Freeform Lighting

SCULPTURAL ARCHITECTURAL LIGHTING

MADE TO ORDER IN THE USA

MADE TO ORDER

Crafted by hand *for the space.*

At the center of every Freeform fixture is our signature illuminated braided cord. Across pendants, linear suspensions, and wall- and ceiling-mounted forms, it brings a soft, sculptural quality to light.

Every fixture is made to order and hand-assembled in the USA.

ATLAS ROD SUSPENSION / HOSPITALITY

Lighting that *moves* with the architecture.

Freeform's signature flexible illuminated braided cord can form a single curve or span an entire room, allowing each composition to respond to the scale and structure of the space.

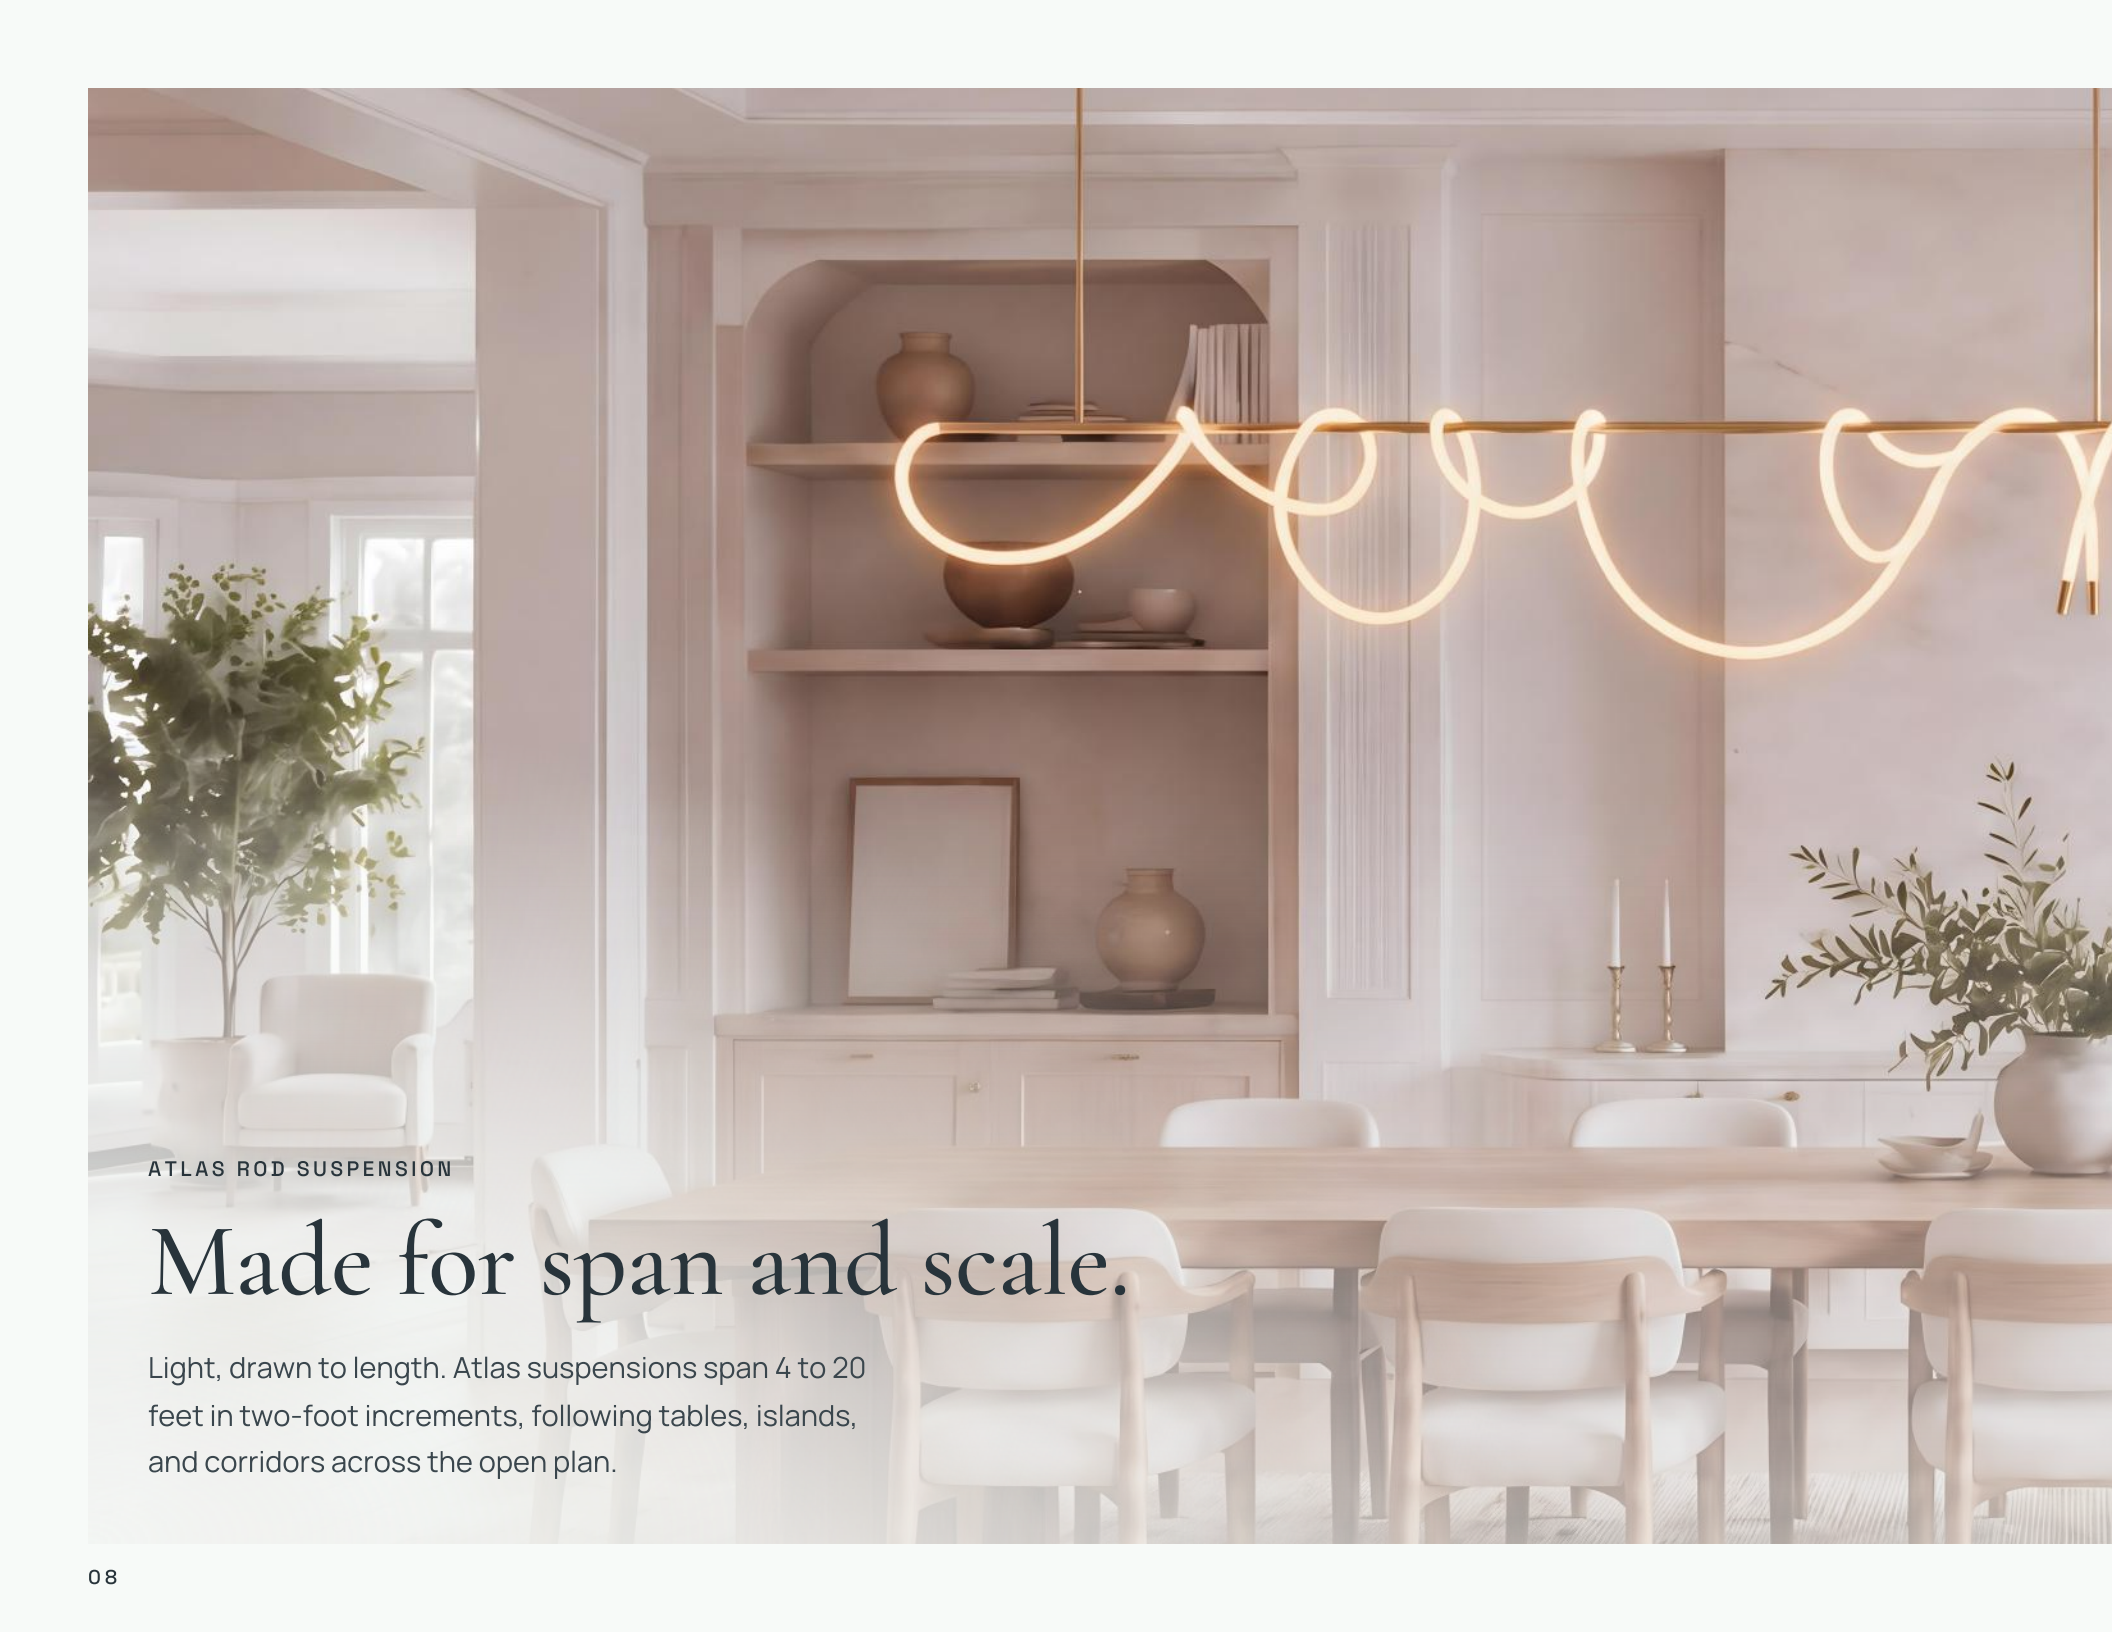

SELENE TRAVERSE / RESIDENTIAL

Every curve begins with a carefully placed connection.

Hand-finished canopies guide the cord and hold every curve in place. The composition remains flexible, restylable, and alive on the wall.

ATLAS ROD SUSPENSION

Made for span and scale.

Light, drawn to length. Atlas suspensions span 4 to 20 feet in two-foot increments, following tables, islands, and corridors across the open plan.

EDEN ROD SUSPENSION • POLISHED NICKEL

Soft movement,
held in balance.

The details are in *the design.*

A slender suspension meets the illuminated braided cord at a carefully engineered connection. Finish, texture, and light are considered together, making the transition an integral part of the form.

EDEN PENDANT / SATIN NICKEL

The curves shape the room.

The connections hold the curves.

The form is considered from every perspective.

ARIA RECESSED MOUNT / COMMERCIAL

CEILING COMPOSITION

A softer way to fill an open volume.

Layered fixtures create presence in tall or expansive interiors, with each curve placed to feel balanced within the room.

FREE END

A cord-suspended
fixture with a
hand-set free end.

MATERIAL + LIGHT

The material behind every Freeform fixture.

