BodyBalanceCheck

Automated and rapid body scan

The ideal support for wellbeing

Simple, automated and fast energetic analyzeing at the highest level

The BodyBalanceCheck Family

Prevention and early detection are becoming increasingly important. Today´s way of living, as well as nutrition and environmental pollution can significantly weaken the body.

Energetic disorders can develop slowly and without you noticing anything at all.

The BodyBalanceCheck enables you to carry out a complete, bio-energetic check. It automatically scans and evaluates the frequency patterns of the entire body, including internal organs, bones and tissues down to the cell level.

It is available in two versions: The BodyBalanceCheck Standard for beginners and the BodyBalanceCheck Advanced with extended functions. An upgrade from “Standard” to “Advanced” is possible at any time.

You will quickly obtain an overview of your client´s energetic status. In the case of detected disturbances, the BodyBalanceCheck will suggest possible causes and provide suitable guidance for further procedures.

What makes it special?

- Simple and intuitive operation
- Clear and easy to understand evaluations
- High level of automation
- Fast and efficient

An innovative and time-effective energetic analysis

- The BodyBalance Check is a bio-energetic method that analyzes the entire state of the body through the use of a special headset.
- In addition to existing imbalances, it is also possible to identify energetic disorders long before they manifest physically.
- With extensive visualization, clients are taken on their own scan journey. Understanding and cooperation are significantly increased.
- Ideal for optimizing the workflow even without knowledge of a manual energetic test technique.
- Easy to get started with. Simple operation and minimal training required.

An overview of BodyBalanceCheck Standard and Advanced

	Standard	Advanced
Quick scan for fast and comprehensive overview	✓	✓
Automatic scan profiles "Express", "Normal", "Detailed"	✓	✓
Creation of own scan profiles	✓	✓
Extended scan selection directly via "Organ systems"	✗	✓
Measure deeper to the cell level directly via the measured scan images	✗	✓
Graphical display of entropy points and curves	✓	✓
Automatic evaluation of the whole scan	✓	✓
Evaluation of the relevant areas, dysbalances, stresses and support from the whole scan	✓	✓
Details of the relevant areas, dysbalances, stresses and support from individual scan images	✗	✓
Evaluation of the recommended and to be avoided foods	✓	✓
Individual and customizable final report for printing	✓	✓
Detailed scan image analysis via "System groups"	✗	✓
Psychological and emotional aspects of the scan image interpretation	✗	✓
Transfer of individual etalons to a storage medium	✓	✓
Transfer of more etalons in combination to a storage medium	✗	✓
Testing of external substances	✗	✓
Automatic energetic haromonization for the whole scan or for individual images	✗	✓

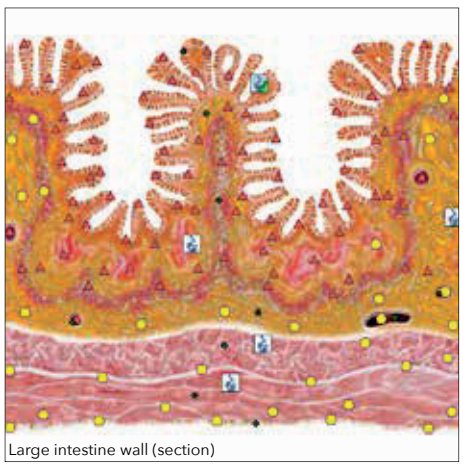

The Standard and Advanced versions

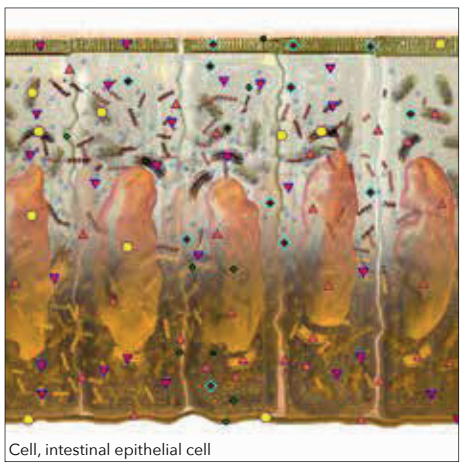

Testing

Scan type min, s	Scan runtime (ca.) *	Creation of evaluation *
Quickscan	15 secs	10 secs
Express	2,5 mins	30 secs
Normal	10 mins	2 mins
Detailed	25 mins	5 mins

