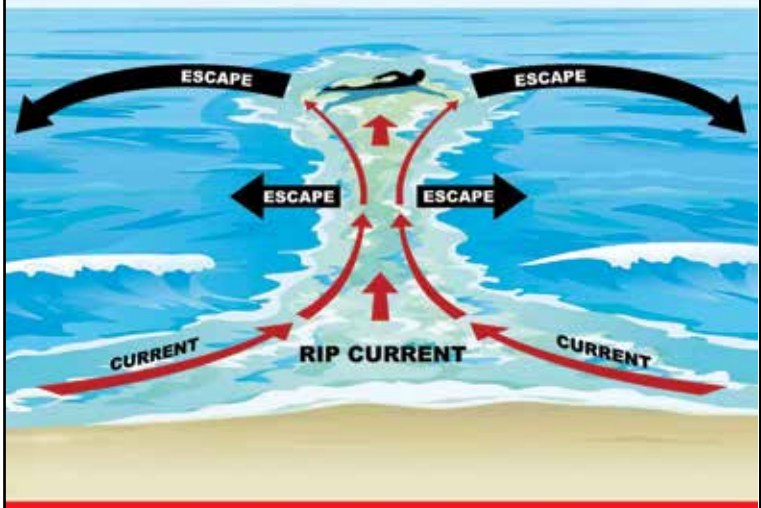
water safety

Rip currents are powerful currents of water moving away from shore. They can sweep even the strongest swimmer out to sea.



- Don't fight the current
- Swim out of the current, then to shore
- If you can't escape, float or tread water
- If you need help, call or wave for assistance

SEA TURTLE NESTING SEASON

MAY 1 - OCT 31

A female turtle digs her nest, lays her eggs, and returns to the ocean. After 60 days, the eggs hatch, and the babies follow the moonlight across the beach to the sea.

Please help us protect these magnificent creatures by remembering a few simple things:

NO FLASHLIGHTS ON THE BEACH AT NIGHT

KNOCK OVER SANDCASTLES & FILL IN ANY HOLES

PICK UP BEACH FURNITURE

DISPOSE OF ALL TRASH

DON'T DISTURB NESTS, TURTLES, EGGS, SIGNS OR STAKES

FOLLOW ALL POSTED BEACH RULES

LEAVE ONLY YOUR FOOTPRINTS

HELP PROTECT TYBEE SEA TURTLES!

DANGER DEADLY SANDBAR ALERT!

At Tybee's South Beach, sandbars stretch over a mile out - but they are deadly! Extreme tides, drop offs and fast currents can knock you down and wash you out to sea in minutes. Every year, people are rescued... and some don't make it back. Stay safe. Stay on the beach.
