Deep-Dive Live Course

Updates in Management of Neurological Emergencies

Dr Philip Judge

Starts 5 October 2026 | 3-Week Course

This 3-week online course reviews current evidence and practical approaches to three common neurological emergencies in veterinary patients. We will cover traumatic brain injury, status epilepticus, and spinal trauma and acute disc disease. Each week focuses on triage, diagnostic decision-making, medical and surgical options, and monitoring. The content is designed for veterinarians who want the latest updates, with clinically applicable protocols you can use in practice.

Online Conference

Online Veterinary Nurse & Technician Conference 2026

in collaboration with Hill's Pet Nutrition Australia

6 - 8 October 2026 | Online Conference

Join us for VNCON26 - a free, three-day online conference for veterinary nurses and technicians. Enjoy six practical clinical lectures covering emergency care, behaviour, nutrition, exotics and weight management, with plenty of takeaways for practice. Earn 6 CPD points (RACE pending) while learning, refreshing your knowledge and connecting with the veterinary community.

Deep-Dive Live Course

Updates in Management of Anaesthetic Complications

Dr Philip Judge

Starts 16 November 2026 | 3-Week Course

This course for veterinary nurses and technicians focuses on the recognition and management of common anaesthetic complications. We will cover the big three: hypotension, hypothermia and abnormal respiration, along with a number of others, including vomiting /regurgitation, and prolonged anaesthetic recovery. Each week emphasises practical monitoring, early intervention, and clear communication with the veterinary team required to manage these complications in a stress-free manner – so you can support your patient in the best way possible.

For Veterinarians

Updates in Management of Neurological Emergencies

A 3-Week Deep-Dive Live Online Course for Veterinarians

2026
