window designs
- Adds flexibility for projects were standard rectangular windows aren't suitable

Doors

At Camden, our doors are designed to deliver lasting performance, strength and security. From energy efficiency and all-weather protection to robust construction and advanced locking systems, every door is built to keep homes warm, secure and protected for years to come.

Performance & Efficiency

Proven Quality
Strong, durable construction designed for long-term performance.

Energy Efficient
Core components and multi-chamber frames help reduce heat loss and maintain comfortable temperatures.

Weatherproof
Weather-resistant skins and sealed edges help protect against the elements.

Double & Triple Glazing
40mm and 44mm glazing options deliver improved thermal performance, energy savings and comfort.

Safety & Security

Multi-Point Locking
Multi-point locking mechanisms provide reliable security as standard.

Hook & Lock Option
Additional hook locks offer enhanced security and are positioned within the steel-reinforced door frame.

Strength & Security
Available with 28mm or 40mm panel thicknesses, with options for toughened or laminated glazing.

Flag Hinges
High-performance hinges provide added security, durability and ease of use.

French Doors

Classic. Open. Inviting

- Classic double-door design for a timeless, symmetrical look
- Wide opening for easier access between indoor and outdoor spaces
- Ideal for period, heritage and traditional-style properties
- Multiple opening configurations to suit different layouts
- Strong visual connection between home and garden
- Available in a range of styles, colours and hardware options
- Suitable for replacement and new-build projects

Patio Doors

Bright. Spacious. Effortless.

- Wide glazed panels maximise natural light and outdoor views
- Smooth sliding operation without requiring additional opening space
- Ideal for modern homes and larger openings
- Space-efficient alternative where swing doors aren't practical
- Large glass areas create a strong connection with the outdoors
- Easy-to-operate design suited to everyday family living
- Available in multiple configurations and finishes

Panel Doors

Versatile. Stylish. Made to Fit.

- Wide choice of panel designs to suit traditional and contemporary properties
- Flexible glazing options to balance privacy, light and style
- Ideal for front, back and side entrances
- Customisable configurations to suit different property styles
- Clean, versatile designs that complement a wide range of homes
- Practical everyday operation with durable, easy-to-use hardware
- Suitable for replacement, renovation and new-build projects

Composite Doors

Stylish. Secure. Built to Last.

- Wide choice of traditional and contemporary designs
- Flexible glazing options to suit different styles and requirements
- Durable finishes designed for long-lasting performance
- Energy-efficient design helps improve comfort and reduce heat loss
- Available in a range of sizes to suit different properties and openings
