WELCOME

Bike Torque Racing was founded in 1997 by Neil Appleton and has specialised in motorcycle hard parts and accessories for over 25 years. In the ever-changing face of the UK motorcycle industry, we are proud to remain a true independent **British owned and based parts supplier.**

Bike Torque Racing or "BTR" as we are often known, started with the distribution of Afam chains and sprockets. Since then, our range has grown massively to include many of the World's finest hard parts such as Brembo brakes, Domino controls, O.Z wheels, DID chains, Motul oils and NGK spark plugs.

The key to our success is the strong relationship that we have with our trade and retail customers - all made possible by our friendly, knowledgeable team who give valuable advice, efficient service, and helpful support - at all times. As bikers ourselves, we understand the needs of today's riders and offer the right expertise to get a well-sorted bike out, and kept out on two wheels.

Ordering from us is simple and you can do this via telephone, website or email.

TRADE ORDERING:

T: 01373 4564252 W: www.biketorquetrade.co.uk E: sales@biketorquetrade.co.uk

RETAIL ORDERING:

T: 01373 464252 W: www.biketorqueracing.co.uk E: sales@biketorqueracing.co.uk

A fundamental part of the Bike Torque Racing ideology is stock, stock, stock! Being able to provide what you want, when you want it straight from us to you – fast! If you do not see what you need, get in touch with us to discuss your requirements.

We feel a strong loyalty to our customers, and proud to keep a 25+ year tradition of offering high-quality parts to satisfied customers. Whether you are new to the industry or new to biking itself, make BTR your "go-to" place.

Thank you for your custom and we look forward to working with you.

The Bike Torque Racing Team

HOW TO USE

The contents page and index page have been set up to allow you to click on an item and the corresponding page will load. handy for when you want to look at oz wheels or want to see master cylinders specifically.

CONTENTS PAGE
Sends you back to the Contents page. Click a section to navigate to the page.

PREVIOUS PAGE
Takes you back through the catalogue one page at a time

NEXT PAGE
Takes you through the catalogue one page at a time

LAST PAGE
Takes you to the Index page for to allow you to navigate to specific pages easily

DOWNLOAD
Download the full catalogue so you can access it offline

PRINT
Allows you to print the specific pages if you so wish

ZOOM IN/OUT
Zooms the page in and out. Double clicking the page will also do this

FULL SCREEN
Changes the view mode to full screen

SEARCH
Search product codes or keywords to help find that specifc part

AFAM® D.I.D JT® SPROCKETS

SHIFTING GEARS

Chains and sprockets are one of our specialities and we probably have the strongest and most comprehensive chain and sprocket offer available anywhere. We aim to cover everything two, three or four wheels and offer a selection of different products and kits to cover all models, all requirements and all budgets. There are several brands that specialize in producing high-quality motorcycle chains and sprockets.

One such brand is Afam, which has been in the industry for over 45 years. Afam offers a range of chains and sprockets for both street and off-road motorcycles, with a focus on durability and performance. Their products are made using high-grade materials and precision manufacturing techniques, ensuring that they can withstand the demands of heavy use.

Another well-known brand in the motorcycle chain and sprocket market is D.I.D Chains. Founded in Japan in 1933, D.I.D has a long history of producing high-quality chains and sprockets for a variety of applications, including motorcycles. D.I.D Chains offer a wide range of products, from standard chains for street use to high-performance chains for racing applications. Their chains are known for their strength, durability, and resistance to wear and stretching.

JT Sprockets is a brand that specializes in producing sprockets for motorcycles, ATVs, and other powersports vehicles. JT Sprockets offers a range of sprockets made from high-quality materials such as aircraft-grade aluminum and high-strength steel. Their sprockets are designed to be lightweight, durable, and precise, ensuring smooth and reliable operation.

Afam are probably the most complete supplier of motorcycle transmission in the world today. There are a number of companies that manufacture chains and still more that manufacture sprockets but only Afam offers both chains and sprockets for all disciplines of Motorcycling and Racing. Steel sprockets, Aluminium sprockets, 'O' Ring chains, 'XS' Ring chains and non 'O' Ring chains.

In addition to chains, Afam also produces a range of high-quality sprockets. Their sprockets are made from high-strength steel or a 7075 T6 anodised aluminium alloy that are designed to work seamlessly with their chains. They offer a range of sprocket sizes to cater to different gearing needs and riding styles.

One of the key features of Afam's chains and sprockets is their precision engineering. The company uses advanced manufacturing techniques to ensure that each chain and sprocket is manufactured to exacting standards. This precision engineering results in chains and sprockets that offer smooth operation, minimal wear and tear, and long service life.

They are the only transmission supplier that works with all the major manufacturer works teams. Aprilia, Ducati, Honda, Kawasaki, Suzuki and Yamaha.

Afam is a reputable brand that produces high-quality motorcycle chains and sprockets that are designed to deliver optimal performance, durability, and reliability. If you're looking for a reliable and high-performance chain and sprocket set for your motorcycle, Afam is the brand to go for

XSR & XHR CHAINS

The AFAM XSR and XHR chains have been selected from our extensive experience to give you the performance you need from a premium quality chain. The XSR chain utilises an 'XS' shaped ring; this revolutionary design reduces friction while giving superior sealing to the chain plates and pins.
The XSR & XHR chains offer:

/ 20% better wear resistance

/ 7% higher tensile strength

/ 9% greater fatigue strength over conventional 'O' ring chains

Gathering & Greasing – The manufacturing processes are state of the art: The pins, plates and bushes are assembled on an automated production line. The external plates are not fully pressed into position, allowing the special grease to reach all key areas. Grease is applied to the chain using a vacuum. This method ensures the grease fully penetrates all areas of the chain.

Final fitting – After greasing, an automatic machine applies a precise load to press on the side plates.

Riveting – The riveting process is the final stage of assembly. The riveting machine is calibrated to securely rivet the pins without causing damage or binding the joints. After a thorough inspection, the AFAM chain is ready for packaging and shipping.

AFAM FRONT SPROCKETS

Afam front sprockets are high-performance motorcycle parts that are designed to improve the acceleration and overall performance of your motorcycle. These sprockets are made from high-quality steel, which makes them durable and long-lasting.

They are also precision-engineered to fit perfectly on your motorcycle's front sprocket shaft, ensuring smooth and efficient power transmission. Whether you are a professional racer or a weekend rider, upgrading your motorcycle's front sprocket with an Afam sprocket is an easy and effective way to enhance your bike's performance and improve your riding experience.

SELF CLEANING

Mud grooves in each tooth quickly disperse sand, mud and debris which can increase chain tension and cause premature wear.

ROAD & STANDARD MX

The highest quality and are exact replicas of the original front sprockets used on most motorcycles.

RACE

Computer-designed lightening holes reduce weight to a minimum whilst retaining the strength necessary for safety.

AFAM REAR SPROCKETS

STEEL SPROCKETS

PERFECT FOR ROAD USE

All AFAM steel rear sprockets are CNC machined and produced in C45 normalized steel (The normalised steel prevents the sprocket from micro cracks in the material) with induction hardened teeth.

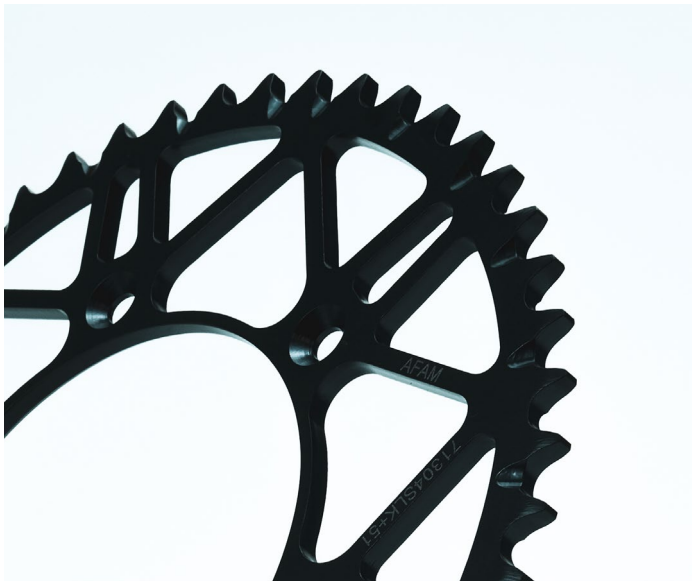

This harder layer on the teeth drastically reduces wear on sprocket and chain to ensure a longer life span.

Executed in silver (zinc plated) or black (electrophoresis) for a long-lasting protection against corrosion. This ensures the quality of the product to offer you a safe ride.

Perfectly round, flat and concentric with the unique AFAM tooth profile make this one of the best after-market sprocket on the market.

SLK STEEL SPROCKETS

PERFECT FOR OFF-ROAD USE

AFAM wants to provide all Enduro and Motocross riders with a long-lasting, superlight steel sprocket, designed for all types of terrain, regardless of the weather conditions. This is where the lightweight steel SLK sprockets come in to play.

This sprocket is perfect for all bikes, from 125cc to 450cc. It has been tested on a prepared 450cc MX1 in the worst conditions imaginable. In sand and mud, this SLK steel sprocket behaved perfectly and showed no premature deformation or wear.

Design is optimised the design, in order to achieve a minimum unsprung weight while ensuring the best possible performance levels in all circumstances.

520 RLK STEEL SPROCKETS

PERFECT FOR ROAD/RACING USE

Every component used on a racing motorcycle has to have the right balance between weight and strength. A sprocket is no different!

Afam have manufactured lightweight Steel sprockets for some years but only for the Moto GP teams at the very highest levels of racing. However, with many of today's production bikes now delivering over 200bhp, this is more or less the point where an aluminium sprocket is on the limit of its mechanical characteristics. Premature wear results in power loss and as a result the material fatigue can cause cracks.

ALUMINIUM SPROCKETS

PERFECT FOR OFF-ROAD USE

AFAM Standard Motocross Aluminum Sprockets (N in the reference) silver anodised and shaped in the second-generation snowflake design for weight savings. This is the all-round aluminum AFAM sprocket for Off-Road use.

SELF-CLEANING ALUMINIUM SPROCKETS

PERFECT FOR OFF-ROAD USE

AFAM Motorcross Aluminum Self-cleaning Sprockets (+ in the reference) are hard anodised. This is a harder layer which reduces wear. The color is Gun Metal and the bottom of the teeth on both sides is provided with a mud groove to evacuate sand and mud quickly to avoid chain tension. With its 3D relief design, they are shaped for maximum weight savings, but they remain safe. The proper tolerances for Off-Road usage and the AFAM tooth profile makes it a high-quality product with a long service life. These MX sprockets are also available color anodized.

RACING ALUMINIUM SPROCKETS

PERFECT FOR RACING USE

AFAM Racing Aluminum Sprockets (- in the reference) also have this harder surface obtained by hard anodising. Most of these sprockets exist in the original pitch, but also in a conversion model for a narrower chain. These AFAM sprockets have custom tolerances for race use and a weight-saving design to ensure the most efficient transmission.

DUCATI

AFAM SPROCKET CARRIERS

PCD Carriers offer a convenient and time-efficient solution for changing rear sprockets on bikes with single-sided swinging arms. With the ability to quickly swap out sprockets, riders can easily adjust their bike's gearing to suit different riding conditions or track layouts.

Furthermore, the use of PCD Carriers can also provide weight reduction benefits for the motorcycle. Additionally, with the ability to use a flat tool to change the sprocket, maintenance costs can be lowered, making it a more economical option.

For race use, it is highly recommended to use a steel sprocket due to its durability and performance capabilities, which are better suited to the demands of today's high-performance superbikes.

DUCATI SPROCKET CARRIERS

REPLACES THE HEAVY OE REAR SPROCKET SET-UP

Ducati Sprocket Carrier **PCD1 / PCD2 / PCD3 / PCD4 / PCD5**

DUCATI REAR SPROCKET

We stock hardened steel sprockets with a black electrophoresis coating or a hard anodised aluminum sprocket which have a dark gold/bronze appearance.

Please see fitment lists for your bike or contact us for more details

D.I.D

D.I.D brand chains are manufactured in Japan and are the No1 chain brand in the World.

Their top quality products are meticulously made by skilled technicians in order to provide outstanding performance for all riders. It is this focus on perfection that D.I.D has been pursuing for over 80 years!

D.I.D is the worlds No 1 original parts (OEM) supplier for Japanese and European motorcycle manufacturers inc Ducati, Honda, Husqvarna, Kawasaki, KTM, MV Agusta, Suzuki, Triumph and Yamaha and at the time of writing they are used by both the Yamaha and Ducati Moto GP teams. They are available in 'O' Ring, 'X' Ring and 'non O Ring' construction depending on their use and application.

DZ CHAINS

The DZ is budget-friendly, high-performance racing chain designed specifically with local motocross champions in mind. Designed to perform in even the most grueling MX conditions, its SDH pin technology helps give it great tensile strength and performance for its size and gives you a longer chain life than a standard non-sealed chain.

VXGB CHAINS

The VX Series chain is a great chain upgrade from OEM and is our most popular and widely used chain. The 520 pitch version boasts a 32% longer chain life than the VO Series and the 525/530 versions boats a 41% longer chain life. This is due to their patented X-Ring seal technology.

It also has increased rigidity as to reduce flex, which gives you a more responsive and smooth driving experience.

ZVMX CHAINS

The D.I.D ZVM-X Series has greater strength than the VX Series and is designed for heavyweight motorcycles with tremendous torque and horsepower. The twisting action of the X-Ring® increases its sealing performance and its four contact points minimizes power loss. The ZVM-X Series' Direct Energy Transfer, born from their experience in MotoGP, means greater stretch resistance under load.

The ZVM-X chain is a great chain for high powered street bikes but may also be utilized on adventure bikes.

VR46 CHAINS

D.I.D's collaboration chain with the one and only Valentino Rossi is now available! With silver outer plates, gold inner plates, and a Rossi yellow colored master link, this chain is certain to POP!

With their patented X-Ring seals, this chain will give you the performance and chain life chosen by Rossi himself. (Rivet link only)

JT Sprockets is a trusted brand that produces high-quality sprockets for motorcycles. With over 50 years of experience in the industry, JT Sprockets offers sprockets made from advanced materials, including Chromoly steel, that provide excellent performance, durability, and reliability.

Their range of sprockets come in various sizes and configurations, suitable for all types of motorcycles. JT Sprockets is a great choice for riders looking to enhance their motorcycle's performance and longevity with high-quality, dependable transmission.

ERGAL 7075 T6

JT FRONT SPROCKETS

JT Sprockets are a reputable manufacturer of motorcycle sprockets that offer a range of high-quality products for riders. Their sprockets are made from strong and durable steel, and are designed to deliver excellent power transfer and smooth operation. JT Sprockets are also precision machined to ensure the best possible fit and performance, which helps to enhance the overall riding experience. As an alternative to Afam sprockets, JT Sprockets are a popular choice among riders due to their excellent quality and affordability. While both brands offer similar levels of performance, JT Sprockets are often considered a more cost-effective option, making them an excellent choice for riders looking for a high-quality sprocket without breaking the bank.

STANDARD

JT Front Sprockets are manufactured using only the finest grade of C49 high carbon steel for the rear sprockets, and SCM420 chromoly steel alloy for the front sprockets.

SILENT

JT rubber cushioned sprockets offer the same quality, design, and OEM proven technology as used by major Japanese motorcycle manufacturers since the early 90s to dampen chain impact.

SELF CLEANING

MX-series steel front sprockets are manufactured to exacting tolerances and designed with special self-cleaning grooves for added life and performance. Made from the best chromoly steel and fully heat-treated for maximum durability.

JT REAR SPROCKETS

STEEL REAR SPROCKETS

PERFECT FOR ALL APPLICATIONS

JT Sprockets is the world's leading brand of sprockets for motorcycles and ATVs. Using only the finest raw materials and using cutting edge technology in their production, their range gives you the ultimate in replacement sprockets at unbeatable value.

JT Steel Sprockets are manufactured using only the finest grade of C49 high carbon steel for the rear sprockets. Their range now contains over 2,500 parts for all motorcycles and ATVs.

RACELITE

MADE FROM LIGHTWEIGHT ALUMINIUM

The new competition range of anodised 7075-T6 aluminium sprockets are designed and engineered to withstand the extreme pro-race conditions, providing maximum strength, durability and minimum weight.

Precision CNC machined from certified 7075-T6 Ergal aviation grade aluminium alloy. We stock them in a hard wearing silky, sexy black anodised finish, and they're also available in a variety of colours. This sprocket will perfectly compliment all major manufacturers' bikes. In addition to the off road range, RaceLite is also available for road sports bikes. Made of the same hard wearing 7075-T6 Ergal aluminium and a selection of gearing options available for all track & racing applications.

TWINSTAR

STEEL/ALUMINIUM HYBRID

HEAT-INDUCTION HARDENED HIGH CARBON STEEL TEETH

JT advanced tempering process achieves hardness that can last six times longer than a 7075-T6 aluminium sprocket, enhancing power transfer and performance.

LIGHTWEIGHT ERGAL 7075-T6 ALUMINIUM CENTRE

Precision made using state of the art laser cutting and CNC equipment, resulting in an ultra lightweight race proven design.

JT SPROCKET CARRIERS

JT Sprockets also produces sprocket carriers that are specifically designed for Ducati motorcycles with single-sided swinging arms. These carriers offer a convenient and time-efficient solution for changing rear sprockets on Ducati bikes. With their high-quality construction and precise engineering, JT Ducati sprocket carriers provide a secure and reliable platform for mounting sprockets, ensuring smooth and efficient power transfer.

These sprocket carriers are also designed to reduce weight and offer the possibility to change sprockets with a flat item, making maintenance easier and more cost-effective. When paired with JT Sprockets' range of high-performance steel sprockets, Ducati riders can achieve optimal performance and longevity for their motorcycles.

DUCATI SPROCKET CARRIERS

REPLACES THE HEAVY OE REAR SPROCKET

Lightweight rear sprocket conversion for OEM Ducati single-piece sprocket allows for quick, affordable replacement of the rear sprocket.

Ducati Sprocket Carrier **JTA750B / JTA760B / JTA770B**

DUCATI REAR SPROCKETS

We stock rear sprockets that are made from the finest grade of C49 high carbon steel that are the perfect aftermarket replacement.

Please see fitment lists for your bike or contact us for more details

AFAM RIVETING TOOL

A SMALL & USEFUL TOOL

This simple tool has been designed by AFAM to enable you to easily join motorcycle chains using a hollow tip rivet type joining link. The tool is made from steel, so it is strong, making it suitable for repeated use.

Afam Riveting Tool **EASY-RIV-5**

D.I.D KM500R

A WORKSHOP NECESSITY

This chain tool is designed to cut chain, press fit connecting link plates and rivet pin heads all with one simple to use tool. It is suitable for use with 520, 525, 530 or 532 chain designs with hollow pin rivet links.

KM500R Riveting Tool **KM500R**
KM500R Spare Pin **KM500R-PIN**

JT CHAIN TOOL

A WORKSHOP NECESSITY

Designed to break and rivet all O-ring, X-ring and non O-ring chains from 520 to 630 pitch. Includes press fitting interference fit side plates. Heat treated for strength and durability. Extractor pin precisely guided to ensure long pin life.

JT Chain Tool **JTCT2**

MOTUL

CHAIN CARE KITS

Chain maintenance is a critical part of motorcycle ownership that should not be overlooked. Regular chain maintenance can help to prolong the life of your motorcycle's chain and sprockets, and also ensure that your bike is running smoothly and safely. Motul is a manufacturer of high-quality motorcycle chain maintenance products that are specifically designed to keep your chain in top condition. Their range of chain cleaners, lubricants, and protective coatings are formulated to work together to provide maximum protection against wear and tear, rust, and dirt buildup. Motul's chain maintenance products are also easy to use and are suitable for all types of motorcycles, making them a popular choice among riders. Overall, if you're looking for a reliable and effective way to maintain your motorcycle's chain, Motul products are a great choice that can help to keep your chain running smoothly and safely for years to come.

02 BRAKES

PADS / DISCS / CALIPERS / MASTER CYLINDERS

brembo HEL

You cannot talk about Brembo without mentioning racing. Even though many production bikes are fitted with Brembo products as standard equipment, all of their products start from the test bed that is racing. From Formula 1 to Moto GP and Superbike. In every racing class Brembo has succeeded in its goal – to win.

They are without doubt the world's most successful name in brakes and have won every race series worth winning, globally.

Why? Not just for the joy of racing, but also to utilise the most extreme test beds in the world. What they do on the track translates over to their products for public use. You don't have to be a Moto GP rider to experience their world class products. From scooters to superbikes, they have braking products for you.

The choice of components available from both Brembo & Brembo Racing is vast. With skill and care, experienced technicians have selected from these and combined them with other components to create the braking systems we need. The products that follow are the consequence of that skilled selection.

