

MATHS SUBJECT LEADER MEETINGS

Led by Gareth Metcalfe [ISeeMaths](#)

AUDIENCE

Maths Subject Leaders and/or Senior Leaders

These termly virtual meetings, led by Gareth Metcalfe provide an opportunity for colleagues to be provided with national and local updates, latest news and relevant research findings regarding maths provision. They enable practitioners to develop as teachers and leaders sharing good practice and networking with other Maths leaders.

RESPONSIVE MATHEMATICS TEACHING

In this session, we will explore key ideas about responsive teaching. We will consider what responsive teaching looks like in individual lessons, and also how schools can respond to the individual needs of children over time. Maths subject leaders will be able to reflect on the teaching practice within their schools and collaborate with other subject leaders in this area.

HIGH-QUALITY ORACY IN MATHS LESSONS

In this session, we will consider the routines that build high-quality oracy within maths lessons. This will include talk structures within lessons, question design and how incomplete or partial responses can be improved with effective feedback. Maths subject leaders can reflect on current practice within school and plan next steps.

REASONING ACROSS THE MATHS CURRICULUM

In this session, we will consider the ways that reasoning can be developed in specific areas of the maths curriculum. We will discern between structures for building reasoning with number from those in geometry or data handling. We will focus on 'big mathematical ideas' in each mathematical area. This will help schools to develop mathematical reasoning in all areas of the maths curriculum.

- To provide advice and support for leaders to deepen their own subject knowledge and ideas for facilitating professional development and improvement in their schools.
- To provide a forum to share good practice.
- To develop the effective leadership of Maths impacting upon the quality of provision and outcomes for children across the Local Authority.
