CATALOGUE (e)

CATALOGUE 2027

EDITO

It is with great pride that we reveal the 2026/2027 edition of the STARBAITS catalogue. Since the brand's inception in the early 90s our ambition has remained unchanged: to offer you the best equipment for carp fishing. This new catalogue continues that tradition representing innovation, performance, and passion.

As you browse through the pages, you will discover new products designed to push the boundaries even further. New rods, luggage, shelters, comfort equipment and, of course, bait. Each product is the result of rigorous research of new raw materials and technological advances. The only validation criteria? Their performance by the water.

Carp fishing is much more than just a hobby: it is a way of life, a passion that unites a true community. At STARBAITS

we share this passion. Like you, we are fishermen first and foremost. This closeness allows us to develop products perfectly suited to your needs on the bank—whether at the edge of a lake, a river, or during a fierce competition.

This year we offer you internationally recognized “best sellers” and a multitude of new products. Every member of the STARBAITS team brings their expertise and experience to our range that aims for one goal: to make each session unique and memorable.

We wish you an excellent season, full of success and all the pleasure our range provides.

With best wishes for successful fishing,

The STARBAITS Team

----------------	-------

MASS BAITING BOILIES

At first glance, one might think they are identical to the performance concept baits. This resemblance is intentional since we wanted to offer a range that could be combined with the performance concept baits. However, there are a few differences worth noting that will prove to be serious advantages for tracking our favorite fish...

- Texture: Mass Baiting have a firmer texture than performance concept. The outer layer of the boilie is harder while being friable inside: the friability will facilitate the absorption and digestion of the bait by the carp, and the harder exterior texture will allow for long-distance baiting with a catapult without the risk of the bait breaking apart. Another major advantage is the firmness of the bait: this will allow it to withstand longer against unwanted species and white fish that often tend to nibble at our bait.
- Ingredients: They are identical. You will find the same ingredients in a Hot Demon performance as in a Hot Demon Mass Baiting. The same goes for all the proposed flavors, but in significantly different proportions...
- Compositions: They are different from the performance Concept. We have deliberately reduced the percentage of certain powerful meals in favor of less rich yet still attractive meals. This difference in composition will have a significant advantage for fishing by avoiding the saturation phenomenon. The example of the Hot Demon is telling: it is such a powerful boilie that you should not use much at the bottom of the water at the risk of saturating the area. With the use of Mass Baiting, whose formulation is designed to facilitate fish assimilation, the use of large quantities to maintain or condition the fish is now possible, eliminating any risk of saturation.

In practice...

With Mass Baiting, you can now use big names in carp bait on a wide range of baiting strategies: ALT, recall fishing, zone baiting... you can fix the carp on your fishing area without the risk of saturation with a more reasonable budget than in the past. We recommend combining the two ranges: maintenance of the spot and baiting with Mass Baiting, and then spot fishing in the baited area with the performance concept for maximum attraction around your setup.

MASS BAITING are available in 3-kilo bags in 14, 20, and 24 mm (the latter diameter will delight river and large lake enthusiasts). In terms of flavor, you will find all the aromas of the performance concept range.

HARD BAITS

Available in 20 and 24mm sizes, these baits harden on contact with water and let you fish with confidence safe from the undesirable attention of smaller fish and crayfish.

BOILIES IN DIP

Ready to use and simple to handle, these pre-boosted hard bait boilies will make it easier to locate your bait. Available in 20 mm and 24 mm, they are ideal for efficient and quick fishing.

POP UP

Available in 14 and 16 mm, these high buoyancy boilies will allow you to fish for over 24 hours with a perfect presentation. The diameters have been designed to easily create snowman rigs.

BRIGHT POP UP

These Bright Pops have all the same qualities of our standard pop-ups but offer an extra-flashy visual stimulus.

PERFORMANCE CONCEPT BOILIES

Performance Concept boilies are specifically formulated with natural ingredients to become a potential food source that can meet the dietary needs of carp. These high-quality baits have quickly proven in tests that they can be instantly assimilated as a natural food source and can be used in any season, whether for spot baiting or long-term baiting. They are available in various diameters to suit all situations.

WAFER

Wafers are critically balanced hookbaits. Available in a 14mm dumbbell version, wafers are ideal for wary fish and silty bottoms.

DROP SPRAY

Formulated to mark bait lures before casting, it will help locate your bait by spreading through different water layers thanks to vertical diffusion. It has proven extremely effective in boosting baits (such as foam types) for zig fishing.

DIP ATTRACTOR

The dip can be used in different ways during a session. Ideal for a long-lasting bait soak or for soaking pellets and groundbaits or to boost your bait sticks and soluble bags. A must have versatile additive for any session!

MIXED PELLETS

These pellets dissolve rapidly allowing you to quickly create some attraction in your swim. Each bucket contains a mix of 4mm and 6mm pellets to give you two different dissolution rates.

BAGGING PELLETS

Widely used in competitions to make micro PVA bags (hence the name 'bagging'), these 2mm micro pellets will allow you to instantly create an attraction zone around your bait. They can also be incorporated into coating pastes to slow down melting time.