S1000

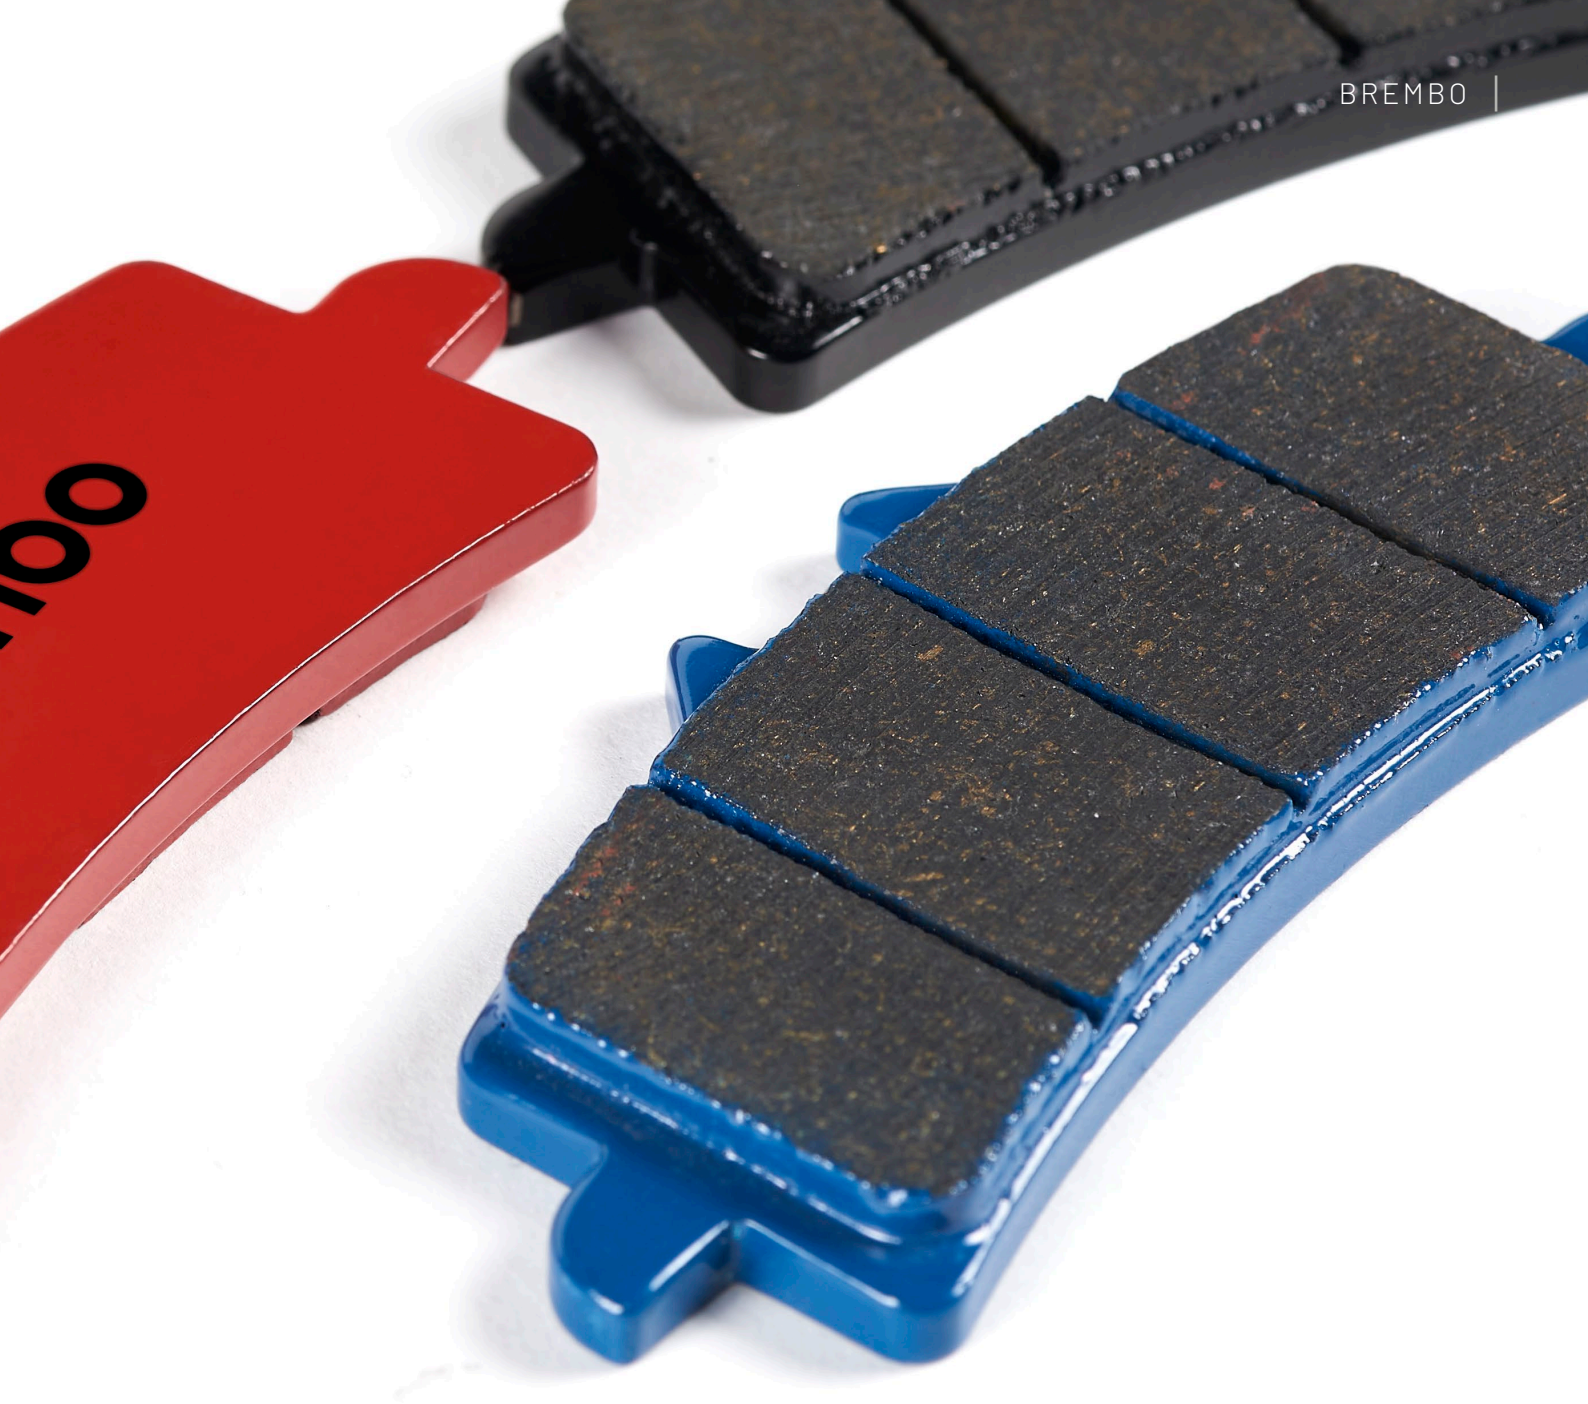

PADS & COMPOUNDS

Brembo, a world leading name in brakes offers a wide variety of compounds, from sintered to carbon-ceramic and able to offer pads for motorcycles of every kind – racing, road, off road, street and scooter – not to mention the expectations of their riders.

The compounds used normally in braking systems are classified in just two families ORGANIC and SINTERED, although the choice of one compound over another is not dependent solely on the type of use: in effect, pads of different type can be used in the same field of application.

This will depend on the different situations a brake pad has to deal with: Racing – braking is optimised for high temperatures. Road – high stability required, with brakes being applied either cold or at medium temperatures. Brembo has an answer to every need.

Bedding-in the pads is a particularly important process for all compounds. The pads are bedded in by applying the brakes lightly several times and ending with a firm bite, leaving a pause between one squeeze and the next. This will produce the correct heating and cooling cycle needed to prepare the system. The duration of the bedding-in period depends on the compound: generally longer for organic compounds than for sintered.

SINTERED

Sintered materials: these are metallic powders, mixed with lubricants and abrasive agents in such a way as to produce a compound that is solidified by compacting even at high temperatures. The compound is bonded to a metal backing plate of whatever shape as part of the sintering process, with no additional adhesive utilized.

The metal powders determine the braking power of the pad at high temperatures. The lubricants help to stabilise the overall braking action and the abrasives keep the discs clean.

ORGANIC

These are composed mainly of resin binders, metals, lubricants and abrasives. In this instance the friction coefficient is generated by the metals and the resins, with the lubricants and abrasives performing the same functions as mentioned previously.

KNOW YOUR COMPOUNDS

Anyone who owns a bike or scooter knows that their vehicle needs care and attention: brake pads are one of the components that are placed under the most strain and are stressed the most when you use your two-wheeler, so in addition to replacing them at the right time, you need to know how to choose the brake pads that are the most appropriate for your bike.

As the official UK Brembo distributor, Bike Torque Racing are proud to have the complete range of Brembo pads. Our technical sales team have decades worth of experience and will be able to help choose the right pad for you.

RACING RC/SC

These pads have been designed to guarantee their users exceptional performance. Materials of this type are notable mainly for their friction coefficient and constant efficiency, especially when exposed to high disc temperatures. These characteristics guarantee an excellent and uniform braking action for the full duration of the race, without fading. Pads of this type provide scant efficiency at lower temperature – a factor of limited importance in racing situations – and therefore not ideal for road use.

RC – Carbon Ceramic

This is a true racing pad, suitable for any kind of competition on the racetrack. With an excellent friction coefficient and exceptional stability at high temperatures, the compound gives constant braking lap after lap, from grid to flag.

RACE/TRACK ONLY

SR – Sintered

This sintered compound has a high friction coefficient when hot but also stays very stable in all running conditions. Since it also has a good friction coefficient when cold, the material is also compatible with road use.

RACE/TRACK/ROAD ONLY

ROAD CC/SA/SP/LA

These are characterised by a high friction coefficient that stays constant whatever the operating conditions – in heat and cold alike – as well as resisting wear, for superior durability and better mileage.

CC – Carbon Ceramic

The evolution of the organic compound, featuring a higher carbon content. This friction material offers increased mileage, and good performance in all conditions: hot and cold, wet and dry.

SA/SP – Sintered Road Compound

A sintered compound intended specifically for road bikes, typified by particularly good efficiency under all operating conditions. Excellent for sports bikes and an ideal alternative to OE pads.

LA – Long Life Sintered Compound

Similar to the SA compound but around 30% longer lasting. Again, typified by particularly good efficiency under all operating temperatures.

OFF ROAD SD/SX

These materials are designed to guarantee maximum efficiency under the various conditions encountered habitually in off road riding – not only cold and heat, but inhospitable terrain as well (water, sand, mud) where braking at low temperatures is also a key requirement. With this in mind, resistance of the material to weathering agents is particularly important.

SD – Sintered Off Road

Good efficiency and stability under all operating conditions. Suitably resistant to wear, even when exposed to water and mud. Less aggressive than the SX, giving more flexible control.

SX – Sintered Off Road and Supermotard

A notably aggressive pad able to withstand high temperature, recommended for Motocross and Supermotard. Particularly steady performance.

SCOOTER CC/XS

These pads guarantee high mileage and stability in all riding conditions. Designed especially for scooters, the compound is formulated for street use, and gives a braking action different to that of a motorcycle.

CC - Carbon Ceramic

An organic brake pad for scooters, offering an optimum quality / price ratio. This is a component characterised by durability and optimum behaviour under all conditions.

XS - Sintered Compound

Intended specifically for scooter brakes, both front and rear. An extremely stable material, this compound guarantees steady performance in all riding situations. Ideal for maxi scooters of the latest generation.

GENUINE

The original replacement part for Brembo calipers.

Selecting these pads, you buy exactly the same OE material as used by the motorcycle manufacturer and developed for a particular application, according to the most stringent criteria. Pads can be of sintered or carbon ceramic material.

GREENANCE

During EICMA 2022, Brembo introduces its GREENANCE brake pads, which will gradually replace the entire range of Brembo Aftermarket pads. With a wide variety of compounds, from sintered to carbon-ceramic, and a big selection of part numbers, the new brake pads satisfy the specific needs presented by motorcycles of every kind: road, off-road and scooter.

MORE ON GREENANCE

GET INTO THE GREEN SCENE

LESS WEAR, LESS WASTE, LESS EMISSIONS.

Brembo is the market leader for high-performance brake systems for motorcycles. In recent years, they have been focusing on developing more eco-friendly brake solutions.

Brembo's Greenance motorcycle brake pads are their latest innovation in this area. Greenance brake pads are made with a new proprietary material that contains no copper or other heavy metals. This makes them more environmentally friendly than traditional brake pads, which can release harmful particles into the air and water during use. In addition, by eliminating the use of methane gas in the production process, a savings of about 176 tons per year of CO2 equivalent will be achieved once fully operational.

Brembo GREENANCE pads exhibit better resistance to heat, as they are designed to maintain the same performance even when brake temperatures rise. In fact, dynamic dyno efficiency tests demonstrate that the pads possess a more stable coefficient of friction at high temperatures and high speeds, as well as a 10 percent higher average coefficient of friction, than any comparable application currently on the market.

They have been extensively tested on both the street and the track to ensure that they meet Brembo's high standards for safety and performance.

In addition to being better for the environment, Greenance brake pads also have a longer lifespan than traditional brake pads. This means that they need to be replaced less frequently, reducing the amount of waste generated by the brake system over time.

Brembo is once again at the top through the performance of its products, which now also deliver a lower environmental impact.

aprilia

Z04 RACING BRAKE PADS

Brembo Racing Z04 pads are for use on steel discs and are probably the best racing brake pads anywhere in the world today. They are the actual pads used at the highest levels of racing including MotoGP, Moto2, Moto3, WSB, WSS, BSB and BSS. Other sponsors stickers may be on the bike but usually these are the actual pads in the calipers! They are sintered so they work well from the first corner to the last, can last more than 3 times longer than most other racing pads, they do not fade and work regardless of weather.

They may be more expensive than some competitor's products but they last up to 3 times as long and as soon as you start using them you will appreciate the difference and where your money went.

SERIE ORO DISCS

Developed very much from racing, Serie Oro Replacement discs are manufactured to all original dimensions and are designed to directly replace and improve upon your original units. The floating front discs use Brembo high carbon stainless steel rotors, heat treated light alloy centres and the two attach together with spring loaded floating bobbins. The rears are one piece high carbon stainless steel rotors manufactured to original dimensions.

Serie ORO floating discs have a unique confirmation that transfers braking torque more effectively while also improving resistance to thermal and mechanical stress. They are available in both front and rear fitments for most modern motorcycles. Most front discs models use 5mm thick rotors for improved performance and durability, and they can be used with all other original equipment parts as well as the Brembo brake pad programme.

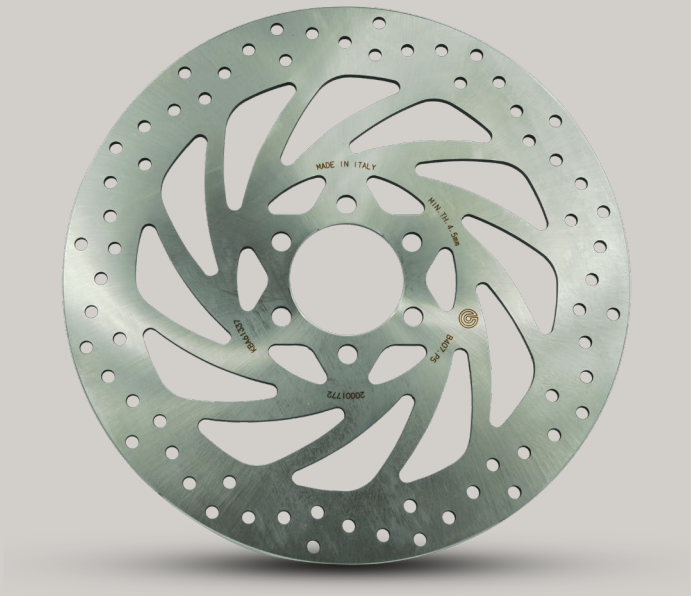

Brembo Serie Oro brake discs represent the best that the market has to offer, with a range of products boasting superlative technical content and quality. Available in both fixed and floating versions, these discs are fully interchangeable with original production discs.

The Serie Oro line is the preferred choice of motorcyclists who demand Brembo quality - which is now accessible to all, with almost 2000 different applications available.

Fixed discs are made from a single piece of stainless steel, and are designed and manufactured to ensure flawless perfection.

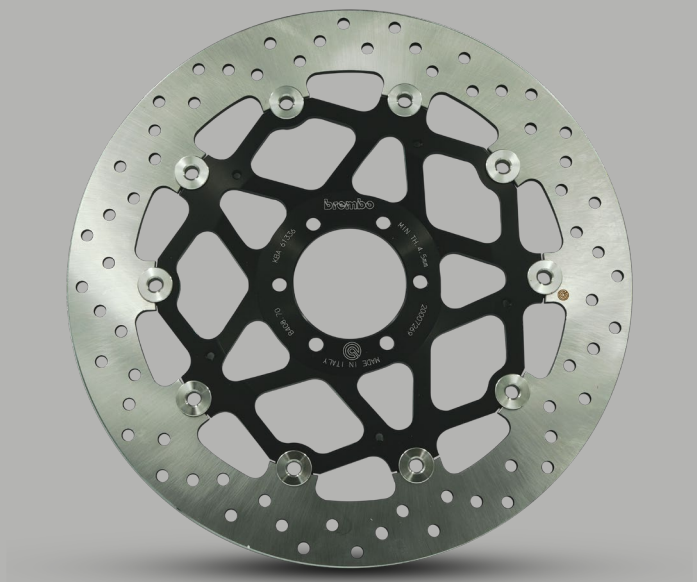

Floating discs are made from only the highest quality materials available to deliver unparalleled performance. These consist of a braking rotor in stainless steel, connected by 10 fastener screws to an anodised aluminium alloy hub.

FIXED

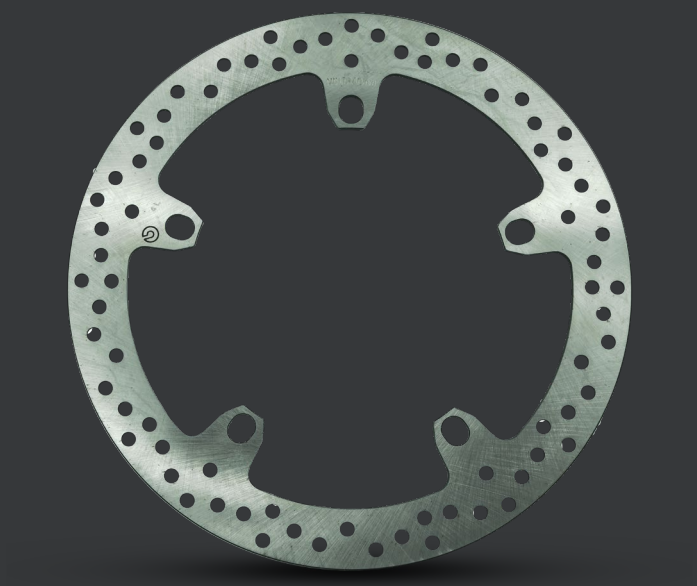

The fixed Serie Oro brake discs are made from a single piece of stainless steel with a design and construction line that respects the very strict tolerances set with machining cycles that guarantee maximum surface flatness and concentricity characteristics.

FLOATING

Floating discs are made from only the highest quality materials available to deliver unparalleled performance.

These consist of a braking rotor in stainless steel, connected by 10 fastener screws to an anodised aluminium alloy hub.

ORIGINAL EQUIPMENT

The brake disc is a fundamental component in ensuring the efficacy and power of a braking system.

The decisive factors in achieving more immediate and safer braking action - especially in extreme conditions - are the ability to transfer braking torque, resistance to thermo-mechanical stress and the rapid dispersal of the heat generated by braking.

Developed by Brembo for original equipment and chosen by leading motorbike manufacturers such as Ducati, Kawasaki, Triumph, KTM and many more!

BIG BRAKES

The Serie Oro is the product with which Brembo entered the racing world in the mid-70s, rapidly becoming the new standard in the sector where discs are concerned.

The Brembo Serie ORO 'Big Brake' upgrade disc uses a 320mm or 330mm 5mm thick high carbon stainless rotor fixed to a CNC machined hard anodised alloy centre with floating bobbins.

Brembo spends more money on research and development than any other braking company in the world. In fact it spends more on R & D than most of its competitors even take in sales revenue. Only by doing so can it design the perfect product for every given application and strike the perfect balance between performance and weight, thereby delivering the best balance of braking performance and handling.

Increasing the diameter of the rotor will increase the breaking leverage and thereby delivers a big increase in braking power. The very latest products are 330mm rotors as used on the very latest championship winning superbikes such as the Ducati Panigale and the Kawasaki ZX-10R.

The rotors are round rather than the novelty fashion petal type to maintain performance, consistency and low pad wear during intense use. Bells are hard rather than colour anodised to ensure good durability and 5mm thick. Spacer kits available to suit models that require them.

CONVERSION KITS

Brembo complete conversion kits are carefully created to give you the very best braking possible. They are developed very much from racing to be not only the most powerful, but wherever possible the most adjustable and the most fatigue resistant.

Your original calipers are replaced with more powerful Brembo units, discs are replaced with Brembo Serie ORO units with high carbon stainless steel rotors and heat treated light alloy centres CNC machined from solid. They can usually be fitted without modification and are available for many different models.

BILLET & FORGED KITS

We can supply two types of complete conversion kits. They only differ in the type of calipers used in the kit. Kits with Brembo Race calipers use CNC billet machined and hard anodised calipers. Kits with Brembo calipers use one of the top grade forged Brembo production calipers and both kits contain calipers, discs, brake lines, brake fluid and hardware.

KITS WITH RCS MASTER CYLINDERS

We are also able to provide conversion kits with an RCS19 Master Cylinder. If you are still running the OEM master cylinder this kit would be the perfect upgrade. Please get in contact for more information.

