Message to Members

Dear Members,

We have exciting updates to share with you regarding TAPA APAC's progress, collaborations and engagements especially in India and Malaysia.

TAPA APAC proudly participated in the National Logistics Summit 2023 as a Lanyard Partner organized by the PHDCCI in New Delhi, India. This summit brought together industry leaders and experts in India and the government authorities to discuss best practices in logistics planning, ratings and standards, and risk management. A lot of very positive feedback from the delegates, who are keen to learn more, upskill their workforce and implement TAPA Standards within their organizations to build an efficient, resilient and robust supply chain.

In another event, TAPA APAC participated in a hybrid webinar co-hosted by PKA and MIMA to address the security challenges faced by nations engaged in maritime trade. TAPA APAC highlighted rising sea crime, particularly illicit trafficking, lack of awareness and the need for robust security measures. The participants had a very insightful and valuable interaction with the panelists.

These engagements with members, industries and government bodies help more Manufacturers, Logistics, and Supply Chain organizations address their challenges and underscore the importance of adhering to global standards, have a credible Standards Certification like TAPA, supporting them towards a more secured supply chain.

Additionally, as part of continuous improvement and progress, TAPA officially launched the New 2023 FSR and TSR Standards, with the primary objective of further strengthening supply chain resilience and sustainability. Trainings of these new standards will be rolled out on a new Training LMS platform, in addition to the face-to-face workshops, that will provide the member organizations greater convenience in learning as well as adapting to the new standards. We strongly urge all our members to upskill their workforce through these new standards, incorporate these standards into their operations and provide higher level of protection for their valuable assets.

Please check TAPA APAC training schedule in our website for more information.

<https://tapa-apac.org/schedule/>

With best regards,

Madu Lokan

Executive Director
TAPA APAC

Navigating the Modern Logistics Landscape in India: TAPA APAC at the Prestigious National Logistics Summit 2023

Transported Asset Protection Association Asia Pacific (TAPA APAC), as a Lanyard Partner, proudly participated in the National Logistics Summit 2023 held at PHD House in New Delhi, India, on 11th August 2023. The summit, with the theme of "Navigating the Challenges & Opportunities of the Modern Logistics Landscape," brought together leading industry players and government authorities to discuss the best practices for planning and executing logistics in the changing business landscape.

India's logistics industry is undergoing a massive transformation in growth, driven by the country's expanding economy, increasing consumer demand, and globalization. However, the industry also faces challenges such as inadequate infrastructure to match with its growth, inefficient supply chains, complex regulatory requirements, and a shortage of skilled labour.

With a focus on providing solutions to address these challenging factors, the participation, knowledge sharing, insights, support and way forward plans from the government authorities and the speakers proved the summit was very well curated with high quality contents and action plans.

Mr. Madu Lokan, Executive Director of TAPA APAC, participated as a panellist on the topic "Logistics Ratings and Certifications: Building Trust and Ensuring Quality." The panel consisted of a Buyer, Reseller, Logistics Service Provider, Supply Chain consultant and TAPA. Madu showcased the role of TAPA and how TAPA is a business enabler addressing the challenges faced by supply chains worldwide, especially in India, uncovering the vulnerabilities encountered and emphasizing the need for robust solutions.