POWER FLASH

Olfactory and attractant gel with the same characteristics as the boilie of the same name, allowing a cloud to form around the bait to spark the curiosity of fish. This thick and sticky gel will remain attached to the lure, whether during the most vigorous casts or when descending to significant depths, thus ensuring maximum attraction in the chosen area. Note the presence of a conical end allowing the gel to be injected into soluble bags before casting.

METHOD MIX

Made from micro pellets and groundbait, this method and stick mix is perfect for creating points of strong attraction in your swim. Can be used in soluble sticks, on a method or as a hookbait paste. For even more attraction try coating your feeder or stick in a dip.

PERFORMANCE CONCEPT *RED KRILL*

The RED KRILL is a high-end boilie specifically developed to attract the most cautious carp, resulting from a combination of two legendary products that have already proven themselves to thousands of carp anglers (robin red and krill). Enriched with nutrient-rich krill meal and combined with high-quality spices, this next-generation bait releases an intense attractive power immediately upon immersion.

Rich in high-quality proteins, essential amino acids, and omega-3 fatty acids, the RED KRILL provides genuine nutritional value that encourages fish to feed persistently in your baiting area.

Its tender texture promotes rapid diffusion of attractants and makes it particularly digestible, facilitating its use during extended fishing sessions or in cold waters.

Benefiting from exceptional natural attractiveness, its formula is enhanced with krill derivatives and a subtle blend of spices, offering a powerful olfactory signal capable of triggering quick and repeated bites.

PERFORMANCE CONCEPT *CRAYZI FRUIT*

Crazyfruit baits are rolled with the same focus on quality as our other Concept baits. Crazyfruit combines two proven fish attractants—crayfish powder and natural fruit flavours. Designed to appeal to the most wary and educated fish on pressurised waters who have grown wary of classic bait flavours. The coarse-ground crayfish powder gives a crunchy aspect to the baits that fish love!

Well balanced flavours and rapid diffusion means the baits can be used all year round for ultra-short sessions as well as longer feeding campaigns. Strongly flavoured with a distinct salty/sweet flavour that is sure to turn even the wariest of carp crazy!

PERFORMANCE CONCEPT RED LIVER

Our RED LIVER concept brings together two of the best carp attractants known to anglers: red liver powder and HAITH'S original Robin Red! Made using the same exceptional quality ingredients as the rest of our CONCEPT ranges including yeasts, betaine, spices and essential oils. Highly digestible, this bait is great for long term acclimatisation campaigns with no risk of over feeding. Designed to be instantly recognisable as a food source, carp quickly incorporate RED LIVER into their regular diets. During testing RED LIVER proved just as successful on runs waters as on harder big fish waters targeting one or two named fish.

PERFORMANCE CONCEPT SIGNAL

Signal is another completely natural bait in the Performance Concept Range. Signal boilies continues to offer a superb soft palatable food based bait. Packed full of natural ingredients found in the carps freshwater environment. The boilie has been developed using large particles such as oyster shell and Egg shell to optimise the crunch factor. A range of ingredients like crayfish meal, bloodworm extract and gammarus meals, water soluble proteins and various forms of salts and spices have been blended to offer a boilie that's as near to the carps' naturally occurring food supply as possible. We are so impressed with the levels of naturally occurring items within 'Signal' we like to think of this boilie as an 'Original Food Source' for carp. Signal contains NO artificial ingredients or flavours and is crafted from 100% naturally derived products. Signal has proved to be an all year round boilie showing superb field testing results to those lucky enough to have used some.

PERFORMANCE CONCEPT SK30

SK 30 has been formulated using a stringent selection of the highest quality heat resistant fishmeals, soluble fish proteins and marine extracts -in particular squid and krill extracts. As SK 30 has a soft palatable, self coloured appearance it enables high levels of leakage from the soluble proteins and amino compounds making it extremely attractive to fish. SK 30 has balanced levels of natural oils which help rapid digestibility once consumed; this promotes heavier feeding situations and healthy fish. SK 30 has shown during testing to have extraordinary results during heavy baiting-lending itself to pre baiting campaigns.

PERFORMANCE CONCEPT DEMON HOT DEMON

Demon Hot Demon is one of the new breed of Performance Concept Boilies developed to provide carp with all their nutritional needs. There are only the highest grade natural ingredients used with no artificial colourings or flavours. Hot Demon has proved through long term exhaustive field testing to be a tremendous fish catcher with outstanding cold water results making it a perfect winter boilie. The bait is rich in pre-digested fishmeals and low temperature water soluble fish and spice oils, matched exclusively with selective crushed spices, vitamins and mineral extracts creating an appetite stimulating food source.

