THE FUTURE IS A SOULITAIRE

~ F O U N D E R ~

Komal Patel founded Ethicarat to redefine luxury by making it sustainable and personal. Where a global technology career meets a long family legacy in fine jewelry, she imagined a brand shaped by human stories, ethical diamonds, vibrant gemstones, recycled gold, and AI-powered design.

Ethical Luxury

~ A B O U T E T H I C A R A T ~

Sustainable—without compromise

Ethicarat is a sustainable fine jewelry house built at the intersection of artistry, technology, and ethics.

Each piece begins with a story — shaped by intention, inspired by global collaborations, and handcrafted in India by generational artisans using ethical diamonds, recycled fine metals, and responsible practices. Every Ethicarat piece

is made to order and fully customizable.

Through our AI muse, **Jewelie**  we extend this artistry to individuals, designers, and retailers — transforming imagination into form and proving that the future of luxury can be personal, creative, and deeply human. Because at Ethicarat, jewelry is more than what you wear — it's what you carry within.

Where Innovation Meets Artistry

At Ethicarat, technology is never a substitute for artistry — it's a tool that amplifies it. Our AI muse, **Jewelie**, helps designers, retailers, and creators bring imagination to life — accelerating design, enhancing creativity, and keeping human intention at the center.

Not every collection begins with AI, but every creation is touched by humans - designers and artisans. Because the future of fine jewelry isn't machine-made — it's human-inspired, intelligently realized.