Representation

Intestine

Large intestine wall (section)

Cell, intestinal epithelial cell

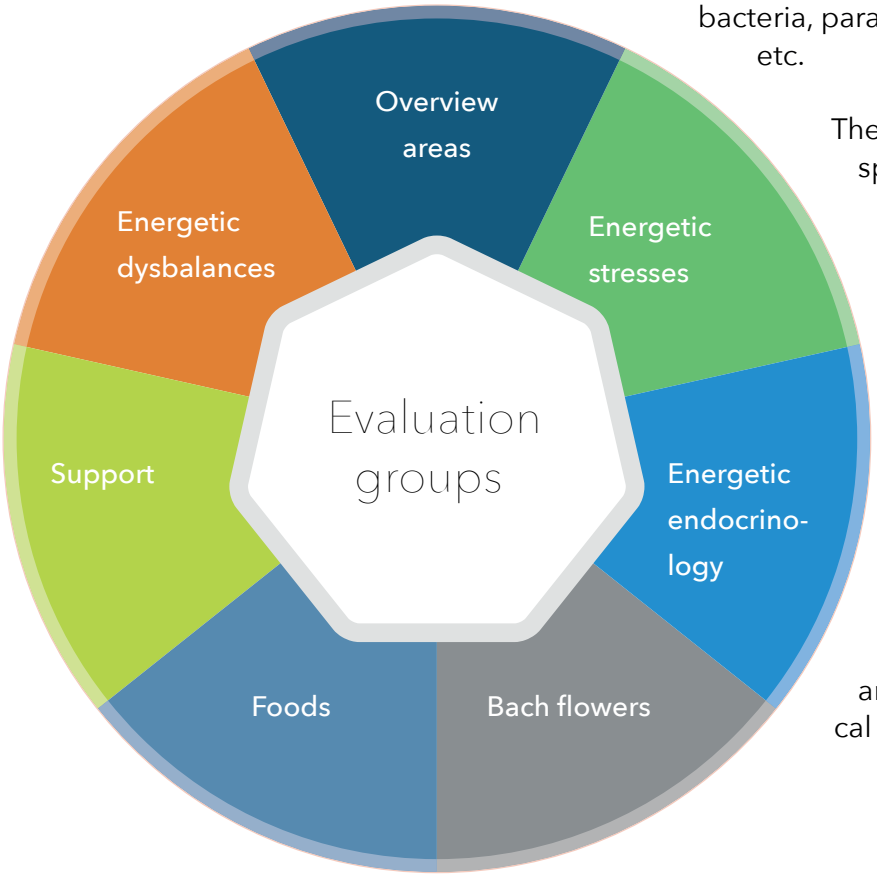

* Determined with standard notebook Lenovo Core i5 (differing times for other computers and processor performance).

Evaluation

The evaluation is **generated automatically** and provides you with **a quick overview of the energetic state** of your client.

The evaluation shows weakened areas, imbalances or stresses. Everything is available at a glance and is summarized in clear categories.

In addition to the overview evaluation, the software supports further with a detailed analysis of the energetic causes. The so-called etalons (reference frequency patterns) provide information about possible energetically disturbing frequency patterns of allergens, viruses, bacteria, parasites, environmental pollution etc.

The identified deviations are displayed visually and listed according to priority.

You can transfer the frequencies of stressful etalons, as well as supporting frequencies, onto a storage medium for use in your further bioenergetic work.

In addition, you will also receive another evaluation category. Bach Flowers give hints about mental imbalances and can be used for psychological stabilization.