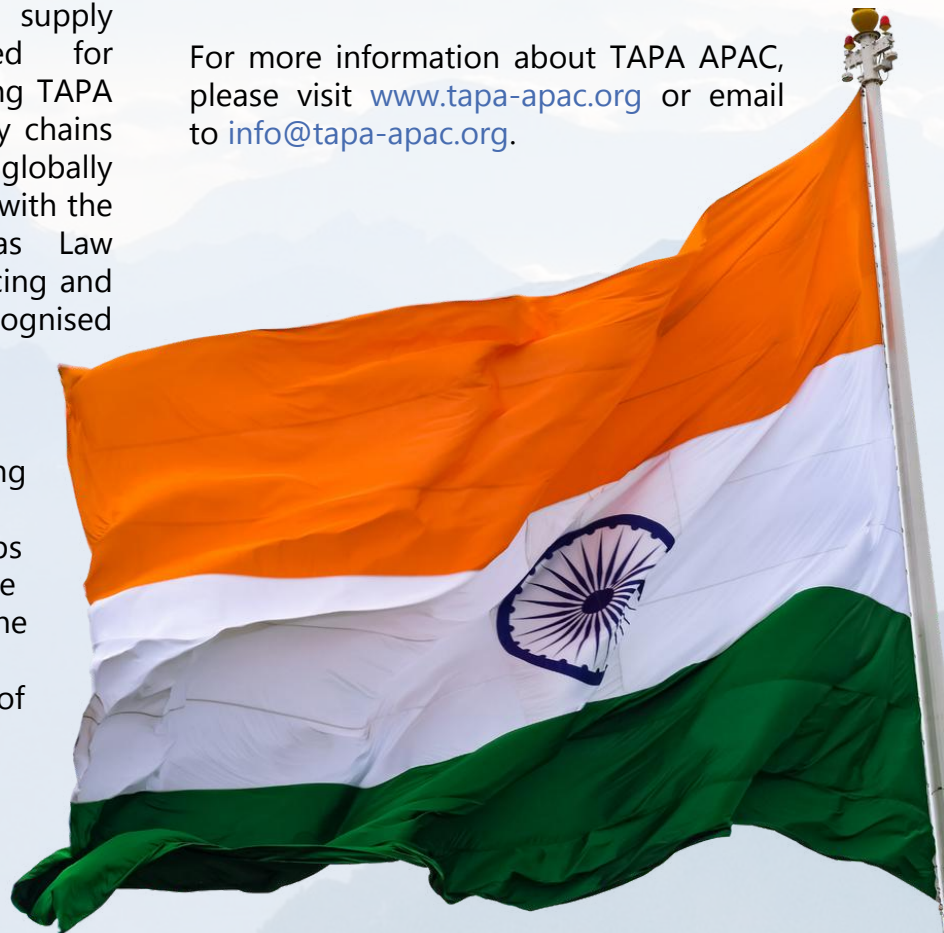

Madu emphasized the importance of ratings and certifications in the supply chain, highlighted the need for collaboration, training, and utilising TAPA programmes to ensure the supply chains are secured and resilient. TAPA globally has various working relationships with the Regulatory Bodies as well as Law Enforcement Agencies. By embracing and implementing TAPA's globally recognised and respected Standards, manufacturers and logistics service providers are upskilling their workforce capabilities, levelling up their supply chains which helps reduce disruptions, losses and helps the industry to confidently navigate the complex logistics landscape. The roll out and implementation of TAPA Standards has proven to be of huge business value even to the ancillary supply chain industry like equipment suppliers, consultants as well as insurance companies.

TAPA APAC Board Directors, Mr. Ratnakar Bade and Mr. Chandran Mavila, also participated and were of great support to TAPA APAC team in the booth and networking with the delegates and dignitaries.

The National Logistics Summit 2023 overall provided valuable insights into various aspects of the logistics industry. TAPA APAC's active participation in the Summit is a commitment to address the myriad challenges, contribute to progress and efficiency, utilise opportunities effectively and help navigate securely the modern logistics landscape in India.

For more information about TAPA APAC, please visit www.tapa-apac.org or email to info@tapa-apac.org.

Empowering Resilience: Combat Against Maritime Drug & Illicit Trafficking, TAPA APAC's insights at the Maritime Security Webinar Co-hosted by PKA and MIMA

From left to right: Dr. Su Wai Mon (Senior Lecturer at Faculty of Law University of Malaya); Mr. Madu Lokan (Executive Director of TAPA APAC); Dato' Mohammed Suffian Bin Awang (Chairman of MIMA); Capt. K. Subramaniam (General Manager of Port Klang Authority); Mr. Aaron Chan (System Engineering Manager at Palo Alto Networks); First Admiral (M) Ahmad Faridi Ferdaus (Director of MCID, MMEA); Huda Mahmoud (Assistant Director of Research Maritime Institute of Malaysia)

On the celebration of 60 years of operations by the Port Klang Authority (PKA) of Malaysia, Transported Asset Protection Association Asia Pacific (TAPA APAC) participated in the hybrid webinar event titled "Maritime Security: Challenges of a Trading Nation", co-hosted by PKA and the Maritime Institute of Malaysia (MIMA). The event was held on the 1st of August at PKA Headquarters to enhance understanding of the security challenges faced by nations engaged in maritime trade. Mr. Madu Lokan, Executive Director of TAPA APAC, participated in the event together with other dignitaries including First Admiral Maritime who is also the Director Maritime Criminal Investigation Division of Malaysia.