ZZR1400	06-12	Complete	BRK-KA18-1B	GP4-RX CNC Billet Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, caliper mounting bolts spacers and new brake lines.
		Complete	BRK-KA18-1F	M4 Forged calipers with pads, 320mm Dia 5mm thick Serie ORO discs, caliper mounting bolts spacers and new brake lines.
		Caliper	BRK-KA18-2F	M4 Forged calipers with pads, caliper mounting bolts, spacers and new brake lines.
SUZUKI				
RGV250 VJ21	89-90	Caliper	BRK-SU28-1T	Forged Titanium Grey P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 290mm Discs
		Caliper	BRK-SU28-1G	Forged Gold P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 290mm Discs
RGV250 VJ22	91-95	Caliper	BRK-SU26-1T	Forged Titanium Grey P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 300mm Discs
		Caliper	BRK-SU26-1G	Forged Gold P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 300mm Discs
		Complete	BRK-SU26-2B	Billet CNC P4 30/34 Calipers with pads, 310mm Dia 5mm thick Serie ORO discs, bracket kit with bolts and new brake lines.
		Complete	BRK-SU26-2T	Forged P4 30/34 Calipers with pads, 310mm Dia 5mm thick Serie ORO discs, bracket kit with bolts and new brake lines.
GSXR600 V-Y Srad	97-00	Caliper	BRK-SU11-1T	Forged Titanium Grey P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 320mm Discs
		Caliper	BRK-SU11-1G	Forged Gold P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 320mm Discs
		Complete	BRK-SU11-2B	Billet CNC P4 30/34 Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, bracket kit with bolts and new brake lines.
		Complete	BRK-SU11-2T	Forged P4 30/34 Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, bracket kit with bolts and new brake lines.
GSXR600 K1-K3	01-03	Caliper	BRK-SU12-1T	Forged Titanium Grey P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 320mm Discs
		Caliper	BRK-SU12-1G	Forged Gold P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 320mm Discs
		Complete	BRK-SU12-2B	Billet CNC P4 30/34 Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, bracket kit with bolts and new brake lines.
		Complete	BRK-SU12-2T	Forged P4 30/34 Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, bracket kit with bolts and new brake lines.
GSXR600 K4-K5	04-05	Complete	BRK-SU13-1B	GP4-RX CNC Billet Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, caliper mounting bolts spacers and new brake lines.
		Complete	BRK-SU13-1F	M4 Forged calipers with pads, 320mm Dia 5mm thick Serie ORO discs, caliper mounting bolts spacers and new brake lines.
		Caliper	BRK-SU13-2F	M4 Forged calipers with pads, caliper mounting bolts, spacers and new brake lines.
GSXR600 K6-K7	06-07	Complete	BRK-SU14-1B	GP4-RX CNC Billet Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, caliper mounting bolts spacers and new brake lines.
		Complete	BRK-SU14-1F	M4 Forged calipers with pads, 320mm Dia 5mm thick Serie ORO discs, caliper mounting bolts spacers and new brake lines.
		Caliper	BRK-SU14-2F	M4 Forged calipers with pads, caliper mounting bolts, spacers and new brake lines.
GSXR600 K8-L6	08-16	Complete	BRK-SU23-1B	GP4-RX CNC Billet Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, caliper mounting bolts spacers and new brake lines.
		Complete	BRK-SU23-1F	M4 Forged calipers with pads, 320mm Dia 5mm thick Serie ORO discs, caliper mounting bolts spacers and new brake lines.
		Caliper	BRK-SU23-2F	M4 Forged calipers with pads, caliper mounting bolts, spacers and new brake lines.
GSXR750 WT-WX Srad	96-99	Caliper	BRK-SU18-1T	Forged Titanium Grey P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 320mm Discs
		Caliper	BRK-SU18-1G	Forged Gold P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 320mm Discs
		Complete	BRK-SU18-2B	Billet CNC P4 30/34 Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, bracket kit with bolts and new brake lines.
		Complete	BRK-SU18-2T	Forged P4 30/34 Calipers with pads, 320mm Dia 5mm thick Serie ORO discs, bracket kit with bolts and new brake lines.
GSXR750 Y-K3	00-03	Caliper	BRK-SU10-1T	Forged Titanium Grey P4 30/34 Calipers with pads, bracket kit with bolts and new brake lines for use on STD OE 320mm Discs

LIGHTWEIGHT & STRESS RESISTANT FOR RACE USE

Visual appeal, but also light weight, use of high-quality raw materials and rigorous testing, on static and dynamic test benches, but also on the road: there are many reasons to choose a Brembo UPGRADE brake discs, all of which are good, but the main one is definitely the safety that they guarantee when on track and road.

Brembo HPK and T-Drive discs are proven winners in the hands of very experienced and novice racers alike.

HPK DISC SET

AVAILABLE IN 300MM – 320MM SIZES

Brembo HPK (High Performance Kit) products are intended for anyone looking for maximum braking performance from standard wide track components. They are designed to interchange with original equipment parts so that you can fit just discs, just calipers, or a complete Brembo HPK kit.

The discs are model specific and are either the same diameter as the originals, as required for many race series or increased to 320mm to increase braking. This means you can use a high performance disc in many race series whilst maintaining the OE calipers if the series rules so dictate. They are 5.5mm thick rather than 4.5mm OE to allow for higher performance and can be used for Road, Track and Full Race use. This gives you World Class Braking at an affordable price.

HPK T DRIVE SET

AVAILABLE IN 310MM – 320MM SIZES

T-Drive discs derive from experience in MotoGP and Superbike and are easy to distinguish through the coupling between band and housing, achieved using eight T pins to replace the classic fastener studs on floating discs. This allows the braking torque to be transferred more effectively, resulting from a study of process and machining tolerances.

With this solution, radial and axial float is not hampered and, consequently, the resistance to thermal-mechanical stress increases, especially under extreme conditions of use. There is greater heat dissipation compared to a fixed disc, with a great benefit in terms of lever stability.

Together with the 5.5 mm (1/4") thickness, the steel braking band and billet machined aluminum housing also guarantee reduced weight which makes for improved motorcycle rideability, both on curves and when accelerating.

STATE OF THE ART

Brembo calipers are among the most highly regarded and sought-after motorcycle brake calipers on the market today. These calipers are known for their exceptional quality, high performance, and reliability, and they are trusted by professional racers and everyday riders alike. When you choose Brembo calipers, you can be confident that you're getting a top-of-the-line product that will help you stop your motorcycle quickly and safely in any situation.

Brembo calipers are designed and manufactured to the highest standards, using the finest materials and state-of-the-art technology. They offer exceptional heat dissipation, which means that they can maintain their performance even under extreme braking conditions. They are also highly durable, with a long lifespan that ensures that you won't have to replace them frequently.

But perhaps the most compelling reason to choose Brembo calipers is their outstanding performance. Brembo calipers provide exceptional stopping power and excellent feedback, giving riders the confidence they need to push their motorcycles to the limit. Whether you're a casual rider or a professional racer, Brembo calipers are the perfect choice for anyone who demands the best from their motorcycle's braking system. So why settle for anything less than the best? Choose Brembo calipers and experience the ultimate in braking performance and reliability.

brembo

STYLEMA®

brembo

Stylema® is a lightweight, compact, carefully sculpted and high performing caliper that has all the technical features and design of a product destined to outshine the rest and to bring its superiority to the next generation of leading-edge bikes.

The name Stylema® is a natural and spontaneous embrace between the words “style” and “stilema” - which is a uniquely Italian way of describing the distinctive features that distinguish an individual designer or author.

In this instance, the product’s unique features blend with its innate “style”, a combination of speed and performance, pure excitement and technology.

Aesthetic choices are tightly intertwined with the tangible reality of cutting-edge technology.

Compared to previous calipers, Stylema® has less volume around the pistons and brake pads, reducing the internal space occupied by brake fluid, to offer a more immediate response.

It has also lost weight, down by about 7 percent, reducing external dimensions and the height of the mounting caliper, and consequently, the length of the screws (5 mm shorter). The reductions do not affect stiffness, as all key sections have been redefined and the location of the external bridges has changed to allow for a more direct connection to the piston area.

By increasing airflow around the brake pads, Stylema® cools extremely quickly, thanks to an increase in the airflow spaces around the pistons and to an opening that allows air to flow out from the central bridge.

The balanced shape stems from the need to eliminate mass, emptying out every unnecessary gramme.

With precise, minimalist lines, the caliper’s geometry is consistent with the leading-edge bikes that will mount the new Stylema® caliper.

The two ribbed areas are both structural and design features that offer the product a dynamic visual presence and create the perfect space for the Brembo logo.

The air intake, a central feature that joins the superior ribbing through two clean edges, gives the caliper a sharper, more aggressive design.

STYLEMA 100MM MOUNTING CENTRE CALIPER

FOUR X 30mm PISTONS

For you, who love beauty in all its forms and are looking for the aesthetic pleasure associated with functionality and performance. For you, Brembo has created Stylema. An original caliper for supersport applications with a more modern and sophisticated design. Brake pads sold separately.

BEYOND WEIGHT REDUCTION

For you, who know how important the lightness of the calipers mounted on your bike is, but who also know that weight reduction must not be at the expense of stiffness. Stylema is 9% lighter and has lower fixing studs and shorter screws.

PERFORMANCE REDEFINED

For you, always looking for the adrenaline that can give you the perfect braking and eager to have a quicker response. Stylema allows for greater deceleration with the same application on the lever. With a 11% higher average coefficient of friction thanks to a new pad material. Thanks to the reduced quantity of brake fluid inside the hydraulic circuit and optimised geometry through innovative stiffening ribs of the external bridges, you require less lever stroke and less lever travel.

VENTILATION

For you, who have sports driving imprinted in the DNA and are looking for a caliper capable of cooling down very quickly. The Stylema has reduced brake fluid temperature by up to 10%, an innovative opening in the central deck that favours the exit of air and has greater areas of air passage around the pistons.

GP4-RX BILLET RADIAL CALIPER

FOUR X 30mm PISTONS

Brembo's latest radial mount, billet two piece, 2 pad Racing and High Performance Caliper. This computer designed caliper is for use with discs of a maximum thickness of 5.5mm in 300mm, 310mm or 320mm diameter. CNC machined from solid 4 pot aluminium pistons with racing seals and road dust seals. For use with stainless steel wide track discs. These calipers are sold in sets and include brake pads.

/ Designed specially for track and sports use
/ Designed to obtain high stiffness values, and high amounts of braking power
/ Nickel treated surface finish borrowed from MotoGP
/ Pinless brake pad design, for super fast and simple brake pad changes

GP4-RX 100mm in Nickel **220B01020**
GP4-RX 108mm in Nickel **220B01010**
GP4-RX 130mm in Nickel **220B01130**

Brake pads range: **07BB37**
Brembo Z04 Race Pads **107A48639**
Notes: 2 pads per caliper

GP4–RS FORGED RADIAL MONOBLOC CALIPER

FOUR X 30mm PISTONS

Brembo's very latest Radial mount one piece forged monobloc caliper with additional cooling fins. Inspired by Moto GP and part of the GP4 caliper series it is 10% lighter than the M4 caliper without compromising stiffness or power. Red Brembo branding, 4 x 30mm pistons and designed for use with normal wide track discs with a maximum 5.5mm thickness. These calipers are sold in sets and come with brake pads.

/ Derived from MotoGP technology
/ The fins allow for efficient heat dissipation when braking
/ The ribbing protects the caliper from deformations caused by significant braking

GP4-RS 108mm in Nickel **220C78310**

Brake pads range: **07BB37**

Brembo Z04 Race Pads **107A48639**

Notes: 2 pads per caliper

M50 FORGED RADIAL MONOBLOC CALIPER

FOUR X 30mm PISTONS

Brembo's latest OEM Radial mount one piece forged monobloc caliper used on models like the Ducati 1199 and 1299 Panigale. It was designed using 'topological optimisation' software to arrive at the optimum structure combining maximum stiffness with minimum weight. Titanium colour anodising with Red Brembo branding, 4 x 30mm pistons and designed for use with normal wide track discs with a maximum 5.5mm thickness. These calipers are sold in sets and come with brake pads

M50 100mm in Titanium (Left) **920.A885.80**
M50 100mm in Titanium (Right) **920.A885.81**

Brake pads range: **07BB37**
Brembo Z04 Race Pads **107A48639**
Notes: 2 pads per caliper

/ Monobloc caliper body increases rigidity to reduce lever stroke
/ Improved airflow around the caliper lowering brake fluid temperatures

M4 FORGED RADIAL MONOBLOC CALIPER

FOUR X 34mm PISTONS

Radial mount one piece forged monobloc caliper used on the Honda RCV213 V4, Kawasaki H4 and many other modern superbikes. Titanium or Black colour anodising with Red Brembo branding, 4 x 34mm pistons and designed for use with normal wide track discs with a maximum 5.5mm thickness. These calipers are sold in sets and come with brake pads.

/ Lightweight monobloc (one piece) caliper
/ Monobloc caliper body increases rigidity to reduce lever stroke
/ Fully linked hydraulic circuit allows ease of bleeding

Brake pads range: **07BB37**
Brembo Z04 Race Pads **107A48639**
Notes: 2 pads per caliper

M4.32 FORGED RADIAL MONOBLOC CALIPER

FOUR X 30mm PISTONS

Brembo's latest OEM Radial mount one piece forged monobloc caliper used on models like the Ducati 1199 and 1299 Panigale. It was designed using 'topological optimisation' software to arrive at the optimum structure combining maximum stiffness with minimum weight. Titanium colour anodising with Red Brembo branding, 4 x 30mm pistons and designed for use with normal wide track discs with a maximum 5.5mm thickness. These calipers are sold in sets and come with brake pads

/ Monobloc caliper body increases rigidity to reduce lever stroke
/ Brake pads can be replaced without removing the caliper from fork mount
/ Error proof assembly, ensures pads cannot be fitted incorrectly

Brake pads range: **07BB38**

Brembo Z04 Race Pads **107A48656**

Notes: 2 pads per caliper

AXIAL FRONT CALIPERS

AXIAL BILLET CALIPER P4 30/34

FOUR X 30/34mm PISTONS

Axial mount two piece Hard Anodised Billet caliper with red branding and 40mm mounting centres. Makes for an excellent classy side mount caliper and can be used as a bolt on upgrade for many European Superbikes from the nineties and noughties including the iconic Ducati 916. Also makes for a superb conversion for many Japanese bikes using inferior equipment. Includes pads.

AXIAL REAR CALIPERS

HPK REAR CALIPERS

FOUR X 30/34mm PISTONS

Two piece, 2 pad Racing and High Performance Calipers with 84mm mounting centre's. CNC machined from solid 2 pot aluminium pistons with racing seals and road dust seals. Quick release pad pin. Includes brake pads.

Fits as an upgrade on the standard mountings of most sporting Italian models. Ducati 748, 749, 848, 916, 996, 998, 999, 1098, 1198, 1199, Panigale 1200 Multistrada, KTM RC8 / R, Aprilia RSV1000 RSV41000, Benelli TNT etc.

EXCEPTIONAL FEEDBACK & CONTROL

Brembo Brake Master Cylinders are the ideal choice for riders who demand the highest level of braking performance and reliability from their motorcycle. These master cylinders are designed and manufactured to the highest standards, using the finest materials and state-of-the-art technology. They offer exceptional control and modulation, which means that you can adjust the braking force to suit your riding style and the road conditions.

Brembo Brake Master Cylinders are also highly durable, with a long lifespan that ensures that you won't have to replace them frequently. They are resistant to wear and tear, and they can withstand extreme temperatures and pressures, making them ideal for use in high-performance motorcycles.

But perhaps the most compelling reason to choose Brembo Brake Master Cylinders is their outstanding performance on the road. Brembo Brake Master Cylinders provide exceptional feedback and control, giving riders the confidence they need to push their motorcycles to the limit. They offer smooth, precise braking action, with no sponginess or fade, even under heavy use.

So why settle for anything less than the best? Choose Brembo Brake Master Cylinders and experience the ultimate in braking performance and reliability. Whether you're a casual rider or a professional racer, Brembo Brake Master Cylinders are the perfect choice for anyone who demands the best from their motorcycle's braking system.

MASTER CYLINDERS

RCS CORSA CORTA

COMPLETE WITH FLIP UP LEVER

The Brembo RCS Corsa Corta Master Cylinder is the evolution of the massively successful RCS master cylinder. These are race parts so are not model specific. With care and adaptation they can be fitted to almost any motorcycle and come ready to connect to a remote master cylinder fluid reservoir.

/ 3 position (Neutral / Sport / Race) idle stroke adjuster allows you to tailor the bite point for more, or less instantaneous response

/ 2 position (18 / 20) lever ratio adjuster allows you to tailor the 'feel' of the braking action between a softer operation with more feedback, or a firmer operation with less feedback

/ Span adjuster allows you to adjust the initial lever position

/ Brake light micro switch included as standard

FOR TWIN DISC AND CALIPERS WITH PISTONS OVER 32MM
19mm Brake RCS Corsa Corta **110C74010**

FOR TWIN DISC AND DUAL FLOATING CALIPER PISTONS
17mm Brake RCS Corsa Corta **110C74040**

FOR SINGLE DISC AND CALIPER PISTONS OVER 32MM
15mm Brake RCS Corsa Corta **110C74030**

RCS MASTER CYLINDERS

COMPLETE WITH FLIP UP LEVER

The Brembo RCS Forged Master Cylinder is the first cylinder to be ratio adjustable. The 19mm brake unit is adjustable for 18 or 20 ratio and the 16mm clutch and 15mm Single Disc Brake unit are adjustable for 18 or 16 ratio. 19mm will power any Twin Disc system and 15mm any Single Disc System. The adjustable ratio allows you change the 'feel' and set it to your preferred position. Levers are span adjustable and the brake unit is supplied with a brake light switch.

These are race parts and are not model specific. With care and adaptation they can be fitted to almost any motorcycle and come ready to connect to any master cylinder.

RADIAL MASTER CYLINDERS

SPAN ADJUSTABLE AND ERGONOMIC

Brembo manufacture the finest radial brake master cylinders in the world. They have been proven at every level of racing throughout the world, virtually every Moto GP and Superbike team in the world demand them.

/ These are race parts so are not model specific. With care and adaptation they can be fitted to almost any motorcycle and come ready to connect to a remote master cylinder fluid reservoir. They are not fitted with a brake light switch but you can overcome this by using a hydraulic banjo brake light switch instead.

/ There are several different ratios which affect the feel slightly but do not affect braking power. 20 Ratio feels hardest to pull, 18 less so and 16 Ratio feels the softest.

TWIN DISC BIKES WITHOUT BREMBO CALIPERS

Forged 19mm with 20 Ratio Fixed Lever **10476060**

CNC Machined 19mm with 20 Ratio Flip Up Lever **XR01172**

TWIN DISC BIKES WITH BREMBO CALIPERS

Forged 19mm with 18 Ratio Fixed Lever **10476070**

CNC Machined 19mm with 18 Ratio Flip Up Lever **XR01171**

SINGLE DISC AND SUPERMOTO BIKES

Forged 16mm with 18 Ratio Fixed Lever **10476080**

CNC Machined 16mm with 16 Ratio Flip Up Lever **XR01130**

Special shorter lever is very popular for Supermoto use.

RADIAL CLUTCH MASTER CYLINDERS

SPAN ADJUSTABLE AND ERGONOMIC

Brembo's specialist radial racing clutch cylinders are fitted as standard to all Ducati race bikes and give the rider greater clutch control.

Available in various bore sizes to suit every application. The smaller the bore, the lighter the action but some machines with heavier parts may require the larger bore sizes.

DUCATI AND UP TO 750CC JAPANESE BIKES

FRONT BRAKE MASTER CYLINDERS

These cylinders are fitted to thousands of motorcycles as OE fitment but can also be used extensively in the aftermarket. 12mm – 13mm will power any single caliper front set up and 15mm – 16mm will power any twin caliper set up. In general, we prefer to use 13mm for single calipers and 16mm for twin calipers.

REAR BRAKE MASTER CYLINDERS

Cylinders are universal fitment with 40mm mounting hole centres (except where marked). They are used on thousands of motorcycles as OE fitment and can also be used extensively in the aftermarket. 11mm to 13mm for single rear calipers. The 13mm cylinders can be used to upgrade some rear braking systems such as the infamous Aprilia Mille. The 16mm cylinder is also useful for powering twin rear caliper systems such as those used on trikes.

REMOTE ADJUSTER

ADJUST BRAKE LEVER REACH ON THE FLY

The remote adjuster has become an integral part of all racing brake systems. One end is attached to the brake lever span adjuster, the other end is mounted on the opposite side of the handlebars to enable the rider to adjust lever span while keeping control of the throttle. Probably used by every team and rider that runs a racing brake system.

RESERVOIR KITS

SIMPLE AND EXTREMELY QUICK TO INSTALL

These kits make installing a Brembo brake system easy and clean looking. Comes with 45ml reservoir, mounting bracket, black rubber hose and hardware to fit bracket to reservoir & master cylinder.

Available both for the brake side and for the clutch side.

BRAKE FLUID

SPORT.EVO++

PERFECT FOR ALL BREMBO BRAKES

Brembo Sport.Evo 500++ is a high performance brake and clutch fluid for use in all Road, Track and Race applications for which a non petroleum based fluid is specified. It out performs almost all other fluids and can be used for road bikes and right up to the very highest levels of racing. Another first from Brembo!

It has a typical dry boiling point of 271°C or 515°F. It will mix safely with other DOT 3, DOT 4 and DOT 5.1 brake & clutch fluids.

SPORT.EVO++ 250ml **04816450**

LCF600 PLUS

PERFECT FOR RACING

Brembo Racing LCF600 plus low compressibility brake fluid is intended purely for racing and is used by the worlds best including Honda and Ducati Moto GP teams and the Ferrari Formula 1 team.