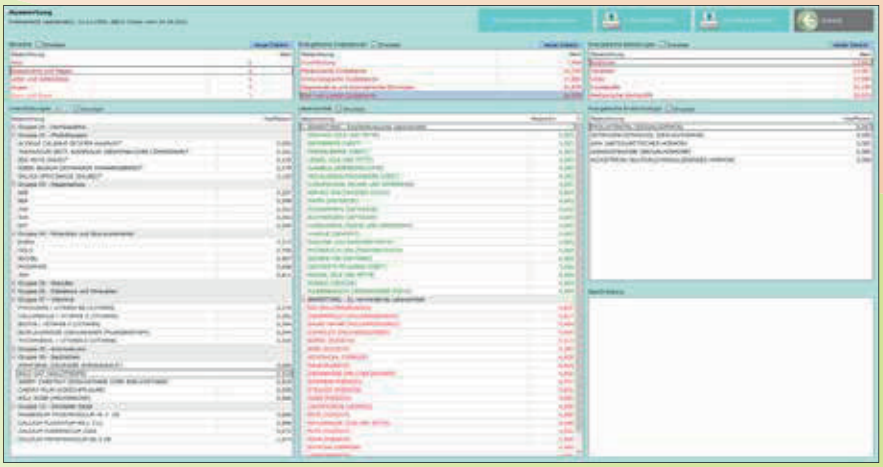

Documentation

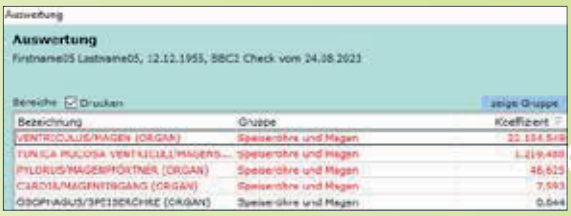

With one click, you will receive a clear report about foods to be avoided, as well as recommended foods from an energetic perspective. The final report helps to optimize your documentation and the food list can also be given to the client to encourage their active participation.

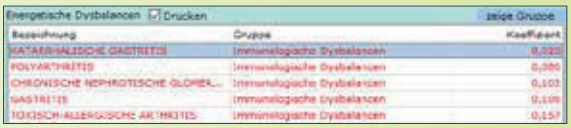

Evaluation groups

All scanned information is automatically selected and evaluated into the adjacent categories. This ensures that the evaluation has a clear structure and helps to support your decision making.

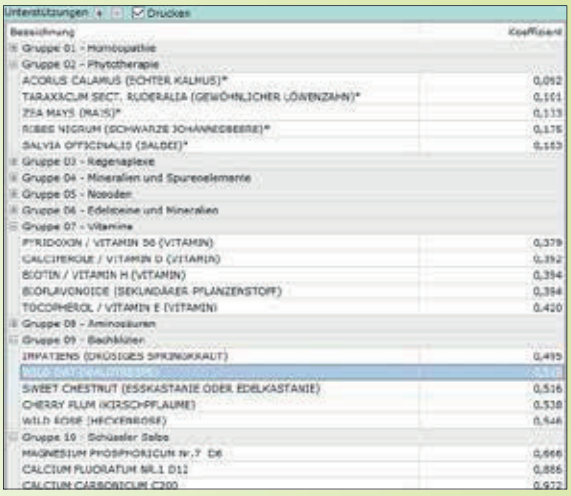

You will receive detailed information about all groups.