The rise in crime on the seas, particularly drug and illicit trafficking, poses a significant threat with implications that extend beyond borders. Malaysia, in particular, offers lucrative opportunities for syndicates to capitalize on due to its status as a key manufacturing and distribution hub and a prominent transit point. However, these opportunities come with inherent risks and exposure.

With extensive industry experience, Madu provided valuable insights into the challenges encountered in maritime borders and emphasized the crucial role of robust security measures in combatting crime. His expertise highlighted the importance of TAPA Standards, specifically designed for manufacturers and brand owners to enhance security practices and mitigate risks, vulnerabilities, threats, and supply chain loss.

Insider threats contribute significantly to the illicit and counterfeit trade. The increasing prevalence of eCommerce and digital trade in ASEAN has further fuelled the trade in counterfeit goods. Additionally, the need for more visibility in tracking incidents within the complex global network makes it challenging to respond swiftly to disruptions. The existing security framework needs to be revised to detect and deter security threats across various existing and new channels. Furthermore, the lack of technological capabilities and centralized supply chain data hinders source verification.

At the webinar, Madu presented "Crime on Seas: Safeguarding Maritime Borders from Drug & Illicit Trafficking" which highlighted the urgent need for collaboration among law enforcement agencies, port and airport authorities, global standards associations, suppliers, industry stakeholders, and intelligence data providers to detect and deter potential vulnerabilities. The World Customs Organization (WCO) and the mechanisms, like SAFE Framework, play a crucial role in ensuring the proactive adoption of global standards and processes.

Madu emphasized the importance of TAPA Standards, as a key mechanism, which enhance supply chain resilience. Manufacturers and logistics service providers can benefit from implementing TAPA's library of standards like the Risk Assessment Standard (RAS), Facility Security Requirements (FSR), Trucking Security Requirements (TSR), and Guarding Security Requirements (GSR), especially for high-risk or vulnerable products. Origin airports and seaports can conduct route risk assessments and AVSEC threat assessments while implementing TAPA FSR, TSR, and GSR Standards. Similarly, destination airports and seaports can enhance security monitoring through these standards. Adopting and implementing such standards for supply chain security, resilience and sustainability combined with the implementation of legal and enforcement measures are vital to choke the supply chain of illicit and counterfeit products.

From left to right: Mr. Sangar Kandasamy (Treasurer of TAPA APAC); Mr. Madu Lokan (Executive Director of TAPA APAC); Dato' Mohammed Suffian Bin Awang (Chairman of MIMA) and Capt. K. Subramaniam (General Manager of Port Klang Authority)

TAPA APAC Board Director and Treasurer, Mr. Sangar Kandasamy, also participated in the webinar, networking with the delegates and providing nuggets on the value of TAPA engagement.

The webinar served as a significant platform to discuss and address the security challenges that arise from maritime trade which is a growing problem with global implications. The event provided valuable insights and best practices and explored potential solutions to combat maritime crime. Collaboration, adherence to global standards, legal and enforcement measures, advanced technology solutions, and continuous awareness and knowledge exchange are key factors in establishing a secure, resilient, and sustainable supply chain.

TAPA APAC is dedicated to providing support to various industry stakeholders, including manufacturers, logistics service providers, law enforcement agencies, ports, and customs. TAPA Standards offer a structured framework to tighten processes against potential risks, vulnerabilities, threats, and supply chain disruptions. By collaborating with stakeholders, TAPA APAC aims to enhance security measures and ensure the integrity of the supply chain.

New 2023 TAPA Standards Officially Launch

Training, Audit & Certification for 2023 Standards

TAPA 2023 Facility Security Requirements (FSR) and Trucking Security Requirements (TSR) Standards has officially launch on September 15th, 2023 across the world – Asia Pacific, Europe & Middle East, and Americas.

TAPA Standards reflect the latest knowledge, industry best practices and play a pivotal role in enhancing the resilience of your supply chain operations. We look forward to more engagement in the coming months and years, and we are certain of your active participation and commitment to embrace and adopt the 2023 TAPA Standards in your business.