It is specially formulated to provide the highest performance under all racing conditions, has an independently proven low compressibility and a dry boiling point of 316°C or 601°F. Do not use in systems containing Magnesium.

LCF600 PLUS 500ml **04816411**

MASTER CYLINDER REBUILDING SERVICE

Our Brembo Motorcycle Master Cylinder rebuild service is designed to provide an efficient and effective solution to customers who are experiencing issues with their motorcycle's braking system. We specialise in the repair and rebuild of Brembo Motorcycle Master Cylinders, which are known for their high performance and reliability. Our service involves disassembling the cylinder, cleaning all components, and replacing any worn or damaged parts with genuine Brembo parts. We use state-of-the-art equipment and techniques to ensure that each cylinder is rebuilt to the highest standards of quality and performance. Once the rebuild is complete, we thoroughly test the cylinder to ensure that it is functioning correctly before returning it to the customer. With our Brembo Motorcycle Master Cylinder rebuild service, customers can have peace of mind knowing that their motorcycle's braking system is functioning as it should.

As an appointed Brembo technical centre we are proud to be provide high quality servicing on your Brembo products.

Please get in touch for more information.

HEL Performance acquired Hose-Equip in 2000 as a strategic means to compete in the performance fluid-transfer marketplace. The name became Hose Equip Limited, shortened to HEL, and the HEL Performance brand was born.

All HEL Performance brake line components are made in Britain, including all of their stainless steel braided brake hose and stainless steel brake line fittings. Also, they're the only company in the UK to manufacture all of our mainline fittings in-house, using their own Star Micronics CNC Machines.

HEL Performance has invested significantly in reducing the environmental impact of its manufacturing processes. This includes the facility to spin all swarf to remove the majority of cutting oil they use in the machining process and re-use it. This also leaves them with 'dry' swarf suitable for creating new stainless steel bar.

These are just two ways they minimise their impact on the environment. They continuously seek better ways of doing things, without compromising the quality they're renowned for.

Recently, HEL Performance has begun delving deeper into the Motorcycle world, now their catalogue has expanded into other braking avenues such as calipers, master cylinders and even racing products.

HEL

BRAKE LINES

HEL brake lines are manufactured from the finest quality stainless steel fittings swaged directly onto a hard drawn, tensile stainless steel, braided fluoropolymer hose.

This eliminates the 'spongy' feeling found with rubber hoses under extreme braking conditions – when you need their performance the most. The stainless steel exterior provides excellent resistance to both corrosion and abrasion and the swaged fittings give a streamlined finish and a secure connection.

Tests have shown that stopping distances can be severely reduced after replacement with high quality stainless hoses and that brake lever 'feel' is improved by the reduction of brake lever travel.

HEL stainless steel brake and clutch hose kits are available to suit all models of motorcycles, whatever the make. These kits therefore, not only provide the reliability and safety demanded but offer brilliant good looks that improve the appearance of any installation. The silky smooth plastic outer covers are available in a wide range of colours to suit any application and the fittings are available in clear or black stainless steel.

/ Eliminates spongy feel

/ Improved braking efficiency

/ Abrasion & corrosion resistant

/ Improved 'feel'

/ Improved aesthetics

THE NEW SOLID BILLET CALIPER

V2

A NEW ROAD LEGAL RACE CALIPER IS HERE

The V2 model is a progression from the original 100mm, 108mm and 130mm calipers. These new versions feature new styling which offers an outboard bleed nipple and banjo take off meaning bleeding and installation are easier. They also feature five bolts rather than the previous three to offer more stability under braking and strength through the caliper. They come complete with stainless steel pad pins which have been upgraded to offer both an r-clip at the back and lockwire hole at the front. They still take the original pad design they have always used meaning you can choose the manufacturer and compound you prefer. Fully CNC machined at their HQ in Exeter – they are a huge step forward.

FRONT CALIPERS

SOLID BILLET RADIAL BRAKE CALIPERS

FOUR X 32mm PISTONS

Many calipers on the market today are forged to hit a lower price point. This limits design as threads and internal flow circuits need to be machine detailed afterwards. HEL calipers are precision machined entirely from race grade solid billet 6082-T6 aluminium - maximising weight and minimising material used. Brake pads sold separately.

COMPLETE CIRCUIT TECHNOLOGY

Unlike some calipers which only feed from one side, HEL calipers utilise complete circuit technology. This race inspired feature allows fluid to fully circulate the caliper meaning easier and faster removal of air from the system when bleeding.

RESEARCH & DEVELOPMENT

The HEL brake lab develops all braking products directly from a huge resource of track data collected from HEL's Superbike and Road Racing teams. The caliper design is based around very extreme race loading values taken from worst-case scenario calculations - the maximum amount of front brake force possible before the bike would start rotating around the front wheel and actually flip. Structural integrity, stiffness and displacement resistance are all fully optmised for prolonged on-limit use.

HEAT SINK PISTONS

HEL's stainless pistons act as a heat sink drawing the extreme temperatures generated when racing down into the piston - and away from the caliper body where the fluid circulates. This keeps the fluid at optimum operating temperature and away from boiling point (which varies depending on fluid specification). On track and on the limit the performance advantage is simply stunning, allowing fade-free powerful braking and ultra consistent feel - lap after lap after lap.

108mm Billet Caliper in Grey	**HC108-32-32-GR**

V2 108mm Billet Caliper in Black	**HC2108-32-32-BK**

REAR BILLET CALIPER

TWO X 32mm PISTONS

The rear calipers are fully CNC machined from solid billet aluminium to offer strength, minimal weight and stiffness. The two 32mm opposed pistons, made out of stainless steel, offer greater heat dissipation under braking. Additionally their total weight is only 505g. Brake pads sold separately.

84mm Billet Caliper in Grey **HC84-32-32-GR**
84mm Billet Caliper in Black **HC84-32-32-BK**

MASTER CYLINDER / CLUTCH PERCH

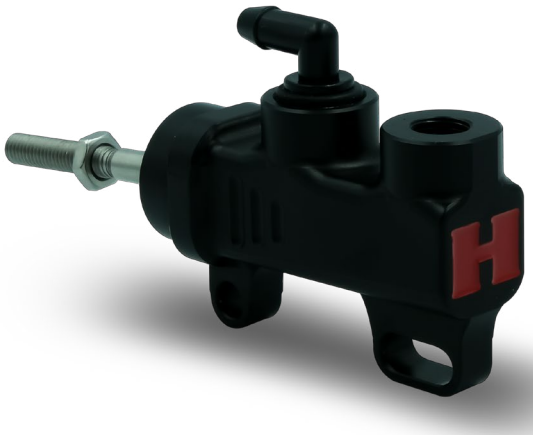

FOR BOTH BRAKE AND CLUTCH

HEL's brake master cylinders are supplied with a billet lever and one ratio adjuster allowing adjustment for 18/19/20 ratios. 19mm for twin front Super bike calipers and 16mm for single calipers or twin calipers on smaller bikes.

19mm Master Cylinder in Black **HMC-19MMBK**
16mm Clutch Master Cylinder in Black **HMC-16MMBK**
16mm Brake Master Cylinder in Black **HMC-16MMBK-BR**
16mm Clutch Perch in Black **HCCL-BK**

REAR MASTER CYLINDER

ADJUSTABLE & EXTENDABLE

The HEL Performance rear master cylinder has been designed in a square format to sit and blend effortlessly behind the heel plate on all models. It features a 13mm bore size and slotted mounting holes to allow the unit to be located exactly where you need it.

Rear Master Cylinder in Grey **HRMC-GR**
Rear Master Cylinder in Black **HRMC-BK**
Includes a HEL reservoir pot and bracket.

BRAKE NECK SPEEDS

HEL Performance have begun to design and build specialised parts perfect for racing. Featuring ingenious ergonomical design and Fully CNC machined from 6082 aluminium there products are up there with the best on the market today.

Coming in a sleek anodised black or grey finish, not only do HEL Performance products look good, they perform too. They're not strangers to the racing scene with countless teams using their brakelines. Every winner in the 2022 Isle of Man TT used HEL brakelines so it was only natural that they delved deeper into the racing world.

Their mobile Race Lab features at the Isle of Man TT, the NW200, and the World Superbike and British Superbike Championships every year, supporting their growing portfolio of sponsored winners with a fast-expanding range of high-performance braking technologies.

FORK MOUNTED THUMB BRAKE

ADJUSTABLE & EXTENDABLE

The HEL Performance Thumb Brake features a multi-position lever so that the individual can set the product where comfortable. The levers can be extended in situ to meet the riders' needs.

Comes complete with brake fluid reservoir & bracket, tubing and a bracket for mounting on the fork.

Fork Mounted Thumb Brake in Grey **HTB-GR**
Fork Mounted Thumb Brake in Black **HTB-BK**
Spare Bracket (38mm - 60mm) **HTB-B#BK**
For the bracket part no. replace the # with the size needed.

BAR MOUNTED THUMB BRAKE

ADJUSTABLE & EXTENDABLE

The HEL Performance Thumb Brake features a large curved lever so that it fits you ergonomically. The larger blade surface area makes it easier to use with gloves on and easier to locate without looking down.

The lever can be adjusted to alter starting position. The lever features pressed in bearings, something we will be looking to include on the standard master cylinders in the future, to offer minimal interference.

Comes complete with brake fluid reservoir & bracket, tubing and a bracket for mounting on the bar.

Bar Mounted Thumb Brake in Black **HTB2-BK**

SOLID BILLET FINGER BRAKE

ADJUSTABLE & EXTENDABLE

The pull brake was designed and modelled with help from leading British Super Bike Teams including Team Pho BMW and McAMs Yamaha.

The new HEL Pull Brake has been used throughout the British Super Bike season by Tarran MacKenzie, Jason O'Halloran, Peter Hickman, Tommy Bridewell and many others to great effect.

The pull brake, as well as the thumb brake, can be directly connected to the rear caliper or, via one of their twin rear master cylinders, to allow both foot and bar operated braking.

Finger Brake in Black **HFB-BK**
Available in 3 piston sizes: 10mm, 11mm and 13mm.

MISC BRAKE PRODUCTS

AXIAL TO RADIAL CALIPER BRACKETS

VARYING SIZES TO FIT ALL BIKES

HEL manufactures many different brackets to allow you to upgrade to radial calipers, including their own. These conversion kits allow an axially mounted caliper to be replaced with a modern radial version. All the brackets are supplied black anodised and are all fully CNC machined in-house at their headquarters in Devon, UK.

100mm Caliper, 62mm mount & 4.5mm offset	**HB-100-62-450**
108mm Caliper, 90mm mount & 2mm offset	**HB-108-90-2**
108mm Caliper, 90mm mount & 10mm offset	**HB-108-90-10**

SOLID BILLET LEVERS

INTERCHANGABLE WITH BRAKE/CLUTCH

HEL Performance offer a folding lever that is fully CNC machined from billet aluminium and features a stainless steel ball bearing and spring.

Can be used on either the Master Cylinder or Clutch perch.

Additionally, a non folding lever is available.

Folding Lever	**HMC-LEVERFOLD**
Spare Lever	**HMC-LEVER**

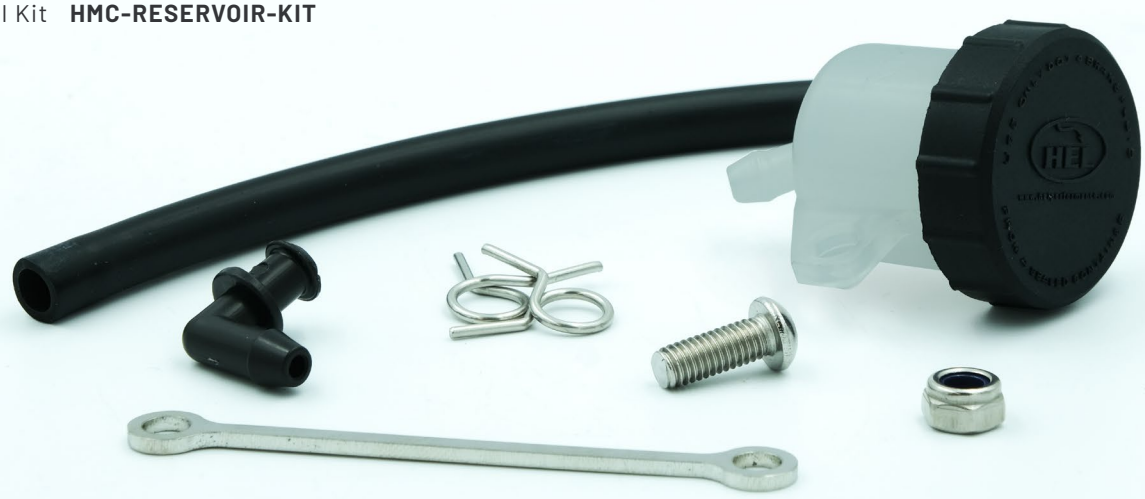

RESERVOIR KITS

15ML & 45ML AVAILABLE

HEL Performance offers two reservoir kits coming with either a 15ml pot or a 45ml pot. Designed to be a like for like replacement for the ones already fitted.

HEL Performance products such as the thumb brake come with a reservoir kit as standard.

15ml Kit	**HMC-RESERVOIR-KIT-S**
45ml Kit	**HMC-RESERVOIR-KIT**

domino®

TOMMASELLI®

Domino is a company that specialises in the design and production of high-quality motorcycle controls and parts. The company was founded in Italy in 1951 and has since expanded its operations to include markets all around the world. Domino is known for producing a wide range of motorcycle controls such as grips, levers, throttle kits, and handlebars.

Domino's products are designed to improve the handling, comfort, and performance of a motorcycle. The company uses high-quality materials and advanced manufacturing processes to ensure that their products are reliable, durable, and safe to use.

Domino's products are used by professional and amateur riders alike and have been featured in various racing events around the world. The company has a strong reputation in the motorcycle industry for producing high-quality and innovative products that enhance the riding experience.

In addition to motorcycle controls, Domino also produces parts for other types of vehicles, such as scooters and ATVs. Overall, Domino is a well-respected company that has been providing the highest quality motorcycle parts and controls for over half a century.

126

COMPETITION CONTROLS

Domino and Tommaselli are Europe's leading manufactures of Control products, including grips, handlebars, throttle controls, brake and clutch levers, lever assemblies, and electric switches.

Their expertise comes from more than 50 years experience of this activity along with the strict application of quality control systems. The Tommaselli name tends to be more associated with classic bikes whereas the Domino name is far more active in the modern racing world of Grand Prix and World Superbikes.

The Domino name is your guarantee of quality and reliability.

HEATED GRIPS

FOR USE ON BMW MOTORCYCLES

Domino developed new grips to satisfy BMW riders. Design is comparable to the original grips, but the material is softer for better grip and better feeling.

This grip replaces the original BMW grip only and not the heating element itself.

BLACK

D100 COLLECTION

D-LOCK GRIPS WITH PUSH-PULL RINGS

Domino's newest off road grip with their ***Lock On*** fixing system.

With 4 different interchangeable pulleys to fix them on most bikes models: KTM, Husqvarna, GASGAS, Honda, Kawasaki, Suzuki, Yamaha.

/ The knurling – Domino patented – maximizes the grip in any direction and the adherence between grips and gloves

/ An index-thumb pad and the 3 clings waffle on the back increase the grip.

FULL THROTTLE

Domino throttle controls feature a modular design, which allows for easy customization and replacement of individual components. They are also known for their durability and resistance to wear and tear, making them a popular choice among motorcycle enthusiasts and professionals.

In addition to their standard throttle controls, Domino also produces a range of advanced electronic throttle controls that use sensors and electronic circuits to provide even more precise control over engine output. These electronic controls are often used in high-performance racing motorcycles.

domino

RIDE BY WIRE THROTTLE

RBW / RIDE BY WIRE

A NEW ERA FOR RACING

Domino's first electronic throttle control (Ride by Wire), specifically designed for racing use – plug and play.

Compared to the original controls, this product minimises the free play between components, providing an extremely precise response to the riders input, very low friction and very low weight (198g), and greater strength.

The components are precision CNC machined from high strength EN AW7075 zinc alloy aluminium, black anodised, with a throttle tube made with special Techno-polymers, a waterproof IP67 rated Hall sensor specially developed by Domino during many years of research, a special return spring tuned for racing use and waterproof connectors.

Although a recent development, The Domino RBW electronic throttle control has already gained many race podiums with World Super Bike and World Endurance Championship teams.

QUICK ACTION THROTTLES

5176.03-02
XM2

XM2 (ADJUSTABLE)

THE GO-TO FOR RACING

Probably the best and most popular throttle controls in racing today and essential for all race and track day requirements. The lower the º/mm, the faster the throttle opening.

The XM2 push/pull unit uses twin cables and comes with three throttle speed rings for maximum throttle adjustment.

Suggested use of the speed rings:

/ White for greater speed control
/ Red for sporty riding due to a more progressive opening
/ Green has a softer opening. For example, better on a wet track

QUICKNESS (RED RING) 2,7°/mm
STROKE (RED RING) 25mm
QUICKNESS (WHITE RING) 2,6°/mm
STROKE (WHITE RING) 36mm
QUICKNESS (GREEN RING) 2,9°/mm
STROKE (GREEN RING) 33mm

KRR 03

KRR 03 (FIXED SPEED)

RECOMMENDED FOR RACING USE

The KRR 03 push / pull unit also uses twin cables and has a set speed.

Whilst very popular in racing, quick action throttles are also handy for road use, especially for long journeys where the reduced throttle travel can ease the pressure on your wrist

In simple terms, fitting a quick action throttle gives you more throttle for less twist of the grip

QUICKNESS 2,6°/mm
STROKE 45mm

ROAD & RACE THROTTLES

SINGLE PULL RACING
ALUMINIUM THROTTLE CONTROL

/ Without throttle cable adjuster
/ Speed: 1.8º/mm Max Stroke: 82mm

With Black grips **1333.03**
With Red/Black grips **3476.03-00**

SINGLE PULL RACING
ALUMINIUM THROTTLE CONTROL

/ With throttle cable adjuster
/ Speed: 1.9º/mm Max Stroke: 57mm

With Black grips **3520.03-01**
Without grips **4011.03-00**

Used on many DUCATI models.

SINGLE PULL RACING
SINGLE-CYLINDER

/ Comes with Ergal bolts and screws
/ Speed: 1.5º/mm Max Stroke: 66mm

With Grey/Black grips **3332.03**
Often used on RS125 and similar race bikes.

VINTAGE TWIN PULL
ALUMINIUM THROTTLE CONTROL

/ For racing vintage use
/ Speed: 2.1º/mm Max Stroke: 65mm

Without grips **1335.03-01**
Often used for twin cylinder bikes

LAIRO SINGLE PULL
ZAMAC THROTTLE CONTROL

/ With cable adjuster
/ Speed: 2.9º/mm Max Stroke: 15/25mm

With Black grips **0346.03-01**

DAYTONA SINGLE PULL
ZAMAC THROTTLE CONTROL

/ Twin cables
/ Speed: 3.4º/mm Stroke: 45mm

Black version **0507.03-01**
Chrome version **0507.03.60-01**

RALLY SINGLE PULL
ALUMINIUM THROTTLE CONTROL

/ Chrome finish
/ Speed: 2.9º/mm Max Stroke: 25mm

With Para grips **0335.03.60-01**

RALLY SINGLE PULL
ALUMINIUM THROTTLE CONTROL

/ Chrome finish
/ Speed: 2.9º/mm Max Stroke: 42mm

With Para grips **0335.03-01**

OFF-ROAD THROTTLES

KRK FOR KTM/HUSQVARNA

100% COMPATIBLE THROTTLE CONTROL WITH ORIGINAL KTM OFF-ROAD 4T CABLES

Suitable for all KTM / Husqvarna 4T cross and enduro bikes from 2004-2015 and can be fitted to the original cables! This push / pull unit comes with three throttle speed rings for maximum throttle adjustment.

KRK Throttle with grips **5204.03-00**
Speed rings for KRK **97.5204.04-00**
Spare tube **97.5847.04-00**

QUICKNESS (GREY RING) 3,0°/mm

REPLACEMENT SPEED RING SET

FOR XM2 THROTTLES

Fits: 5176.03-02 / 5182.03-02 / 4006.03-00 / 3846.03-01 / 3847.03-01

Speed rings set **97.5176.04-00**

REPLACEMENT SPEED RING SET

FOR KRK THROTTLES

Fits: 5204.03-00

Speed rings set **97.5204.04-00**

XM2 THROTTLE TUBE

For XM2 / ENDROSS. Fits: XM2 / 1469.03 / 1361.03 / 1333.03.

Throttle Tube **97.158.04-00**

HR CROSS THROTTLE TUBE

For HR Cross. Fits: 2122.03 / 2203.03 / 2311.03 / 3861.03.

Throttle Tube **97.2978.04-00**

KRR 03 THROTTLE TUBE

For KRR 03. Fits: 3357.03 / 3484.03 / 3572.03 / 3918.03

Throttle Tube **97.4643.04-00**

ZAMAC THROTTLE CAP

Fits: 0507.03.60-01 / 0507.03-01

Throttle cap **0507.02.2110**

HF THROTTLE CAP

Fits: 0514.03 / 0515.03

Throttle cap **0514.02.2092**

THROTTLE CAP

Fits: 0637.03.07 / 0666.03 / 0670.03-01 / 1800.03 / 1908.03 / 3480.03-02 / 3485.03-02

Throttle cap **0637.02.744**

RUBBER GAS COVER

Fits: 2122.03 / 2311.03 / 2350.03

Throttle cap **0507.02.2110**

ADJUSTING SCREW CAP

DQS / QUICK SHIFTER SYSTEM

COMPLETE SENSOR KIT WITH ROD

The New Hall effect, Plug and Play Domino DQS is a revolution in quick shifters. Until now, all quick shifters were after market products that required to be spliced into or added to the existing wiring looms and then required a fiddly and somewhat uncertain set up.

