

KTJ Secondary

Key Stage 3

Key Stage 3 (Years 7 to 9) is a time for students to start discovering who they are as learners and what really excites them. In English, Mathematics and Science, there is plenty of stretch and challenge, encouraging students to think hard, ask questions, take risks and become more confident and independent in their learning. Just as importantly, the breadth of the curriculum gives them space to try something new, explore different subjects and uncover interests and talents they may not yet know they have.

Those discoveries do not have to stay in the classroom. A spark of interest can become a passion pursued through our CCAs, whether in sport, the arts, service, academic exploration or something entirely new. Key Stage 3 is about giving students the confidence to have a go, find what matters to them and keep going when things are difficult. Along the way, they develop curiosity, resilience and independence, while beginning to find their own strengths, their own passions and their place within the KTJ family.

Subjects

Learning Area	Subjects	Weekly Hours