PROBIOTIC PRO STRAWBERRY SPICE

Developed on a plant base enriched with marine elements (such as krill...), the STRAWBERRY SPICE boilie embodies a new generation of baits that are both attractive and nutritious. Each ingredient has been carefully selected for its freshness, nutritional value and attractiveness to get the best response from fish - even the most cautious ones. Its secret lies in the subtle combination of strawberry enhanced with a mix of spices rigorously chosen for their stimulating properties. This unique aromatic combo creates a lasting taste imprint, keeping fish coming back to feed. Thanks to its excellent nutritional qualities and optimal digestibility, STRAWBERRY SPICE stands out as an ideal solution for longer sessions, holding fish on the spot while attracting larger specimens. Its composition allows for effective diffusion even in cold water, making it just as effective for spot fishing (for example using soluble bags) as for long-term baiting (such as ALT). Tests conducted in different types of waters - both easy and notoriously difficult - have demonstrated that its use in synergy with our complementary products significantly improves results. STRAWBERRY SPICE: The perfect balance between nutrition, attraction, and performance!

PROBIOTIC PRO BANANA NUT

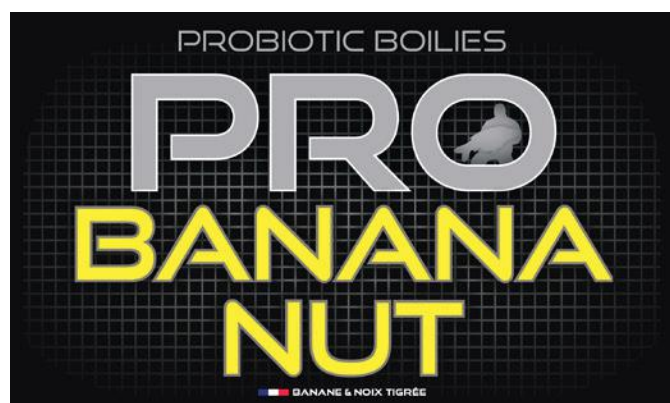

Carp sweets are a perfect description for our latest addition to the PROBIOTIC range – Banana Nut!

Carp are curious fish and our Banana Nut baits play on this. Based on powerful banana flavours coupled with the attraction of tiger nuts and boosted by an intense sweet enhancer, these new boilies are making quite a splash on natural venues. The yellow colour helps the bait stand out on the bottom and the flavours diffuse rapidly making this a great all year-round bait working even in very cold water.

All PROBIOTIC baits we have strict quality controls on all the natural ingredients and additives to ensure that our Banana Nut baits are of the highest quality.

To cover all eventualities, you will find a full range of complimentary baits including dips, po-ups and wafers.

We are sure you will go mad for our Banana Nut baits just like the hundreds of carp we caught during field testing!

PROBIOTIC PRO BLACKBERRY

PRO BLACKBERRY boilies are designed to give you a bait rich in nutritional triggers to create a feed fish instantly recognise as a potential food source. All our Probiotic baits use natural ingredients and quality derivatives (like yeast, betaine, liver, minerals and oils) rigorously selected to make PRO BLACKBERRY top quality carp baits. Can be used for long term feeding campaigns or used in conjunction with PRO BLACKBERRY BOOST for spot sessions.

Another superb carp catching bait from the Probiotic range. A sweet delicate smell of tropical fruits with a bit of an edge behind it (N-Butyric Acid) A delicate pink colour matches the aroma. The ingredients used to formulate this boilie are naturally derived from yeasts, liver, crushed organic material and seeds, high mineral meals along with oils, betaines and of course N-Butyric Acid. Pro Peach is so high in nutritional value it will easily be recognised as a food source. Because of its sweet, pungent aroma the Pro Peach will work well instantly but due to its high food value it will lend itself to long term baiting campaigns. Probiotic -good for them means good for you.

D-SOLVE

D-SOLVE baits use the same quality control parameters as our other probiotic and concept baits. Designed with particles that dissolve 4 to 6 hours after feeding, the time varying depending on water temperature and fish activity. This solubility coupled with the attractiveness of the ingredients pulls carp quickly into your swim and hold them there. A real edge for competition carp anglers!

GRAB AND GO GLOBAL

G&G Global boilies are boilies that can be used absolutely anywhere to great effects. They are packed full of quality ingredients and have been matched with popular feed inducing stimulants and attractors to create a strong feeding response amongst carps. Because of the G&G Global's high digestibility, and the chosen ingredients used, it's an extremely palatable food source for carps, which will in turn create longer feeding spells making the carp easier to catch. G&G Global lend themselves to serious, high input baiting campaigns in any climate, hot or cold. A large bed of these boilies will leak off a soft, comfortable level of attractors encouraging the fish to investigate the source. Used with a matching dip/glug G&G Global males and excellent stand-alone single hook bait.

D SOLVE PVA BAG SYSTEM

Complete system allowing the easy and almost instantaneous creation of soluble bags, regardless of the chosen size. Thanks to its accessories dedicated to filling and twist closure, you get a perfectly ready-to-launch bag in seconds. A specific accessory also allows you to set up your rig and bait compactly, ensuring long-distance casts without the risk of tangling.

Ref	Dim.	Qty/pack	RRP€

HOOKS

Power Plus hooks are made from a superior carbon and steel formula giving you unrivalled strength while keeping a refined low diameter and weight ratio allowing delicate balanced rigs with extra force to be made. Use Power Plus for when you need to hook and hold!

POWER HOOK POWER SNAG

This is a beast of a competition hook – super strong, razor sharp and curved for maximum penetration. A true hook and hold hook!