The DQS is different. It connects straight into the existing OEM wiring and integrates with the OEM CDI or control box.

The sensor has a double signal so it works both up and down in the gearbox and can be fitted with both Race (1 up 5 down) or Street (1 down 5 up) gearshift patterns. Each unit is developed directly for each individual bike model and finely tuned with factory race input. It doesn't need to be adjustable because it is correctly set up for each individual model in the first place.

It uses a Hall effect Domino sensor, a threaded rod made in 7075 Ergal aluminium, a steel ball joint rod end and electrical connectors that plug straight into the OEM wiring.

As used by many Factory and Satelite teams around the world.

HINGED CLIP-ONS

HINGED CLIP-ONS WITH ENGRAVED SCALE

BTR Hinged Motorcycle Handlebar Clip-ons are a vital component for any rider that wants the ease of adjustment and build quality of the more premium brands.

The Universal Clip-ons are a culmination of years of experience and the need for a high-quality product, with a clever design and an excellent price. The split hinged design allows them to be fitted and removed without the need to remove and refit the top yoke, saving time and effort.

The clip-ons are beautifully CNC machined from 6061 T6 Aluminium ensuring that they're both light and stronger than OE clip-ons. Coming in a black anodised finish, the clip ons are not only stylish but incredibly durable too.

04 WHEELS

ALUMINIUM / MAGNESIUM / CARBON FIBRE

O·Z MOTORBIKE ROTOBOX

LIGHTWEIGHT HEAVYWEIGHTS

The two main qualities required for a quality wheel are light weight and strength.

So why are light wheels so important? With today's modern bikes being so powerful, improved handling is now worth considerably more than additional power. A Superbike now spends as little as 2% of its lap time on full throttle and that is the only time that power really affects lap times. Lightweight wheels are a massive advantage because any loss in unsprung and rotating weight is worth several times its actual physical weight, having a massive affect on handling on both track and road.

By fitting lighter wheels you will –

/ Reduce Rotational Inertia

/ Improve Acceleration & Braking

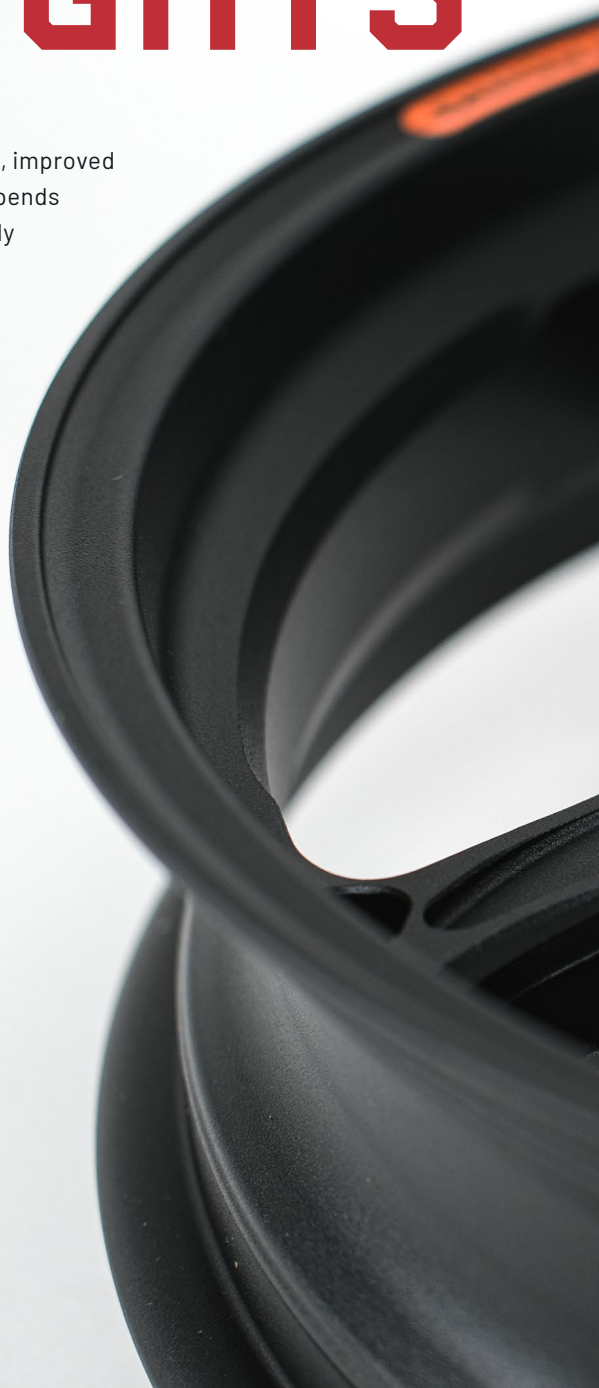

/ Reduce Tyre Wear

/ Improve Grip and Traction

/ Improve Handling

/ Reduce Rider Fatigue

Of course, anyone can make a wheel lighter simply by using less material. The difficult bit is to make it both lighter and strong enough to do it's job at speeds over 200mph.

OZ Motorbike is part of the OZ Group, an Italian company which since 1971 has led the car and motorcycle aftermarket wheel industry.

For almost 40 years the OZ brand has been a guarantee of quality and Italian design. And today with the very latest products OZ Motorbike makes it's already world-renowned brand even stronger.

This quality and expertise is recognized in the racing world and OZ wheels are used extensively throughout all levels of racing including World Super Bike, Grand Prix, the World Rally Championship and Formula One.

PIEGA

FRONT, REAR, REAR MONOARM

Finally, a road racing wheel. The extreme shapes of the iconic 5-spoke design make a statement thanks to the qualities of the forged aluminum and its inspired design. Lightweight, but without compromising rigidity. A road wheel that pays big rewards, even for the most exacting riders.

DESIGN:	5 Spokes
MATERIAL:	Aluminium Alloy
FINISH:	Gloss Black,Matte Black,Matte Gold

Wheels are interchangable with the originals. For rear, only the sprocket needs to be replaced.

TRACK

PIEGA R

FRONT, REAR, REAR MONOARM

The latest generation forged Racing wheels, aluminum, 5 spokes. No detail escapes our attention, ensuring breathtaking performance at the highest levels. Reliable and sturdy, they are the wheel of choice for top motorcycle manufacturers that are already using them for their official teams.

DESIGN: 5 Spokes
MATERIAL: Aluminium Alloy
FINISH: Matte Black,Matte Gold

Wheels are interchangable with the originals. For rear, only the sprocket needs to be replaced.

ROAD&
TRACK

GASS RS-A

FRONT, REAR, REAR MONOARM

Straight from the SBK tracks and now available in a road version. The lightest aluminum alloy wheel for road use. It leverages all of the extreme customizations developed on the race tracks, including shaving weight off the HLT inner rim and the two-section spokes. No compromises made on this wheel. Also available with exclusive titanium finish.

DESIGN:	6 Spokes
MATERIAL:	Aluminium Alloy
FINISH:	Titanium, Gloss Black,Matte Black,Matte Gold, Gloss Gold

Wheels are interchangeable with the originals. For rear, only the sprocket needs to be replaced.

ROAD OR TRACK

CATTIVA

FRONT, REAR, REAR MONOARM

Its 6-spoke design with double-section profile was drawn straight from OZ Racing experience. The special care that went into choosing the magnesium alloy and its surface- and heat-treatment ensures never-before-experienced bends and maneuverability. Preferred by those who want the most from their bike. Wheel is interchangeable with the originals. So, it takes standard discs and ABS components if they are original to the model.

DESIGN:	6 Spokes
MATERIAL:	Magnesium Alloy
FINISH:	Gloss Black, Matte Black,Matte Gold

Wheels are interchangeable with the originals. For rear, only the sprocket needs to be replaced.

ROTOBOX

Rotobox is the first and still the only carbon fibre motorcycle wheel producer in the world to develop and use a unique 3 component composite. During production several different types of CNC tailored carbon fabrics are hand placed into forming moulds.

Next liquid epoxy resin is injected into the sealed and tempered moulds under very high pressure. This process of producing the one-piece hollow carbon cast is an adaptation of the special high pressure Resin Transfer Moulding (RTM) technology. Ensuring continuous quality, safety and accuracy of the production process.

Stainless 2.5mm steel wire is integrated in each side of the rim increasing its impact resistance of the rim edge, yet keeping the rim edge ductile. A closed rim edge where the carbon fibres are spun around the integrated steel rim wire results in a rim edge without machining and thus ensuring the best quality, wheel stiffness and strength. With the industry's first 3 component composite (carbon-epoxy-steel) and its unique one-piece hollow carbon cast construction, Rotobox is redefining the quality and manufacturing standards of a whole industry.

Unique technology enables combining chopped carbon fibres with woven fabric seamlessly in one-piece monocoque in a process called dry forging.

To create the solid thin spokes of the Rotobox Bullet wheels, they use special carbon fibre yarn developed for military use which makes them small and compact yet super-strong.

Rotobox Boost wheels elegant spoke design brings even greater stiffness and although the spokes are sleek, they can take a huge permissible static load of 280 kg on the rear wheel and 180 kg on the front wheel.

Hubs are CNC machined from 7075 T651 aluminium alloy, anodised into optional colour and permanently assembled to the carbon rim. Designed specifically for each motorcycle model, the Rotobox wheels are a direct replacement of the OEM-wheels and are supplied with a cush drive, sprocket carrier, spacers and a choice of ceramic or steel bearings.

ROTOBOX BULLET

CARBON FIBRE BENEFITS

Rotobox have just one target. To make the lightest and strongest carbon fibre wheel in the world! To make the new Bullet wheel they use a revolutionary 3 component-carbon-epoxy-steel-composite and a newly developed production procedure. This has paved the way for a new generation of high performance motorcycle wheels by Rotobox.

Their carbon fibre wheels are ultra-light motorcycle wheels for both racing and road applications and are a huge upgrade from the OEM production wheel. The wheels have been designed to meet the highest level of performance and due to one-piece carbon cast construction they develop a safe and controlled advantage in speed, providing the lowest moment of inertia and the lowest gyroscopic effect.

The thin spokes are created by using a special carbon fibre yarn developed for military use. Because of the extreme mechanical properties of the fibres and high density forging process, the cross section of the spokes becomes small and compact.

The result is both unique and beautiful and Rotobox believe that they have achieved their goal!

ROTOBOX WHEELS

ROAD&
TRACK

BOOST

FRONT, REAR, REAR MONOARM

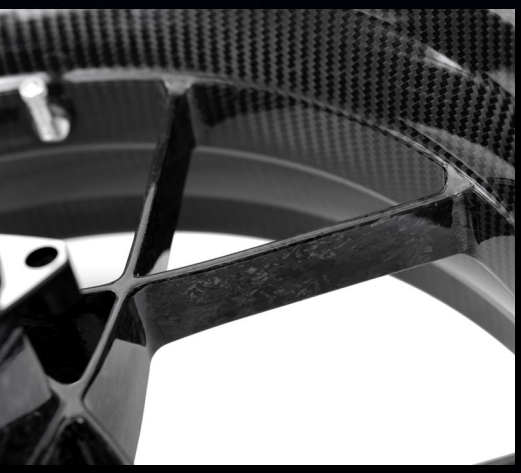

The Rotobox Boost was the world's first carbon wheels reinforced with stainless steel wire inside the carbon rim to increase impact resistance of the carbon composite. With it's shape and performance that are a pure thrill for the senses, Rotobox Boost make the motorcycle capable of more while weighing less. The shape, structure and dimensions of each wheel are defined by high precision aluminium tools CNC made in-house specifically for wheel design.

DESIGN:	5 Spokes
MATERIAL:	Carbon Fibre
FINISH:	Highly customisable. Enquire for more details

Wheels are interchangable with the originals. For rear, only the sprocket needs to be replaced.

ROAD& TRACK

BULLET

FRONT, REAR, REAR MONOARM

Rotobox Bullet carbon fibre take things to another level: more riding performance, more design and more technology to accentuate the sportiest side of each motorcycle. Their R & D team was challenged to develop a new technology of solid spokes and a light alloy-like wheel design. The result is a unique, top performance, FORGED carbon with a daring appearance. Your secret weapon that will get you noticed for all the right reasons!

DESIGN:	10 Spokes
MATERIAL:	Carbon Fibre
FINISH:	Highly customisable. Enquire for more details

Wheels are interchangable with the originals. For rear, only the sprocket needs to be replaced.

05 SUSPENSION

STEERING DAMPERS / SHOCKS / FORKS

Matris is an Italian manufacturer of high-performance suspension components for motorcycles. The company was founded in 1990 by a group of engineers and technicians with extensive experience in racing and motorcycle design.

Matris produces a wide range of products, including shock absorbers, steering dampers, and fork cartridge kits. These products are designed and manufactured to meet the demands of racing and high-performance riding, and are used by professional racers and road riders alike.

One of the distinguishing features of Matris products is their use of advanced materials and technologies, such as titanium, CNC-machined aluminum, and carbon fiber. These materials offer a combination of strength, durability, and light weight that can improve the handling and performance of a motorcycle.

Matris has also developed a reputation for providing excellent customer service and technical support. They offer personalised advice and support to customers, as well as assistance with installation and tuning of their products.

Matris is a respected and innovative company in the motorcycle industry, known for producing high-quality suspension components that to suit every riders needs.

HONDA

RACE PROVEN DAMPERS

Modern superbikes use very steep head angles, short wheelbases and very powerful engines. By their very nature this will make them inclined to tank slap, regardless of frame or suspension design. In more recent years the bike manufacturers are beginning to fit steering dampers as Original Equipment but rather like OE shock absorbers they are mostly poor quality, nonadjustable, inexpensive items which can be vastly improved upon.

Matris have been manufacturing some of the best speed sensitive dampers in the world since about 1990. There are other brand names that are better known, but in our opinion none that produce a better product, and they have been Race Proven all over the world! Their speed sensitive design reacts to sudden movements by automatically increasing their damping without restricting movement at slow speeds. This gives the best of both worlds and the perfect damper design.

STEERING DAMPERS

SDK STEERING DAMPER

PROVIDING GREATER SAFETY AT HIGH SPEED

The short wheelbases and high-performance engines of modern sport-bikes, are by nature more inclined to nervous/twitching movement, regardless to frame or suspension design.

SDK steering dampers improve the control of the front axle with 13 positions of adjustment, damping all the oscillations and the rapid setting changes, reducing shaking of the front wheel and providing greater safety at high speed.

Supplied with a full fitting kit where necessary.

SDR STEERING DAMPER

THE BEST SPEED SENSITIVE DESIGN

SDR steering dampers improve the control of the front axle, damping all the oscillations and the rapid setting changes, reducing shaking of the front wheel and providing greater safety at high speed. With 16 “active” fully adjustable hydraulic damping options with calibrated holes and micrometric points of resistance and hardness and a “Speed Sensitive” progressive hydraulic damping system, the SDR is a essential part for a race bike.

Supplied with a full fitting kit where necessary.

* Dampers marked 'Race Use Only' require the removal of the ignition barrel!!

ENGINEER MARVELS

Matris shock absorbers combine outstanding performance with exquisitely engineered product design and value for money.

Manufactured in Italy to the highest quality, Matris shock absorbers are available in three different formats. The 'KD' single damping adjustment for Road use, the 'K' or two way damping adjustment for Road and Track use, and the 'R' or three way damping adjustment for Road, Track and Race use.

The design is based around a 46mm diameter piston with a 16mm diameter piston rod.

RING

SHOCK ABSORBERS

MONOSHOCK R / M46R

THE THREE-WAY "R" ADJUSTABLE SHOCK

This rear shock line is a sophisticated unit intended primarily for race and track use.

It is equipped with three independent hydraulic control adjustments: high & low speed compression damping and rebound damping. The ride height is also adjustable. Computerised engineering systems are used to design, project and produce all the components and only materials of high-end technical and mechanical characteristics are used.

High precision machining with the objective of reducing weight and friction to improve sliding, high temperature stability, plus fine damping adjustment to ensure the greatest sensivity and confidence to the rider and also an excellent stability of the rear axle. The difference in damping is easily perceptible with every click adjustment .

Available with orange or black spring.

MONOSHOCK K / M46K

THE TWO-WAY "K" ADJUSTABLE SHOCK

This rear shock line is ideal for fast road, track day or race use.

Two separate and independent hydraulic damping control units to adjust Compression & Rebound. The ride hight adjuster unit is available on most applications for a customizable setting of the bike. As standard, the spring Preload by millimetric rings is included. A full choice of Hydraulic spring Preload units also available.

Manufactured using only materials of high-end technical and mechanical characteristics. High precision CNC machining with the objective of offering fine damping adjustment to ensure the greatest confidence and excellent stability.

Each click makes a perceptible difference to the damping.

Available with orange or black spring.

MONOSHOCK K-FLEX / M46KF

THE "FLEX" TWO-WAY VERSION OF "K" SHOCK

The flex-hose rear shock line is ideal for street and dual-sport bikes. Easy to fit in different position options.

Two separate and independent hydraulic damping control units to adjust Compression & Rebound.

The length adjuster unit is available on most applications. It is supplied as standard with a millimetric ring spring Preload system but a full choice of Hydraulic spring Preload units is also available.

Manufactured with the objective of offering to the rider a fine damping adjustment and ensure the greatest confidence and stability. The difference in damping setting is easily perceptible with every click adjustment .

Available with orange or black spring.

MONOSHOCK KD / M46KD

THE SINGLE WAY "KD" ADJUSTABLE SHOCK

The "KD" single adjustment shock is intended principally as a shock for naked and street bikes.

Very easy to adjust at a right set up for all road rider.

It allows the Rebound hydraulic damping control and on most cases the ride height adjustment.

The spring Preload by millimetric ring is included as standard, but a full choice of Hydraulic spring Preload units are available too as also a wide range of spring rates to fit all bikes and different drivers weight.

Manufactured using the same quality of ever, even if it is an entry level product.

Available with orange or black spring.

TWINSHOCK KC / M40KC

THE TWO-WAY "KC" ADJUSTABLE TWIN SHOCK

This twin shock range is ideal for touring and sport use on Classic and Custom bikes.

Two separate and independent hydraulic damping control units to adjust Compression & Rebound are provided.

On most applications, it is also available the adjuster unit for length and ride height. The spring Preload is by millimetric ring.

Manufactured using only high-end technical and mechanical materials with the objective to offer fine damping adjustment to ensure the greatest confidence plus an excellent comfort.

Each click makes a perceptible difference to the damping. Fully re-buildable and re-valveable.

To match the look of your bike the twins are available in two versions: Dark & Chrome.

TWINSHOCK D / M40D

THE SINGLE-WAY "M40D" ADJUSTABLE TWINSHOCK

The M40D is an adjustable hydraulic twin set with an internal pressurized expansion tank of Nitrogen gas (N2). Single, easy to use, damping (Rebound) adjustment. Where possible the length adjuster unit is also available.

The spring Preload is by millimetric ring. Manufactured using only materials of high-end technical and mechanical characteristics with the objective of offering fine damping adjustment to ensure the greatest confidence, and excellent comfort.

Each click makes a perceptible difference to the damping.

Fully re-buildable and re-valveable.

To match the look of your bike the twins are available in two versions: Dark & Chrome.

TWINSHOCK SR / M40SR

THE TWO WAY "SR" ADJUSTABLE SCOOTER TWIN SHOCK

Ideal for high performance scooters for street and sport use. Two separate and independent hydraulic damping control units to adjust Compression & Rebound are provided.

On demand, where possible, the adjuster unit for length and ride height is also available.

The spring Preload is by millimetric ring.

Manufactured and assembled using only high level quality materials and components.

The main objective is to offer a fine damping adjustment to ensure great confidence and excellent comfort.

Each click makes a noticeable difference to the damping range.

TWINSHOCK S / M40S

THE TWO WAY "S" ADJUSTABLE SCOOTER TWIN SHOCK

Ideal for high performance scooters for street and sport use. Two separate and independent hydraulic damping control units to adjust Compression & Rebound are provided.

On demand, where possible, the adjuster unit for length and ride height is also available.

The spring Preload is by millimetric ring.

Manufactured and assembled using only high level quality materials and components.

The main objective is to offer a fine damping adjustment to ensure great confidence and excellent comfort.

Each click makes a noticeable difference to the damping range.

TRIUMPH

FORK CONVERSIONS

Original equipment motorcycle forks are by their very nature a compromise. They are set up by the manufacturer for the average rider of average weight and ability riding on the average road! Unfortunately, since people, their weight, riding ability and the roads and tracks they ride upon are not average this means that the forks and their settings are often wrong and can be vastly improved upon.

Manufactured in the Italy to the highest quality, Matris fork conversion kits are designed to improve upon the original equipment and can be set up much more accurately for each individual rider.

Depending upon specification, this means they will improve upon both the springing and damping effects making the forks more precise, more adjustable, easier to use and ultimately better in every regard. They are available in three principal formats, Spring Kits, Hydraulic Kits and Complete Cartridge kits.

FRONT FORKS KITS

SUPERBIKE FORKS / F43SP

SEALED & PRESSURIZED FRONT FORK

The F43SP fork is their most innovative high-end product. It utilises their top of range "Speed Sensitive System" F25SP Nitrogen pressurised cartridge housed within the fork body to set a new market standard.

Not having an external volumetric compensation tank, dimensions and weights of the front axle are reduced improving performance, handling and feeling response in sporting use. Simple design, easy setting.

The damping asymmetrical adjuster units of Compression and Rebound, together with Preload are integrated in the upper fork cap for simple and practical operation.

