

Refine DS6 Ultrasonic Scaler

The Refine DS6+ Ultrasonic Scaler is an advanced ultrasonic scaling unit designed for multi-functional dental procedures including scaling, periodontal treatment and endodontic applications. With stable 28kHz $\pm$ 3kHz ultrasonic performance, touch-control operation, controlled water flow and an LED detachable handpiece, it supports efficient plaque and calculus removal, root canal irrigation and clinical procedures requiring precision and control. Its compact design, multiple tip compatibility and user-friendly workflow make it a reliable choice for modern dental clinics looking for a versatile daily-use ultrasonic scaler.

Key Highlights

- ✦ Multi-Function Clinical Use
- ✦ Stable Ultrasonic Performance
- ✦ High-Efficiency Root Canal Irrigation
- ✦ Touch-Control Operation
- ✦ LED Detachable Handpiece
- ✦ Controlled Water Flow
- ✦ Compact Chairside Design

Multiple Functions: With different scaler tips, the machine is applicable to:

- ✦ Implant Maintenance
- ✦ Broken File Removing
- ✦ Gutta Percha cutting,
- ✦ Crown Removing
- ✦ Cavity Preparation
- ✦ Shoulder Preparation
- ✦ Calcifications Removing &
- ✦ Root Planning

High Efficient Root Canal Irrigation With Different Scaler Tips

Before & After Treatment:

Refine DS6+ Ultrasonic Scaler - Technical Specification	
Model	DS6+
Product Type	Ultrasonic Scaler
Power Input	220VAC 50Hz / 110VAC 60Hz
Main Unit Input	24VAC 50Hz, 1.3A
Vibration Frequency	28kHz $\pm$ 3kHz
Water Pressure	0.1 bar – 5 bar / 0.01MPa – 0.5MPa
Function Setting	Scaling / Periodontal / Endodontic
Handpiece	LED Detachable Handpiece
Touch Control	Yes
Package Size	375mm $\times$ 305mm $\times$ 120mm
Weight	2.4 kg