Ref		Qty/pack	RRP€
34466	SIZE 2	10	5,99
34467	SIZE 4	10	5,99
34468	SIZE 6	10	5,99
34469	SIZE 8	10	5,99

POWER HOOK CURVED SHANK

With a traditional curve across the shank of the hook this shape gives superior hooking characteristic and lends itself to rigs where the hook wants to be pushed away from the boilie on the hair.

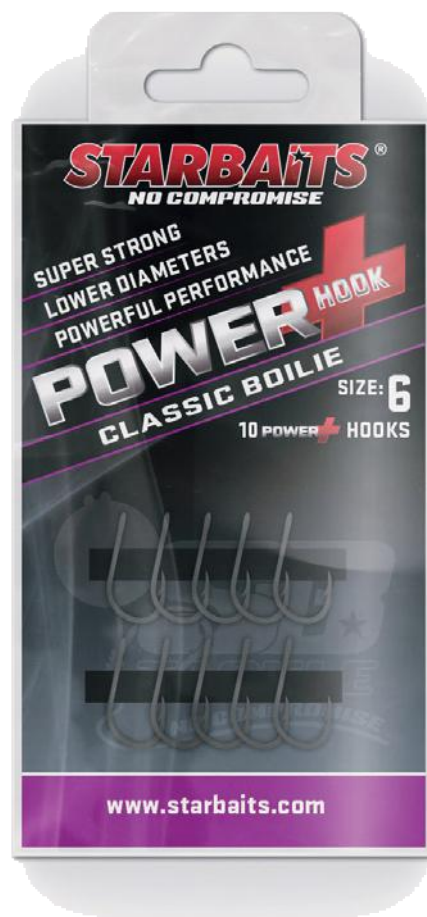

Ref		Qty/pack	RRP€
34497	SIZE 4	10	5,99
34498	SIZE 6	10	5,99
34499	SIZE 8	10	5,99

POWER HOOK CLASSIC BOILIE

A wider gaped hook for self-hooking rigs. A big asset when creating long haired rigs and combination rigs. The super sharp and strong all-round hook!

Ref		Qty/pack	RRP€
34476	SIZE 2	10	5,99

52874	6	10	5,99
52875	8	10	5,99

N D RIG

Particularly effective with floating baits, the D-Rig involves presenting your bait on a loop positioned along the shank of the hook. This characteristic loop, from which it gets its name, optimizes hooking while maintaining a discreet and effective presentation. Particularly effective on soft bottoms, its presentation offers the bait a natural freedom of movement, making it more realistic and especially much more difficult for fish to spit out. Another major advantage: the rigidity of this leader considerably reduces the risk of tangling, even during powerful casts, thus ensuring a reliable and quick setup.

Ref		Hook	N°	Length (cm)	Power (lbs)	Qty/pack	RRP€
74347	N°2	CURV SHANK PTFE COATED	2	18	20	3	5,99
74348	N°4	CURV SHANK PTFE COATED	4	18	15	3	5,99
74349	N°6	CURV SHANK PTFE COATED	6	18	12	3	5,99

N SPINNER RIG

A very popular and extremely versatile rig, the SPINNER STIFF RIG is designed to optimize hooking potential. The hook is mounted on a swivel, allowing it to rotate freely 360°, thus promoting an immediate point turn and fast hooking as soon as it is taken in the mouth. Its stiff fluorocarbon section ensures excellent bait presentation, greatly limits the risk of tangling during casting, and helps keep your rig in place. The ability to quickly replace your hook allows you to easily adapt your setup or replace a blunted hook without having to redo the entire leader.

Ref		Hook	N°	Length (cm)	Power (lbs)	Qty/pack	RRP€
67547	N°2	CURV SHANK PTFE COATED	2	18	25	3	6,99
67548	N°4	CURV SHANK PTFE COATED	4	18	20	3	6,99
67549	N°6	CURV SHANK PTFE COATED	6	18	20	3	6,99

N STIFF RIG

This 100% rigid setup will significantly reduce the risk of tangling during casts, even the strongest ones, and ensure an instant placement on the bottom. It will remain effective even in the presence of unwanted elements and will considerably reduce the risk of unhooking, especially when the fish tries to spit out the bait.

Ref		Hook	N°	Length (cm)	Power (lbs)	Qty/pack	RRP€
67544	N°2	CURV SHANK PTFE COATED	2	18	25	3	5,99

67546	N°6	CURV SHANK PTFE COATED	6	18	20	3	5,99

N HALF RIG

Perfect balance between strength, rigidity, and flexibility, the HALF READY RIG was made from a high-quality coated braid, ensuring optimal resistance. The braid is stripped in the last few centimeters before the hook, offering your bait maximum freedom to entice the most cautious fish. The upper part of the leader, coated, provides a certain rigidity, significantly reducing the risk of tangles during the most forceful casts. An exceptionally versatile rig, this leader proves effective in all fishing situations.