FORK CARTRIDGE KIT / F25SA

THE 'SEALED' CARTIDGE

The F25SA kit is the Matris 'Flagship' high performance product. It is a SEALED kit which means it is delivered with the oil already inside the cartridge.

It is Asymmetric, so again the kit houses the preload and rebound damping in one fork leg and the preload and compression damping in the other, both machined from aluminium billet, with their own dedicated shim stack and supported by oiless slide bearings.

The expansion tank is controlled by an anti-cavitation mechanical system, integrated with the hydraulic cartridge kit. This is a High Level Upgrade of the original fork and the difference is like night and day!

FORK CARTRIDGE KIT / F25R

THE "CLASSIC" HYDRAULIC CARTRIDGE

It is aimed at sport bikes and maxi naked for track and fast-road use.

The symmetric system is supplied for bikes with adjustable forks as OEM, it adjusts rebound and spring preload at the top of the cartridge and provides a new compression adjuster to replace the OEM adjuster at the bottom of the fork. The asymmetric system uses the 'Quad Valve' system and locates the preload and Rebound damping in one fork leg and preload and compression in the other.

Each adjustment makes a specific click that allows you to know exactly where you have set the adjusters and most important of all, each click actually makes a difference to the damping you can feel!

FORK CARTRIDGE KIT / F20K

THE "ASYMMETRICAL" CARTRIDGE

The F20K is a 20mm asymmetrical cartridge kit that completely replaces the original internals to upgrade forks that were supplied with some level of adjustment as standard.

The kit houses the preload and rebound damping in one fork leg and preload and compression damping in the other and is a massive upgrade for all Sport, Naked, and Adventure bikes.

Every adjustment click makes a difference to the damping and you can feel every one! It is supplied ready to fit, no modification of the original fork is required for assembly and it is fully reversible.

FORK CARTRIDGE KIT / F15K

THE "QUAD-VALVE" CARTRIDGE

The F15K sets a new standard & quality level in the market place.

It is a 20mm asymmetrical hydraulic kit that completely replaces the original internals of conventional non-adjustable forks to convert them into fully-adjustable forks found in a sports bike.

The kit houses the preload and rebound damping in one fork leg and preload and compression damping in the other and is intended for all Street, Naked, and Classic bikes equipped with conventional forks. It is supplied ready to fit, no modification of the original fork is required for assembly and it is fully reversible.

RST
SUZUKI
PRO-RACE
brembo

SPRING KITS

FORK KIT / FKS

THE FIRST STEP TO UPGRADE FORKS

Easy to assemble, it consists of a set of springs available in different rates plus a set of spacers in different lengths to match all models.

/ Springs & Spacers
/ Supplied with specific fluid

FORK KIT / FKE

THE ADJUSTABLE SPRING KIT

Easy to assemble and adjust, it improves comfort and driving confidence. Ideal for all Street, Naked and Classic bikes equipped with conventional forks.

/ The kit is supplied ready to fit
/ No modification to the original fork is required
/ Is fully reversible

FORK KIT / FSE

THE HYDRAULIC CONTROL OF A SPRING KIT

The FSE fork kit improves the functioning of the original ones. Easy to assemble and adjust, it improves comfort, driving confidence and dynamic performance, making the fork more precise. Ideal for all Street, Naked and Classic bikes equipped with conventional forks.

/ The kit is supplied ready to fit
/ No modification to the original fork is required
/ Is fully reversible
/ Supplied with specific fluid

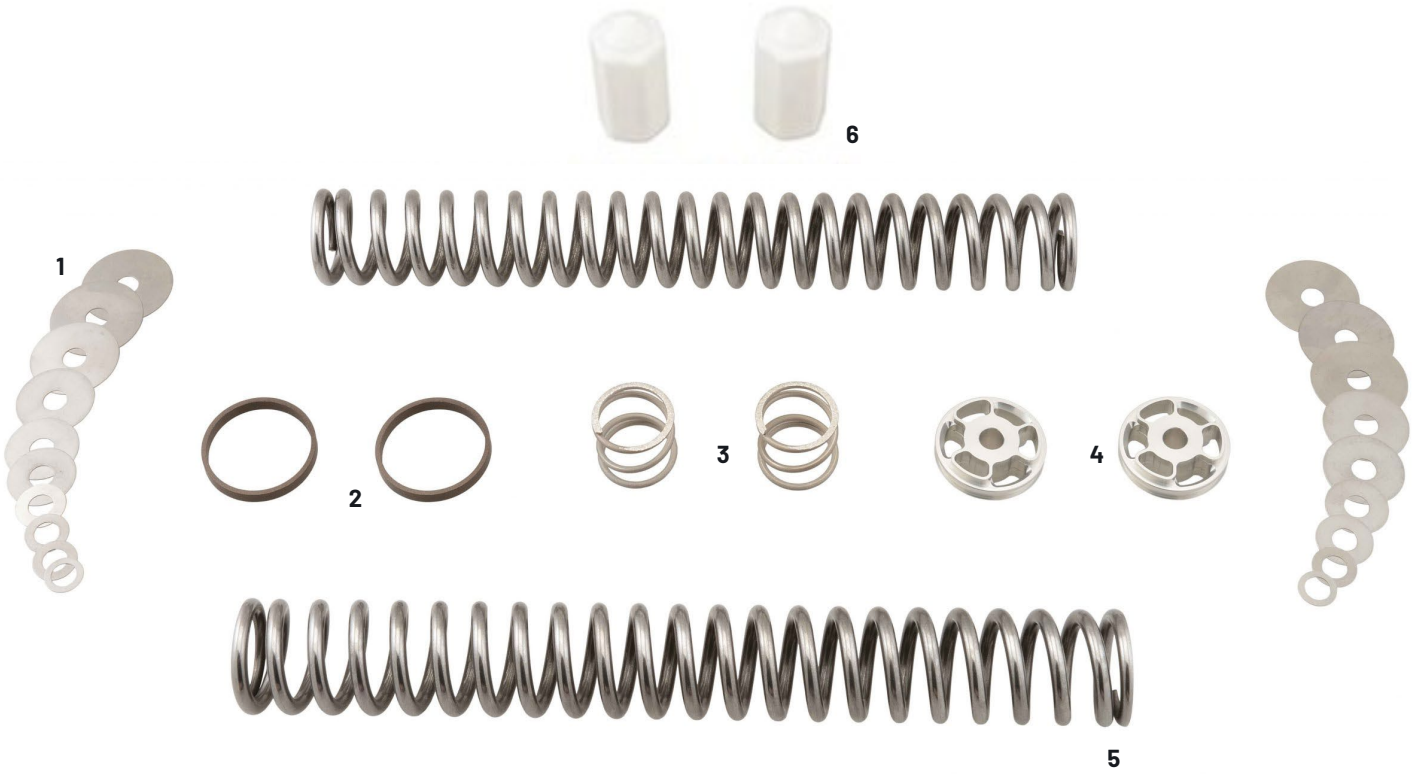

FORK KIT / FRK

THE HYDRAULIC HEART

The FRK kit improves the functioning and the performance of the original fork equipped with cartridge. Easy to assemble and adjust, it assures better dynamic response and front-end stability, making the fork more precise. It is intended for sport bikes and sport naked for track and street use.

/ Separate Piston set and shim stack for compression adjustment
/ Separate Piston set and shim stack for rebound adjustment
/ No modification to the original fork is required
/ Supplied with specific high sliding fluid

FORK KIT / FRK - BP

DEDICATED TO "BIG PISTON" FORKS

The FRK-BP is the first step to modify the fork hydraulic valves of 41mm & 43mm "BPF" Showa forks.

Billet Alu alloy piston with pre-assembled shims stack to control the hydraulic Compression and Rebound flows to improve the performance and to grant more feeling on the front-end.

Fork kit supplied with specific low viscosity fork fluid for a long high performance.

STAGE ONE

1 Specific Compression & Rebound shims stack
2 High sliding coefficent sealing bands
3 Compression valve spring (in place of original one)
4 Compression & Rebound billet Alu alloy piston

STAGE TWO

Stage Two consists of FRK-BP Stage One plus
5 Linear spring in Si-Cr alloy Steel, availble in different rates
6 Technopolymer spacer sized to fit on different fork models

FRONT FORKS

NEED A SPARK?

Motorcycle batteries are an essential component of any motorcycle, as they provide the electrical power required to start the engine and power the bike's various electrical systems. When it comes to motorcycle batteries, there are two main types: lead-acid and lithium-ion batteries. Lead-acid batteries have been the traditional choice for motorcycles for many years due to their low cost and reliability. These batteries use a liquid electrolyte solution and lead plates to produce a charge. They are relatively heavy and require regular maintenance to ensure their longevity.

On the other hand, lithium-ion batteries are a newer type of motorcycle battery that offers several advantages over lead-acid batteries. These batteries use a solid electrolyte solution and lithium-ion cells to produce a charge. They are much lighter and have a longer lifespan than lead-acid batteries. Additionally, lithium-ion batteries require very little maintenance and are less prone to damage from vibration or overcharging. However, they are generally more expensive than lead-acid batteries, and they may not be suitable for all types of motorcycles, depending on their electrical requirements. Understanding the differences between these two types of motorcycle batteries is crucial in selecting the right one for your specific needs.

SHIDO®

For nearly 100 years the battery has remained the same until Shido changed the motorcycle game with their new ultra high tech Lithium Ion battery.

Up to 75% lighter than conventional batteries – With a weight saving of around 2kg on an average superbike, it is the cheapest and easiest weight saving you will make. Perfect for road, race & track! Lighter weight improves acceleration, braking, handling and even fuel consumption.

/ Superb cranking capacity – up to 50% more than lead acid batteries.

/ Safer to you and kinder to the environment – much safer than conventional lead acid batteries since they contain no explosive gases, corrosive acids or toxic heavy metals.

/ Long lasting and rapid charging – can accept more than 2000 charging cycles and can last up to 10 years. Will charge up to 75% in just 6 minutes.

/ Easy fit – unlike many others, the battery is the same size and shape as the OE battery so that it fits directly into the same space with the same electrical connectors and bolts. So no messing around and wire cutting to get it to fit.

/ Their light weight gives them an obvious application for track & race bikes but their other benefits make them a must for all on and off road applications.

SHIDO HIGH PERFORMANCE LITHIUM RANGE

The black Lithium motorcycle high-performance (HP) battery has a larger capacity and even higher cranking power for the exact dimensions of the standard lithium-ion range.

/ Unique motorcycle battery

/ Quicker (cold) starts

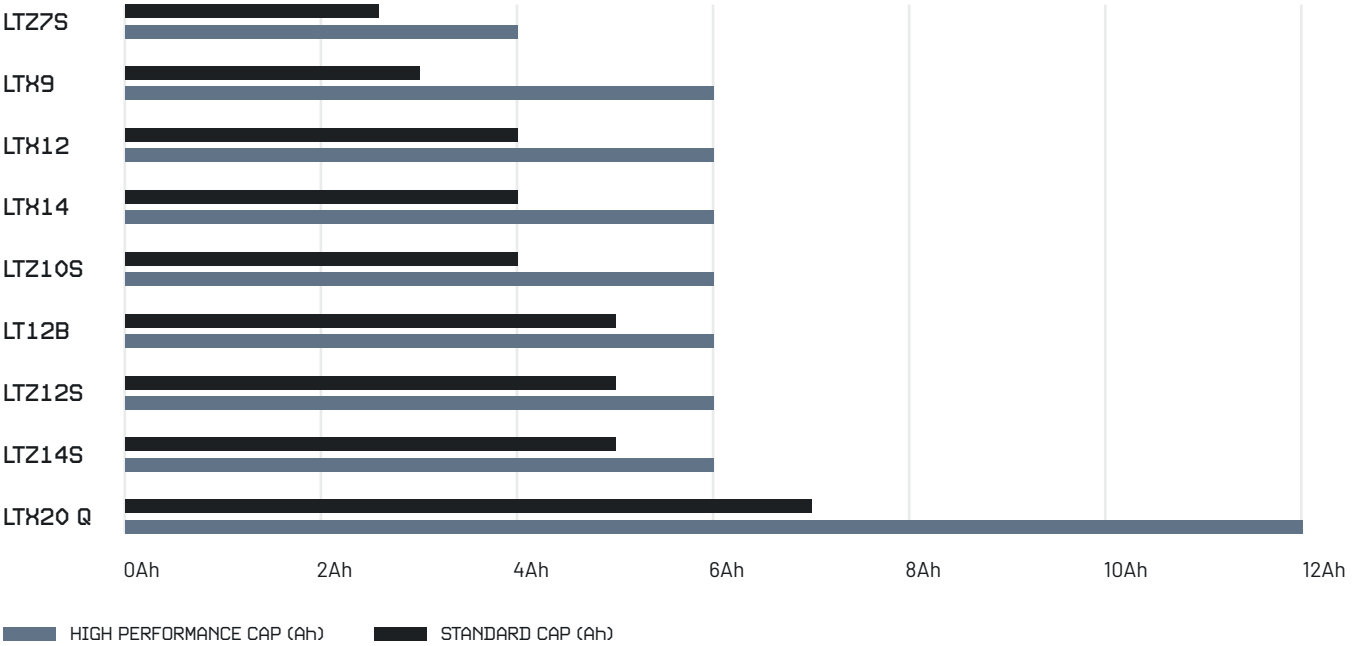

/ Extra battery consumption will not drain it quickly

A SHIDO HP battery has the same capacity as a lead-acid battery with a cranking power that exceeds OE lithium battery specifications. The right battery for customers looking for loads of cranking power and instant starts.

HIGH PERFORMANCE VS STANDARD

SHIDO DUAL BATTERY CHARGERS

Lithium batteries offer an excellent level of performance, but to gain the best from them they need to be charged correctly.

Shido have now developed the Dual Charger range suitable for both Lead Acid and Lithium Ion Batteries. They come with unique and optimized charging algorithms which allow for a safe charge of both Lithium LiFePO4 and lead acid batteries and these algorithm's are built on long battery experience.

DC1.0

So, what's an algorithm? Well an algorithm is a 'pattern' of charging which needs to be different for different types of batteries. One of the key notices is that charging a deeply discharged lithium battery (<10V) should be done very very gently, starting with applying very low voltage and current. Applying high voltage and current from the start will cause premature failure. Also, chargers where the voltage exceeds 15v for a certain period in time will severely damage your lithium battery.

DC4.0

/ Cheaper chargers often have no algorithms at all and charge both types of battery at the same rate even when they are specified for Lithium Ion batteries!! That's a very bad idea and will result in a badly damaged battery!!

/ Shido Dual Chargers come with tested charging algorithms gained from long experience and also maintain the charge after the charging is completed. Every 4 hours the charger will check the voltage and when it drops below 12.8v the charger will start applying charge again to keep your battery ready to rock at all times!

DC1.0 CHARGER
FOR ALL BATTERY TYPES

/ Input: 220-240V AC50-60Hz
/ Output: 12v 1A DC

DC1.0 Dual Charger **DC1.0UK**

DC4.0 CHARGER
FOR ALL BATTERY TYPES

/ Input: 220-240V AC50-60Hz.
/ Output: 6v 12v 1A or 4A DC

DC4.0 Dual Charger **DC4.0UK**

Suitable to charge: Lithium LiFePO4, and lead acid GEL, AGM or WET batteries.

WIRING ACCESSORIES

Made to compliment Shido's Lithium Ion Motocycle Battery Chargers, The Shido Fit & Forget cables are just as technologically advanced as their batteries and chargers.

Designed to be fitted to the bike once, and then left on in an easy access place for future charge top ups, with a plugged connector to stop water ingress.

Battery Monitor Cable with 6mm Eyelets **S40028**
Cable with Crocodile Clips **S40055**
Battery Cable with 6mm Eyelets & Fuse **S40057**
Cigarette Lighter PL Cable 21-12mm 8A **S40059**
3m Extension Cable **S40029**

The very innovative range of Unibat Lithium-ion batteries for motorcycles and powersports has been engineered for the most demanding motorcyclists.

Always looking for higher and safer performance, faster acceleration, extremely reduced weight (about 3 times lighter than a traditional battery) and much longer battery life.

The strong starting currents generated by the battery power allow safe, repeated and consecutive starts even at low temperatures.

Its very long life is estimated to be over 5 years and over 2000 complete charge / discharge cycles guarantees operation even after long periods of inactivity. Additionally, the charging time is very short taking only 6 minutes for a 90% charge.

Unibat batteries come with 4* reinforced poles for any type of installation, even at 180º. Unibat lihium-ion batteries are a small range which covers many fitments! Each one comes supplied with multiple spacer pads to get the perfect fit to your battery box.

/ Over charge and over discharge protection

/ Excellent cycle life: more than 2000 cycles

/ Super cranking capacity - Long capacity retention

/ Up to 75% lighter

/ Up to 3 times more durable than traditional batteries

/ Charge and discharge over temperature protection

*The ULT1B only has 2 poles

NiTRO

Legal changes in early 2021 mean that batteries can no longer be supplied with plastic bottles of acid. This new challenge to the battery industry has lead to the SLA (Sealed Lead Acid) battery which utilises a lead acid Gel with AGM (Absorbed Glass Matt) technology to produce a fully sealed lead acid battery.

The addition of Silica into liquid acid makes it become a jelly like substance and these Gel batteries are filled, completely sealed and then activated at the factory. This means that they comply with the new laws, are much safer than liquid acid batteries and are immediately ready for use.

/ Fully Sealed so no acid leakage is possible
/ Lower self discharge during storage and use
/ Absolutely Spill-Free. Environment friendly
/ Can be fitted in any position (except upside down)
/ Immediately ready for use
/ Better vibration resistance
/ Longer starting capability
/ Fully Maintenance Free

07 SPARK PLUGS

NICKEL SPARK PLUGS / LASER IRIDIUM SPARK PLUGS

DUCATI
PIRELLI

THE IGNITION SPECIALIST™

NGK Spark Plugs have been developing spark plug technology since the 1930s and manufacture plugs for every type of automotive engine.

From passenger cars and bikes to Formula 1 and motorcycle racing, NGK Spark Plugs has established itself as a heavily relied upon original equipment manufacturer (OEM). With its clear commitment to delivering the highest quality and continuously raising the bar, NGK Spark Plugs is the obvious brand of choice for an array of vehicle manufacturers.

In order to meet growing expectations, NGK Spark Plugs regularly invests in research, technology, and development. As a result, the company produces over 1,000 different types of spark plugs for every type of automotive engine as well as for motorcycles, marine, power sport, and many other applications.

When engineers seek to maximise the efficiency and performance of today's increasingly sophisticated engines, they look to products from NGK to find the perfect match. That's why they are the No.1 choice original equipment supplier to motorcycle manufacturers around the world.

The vast experience and technology that NGK has ensures that there is no doubt that NGK are the world's No.1 spark plug.

AIR FILTERS / OIL FILTERS

MIW FILTERS

Pipercross

HIFLOFILTRO PREMIUM FILTERS

The Meiwa Company Ltd, MIW, has been a leader in filter technology since the early 1970s. Developed in Shizuoka, Japan, for use with all OEM applications and after-market performance and replacement parts. MIW provides the most comprehensive range of air filters for maximum market coverage.

MIW Air Filters are a top-of-the-line air filter solution designed specifically for motorcycles. These filters are engineered with high-quality materials to provide maximum filtration, airflow, and protection for your motorcycle's engine. They are designed to improve engine performance and efficiency, making them an essential component for riders who demand the best from their machines.

MIW Air Filters are made from premium-quality foam, which provides superior filtration capabilities while allowing for maximum airflow. This allows your motorcycle's engine to breathe more efficiently, resulting in improved horsepower, torque, and acceleration. The filters are also designed to fit perfectly in your motorcycle's airbox, ensuring that no unfiltered air enters the engine, which can lead to damage and reduced performance. With MIW Air Filters, you can be confident that your motorcycle's engine is receiving the cleanest and most efficient air possible, providing you with the ultimate riding experience.

A perfect replacement for your standard air filter.

The PX range of Pipercross high performance air filters offers the ultimate in engine filtration, giving outstanding performance over the life of the filter compared with leading cotton gauze filters.

This filter framework allows optimum airflow to the induction system, as well as absorbing dust particles in a sieving action. The layers of foam contain pores of differing sizes, with larger dust particles trapped in the outer layers, medium particles at the next layer and so on, through to a final layer that traps particles as small as five microns. Pleated cotton gauze filters, by comparison, have to be regularly cleaned to achieve the same life as a maintenance-free foam filter. This means that although air flow and power results are often very similar when first fitted the Pipercross continues to flow more air than the cotton gauze filters once they start to get dirty.

Power Filters

Dyno and race proven filters to replace the original equipment item. Requires the retention of the original air box. Wherever possible these also increase the aperture size to ensure maximum air flow and maximum power!

/ Resulting in high power and low maintenance, often out performing rivals in competitive brand tests.

/ Pipercross are one of the most successful filter manufacturers and have won hundreds of championships including several World Rally Championships. Additionally they have been supplying OE filters to Triumph for 10 years and are used and recommended by top race teams.

POWER RACE FILTERS

Developed from the Power Filter range but utilizing an F1 type foam to develop maximum power for Race and Track bikes. This delivers excellent breathing and therefore power but requires more maintenance than the Power Filter range.

POWER SOCKS

Individual Power Socks can be used to replace the air box and clamp straight onto the back of the carburettor. They are soft as they are only constructed from air filter foam so are excellent for use in cramped and difficult situations. Sold individually.

All measurements in mm / Height: Includes 20mm Neck height

CRANKCASE BREATHER FILTERS

Designed to prevent contaminated oil vapour from entering back into the engine. To be attached directly onto your existing crank case breather hose.