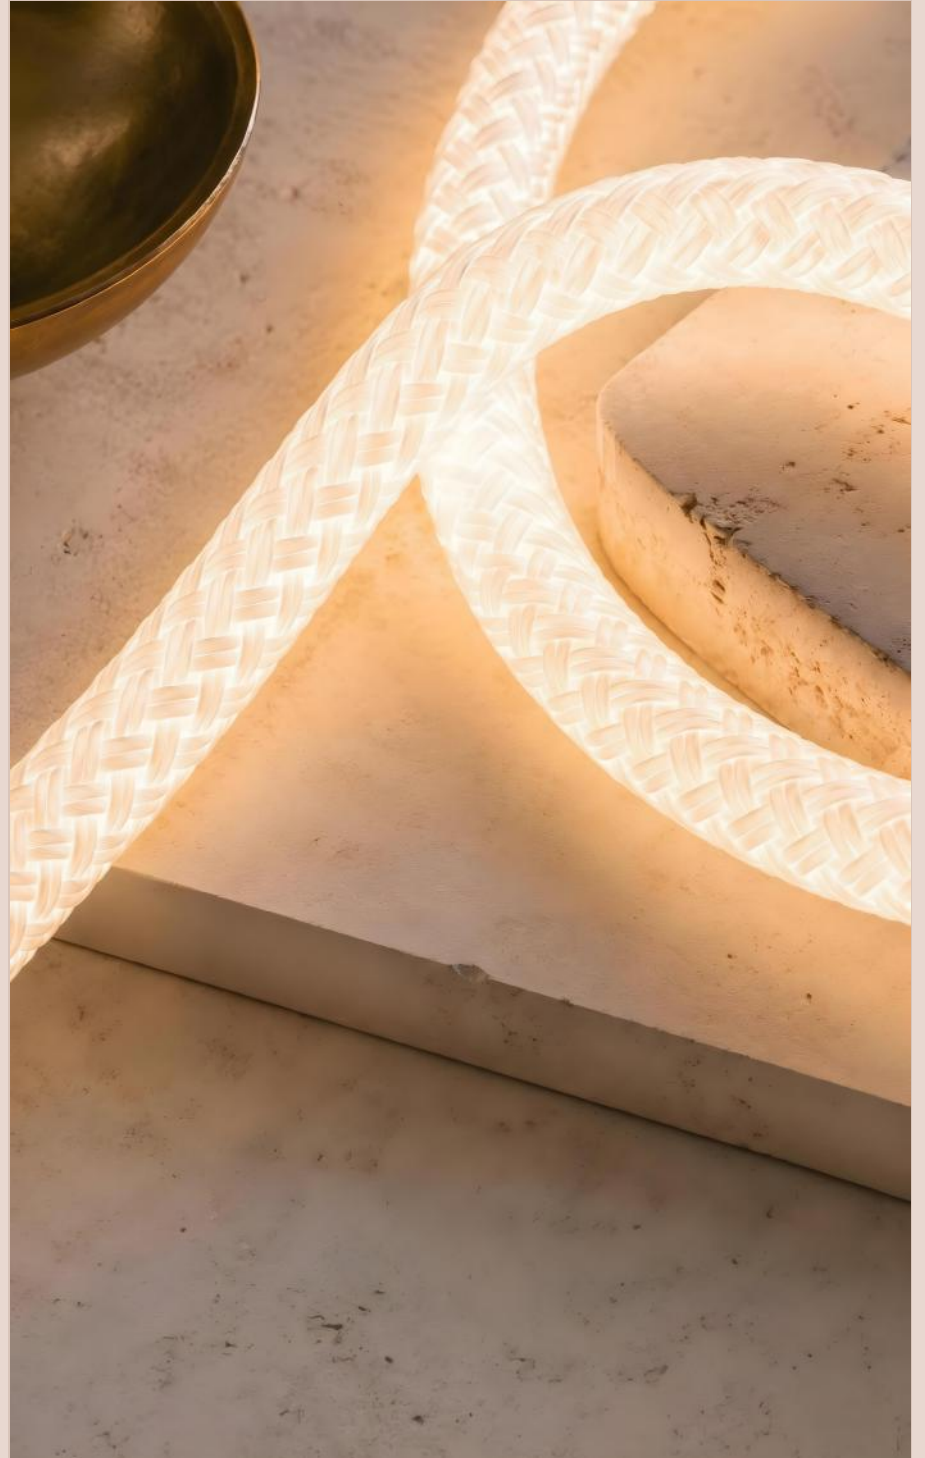

At the center of every fixture is a tactile one-inch illuminated braided cord with the flexibility to form natural curves and a soft, even glow from every angle.

360-DEGREE ILLUMINATION

SOFT, DIFFUSED LIGHT

SMALL-SCALE APPLICATION

Made for *smaller* spaces, too.