Ref		Hook	N°	Length (cm)	Power (lbs)	Qty/pack	RRP€
67541	N°2	CLASSIC HOOK PTFE COATED	2	18	25	3	6,49

67543	N°6	CLASSIC HOOK PTFE COATED	6	18	20	3	6,49

N TOURNO RIG

The TOURNO RIG is a combination of the rigidity of fluorocarbon for impeccable hold and the flexibility of the hair for an ultra-natural presentation of your bait. Easy to use, effective with every cast, this rig is the preferred choice of some members of our competition team. For anglers seeking reliability and discretion, it is the ideal setup to entice the most wary fish.

FEATURE FINDING/MARKERING

SESSION H MARKER

The Session H Block marker is a highly buoyant marker system that simply works by releasing the marker and lead into the water. The lead will fall to the bottom while the H marker spins and unravels. Once the lead has hit bottom and the block has hit the surface the H Block will stop unravelling and sit there to you collect it showing your spot.

TACKLE BOXES

N STB CHALLENGER STORAGE BOX

Discover a storage box designed to combine practicality, protection, and efficiency in the field. With its removable dividers, organize your space as you wish by creating compartments of various sizes, perfectly suited to your needs. Ideal for storing your artificial baits (zig foams, artificial lures, etc.), this box ensures optimal hold of your accessories or baits thanks to specially designed separators that prevent any movement inside the compartments. Its O-ring seal guarantees perfect waterproofing once the box is closed, effectively protecting its contents against moisture and infiltration. Additionally, an integrated anti-humidity separator helps preserve the quality and durability of your baits. The presence of a transparent lid offers instant visibility of the entire content, allowing you to quickly find what you need, even in the heat of action.

STB CHALLENGER PONTON

Developed in collaboration with our competition team, this fishing platform was designed to meet the most stringent demands of carp fishing in competition. Its aluminium structure is lightweight, robust and extremely easy to set up regardless of the ground conditions.

The adjustable legs and modular surfaces allows you to easily create a perfectly flat surface, even on the roughest ground. It comes with an 80 cm x 80 cm platform equipped with 4 adjustable legs (height from 80 cm to 130 cm) and can be extended with a second platform of the same dimension, equipped with 2 fixed legs (maximum height of 80 cm), to achieve a surface of 80 cm x 160 cm.

Its perforated metal platform is non-slip and designed to eliminate any risk of water pooling, thus ensuring optimal safety and unparalleled comfort. Its exceptional stability allows you to perform powerful casts with full confidence.

Delivered complete in a transport cover, this set includes: 2 platforms of 80 cm x 80 cm / 4 adjustable legs (80 cm to 130 cm) / 2 fixed legs (maximum 80 cm).

Ideal for situations where stability and casting precision are essential, this platform is an indispensable asset for demanding competitors and enthusiasts.

N STB CHALLENGER POD XT

The STB CHALLENGER POD XT is a robust, versatile, and ultra-stable rod pod. Thanks to its larger dimensions, the XT version adapts perfectly to all fishing situations, even on the most challenging terrains. Its reinforced design with larger diameter tubes gives it excellent rigidity and remarkable stability. The longer legs allow for optimal setup on all types of stands, while the leg tips are equipped with fixing holes to securely anchor the rod pod to the ground. The double central bar, adjustable in length, offers great versatility and can easily accommodate rods from 10 to 13 feet. The 4-rod buzz bars are equipped with screws and locknuts to ensure perfect alignment of the detectors and rear supports. For precise adjustment according to the terrain configuration, the tripod legs have 3 different adjustment positions, while the buzz bars are also height adjustable.

ALARMS DLX4

N DLX 4

DLX4 detectors have been designed with advanced digital technology, providing ultra-precise detection and optimal reliability in all conditions. Designed to combine safety and ergonomics, the DLX4 are equipped with non-slip rubber pads and high ears, ensuring perfect hold of the rods, even during the most violent bites.

Functionality is based on a 3-position ON/OFF switch, complemented by three independent control buttons allowing precise adjustment of: volume, tone, and sensitivity (with 8 levels of adjustment for each). The detector integrates a high-quality speaker, ensuring clear and powerful sound reproduction, as well as a 2.5 mm jack for easily connecting your light accessories.

Its robust design is based on a 3/8" stainless steel thread, ensuring impeccable strength and unparalleled durability. In terms of customization, the DLX4 features an external diode color selection button, allowing instant display change according to your preferences. A light intensity adjustment function also adapts the visibility of the diode according to seasonal conditions.

Power is supplied by 2 AA batteries (not included), accessible through a secure compartment, opened with a screwdriver provided in the set. Finally, for complete peace of mind by the water, the DLX4 detectors are equipped with an integrated anti-theft alarm, effectively protecting your setup. The DLX4: the combination of precision, reliability, and performance.

DLX4 Detector Features:

- Volume control button: 8 positions (with mute position)
- Tone control button: 8 positions
- Sensitivity control button: 8 positions
- Low battery function
- Anti-theft function
- Color selection button
- Comes with protective cover
- Night function
- Diode brightness adjustment
- Maximum range: 500m
- Operates with x2 AA batteries (not included)

DLX4 Receiver Features:

- 6 color channels
- Low battery alert function
- Anti-theft function
- Vibration function
- Waterproof
- Bivvy light function
- Volume adjustment button: 8 positions (with mute position)
- Maximum range: 500 m
- Operates with x3 AA batteries (not included)

N SBI

Equipped with volume, sensitivity, and tone settings, the SBIs will perfectly adapt to all fishing situations, whether you are on a lake or a river. Their advanced customization system allows you to adjust your detectors with great precision, ensuring reliable, tailored detection according to your needs. The silent mode guarantees absolute discretion at the water's edge while ensuring effective transmission of bites. The central unit, with a range of 150 meters, offers you optimal freedom of movement. It also integrates a vibration function, perfect for staying informed of bites discreetly. A 'Nightvision' position will enhance the visibility of your detectors at night.