Push In Rubber Neck **C9024**
Clamp On Alloy Neck **C9025**

CLEANING KIT

An air filter cleaner and Air filter retention additive allow you to clean and improve the efficiency of your filter in a handy little kit.

Cleaning Kit **C9000**

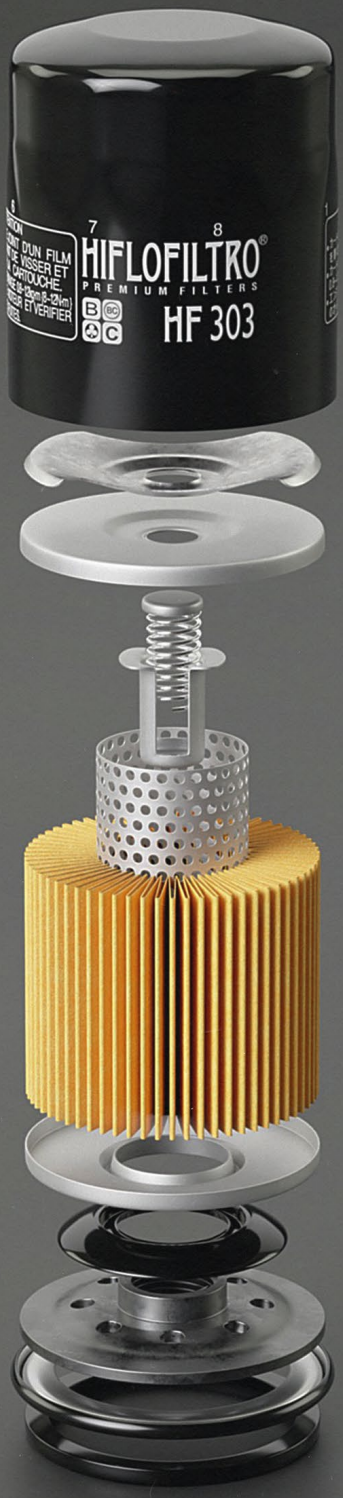

Hiflofiltro is the world's first and only TÜV approved motorcycle oil filter. Constructed using the best materials available, all Hiflofiltro oil filters meet or exceed original equipment performance levels. Available for street, scooter, motocross, enduro and ATV's.

Providing unbeatable performance and exceptional value, Hiflofiltro is the best-selling brand of aftermarket filters for motorcycles

To achieve their high quality standards and to ensure the consistency of their products, they use only premium materials from well known manufacturers: steel from Toyota Tsusho and NKK Japan, glue from Henkel Germany, filter paper from Ahlstrom Filtration Finland, Hollingsworth & Vose USA and Awa Paper Japan.

Every oil filter goes through 16 individual quality control checks before it is ready to leave the factory. The whole manufacturing process, including the checking of raw materials, individual filter testing, is regularly audited and verified independently by TÜV SÜD.

WHY HIFLO FILTRO OIL FILTERS?

MATERIALS

To achieve their quality aims and to ensure the consistency of their products, they use only premium materials from well known manufacturers.

PRODUCTION

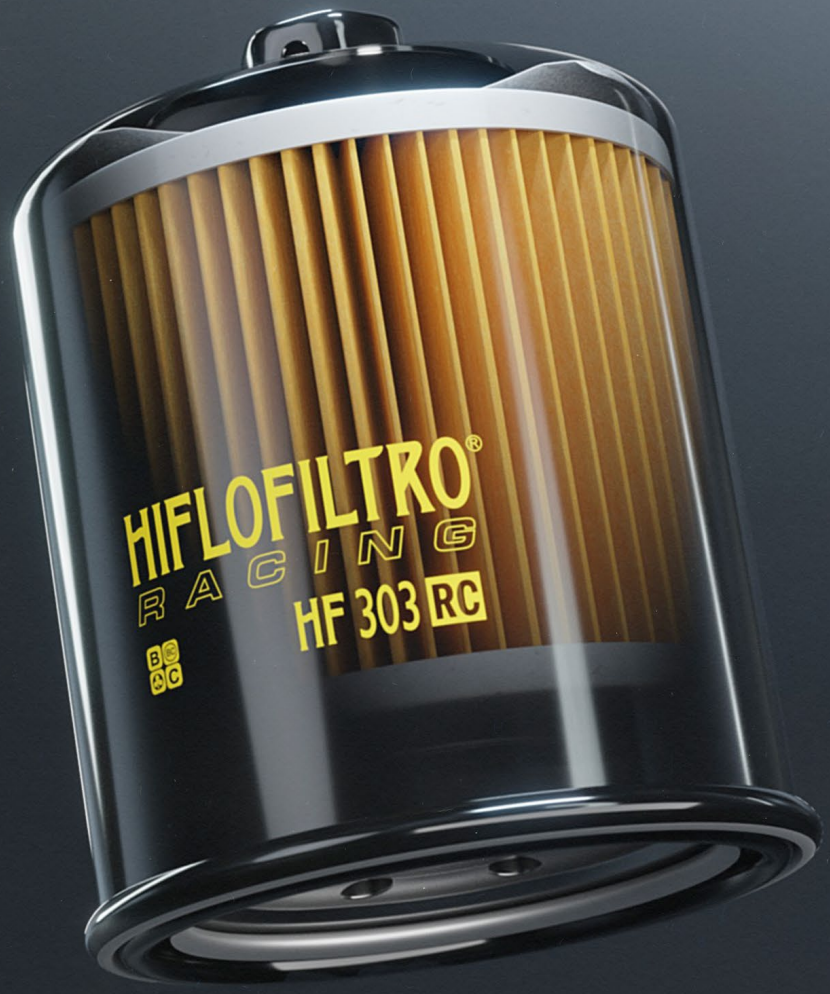

The Hiflofiltro-Thai Yang Kitpaisan factory was founded in 1955 and has been manufacturing filters for the OEM motor industry since 1963. With the experience of more than six decades, continuous research and development and modern production facilities, they manufacture some of the best quality filters in the world.

QUALITY CONTROL

Every oil filter goes through 16 individual quality control checks before it is ready to leave the factory.

HiFlo oil filters can either be sold separately,with Motul engine oil or with our service kits.

RC RACE FILTERS

Developed and manufactured to very high specifications to exceed the demands of modern racing engines and extreme racing conditions, the Hiflofiltro RC range provides numerous advantages for both road user and track racer.

/ 17mm cross drilled nut enabling easy removal and lock wiring for race use

/ Advanced high performance tri-fiber filtration media for optimum filtration, high capacity, and improved oil flow. Capable of capturing particles as small as 5 microns.

/ Tough heavy duty steel canister capable of withstanding extreme pressure

/ Special fibre or rubber coated relief valve for perfect sealing

/ Compatible with all oil types, mineral and synthetic

Simply add 'RC' to the end of the product code. Eg. ***HF303RC***

09 OIL & LUBRICANTS

OIL / LUBRICANTS / MAINTENANCE

Motul have been the choice of numerous world champions in MotoGP, WSBK, BSB and the World MX championships. Whether a race team owner, track day enthusiast, commuter or fun rider, Motul has the perfect product for you.

As Europe's No1 brand, Motul has over 160 years of experience producing technologically advanced lubricants and cleaning products. It has further improved the performance of its motorcycle lubricants through development of it's own type of Ester technology. The ESTER core technology is 100% synthetic and offers unrivalled levels of engine protection. In independent tests, these Esters came out on top for low traction coefficient resulting in significant power output and torque improvements.

They are available in Fully Synthetic and Semi Synthetic versions, with and without the Ester technology, and the differences in price are largely down to the ever improving quality moving from the 5000 general road bike oils to the 300V race oils.

Some of the best people to judge oils are often race engine builders because they see the engine internals after the engines have been run to their limits. Our race engine builders use and recommend Motul oils. In fact, we use Motul oils in all our Race, Track day and Road bikes and have done for years!

FACTORY LINE

Motul Factory Line is the pinnacle of the Motul product range. Formulated to offer the best to people who demand the best.

The Factory Line range caters to motorsport race teams and individuals who put their bike through the most rigourous of environments and need the best performance from all aspects of their bike. Having Motul products running through the veins of your bike ensures that it is running to it's very best, day in, day out.

A3 Air FIlter Oil 1L **450129**

FUEL SYSTEM CLEAN

READY TO USE ADDITIVE

/ Cleans dirtying and clogging fuel systems
/ Dissolves resins & gums

Fuel System Clean 200ml **450121**

TECH GREASE 300

MULTI-PURPOSE GREASE

/ For cables, bearings and ball joints
/ Offers good mechanical stability

Tech Grease 300 300g **450117**

P1 CARBU CLEAN

POWERFUL CARBURETOR CLEANER

/ Improves engine performance
/ Stabilises engine idling

P1 Carbu Clean 400ml **450152**

P2 BRAKE CLEAN

POWERFUL BRAKE CLEANER

/ Dissolves oil, grease and tar
/ Evaporates quickly & leaves no marks

P2 Brake Clean 400ml **450153**

P4 E.Z LUBE

A SUPERIOR ANTI-RUST LUBRICANT

/ Protects metals exposed on the exterior
/ Suitable for dry electric circuits

P4 E.Z Lube 400ml **450155**

CHAIN MAINTENANCE

C1 CHAIN CLEAN

CHLORINE-FREE DEGREASING AGENT

/ Suitable for all road/off road chains
/ Suitable for O, X and Z ring chains

C1 Chain Clean 400ml **450130**

C2 CHAIN LUBE

CHAIN LUBE FOR ROAD USE

/ Coats chains even at high speeds
/ Reduces friction and increases durability

C2 Chain Lube 400ml **450131**

C3 CHAIN LUBE

CHAIN LUBE FOR OFF ROAD USE

/ Disperses deposits
/ Protects chains in wet / muddy conditions

C3 Chain Lube 100ml **450133**
C3 Chain Lube 400ml **450132**

C4 CHAIN LUBE

CHAIN LUBE FOR ROAD/RACE USE

/ Factory Line
/ For high performance motorcycles

C4 Chain Lube 100ml **450135**
C4 Chain Lube 400ml **450134**

C5 CHAIN PASTE

VERY STICKY CHAIN LUBRICANT

/ Protects chain against corrosion etc.
/ Comes with a brush tip applicator

C5 Chain Paste 150ml **450136**

CHAIN CLEANING BRUSH

MULTIPLE SIDED CHAIN BRUSH

/ Sturdy bristles to remove dirt and grime
/ Tail brush for hard to reach places

Chain Cleaning Brush **BRUSH1**

CHAIN CARE KITS

A motorcycle chain care kit typically includes a range of tools and products to help maintain and clean the chain, such as a cleaning brush, lubricant, and degreaser. A well-maintained chain can also lead to better overall performance, including smoother shifting and improved acceleration. By reducing friction and noise, a clean and lubricated chain can also make for a more enjoyable riding experience. Ultimately, investing in a motorcycle chain care kit can help riders to get the most out of their motorcycle, while also ensuring their safety and satisfaction.

CLEANING PRODUCTS

E1 WASH & WAX

DRY CLEANER & PROTECTIVE WAX

/ Protects plastic parts/paints w/o water
/ Dry cleaner

E1 MC Wash and Wax 400ml **450137**

E2 MOTO WASH

BIODEGRADABLE CLEANING SPRAY

/ Removes dirt and protects surfaces
/ Usable on all surfaces

E2 Moto Wash 1L **450138**

E3 WHEEL CLEAN

NON-AGGRESSIVE CLEANER

/ Suitable for all wheel types
/ Does not attack paint and varnishes

E3 Wheel Clean 400ml **450139**

E5 SHINE & GO

SILICONE BASED PROTECTION SPRAY

/ Leaves a top sheen after a polish
/ Leaves a protective film

E5 Shine & Go 400ml **450141**

E7 INSECT REMOVER

REMOVES INSECTS AND RESIDUE

/ Suitable for all plastics and mirrors
/ Will not damage the motorcycle

E7 Insect Remover 400ml **450143**

M1 HELMET/VISOR CLEAN

HELMET AND VISOR EXTERIOR CLEANER

/ Leaves a streak free finish
/ Can be used on windscreens too!

M1 Helmet & Visor Clean 250ml **450149**

M2 INTERIOR CLEAN

SANITISER FOR HELMET INTERIOR

/ Non-irritating, dermatological tested
/ Deeply cleans and neutralises odours

M2 Helmet Interior Clean 250ml **450149**

M4 HANDS CLEAN

CLEANER & DEGREASER CREAM

/ Practical and non-flammable
/ Dissolves grease, oil, and stubborn dirt

M4 Hands Clean 100g **450151**

TOP GEL WORKSHOP

WORKSHOP HAND GEL

/ Contains 100% natural origin abrasives
/ Leaves hands clean & soft

Top Gel Workshop 3L **450118**

CLEAN & PROTECT YOUR HELMET

HELMET CARE PACK

BUNDLE FOR THE BEST HELMET CARE

/ M1 Exterior Clean & M2 Interior Clean
/ Microfibre cloth for polishing

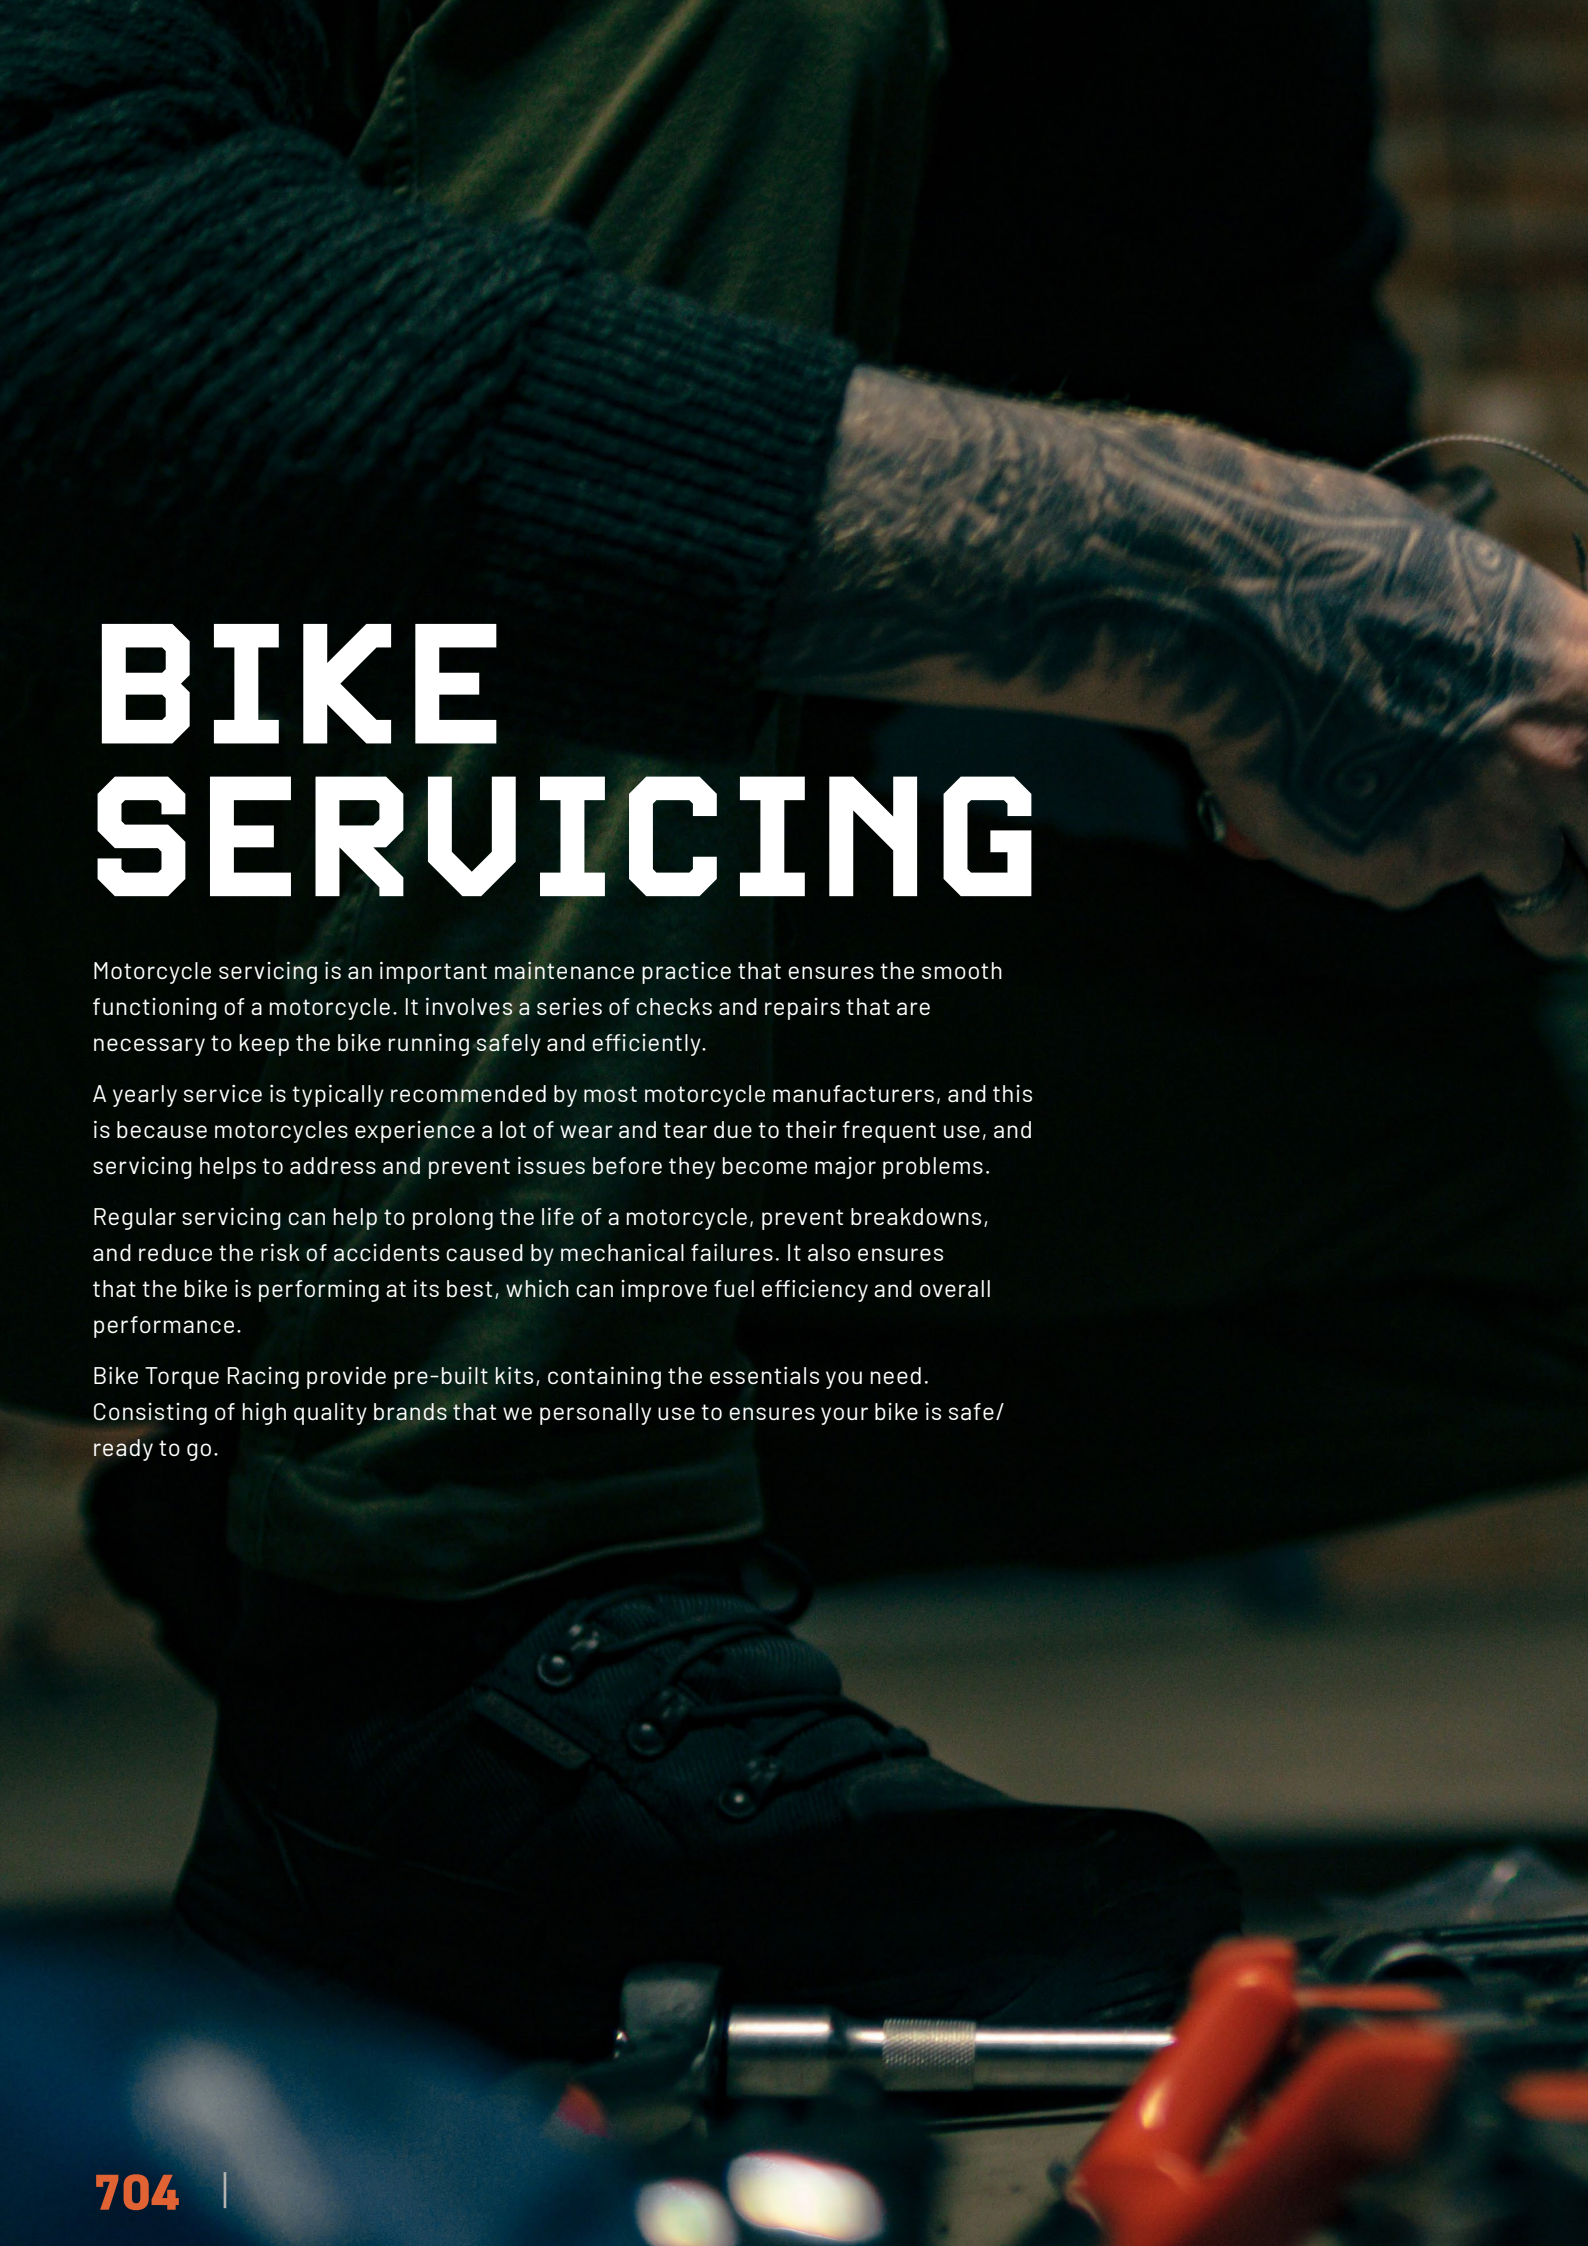

Helmet Care Pack **450372**

10 SERVICE KITS

ENGINE OIL / AIR FILTER / OIL FILTER / SPARK PLUGS

BIKE SERVICING

Motorcycle servicing is an important maintenance practice that ensures the smooth functioning of a motorcycle. It involves a series of checks and repairs that are necessary to keep the bike running safely and efficiently.