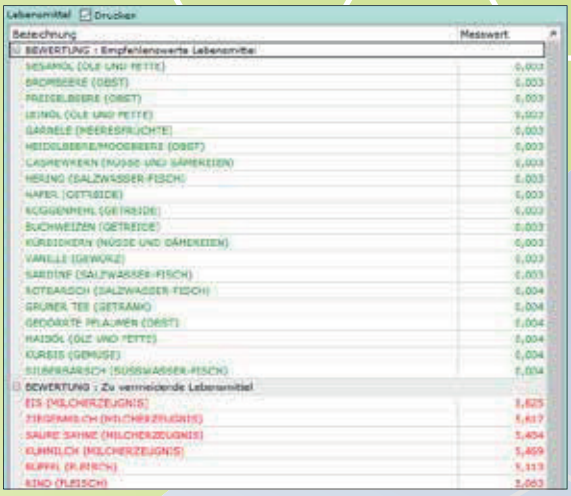

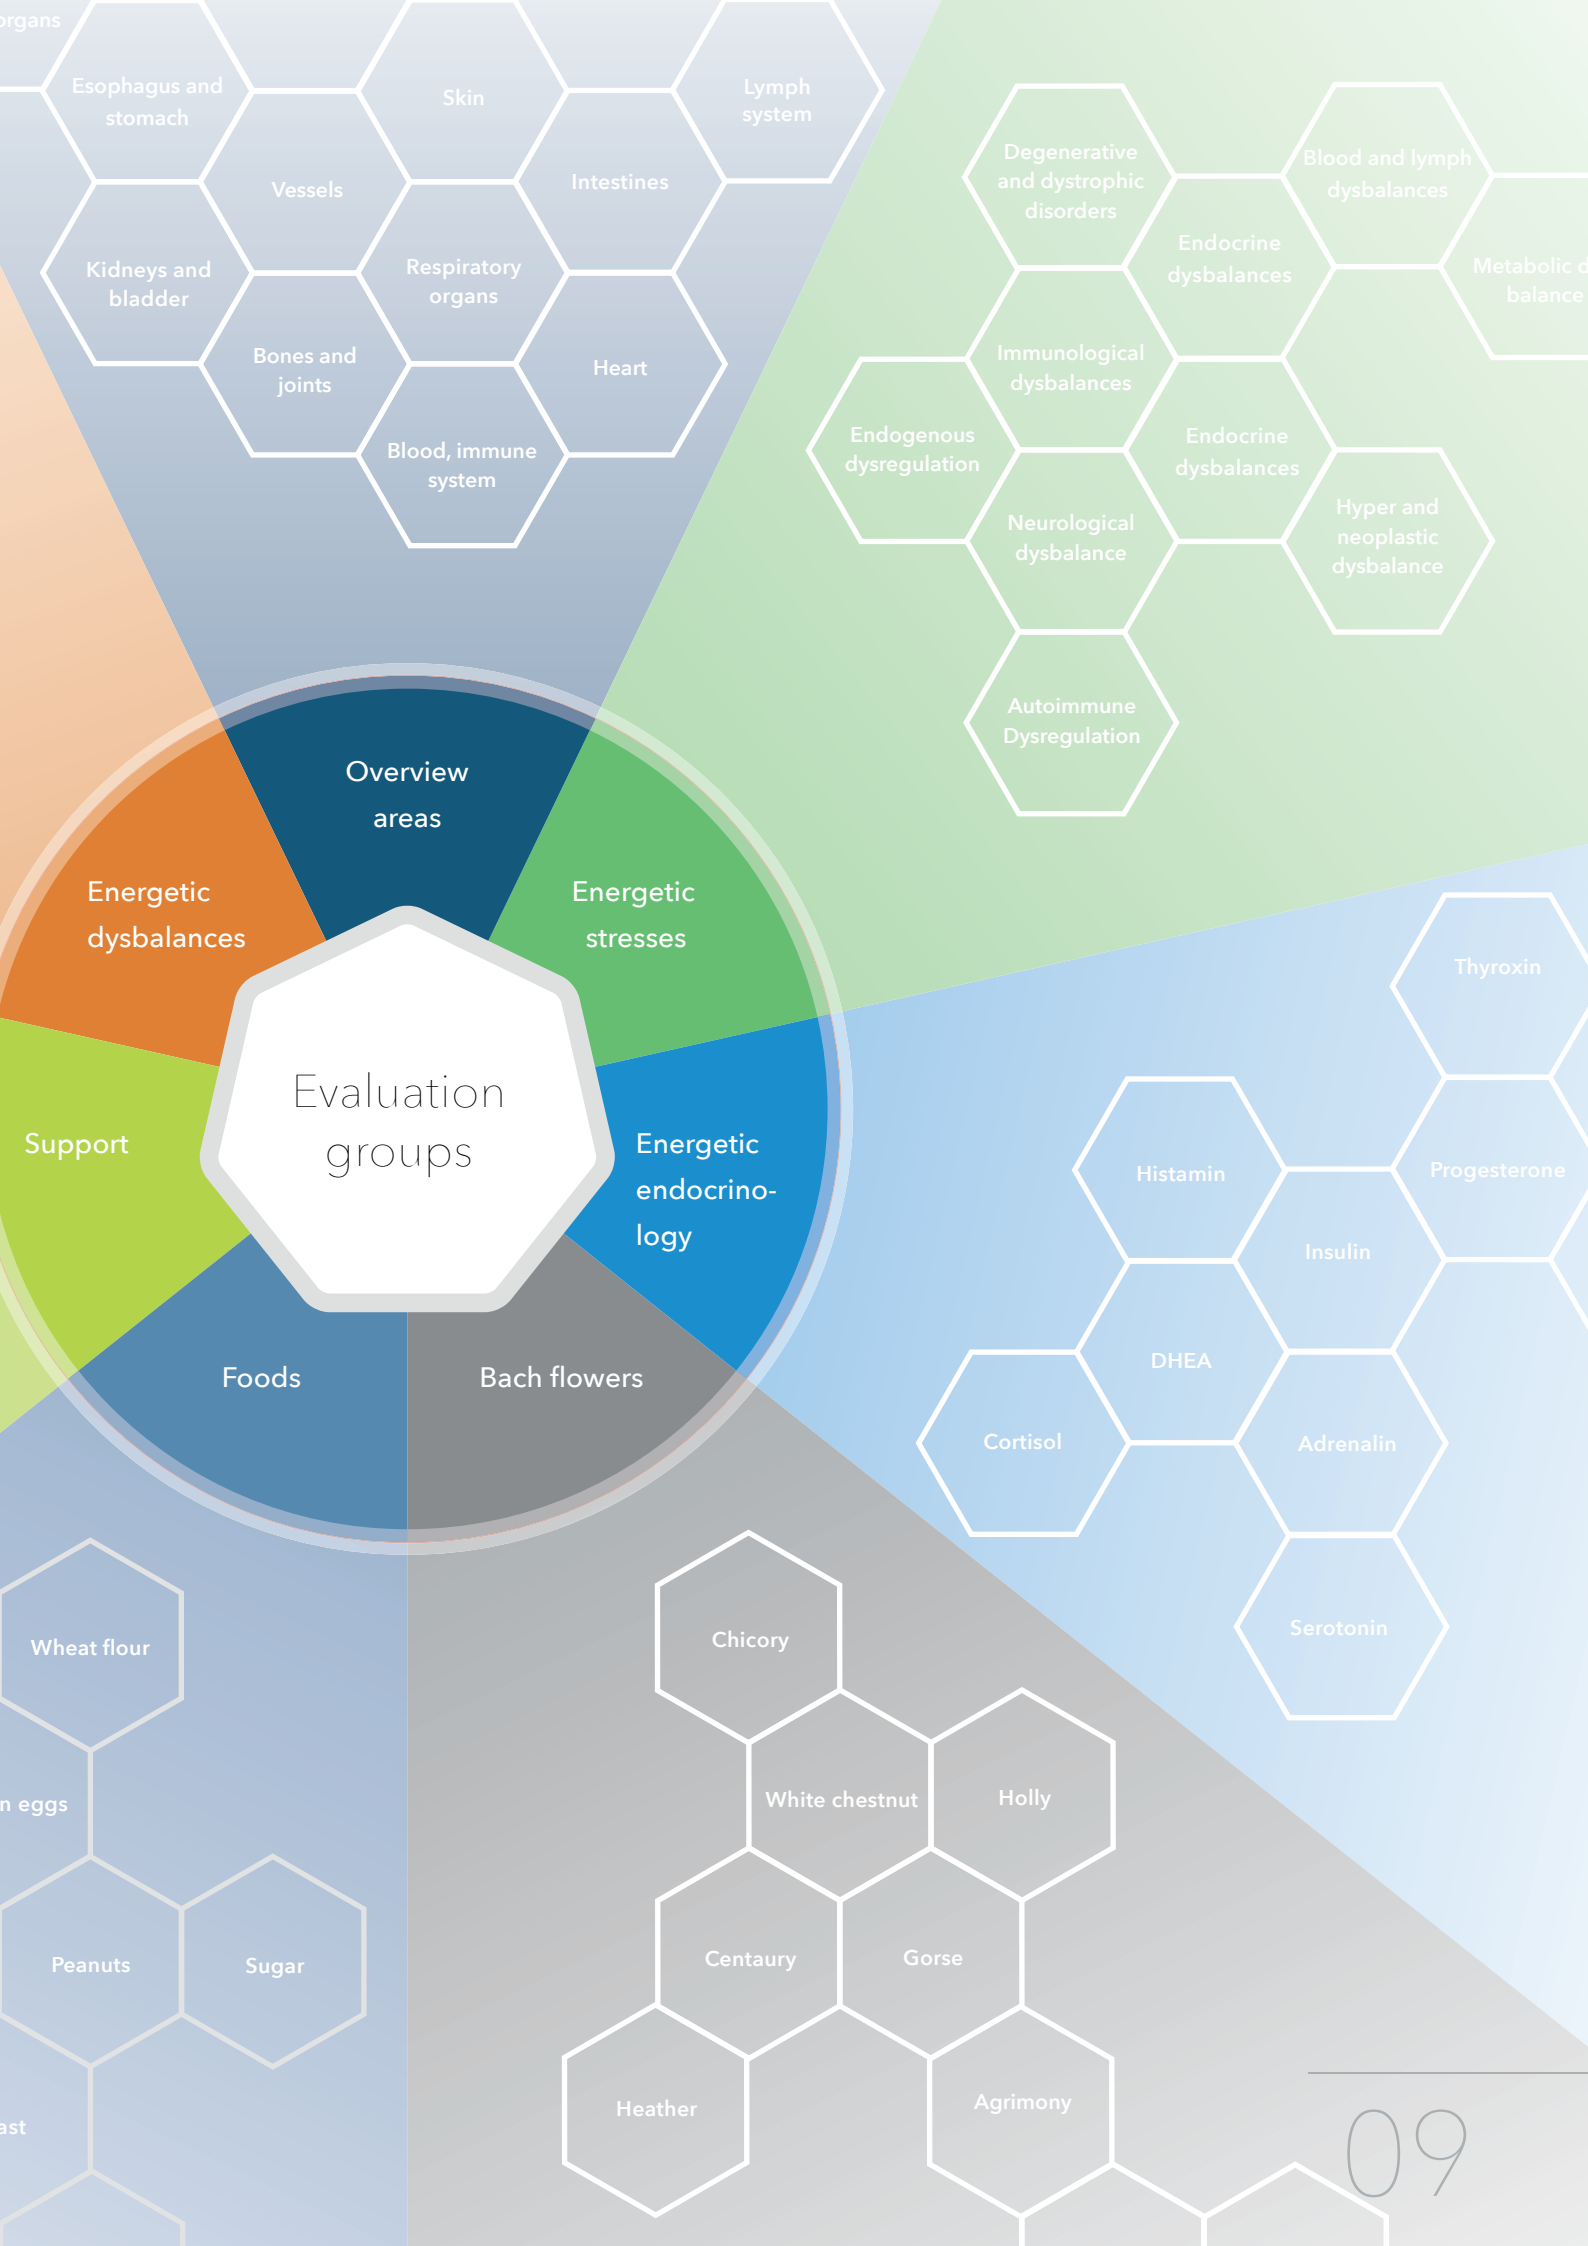

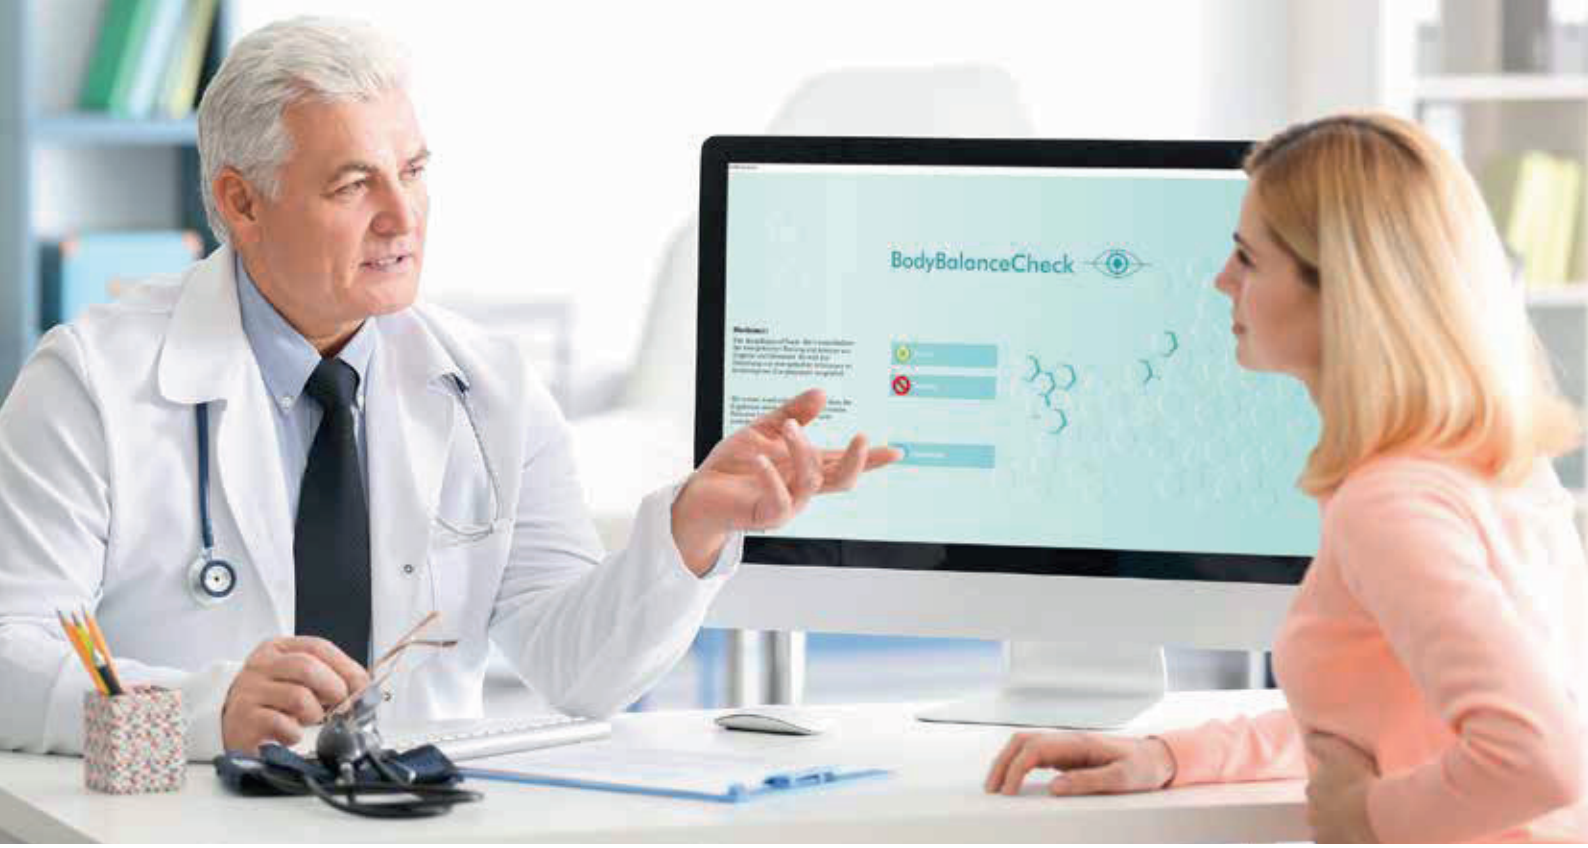

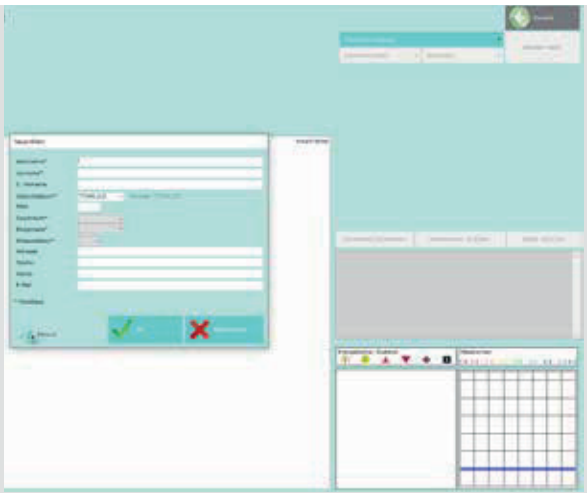

Esophagus and stomach
Skin
Lymph system
Vessels
Intestines
Kidneys and bladder
Respiratory organs