Detector features:

- digital technology
 - waterproof
 - volume button with 8 levels (including a mute function)
 - sensitivity button with 8 levels
 - 8 tone levels
 - high visibility LEDs
 - 'night vision' position for better night visibility
 - detection by magnetic roller equipped with a contact seal
 - powered by x2 AAA batteries (not included)
 - easy access battery compartment
 - metal thread with adjustment ring
 - 2.5mm jack for lighted accessories
 - intuitive and easy adjustments with a simple press
- Central unit features:
- digital technology
 - radio transmission range of 150m
 - 8 volume levels (including a mute function)
 - torch function with a short press on the on/off button
 - 20s diode delay - instantaneous transmission

LCR BLUE LINE XT

N LCR BLUE LINE XT

The LCR BLUE LINE XT is a high-performance rod designed for demanding anglers seeking sensitivity, power, and precision. This exceptional rod is particularly suited to technical fishing enthusiasts who want to benefit from optimal control during casting and fighting.

Its construction is based on a low-resin carbon blank, offering an excellent balance between lightness, responsiveness, and robustness. This technology is complemented by an elegant 1K Woven carbon finish, which strengthens the structure while providing a premium look.

The BLUE LINE XT is distinguished by its fast tip action, allowing for instant transmission of information and great accuracy during casts.

The implementation of a greater number of guides optimizes stress distribution on the blank and smooths line glide during casting; this design helps improve casting distance by offering better line control, thereby avoiding loops in the guides (especially in strong side winds).

During fights, even with modest fish, the rod maintains excellent progressivity and is particularly pleasant to use. Its power reserve allows for effective fish control while retaining enough sensitivity to fully enjoy every bite.

Combining modern technologies, meticulous finish, and high-level performance, the LCR BLUE LINE XT establishes itself as a reference choice for anglers seeking a lightweight, lively rod capable of reaching extreme distances.

LCR DARK LEGEND

N LCR DARK LEGEND

Building on an excellent reputation established by the LCR range over the years, the new LCR DARK LEGEND further pushes the standards of high-end rods designed for the most demanding anglers. Designed with a specific goal: to offer casting enthusiasts a high-performance tool combining power, precision, and comfort of use, without ever compromising the action of the rod or the pleasure felt during the fight with the fish. Its high-modulus blank benefits from advanced compression technology ensuring an ultra-fast recovery after casting. This exceptional responsiveness allows for optimized energy transfer, improved trajectory accuracy, and increased casting distances while maintaining perfect control. To ensure maximum reliability during the most forceful casts, the LCR DARK LEGEND features specific reinforcement of the wraps at the spigot. This strategic part of the rod, often subject to significant mechanical stress, thus enjoys enhanced resistance. The LCR DARK LEGEND establishes itself as a benchmark for anglers seeking the perfect combination of power, casting distance, and enjoyment.

MILSPEC LCR DARK SHADOW

MILSPEC LCR DARK SHADOW

Designed to launch rigs clear out of sight, the MILSPEC LCR DARK SHADOWS are singularly strong rods in the LCR range. Featuring 50mm butt rings and a 20mm tip ring to help gain extra metres on every cast. The 18mm DPS reel seat will take any large spool distance casting reel. The huge amount of power in the butt and a specially designed tip help with casting and will handle the very biggest of carp. Elegant mat black carbon blanks and first class finishing make these rods a pleasure to fish with.

N STB COMFY CRADDLE

The COMFY CRADDLE stands out from all the products on the market firstly due to the absence of sidebars, ensuring secure support at the head and tail of the fish, and also thanks to its deep retention pocket without water drainage, promoting optimal conditions for keeping your catch in a humid and protective environment. Its structure is based on four adjustable legs, ensuring maximum stability on all types of terrain. Its innovative instant deployment system allows for quick and effortless setup. The interior is made from a 'fish-friendly' material, specifically designed to preserve the fish's natural mucus, which is essential for its health. For added peace of mind, a removable full flap is included: ideal for calming and securing the fish while you prepare your weighing or photography. Convenient and compact, the COMFY CRADDLE comes with a dedicated cover, and its generous dimensions will allow you to accommodate the most beautiful specimens with complete confidence.

Ref	Length (cm)	Width (cm)	Height (cm)	Depth	Weight (kg)	RRP€

SAFETY CRADDLE

Designed to meet the demands of the most attentive anglers, the SAFETY CRADDLE combines safety, comfort, and respect for your catches. Its padded metal frame and 'fish friendly' material ensure safe handling of your fish. The presence of a removable flap optimizes the protection of your catches, while the rubber mesh ends ensure rapid water drainage. Easy to fold and transport, the presence of 4 adjustable legs equipped with mud feet ensures optimal stability even in difficult conditions. Delivered with a carrying bag.