A yearly service is typically recommended by most motorcycle manufacturers, and this is because motorcycles experience a lot of wear and tear due to their frequent use, and servicing helps to address and prevent issues before they become major problems.

Regular servicing can help to prolong the life of a motorcycle, prevent breakdowns, and reduce the risk of accidents caused by mechanical failures. It also ensures that the bike is performing at its best, which can improve fuel efficiency and overall performance.

Bike Torque Racing provide pre-built kits, containing the essentials you need. Consisting of high quality brands that we personally use to ensures your bike is safe/ ready to go.

MOTUL ENGINE OILS

Motul engine oil offers superior protection, enhanced performance and long-lasting benefits. Their range is compatible with a wide range of motorcycles, and gives the peace of mind that comes with using a trusted brand. It's a smart choice for anyone looking to keep their motorcycle running smoothly and efficiently. A globally appreciated range of the highest quality oils.

MIW AIR FILTERS

MIW Air Filters are a top-of-the-line air filter solution designed specifically for motorcycles. These filters are engineered with high-quality materials to provide maximum filtration, airflow, and protection for your motorcycle's engine. They are designed to improve engine performance and efficiency, making them an essential component for riders who demand the best from their machines.

NGK SPARK PLUGS

NGK Spark Plugs has been developing spark plug technology since the 1930s and manufacture plugs for every type of automotive engine.

When engineers seek to maximise the efficiency and performance of today's increasingly sophisticated engines, they look to products from NGK to find the perfect match. That's why they are the No.1 choice original equipment spark plug supplier to motorcycle manufacturers around the world.

HIFLO OIL FILTERS

Hiflofiltro is the world's first and only TÜV approved motorcycle oil filter. Constructed using the best materials available, all Hiflofiltro oil filters meet or exceed original equipment performance levels. Available for street, scooter, motocross, enduro, ATV, UTV, marine outboard, and snowmobile models.

11 CLUTCHES

OEM REPLACEMENTS / HIGH PERFORMANCE / RACE

NEWFREN
BRAKE&CLUTCHTECHNOLOGY

Newfren are one of the foremost experts of motorcycle clutches in the world today. Their production goes back more than sixty years and their clutches cover every aspect of motorcycling from the earliest classic bikes to modern race machines.

They produce original equipment clutches for many motorcycle manufacturers and are the Technical Partners and clutch suppliers for Ducati Moto GP and World Superbike teams as well as being the Technical Partners for Moto2, Moto3 and MXGP Championships.

Newfren produce some of the best clutches in the world and their experience is second to none. By producing such high-level products, they have a market leading reputation and are terrific value for money.

OE-STANDARD LINE

They are designed to replace the OE clutch, maintaining the same performance and durability. The OE-Standard clutch plate sets are made using top quality materials. They are exceedingly reliable products. The friction material of the plates is organic. The compound of the organic material is chosen in relation to the type and utilization of the motorcycle, thus optimizing performance, albeit within the manufacturer's guidelines.

PRO-RACE LINE

The Pro Race clutches are the top of the range. They are the result of research in new technologies combined with new materials developed in collaboration with important teams in Superbike, Moto3 and MXGP. The friction material is mainly composed of cellulose, resins, carbon and other elements that guarantee an extremely high coefficient of friction and are less compressible. The particular design of "separate notches" improves the flow of oil, allowing the plates to operate more efficiently. The combination of this design with the new friction material increases the fatigue resistance and guarantees maximum performance stability, even in extreme use, thus making the Pro Race clutch a very high quality racing product.

CLUTCH SPRINGS

Sets of up-graded clutch springs are available for most of the clutches in the catalogue.

DRY CLUTCH LINE

The range of single-disc dry clutches provides applications for BMW from the 1970s onward, as well as Moto Guzzi and three-wheeled Piaggio, with a high-performance replacement. The original K type, available for all applications, is a high-quality replacement. The more recent KW type incorporates a new friction material composed of a synthetic aramid fiber, of which the main characteristic is its exceptional mechanical resistance to tension and heat. In the event of overheating the material will not suffer glazing and will return to its original characteristics as soon as it cools down. Another important feature of the new type is that its friction material is efficient even if it comes into contact with "oil". These are "High Quality Spare Parts", "Made in Italy".

PERFORMANCE LINE

The Performance clutches are also suitable for sports use. The range is designed for non-competitive high-performance use, but also for non-extreme sports use, and therefore designed to withstand high stresses, guaranteeing good performance. The friction material, used for the drive plates of wet clutches, is Paper Carbon.

The driven plates are made of special steel to guarantee maximum resistance and minimum deformability.

WRP
WORKS RACING PARTS

Since its introduction in 1999, WRP has offered a technical range of top-level products for motorcycles.

The WRP brand relies on two factors: a strong sponsorship program that endorses the name in the racing industry and intense testing on the tracks that optimizes the performance of those products used by top riders and top teams competing in the highest expression of motorcycle racing in the world. They are in FIM World Championships of MotoGP, Superbike, Supersport, Motocross, Enduro, Freestyle MX, Supermoto and Rally, as well in American AMA Supercross and Motocross.

WRP offer top quality bearing kits for most modern and older motorcycle models. They are produced from the highest quality materials in modern computer controlled factories and often outlast OEM originals.

WRP BEARINGS

WHEEL BEARING KITS

High-speed bearings are manufactured to ABEC 3 precision levels. They use triple lip rubber seals with stainless garter springs to keep the grease in and the water and dirt out. The Chevron SRI 2 grease contains rust and oxidation inhibitors (-29° -177°).

/ The wheel bearing kits come as a package including all the parts you need

/ Double or triple rubber lip seals where applicable

/ OEM replacement, meet or exceed OEM specs

STEERING BEARING KITS

Steering bearing kits are produced to upgrade old style ball bearings to heavy duty taper bearings and to replace and upgrade OEM taper bearings. Kits contain top and bottom bearing assemblies, and seals where necessary.

/ The steering repair kits come as a package including all the parts you need

/ Heavy-duty tapered roller bearings

/ OEM replacement, meet or exceed OEM specs

13 PROTECTION

ENGINE COVERS

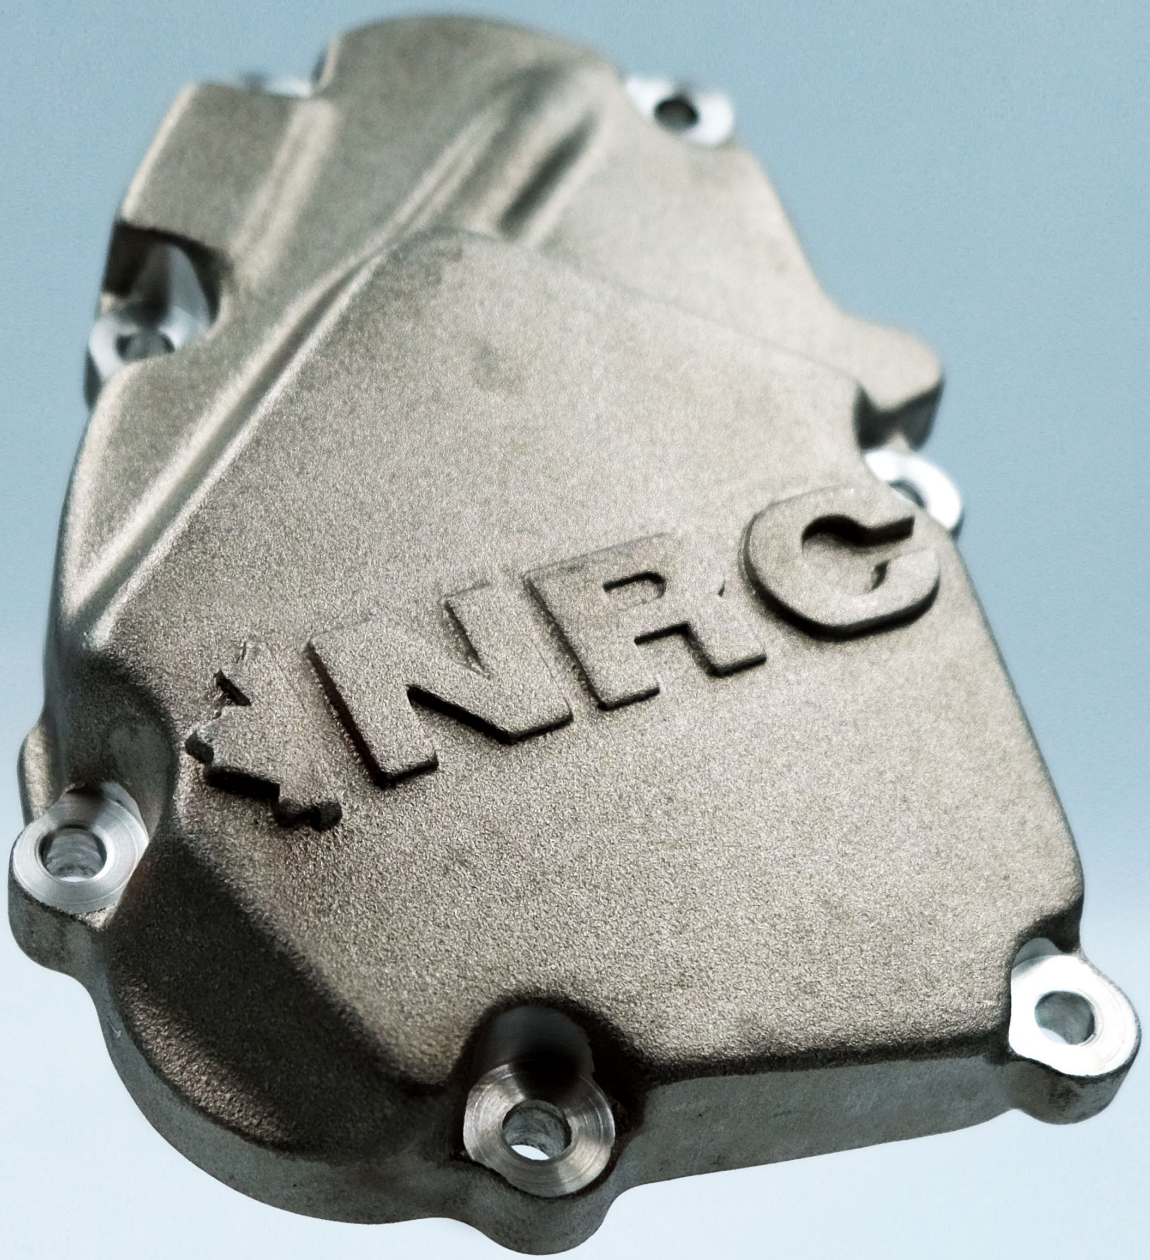

byhap
YAMAHA

Niagara Race Crafters or NRC is the worlds largest producer of heavy duty superbike engine covers, with more than thirty four years experience in engine cover design and production. They have committed hundreds of thousands of dollars in design, investment moulds, tooling and state of the art CNC equipment to produce the finest heavy duty engine covers possible!

They are produced to ISO 9002 quality control standards and are finished in a natural silver grey alloy with the NRC logo cast into the cover.

They are very different from the plastic bolt on covers which are available but offer very little additional protection to the OE cover. NRC believe in making a high quality durable product and we know of some riders who have crashed multiple times on NRC covers. We therefore remain confident of their overall economical and design benefits.

LVEC

ENGINE COVERS

Standard engine covers are nice and light weight but break very easily when you fall off. Expensive engine damage is often the result from damaged crankshafts and gravel in the oil.

Manufactured under stringent ISO quality assurance standards, cast alloy grain follows each cover's particular shape, aiding to its strength through profile design and are thicker than stock covers. "Billet" covers have a linear grain only which results in finished product reduced strength and less resistance to cracking.

Cast covers are less expensive to mass produce and yield minimal scrap after machining. Billet covers require an enormous amount of time to machine and the majority of the material goes to scrap. When you consider it takes an 8" x 8" x 3" piece of billet stock, weighing approximately 19 lbs., to produce a typical generator cover weighing about 2 lbs., 17 lbs. of billet material and the much longer time it took to CNC machine, goes to scrap. This wasted material cost and extra CNC time result in a more expensive billet cover.

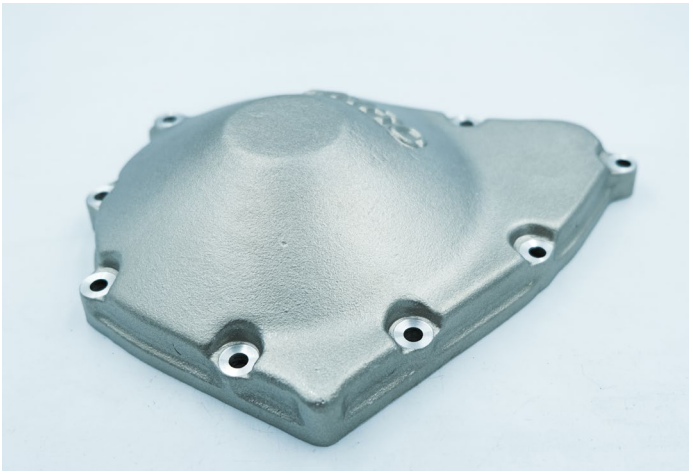

Fit some heavy-duty NRC aluminium engine covers before you fall off and save yourself a fortune. For track day and race use they are essential equipment!

BOLTS / NUTS / SPACERS

Dog's Bolts is a brand of bolts owned and trademarked by Bike Torque Racing Ltd. It was born out of painful experience trying to source good quality bolts for use in racing and customising.

It seems that many other companies offer either cheap prices and poor quality or good quality with high prices but awful availability. 6 weeks to get good bolts. Really?

We wanted to offer great quality, great prices and great availability!

We also wanted to offer a British product and currently, all Dog's Bolts are manufactured in the UK using precision high tech CNC machining equipment to produce a top class product that is a massive improvement over Original Equipment bolts. They are superb quality, lightweight and offer extended durability and high torque levels.

Stainless steel is both a cosmetic & technical improvement over the coated mild steel originals where they are strong, classy, durable and resistant to corrosion.

We think that you will agree that they are an excellent alternative to the originals and offer superb value for money!

PRECISION & PERFORMANCE

Stainless steel bolts offer several benefits for motorcycles, including corrosion resistance, strength, longevity, aesthetics, and chemical resistance. Corrosion can weaken bolts, which can lead to failure and potentially dangerous situations, but stainless steel bolts are highly resistant to corrosion. Additionally, stainless steel bolts are often stronger than other types of bolts and can help prevent bolts from shearing or breaking under stress. Their durability and long-lasting properties can also help prevent the need for frequent replacement, which can save time and money in the long run. Moreover, stainless steel bolts have a sleek and polished appearance, which can add to the overall aesthetic of a motorcycle. They are also resistant to many chemicals and solvents, which can be particularly useful for motorcycles that may be exposed to fuel, oil, or other chemicals.

TERMS & CONDITIONS

ORDERS

Orders can be telephoned, placed online, Emailed or collected from our premises at Unit 15, Handlemaker Road, Marston Trading Estate, Frome. Somerset. BA11 4RW.

VAT

All prices are subject to VAT where appropriate and carriage charges where relevant.

PAYMENT

We are able to accept payment by most Credit or Debit cards, PayPal, or Bank Transfer. Account facilities are available for trade customers, subject to satisfactory references and certain conditions.

RETURNS

Where mistakes have occurred we will accept most mail order parts for return, provided they are returned within 14 days of despatch. Special orders cannot be returned, refunded, exchanged, credited or cancelled under any circumstances. All other parts may be returned according to the following guidelines. Parts ordered incorrectly will incur a 20% restocking charge and carriage charges cannot be refunded. If the error is ours, returned parts will be refunded in full but please be aware it is entirely your responsibility to ask for the correct parts for the correct model. Parts that agree with the invoice are deemed to have been correctly supplied. All parts returned must arrive back with us not later than 2 weeks after the date of despatch and it is the senders responsibility to ensure that they are well enough packed to survive the rigours of transport.

RACING & TRACK RIDING

Warranty on any and all products sold by Bike Torque Racing Ltd is invalidated by their use in racing or track riding. All parts sold for use in racing are not warranted in any way.

RESPONSIBILITY FOR FITMENT

Some parts and products are supplied with technical specifications and fitting instructions and some not. It is most important that all persons or companies carrying out fitting work should read all such information and be competent and knowledgeable in the task they are undertaking. The fitting of some parts may necessitate the modification of other parts and/or the replacement or removal of other parts. It is the responsibility of the purchaser to ensure the correct parts are fitted and that any necessary modifications are carried out competently. If you are in any doubt please consult a professional mechanic or engineer. It is expressly your own responsibility to ensure that all parts are fitted correctly and that all safety measures have been taken. Always refer to the manufacturers workshop manual.

SAFETY

The use of any vehicle, including a motorcycle, whether on or off road involves some degree of risk of injury or death to yourself or others. You have a duty to ensure that your actions, or the result of your actions have no potentially adverse effect on safety. If all necessary steps are taken to follow safe working practices, it is possible to minimise the chance of an accident or damage which might otherwise occur as a direct result of parts or accessories having been fitted incorrectly, or the wrong or inappropriate part or accessory having been fitted. It is essential that you fulfil your own personal responsibilities to ensure the safe working and operation of your motorcycle.

RETENTION OF TITLE

Not withstanding delivery and the passing of risk in the goods, or any other provision of these Conditions, the legal and equitable property in the Goods shall not pass to the Buyer until the Seller has received cleared funds. Until such time as the property in the Goods passes to the Buyer:-

The Buyer shall hold the Goods as the Sellers fiduciary agent and bailee, and shall keep the Goods separate from those of the Buyer and third parties and properly stored, protected and insured and identified as the Sellers property., but the Buyer shall be entitled to resell or use the Goods in the ordinary course of its business provided that it shall account to the seller for the proceeds of sale up to the total amount outstanding in respect of any unpaid Goods; and (provided the Goods are still in existence and have not been resold), the Seller shall be entitled at any time to require the Buyer to deliver up the Goods to the Seller and, if the Buyer fails to do so forthwith, to enter upon any premises of the Buyer or any third party where the Goods are stored and repossess the Goods. The Buyer shall not be entitled to pledge or in any way charge by way of security for any indebtedness any of the Goods which remain the property of the Seller, but if the Buyer does so all moneys owing by the Buyer to the seller shall (without prejudice to any other right or remedy of the Seller) forthwith become due and payable. Nothing in these clauses shall preclude the Seller from taking action against the Buyer for the unpaid price of the Goods supplied.

FRAUD

Due entirely to the rise in credit card and mail order fraud. All orders must be sent to the credit card holder's address which is checked with the credit card company, except where the customer is already known to us. We apologise for any inconvenience this may cause. Any and all attempts at defrauding Bike Torque Racing Ltd will be prosecuted fully.
