SWOT Analysis

An honest read on where Clay Craft is strongest — and where to watch

STRENGTHS

- 100% backward integration across the manufacturing process
- Automatic & semi-automatic production units across 2 factories, 3rd upcoming
- Socially & technically compliant — ISO 9001 and SEDEX 4-Pillar certified
- In-house design, mould/tooling & SAP-integrated operations

OPPORTUNITIES

- Available capacity to serve large volume buyers
- No anti-dumping or additional tariffs, unlike other global competitors
- FTA-driven access to markets including the UK, EU and UAE
- New porcelain facility expected to add capacity in 2027

WEAKNESSES

- Large-scale set-up limits ability to service low-volume orders

THREATS

- Unfair, dumped pricing from China-based manufacturers pressuring margins

Key Clients & Partnerships

Trusted by 500+ brands across hospitality, retail & e-commerce

HOSPITALITY & F&B PARTNERS

RETAIL, E-COMMERCE & CORPORATE PARTNERS

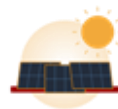

...and 500+ additional retail, export and hospitality partners across India and 22+ countries.

CSR & Sustainability

Building responsibly — for people, community and planet

Solar Energy

~22% of total energy sourced from on-site rooftop solar generation

Recycle / Circular Economy

~80% of recovered/recycled material reused back into production

Responsible Sourcing

Raw-material optimization and IKEA IWAY (Must/Basic) compliant sourcing

Water Stewardship

Wastewater managed via an Effluent Treatment Plant — near zero-discharge

Sustainable Packaging

Recycled and reduced packaging materials across product lines

Community Outreach

Regular tree plantation drives and employee blood donation camps

Why Clay Craft as a Partner?

1

Excellence in manufacturing across ceramic, plastic, and steel consumer products

2

A visionary, hands-on team of Directors

3

A rapidly growing and successful group of companies

4

Strong distribution network across India

5

Established exposure in the international consumer market

6

Technically and socially compliant manufacturing facilities

7

Deep understanding and experience of consumer behaviour

8

Backward integration across most ancillary processes

9

A professional team of product developers, designers, and R&D personnel

Thank You.

Let's build something lasting together.