MONSTER MAT

Designed for demanding anglers who care about the well-being of their fish, this ultra-protective landing mat ensures maximum safety when handling your catches. Thanks to its rigid edges, it offers optimal protection against shocks and sudden movements. The 'soft touch' internal material has been specially selected to preserve the fish's protective mucus, while the presence of rubber mesh ensures quick water drainage. The canvas flap with Velcro fastening effectively prevents fish from jumping out. Practical, it features a zipper at each end, making it easy to return the fish to the water. Its 50 mm high-density foam padding provides perfect protection even for larger fish, which can be easily transported thanks to the plastic handles at each end. Ground anchor points ensure stability and the quick-drying feature makes it even more practical in use.. Compact and lightweight, this mat comes in a convenient carrying bag for minimal bulk. A high-security landing mat for optimal comfort of your catches.

WEIGHING AND FISH CARE

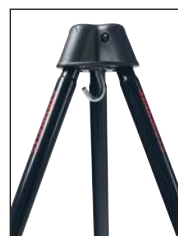

STB CHALLENGER DIGITAL SCALE

The STB DIGITAL SCALE is a compact and practical scale with ergonomic handles providing a secure and comfortable grip. It also features a hook to use with a storm pole if desired. The weight reading is made easy with a bright LCD screen (handy at night). The STB DIGITAL SCALE allows you to weigh fish up to 50 kg (other units available: Lb, Lb:oz, Oz). For accurate weighing, the scale has an automatic weight lock function, indicated by a beep and 'hold' on the screen (after a few seconds). In addition the STB DIGITAL SCALE displays the temperature (°C or °F), a TARE function and includes a tape measure integrated into a handle.

- Operates with 2 AAA batteries
- Suspension hook

STB CHALLENGER WEIGH SLING

Designed for fish-friendly handling, the CHALLENGER WEIGH SLING is an essential accessory for every angler. Equipped with double handles at each end, it ensures a secure grip, regardless of the size of your catch. The reinforced weighing straps and materials protect the fish preventing any stress or injury during weighing. The zippers at each end allow fast and effortless release of your catch. The presence of a rubber mesh facilitates water drainage, allowing for precise and quick weighing. All seams are reinforced at stress points to ensure optimal strength. The slightly rounded shape ensures excellent support of the fish during weighing. Rolls up for reduced bulk, it comes with a carrying case.

N SPECIALIST POP UP BAG

The luggage from the SPECIALIST POP UP BAG range features a transparent lid, providing immediate visibility of all your stored products: no need to search, everything is accessible at a glance. Designed to store your pop-up boxes, these versatile bags also allow you to easily store your essential accessories such as PVA, marker floats, or nylon spools. Easy to use, they perfectly integrate with other luggage from the range, optimizing your storage space. Their padded design ensures optimal protection of your equipment, while the quality double zipper closure guarantees robustness and durability.

DELUXE STOVE

The legs of the stove fold and wrap around the main stove body to create a more compact traveling cooker. Once out folded the legs create solid pan support pad. A Piezo ignition simplifies the lighting of the stove and a winter gas warmer pipe sits above the flame flute but below the pan rest for cold weather usage. Supplied with a universal can adapter to fit different gas can tops and a black carry bag, an excellent cooking stove for easy hot food and drink preparation.

TROLLEY

N STB TROLLEY

Designed to maximize the ease of transporting your equipment, the STB Trolley combines maneuverability, stability, and durability to accompany you on all your fishing trips. Compact and practical, it folds completely flat, significantly reducing space when transporting by car or storing. Thanks to the adjustable front section, it easily adapts to the volume of equipment to be transported. Integrated attachment points allow you to securely fasten your load with straps. Equipped with adjustable legs featuring mudguards, it ensures excellent stability, making it ideal for day fishing as well as mobile sessions.

N DLX CAMPUS

The DLX CAMPUS is a multifunctional shelter designed to meet the needs of anglers, whether in competition, with family, or during long sessions by the water. Thanks to its quick setup system, this shelter ensures a straightforward and efficient assembly, achievable by just one person. Its telescopic poles, easy to deploy, fold compactly for hassle-free transport. Designed to offer optimal stability, it is equipped with a double-leg system at all four corners, ensuring excellent ground support even in challenging conditions. The front facade features a large door with an integrated 'umbrella' porch equipped with adjustable stiffeners, allowing for increased sheltered area and improved usability. It comes with a waterproof wall and a mosquito net, adapting to

weather conditions and external disturbances. Both side faces each include a large door with mosquito net windows and waterproof panels, closed with zippers, providing adjustable ventilation and enhanced protection. At the back, a large door with a mosquito net window that can be obscured by an opaque and waterproof panel completes the setup. Highly practical, this shelter can be directly connected to your sleeping bivvy to create a true central living space. Supplied complete, this shelter includes an oversized high-quality carry bag, a groundsheet, an overwrap, four organizers, porch stiffeners and poles, as well as luxury pegs. A reliable, spacious, and ingenious piece of equipment, ideal for anglers seeking comfort, modularity, and performance.