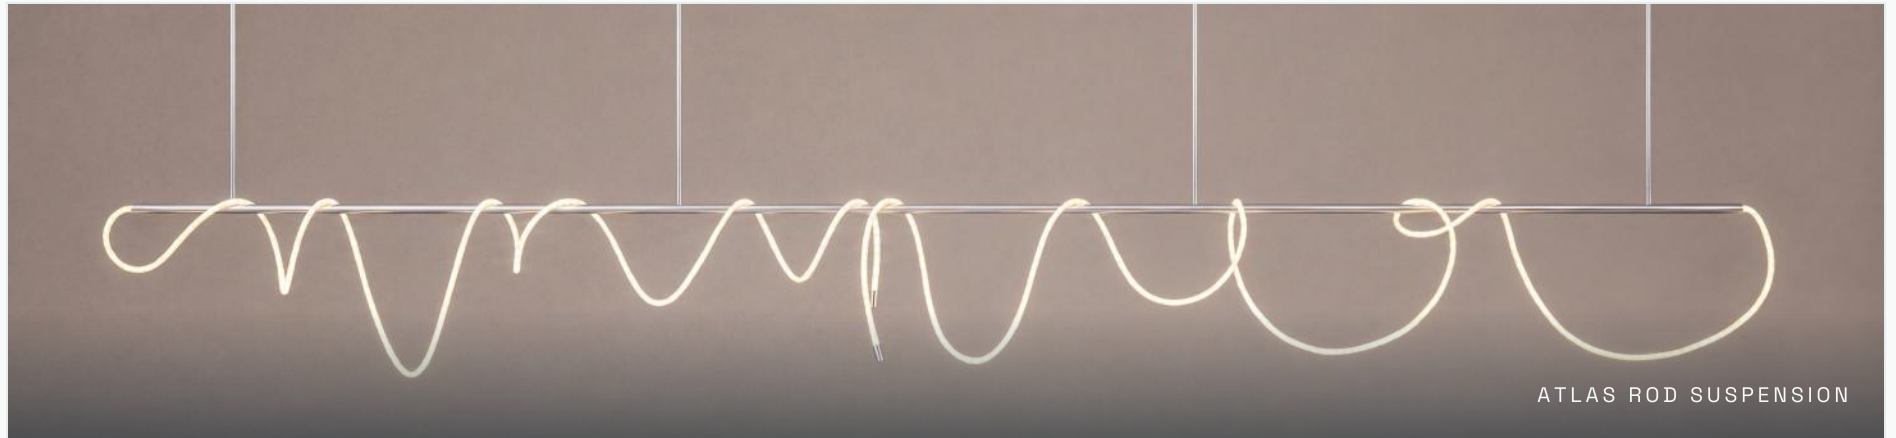

Illuminated curves bring warmth and sculptural form to more intimate rooms.

Different forms. The *same* illuminated cord.

Freeform's illuminated cord can be wall-mounted, cord-suspended, linear, recessed, or finished with a free end. Each configuration is made to order around the architecture of the project.

COLLECTION FIXTURES

Start with *a fixture.*

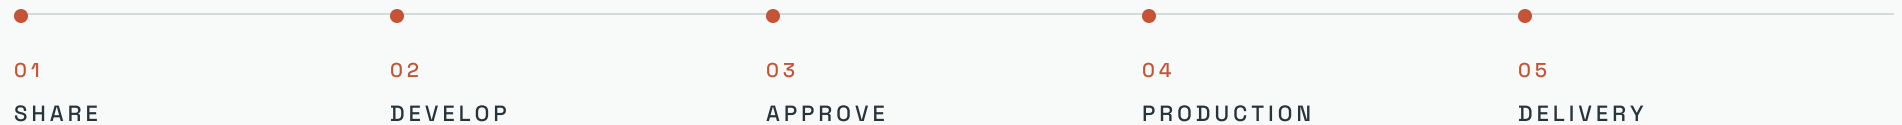

Choose an established fixture design, then tailor the details to suit your project. The form and engineering are fully developed; the illuminated cord is styled during installation to give each piece its own expression.

ARIA + SELENE TRAVERSE

Or start with the *space*.

Bring us the architecture, project requirements, and your vision. Using Aria or Selene Traverse, we'll develop a custom composition unique to your space.

LIGHT

The right light changes how a room feels.

Five color temperatures make it possible to choose a glow that feels natural alongside the room's materials and ambient light.

2400K

CANDLELIGHT WARMTH

4200K

COOL WHITE

ALL FIXTURES

Fully dimmable.

Every Freeform fixture can be adjusted to suit the time of day, the use of the room, and the atmosphere you want to create.

Colors shown are representative. Samples are available for review in the project environment.

FINISHES

Finish is part of the composition.

Every metal component is hand-finished in one of six refined finish options. Subtle variation is natural and part of the character of each piece.