Bones and joints
Heart
Blood, immune system
Degenerative and dystrophic disorders
Blood and lymph dysbalances
Endocrine dysbalances
Immunological dysbalances
Endogenous dysregulation
Endocrine dysbalances
Neurological dysbalance
Hyper and neoplastic dysbalance
Autoimmune Dysregulation
Overview areas
Energetic dysbalances
Energetic stresses
Evaluation groups
Support
Energetic endocrino-logy
Foods
Bach flowers
Thyroxin
Histamin
Progesterone
Insulin
DHEA
Cortisol
Adrenalin
Serotonin
Wheat flour
Chicory
White chestnut
Holly
Peanuts
Sugar
Centaury
Gorse
Heather
Agrimony

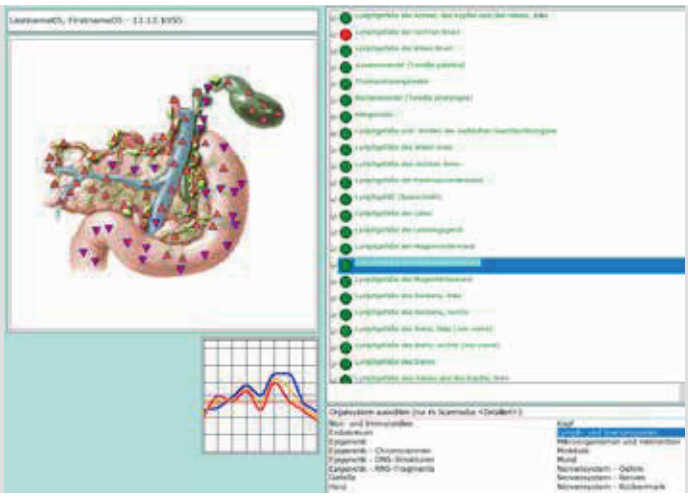

BodyBalanceCheck - Advantages

The **intuitive user interface and clear structure make** working with the BodyBalanceCheck extremely easy.

- Easy to get started with
- Automatic interpretation instead of manual collection of information
- One-click solution for the evaluation and creation of reports

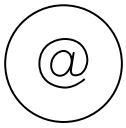

Due to the clear design and operation, very little training is needed to begin working with the BodyBalanceCheck