BASE CAMP DLX PACK 300

Designed for competition anglers as well as groups fishing long sessions, the BASE CAMP DLX is a large, versatile, ultra-functional shelter. Ideal as a technical shelter or a social space, it offers robustness, modularity and comfort. The aluminium telescopic pole frame allows for easy setup, even solo, and reduces bulk once folded. Double reinforced feet at each end, stabilized by anchor cords, offer optimal stability in any weather conditions. The four sides are equipped with large mosquito netting panels and ensure 360° visibility while maintaining effective protection against insects. Fully openable, they can

transform the shelter into an airy gazebo to fully enjoy good weather. One of the openings can be converted into a porch, creating an additional pleasant living space. An integrated flysheet enhances protection against rain and condensation for optimal comfort. Practical and well-designed, this shelter is equipped with removable storage pockets at the four ends, ideal for organizing your gear. The BASE CAMP DLX PACK 300 includes everything needed for a complete setup: bivy, flysheet, groundsheet, porch poles, pegs, anchor cords, all in a high-quality carry bag. The ultimate technical and friendly shelter.

N SPEC. COMFORT COCOON MEMO SLEEPING SYSTEM

The SPECIALIST COMFORT MEMO SLEEPING SYSTEM has been designed to offer maximum comfort during your long fishing sessions. A true combination of high-end bed chair and efficient sleeping system, it guarantees maximum comfort even in the most demanding conditions. Its high-density memory foam mattress with lumbar support integrated into the frame ensures optimal back support and exceptional comfort throughout the night. Its specific foot shape allows for perfectly straight legs for a more natural and pleasant sleeping position. Designed for practicality by the water, the system features compression straps independent of the leg locking mechanism, allowing the bed chair to be easily compacted even when the legs remain open inside the bivvy. A real time-saver during setup and storage. The leg adjustment is instant thanks to a robust and reliable spring mechanism, allowing for quick leveling on all terrains. The large pivoting mud feet provide excellent stability, regardless of the terrain type. The modular double-layer sleeping bag allows for use in 3 or 5 season configurations, perfectly adapting to your needs throughout the year. Combining comfort, modularity, and practicality, the SPECIALIST COMFORT MEMO SLEEPING SYSTEM is the ideal partner for demanding anglers seeking high-end performance by the water.

N SPECIALIST COMFORT COCOON CHAIR

The SPECIALIST COMFORT COCOON CHAIR is designed to provide absolute comfort during all your fishing sessions. Thanks to its enveloping shape, the seat perfectly fits the body while limiting drafts, for an optimal sense of well-being. Its generous dimensions and deep seat offer exceptional support and remarkable comfort in all circumstances. The reclining backrest with three positions allows you to easily adjust your posture to your needs.

Practical, this chair features a spring-loaded foot adjustment system, allowing for instant adjustment with one hand, even on uneven terrain. For enhanced safety, the backrest and legs are lockable to prevent accidental folding. The padded armrests add an appreciable touch of extra comfort, while the swivel mud-resistant feet ensure perfect stability on all types of grounds.

N SPECIALIST COMFORT RECLINER CHAIR

The SPECIALIST RECLINER CHAIR range incorporates all the qualities of the COMFORT Starbaits range. Its ultra-light structure ensures great solidity, while its thick high-density mattress with a honeycomb covering, allowing air passage, provides excellent support for unparalleled comfort. The mattress contours, subject to friction, are covered with 600D polyester fabric for greater longevity.

The presence of mattress springs on the seat and back parts will provide unmatched comfort with no risk of sagging over time. The backrest adjustment joints allow for multi-position use to suit your preferences, whether for resting or during observation sessions. Its adjustable legs with a spring mechanism and mudguard cups ensure optimal seating adjustment regardless of ground conditions. Its ultra-strong and very light structure is equipped with a multi-point backrest inclination system.

Features:

- Heavily padded seat with a honeycomb covering allowing air circulation and reinforced with springs for better support
- Seat contour with 100% 600D polyester covering filled with high-density foam
- Presence of armrests
- Quick folding mechanism
- Clips for securing leg bars to the metal structure
- Spring foot adjustment system ensuring instant setup

N STB CHAL. 30K WATERPROOF JACKET

Developed from a waterproof outer fabric made of reinforced 3-layer Nylon with a PU coating, the waterproofing of this WATERPROOF STARBAITS jacket allows for long-lasting fishing in the rain. The seams are sealed with thermo-bonded sealing strips to perfect the waterproofing. Designed to withstand severe weather, the technical and very durable fabric of this jacket is also breathable (3000g/m²). Its straight, long cut ideally protects the lower back. It is also comfortable and ensures great freedom of movement. All closures are waterproof, including the pockets. The drawstrings at the waist, neck, and hood allow you to perfectly adjust this jacket to your body shape, essential in case of wind or heavy rain. Preformed, rigid, and adjustable visor. Cuffs with sleeve and velcro strap closure. Main fabric: 100% Nylon Ripstop. Lining: 100% Polyester.
