BRIGHT IDEAS SMART SOLUTIONS

Driven by innovation, defined by quality,
designed for you.

At VAKO/Domicet, smart design starts with flexibility. We create window solutions that adapt, not the other way around.

WHY INGLAZIA® IS THE RIGHT CHOICE

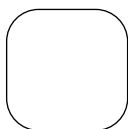

Expand the time you can spend on your glazed balcony or in your conservatory and make them an extra room to your house! With inGlazia® blinds you can easily regulate the temperature and your privacy.

The inGlazia® system is perfect for movable doors or windows due to its minimal need of installation space.

COLOURS

BLACK

WHITE

GREY

INDOORS

- Perfect fit for tilt-and-turn windows and doors
- Adds clean, modern shading without heavy curtains

BALCONY

- Compact system ideal for glazed balcony structures
- Creates privacy in close urban surroundings

GLASS TERRACE

- Controls heat build-up under large glass surfaces
- Suitable for roof glazing and glass panels and doors

FABRICS

- inGlazia® fabric range

OPERATION

Move the blind effortlessly from the main profile or by using handles or a control wand – from the top down or from the bottom up.

MANUAL

- Easy to operate by hand
- Profile design fitted for fingers

HANDLE

- Adjustable position
- Clicks into profile
- Easy to remove

CONTROL WAND

- Use with extra high blinds
- Effortless to use
- Slim design and light weight

inGlazia® 15MM FOR INDOORS

The inGlazia® pleated blinds offer a versatile shading solution also for tilt-and-turn windows, standard windows and doors, as well as larger indoor window surfaces. They combine practical functionality with clean, modern aesthetics.

A wide range of fabric options is available, from light-filtering transparent qualities to blackout solutions — allowing you to create the desired atmosphere while maintaining practical comfort.

With the full inGlazia® range, the blinds can be positioned at the top, bottom, or anywhere in between — whether in use or not — exactly as you desire.

FRAME BRACKET

- Compact size
- Suitable for narrow frames
- Glare control and heat reduction.

maximum size

width = 180 cm

height = 300 cm

A versatile solution compatible with most glazing systems, offering easy installation and **complete coverage for the entire balcony.**

With range of inGlazia® blinds you can easily regulate the temperature and your privacy.

inGlazia® 15MM FOR BALCONY

inGlazia® pleated blinds provide sleek, compact shading for your upper glazing. The slim 15 mm design ensures smooth operation, effective glare control and enhanced privacy — without adding bulky structures to the glazing.

UNIVERSAL BRACKET

- Mounting straight to balcony glazing
no screw installation required
- Suitable for glass thicknesses of 6, 8, 10 and 12 mm
- Glare control and heat reduction.

maximum size

width = 120 cm
height = 200 cm

inGlazia® railing blinds are designed for the lower glazing panel, providing effective privacy and light control. The streamlined system allows easy, no-screw installation without adding bulky structures to the glazing.

SIDE CHANNEL BRACKET

- Railing blind – no screw installation required
- Suitable for both horizontal and vertical operation

maximum size

VERTICAL

width = 120 cm
height = 110 cm

HORIZONTAL

width = 200 cm
height = 110 cm

inGlazia® 15MM FOR GLASS TERRACE

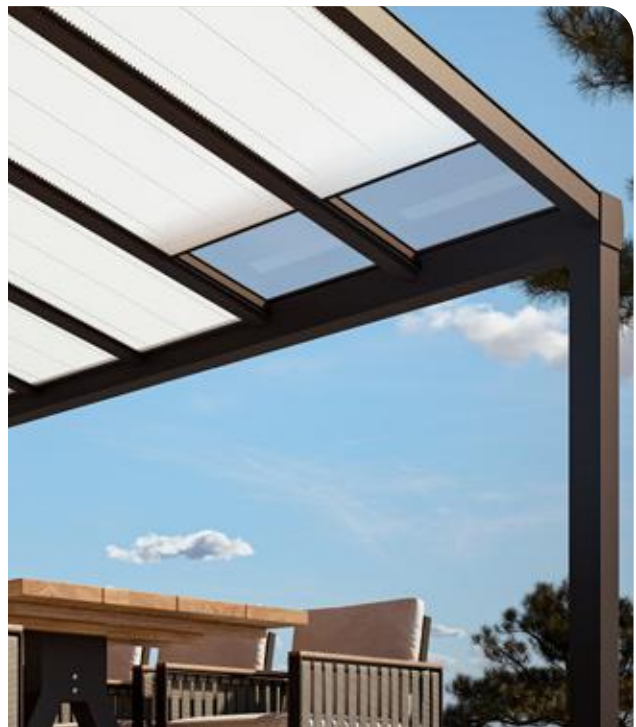

ROOF

The system features side channels and is operated with a control wand. It offers a maximum length of 400cm and requires no tension wires to install.

maximum size

width = 90 cm

height = 400 cm

GLASS PANELS/DOORS

Can be mounted with frame or universal brackets. Suitable for sliding doors and glass panels.

maximum size

FRAME BRACKET

width = 180 cm

height = 300 cm

UNIVERSAL BRACKET

width = 120 cm

height = 200 cm

The inGlazia® tensioned cord shoe – a smart and compact shading solution designed for both doors and standard windows.

Thanks to its tensioned cord design, the fabric remains neatly in place, making it especially suitable for frequently used doors.

CORD SHOE

This small 2-profile pleated system offers a sleek and practical option where space is limited.

- Compact size
- Suitable for narrow frames
- Glare control and heat reduction.

maximum size

width = 120 cm
height = 250 cm

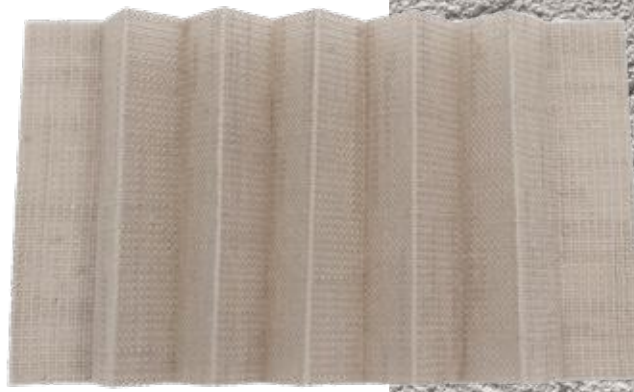

The system is screw-fixed directly onto wooden, aluminium or plastic frames, ensuring a secure and durable installation. Its slim construction makes it particularly ideal for narrow windows and tight spaces where traditional systems may not fit.
