Bubble AI

Bubble AI enables anyone to **build powerful web apps without coding**, using AI-driven workflows, visual design tools, and automated logic to accelerate development and launch products faster. Contact **thinh.duong@aidcvietnam.org**

ChatGPT

ChatGPT provides **advanced AI capabilities** for conversation, automation, content creation, and data analysis, helping organizations enhance productivity and innovate faster with intelligent, scalable tools.

Contact
thinh.duong@aidcvietnam.org

GPT-3

GPT-3 apps use generative AI to deliver search, conversation, content creation, and creative experiences, enabling developers to build intelligent tools, automate workflows, and enhance user interaction across diverse industries.

Contact: thinh.duong@aidcvietnam.org

GPT 3.5 Turbo

GPT-3.5 Turbo is a fast, efficient AI model designed for generating text, answering questions, and supporting conversational tasks with reliable performance and low cost. Ideal for everyday applications. Contact: **thinh.duong@aidcvietnam.org**

GPT-4

GPT-4 is an advanced AI system that understands complex questions, generates clear insights, and supports decision-making across engineering, research, and leadership tasks with speed and precision. Contact: **thinh.duong@aidcvietnam.org**

GPT-6 Astra

GPT-6 Astra delivers ultra-fast reasoning, multimodal intelligence, and enterprise-grade reliability, powering complex workflows, automation, and real-time decision support across industries. Contact **thinh.duong@aidcvietnam.org**

ElevenLabs – AI Voice Technology

AI voice platform delivering **realistic text-to-speech, voice cloning, and multilingual audio generation**, supporting projects featured on **www.drthinhduong.com**.

- Provides scalable tools through **ElevenAPI**, enabling expressive, high-quality voice experiences for modern AI applications.

ElevenLabs Studio 4.0 – AI Audio Creation

Advanced AI audio studio offering **realistic voice generation, cloning, dubbing, and multilingual speech tools**, supporting projects featured on **www.drthinhduong.com**.

- Powered by upgraded ElevenLabs models to deliver **high-quality, expressive, and scalable AI audio** for modern applications.

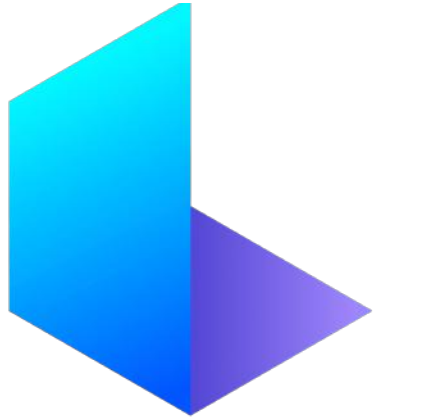

Grok AI – Advanced Multimodal Intelligence

- Grok AI is a multimodal large-language model offering **real-time search, advanced reasoning, coding, and image/video generation**, supporting projects featured on **www.drthinhduong.com**.

Luma AI

Luma AI is the **intelligent creative agent for enterprise**, transforming product visualization, digital content, and immersive experiences with advanced AI. It accelerates workflows, enhances creativity, and delivers high-quality 3D and media outputs at scale. Contact **thinh.duong@aidcvietnam.org**

LUMA AI

Lumi AI

Lumi AI automatically analyzes **ERPs and databases** to uncover hidden efficiencies, reduce waste, and reveal untapped ROI opportunities. It empowers enterprises with data-driven insights for smarter decisions and optimized operations. Contact **thinh.duong@aidcvietnam.org**

Lumi AI 3.0

Lumi AI rolls out **Lumi 3.0**, built to handle complex enterprise workflows with automated ERP analysis, deep database intelligence, and ROI discovery. It streamlines decisions, boosts efficiency, and unlocks hidden value across large organizations.

Contact

thinh.duong@aidcvietnam.org

Meta AI

Meta AI delivers advanced multimodal intelligence, enabling fast content generation, smart automation, and enterprise-ready workflows across platforms with scalable performance and deep integration. Contact **thinh.duong@aidcvietnam.org**

Muse Spark 3.1

Muse Spark 1.3 delivers advanced creative intelligence, generating high-quality concepts, visuals, and content with faster processing and enhanced precision for enterprise workflows. Contact **thinh.duong@aidcvietnam.org**.

Stable Diffusion – Open-Source Image Generation (Stability AI)

Open-source AI model enabling **high-quality, customizable text-to-image and image-to-image generation**, supporting creative and enterprise projects featured on **www.drthinhduong.com**.

- Developed by **Stability AI**, offering flexible diffusion-based workflows for **advanced visual creation and automation**.