1. 2023 FSR and TSR Standards Documents

While the first audit date for 2023 Standards will be Jan-01-2024, starting 1st October 2023, TAPA APAC members may request access to the 2023 FSR and TSR Standards Documents, including the new Audit Forms via email to us at info@tapa-apac.org. Standards documents will help members to familiarize yourselves with the Standards and make the necessary preparations for their implementation after training. When you send the email, please quote your TAPA APAC Membership number and registered Admin email for verification purposes. The Membership number is available in the Membership certificate which has already been sent to your Admin contact.

2. Training Now Available for 2023 FSR and TSR Standards

We are pleased to inform you that the training schedule for the 2023 New Standards is available now. You can access the training schedule and register on the [TAPA APAC website](https://www.tapa-apac.org). These training sessions will equip you with the knowledge and skills required to effectively implement and uphold the new 2023 TAPA Standards within your organization. When you register, please input the mandatory TAPA APAC Membership number which is available in the Membership certificate sent to your Admin contact.

We encourage all members to take advantage of these training opportunities to ensure a smooth transition to the 2023 New Standards that come into effect from Jan-01-2024.

Register for 2023 FSR & TSR Training

If you have any questions or require further information about the launch of the 2023 New Standards or the training schedule, please do not hesitate to reach out to us at info@tapa-apac.org. We are here to support you in your every step towards excellence and resilience of your supply chain.

Elevate Resilience with Certified TAPA Trucking Security Requirements (TSR) Logistic Service Providers

Supply chain disruptions and operational failures are posing critical threats to the integrity of your business today. The interconnected nature of global trade amplifies the potential for setbacks within the road transportation sector, where the risk of cargo losses at possible at every turn.

The TAPA Trucking Security Requirements (TSR) Standard offers more than a transformative framework, but also a holistic approach to fortify your road transportation and your operations gain the resilience needed to counter operational failures and prevent supply chain disruptions. TAPA TSR ensures that your road transportation and supply chain remains a stronghold against the drain of financial resources caused by cargo losses.

When you use only TSR-certified logistic service providers to be an integral part of your ecosystem, not only do you align your security standard but you also reinforce a culture of security excellence that resonates throughout your supply chain network.

This signifies your unwavering commitment to ensuring the highest levels of security within your supply chain operations and solidifying your position as a market leader.

Why use TSR-Certified Partners

1

Mitigate Risks:

The TAPA TSR Standard is not a static document; it's a dynamic response to emerging threats. By adhering to its principles, you gain a proactive advantage in staying ahead of potential risks and vulnerabilities.

2

Elevated Reputation:

By prioritizing TAPA TSR and collaborating with TSR-certified partners, you position your organization as a beacon of trust and reliability in the eyes of your customers, regulators, and stakeholders.

3

Continuous Improvement:

Using the upcoming version of TAPA TSR that was released in Sep 2023 equips you with the tools needed to continuously enhance your supply chain's security posture.

4

Global Consistency:

In a world of diverse regulations and standards, TAPA TSR provides a harmonized framework that transcends borders and ensures uniform resilient practices across your operations.

The time to fortify your supply chain against the rising tide of disruptions is now. By exclusively engaging with TSR-certified logistic service providers, you empower your organization with a robust security ecosystem that not only safeguards your assets but ensures that business continuity is not compromised.

Our commitment at TAPA APAC is to provide you with unparalleled support, guidance, and resources as you embark on this transformative journey towards supply chain security excellence. If you have any questions regarding TAPA TSR, please feel free to reach out to us today via info@tapa-apac.org.

Together, let's ensure that your supply chain remains impervious to threats, resilient in the face of challenges, and optimized for a future of prosperity.

Personalized Upskilling on Demand! Only 45% of APAC Companies are Upskilling Employees Lack of Skilled Workforce

Upskill Training Needed for Supply Chain Professionals

The supply chain ecosystem today is facing a challenging situation where there is a shortage of skilled workforce. A Randstad report estimated that 85 million jobs globally will be left unfilled by 2030 due to shortage of skills. To make matters worse, employees are often required to cover multiple roles. In such a scenario, it is crucial for companies to invest in training their workforce to acquire new skills.

However, a PWC Survey has reported that only 45% of companies in Asia Pacific are doing so, which is a cause for concern. It is imperative for companies to recognize the importance of upskilling their workforce to keep up with the evolving demands of the industry and ensure sustainability in the long run. Leaders need to re-evaluate their current workforce development structure and ensure that their employees receive support from the organization in developing their professional skills, especially in supply chain.

Mr. Tony Lugg, TAPA APAC Chairman said, "The supply chain personnel will need to possess a comprehensive range of abilities so that they can cover multiple roles. By investing in upskilling and reskilling, organizations can ensure that their people are engaged and future-proofed in the face of ever-evolving business. TAPA is committed to providing the supply chain industry with knowledge and resources needed to achieve global standards and TAPA certification. Through our training initiatives, we equip companies with the processes and methods necessary for resilient, secured and sustainable supply chain operations."

Benefits of Upskilling:

- **Return on Investment as Workforce Capabilities Increase:** The investment in upskilling will be worthwhile for the loyalty and brand recognition it generates, even if trained employees eventually leave. Moreover, upskilling efforts in Asia Pacific should be adapted to particular roles.
- **Retaining Talented Professionals for Long - term Stability:** Offer competitive compensation and benefits packages, opportunities for career growth and development, and fostering a culture of open communication and collaboration.

For leaders to effectively address skills shortages, not only should they think about the needs of their employees and the company in the long-term, but also take into account the changing supply chain landscape, business direction and workforce environment. Below are the key aspects of upskilling and learning to consider:

1 Continuous Learning

Companies should invest in ongoing training in order to make their workforce more competent and demonstrate their commitment to their staff. TAPA, for instance, provides training such as its Facility Security Requirements (FSR) Standard, where members gain certification and understand the processes and methods for attaining and maintaining TAPA certification for their facilities and transit operations.

2 Making Training Personal

Personalized training and certification programmes provide employees with a unique competitive edge, enabling them to stand out from their peers. When employees receive their own certification and skill set, they become more confident and motivated to perform their duties to the best of their abilities. Training should include hybrid learning options to help staff adapt to different working environments. TAPA APAC certifies all trained Authorized Auditors (AAs) with blockchain powered credentials that allow individuals to share their achievement on social media and stay with them as they progress in their career.

3 Simplifying & Digitizing Processes

Create a modern, digital working environment that simplifies and streamlines routine tasks, while still empowering employees with the freedom to make key decisions based on their experience and expertise. Let technology take care of the mundane, freeing up valuable time for your team to focus on what really matters. Deploy a digital center of excellence to drive rapid value creation and focus investments on the most impactful opportunities across functions. Leverage the latest technologies and best practices to maximize ROI and gain insights into the customer experience.

Leading the industry at the forefront, TAPA APAC's training and membership programmes help supply chain professionals to achieve their goals and propel organizations to succeed. We constantly support the industry with online and offline TAPA Standards training to upskill their workforce continuously and to also help in their organization's supply chain resilience and sustainability.

TAPA APAC's New & Upcoming Training Initiatives:

- **New 2023 Standards:** To provide members with frameworks and guidelines for better resilience against current threat environments, new TAPA Standards include Facility Security Requirements (FSR), Trucking Security Requirements (TSR), Guarding Security Requirements (GSR), and Risk Assessment Standards (RAS).
- **Learning Management System (LMS):** As part of digitalization efforts, TAPA APAC will introduce the LMS to support members in their training experience with technology, target to launch in Q4 2023. Members can learn at their own pace on the platform through modules with access to previous modules for recap. They are also able to search for content easily within the platform.
- **New Advanced Standards & Training Courses:** To help members implement TAPA Standards in their daily work and organizations' supply chain procedures, TAPA APAC will introduce new advanced Standards such as Cyber Security Standards (CSS) enhanced version, Brand Protection Standards, Scrap Management Standards. TAPA APAC will also launch courses to help manufacturers incorporate TAPA Standards into their contractual agreements with their vendor partners. Additionally, a financial course on the ROI of the TAPA APAC programmes and its certifications is also in the pipeline.
- **Integrated Security Management Systems (IMS):** In order to support member companies to save on their audit and administrative processes, TAPA APAC will launch an IMS to integrate and align the various TAPA Standards with their existing security systems.
