Peggie Pages

Modularity meets fashion in a pegboard system designed to work with MAXe or on its own.

shopforshops.com/free-catalogue

Welcome to MAXe Manual 02

MAXe is the one system with unlimited applications...

Designed, manufactured, and distributed by Shop for Shops.

As a wall mounted or freestanding solution, MAXe is used to transform a wide range of spaces including:

- Shops
- Homes
- Offices
- Exhibitions and conferences
- Hotels and hospitality
- Schools
- Pop up and temporary retail
- and beyond...

MAXe is popular because it is:

- An off the shelf solution and well stocked
- Modular
- Flexible
- Cost Effective
- Quick and easy to assemble and install
- Efficient and cost effective to freight
- Strong
- Stylish

MAXe Manual 02 is just the start of the MAXe journey, providing you with images of inspiration, new products and information on over 700 products in the system.

No matter the size of the space you are looking to transform we are here to help.

Single sided batten mounted post cover set

Use with back panels to neatly finish off your wall mounted display. These fit perfectly on single sided posts mounted using battens.

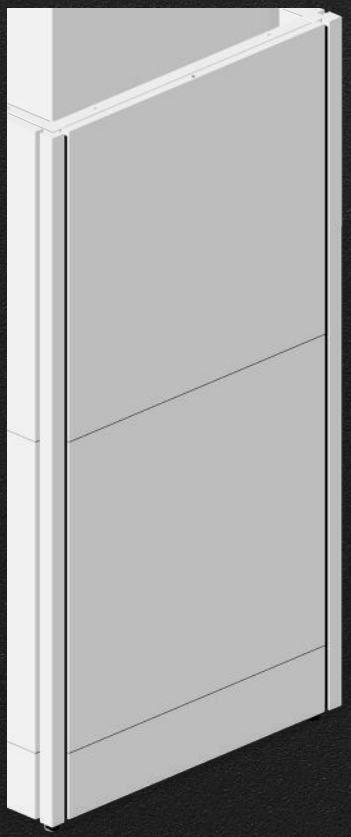

See page 90

External corner post cover

The ability for MAXe to go around corners and columns is fantastic. The external corner post covers allow you to finish off corners with ease.

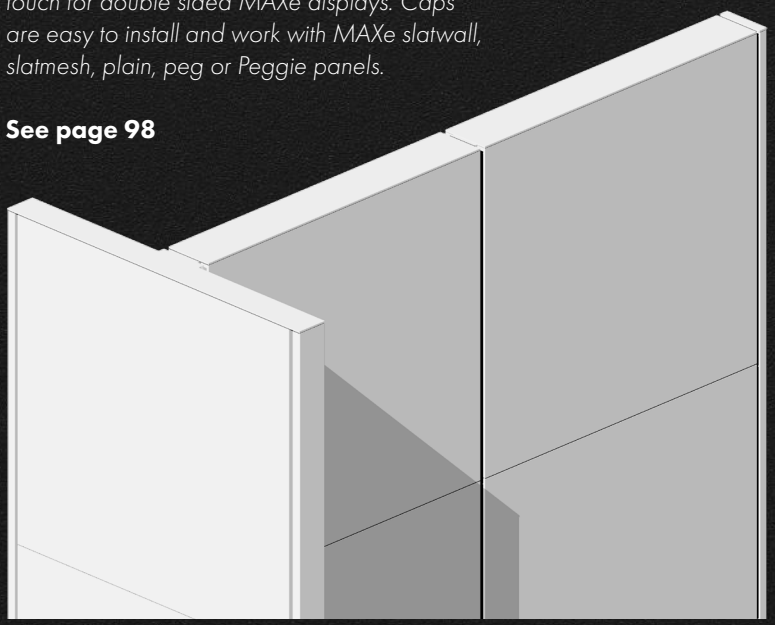

See page 92

Top capping system

Our capping system is the perfect finishing touch for double sided MAXe displays. Caps are easy to install and work with MAXe slatwall, slatmesh, plain, peg or Peggie panels.

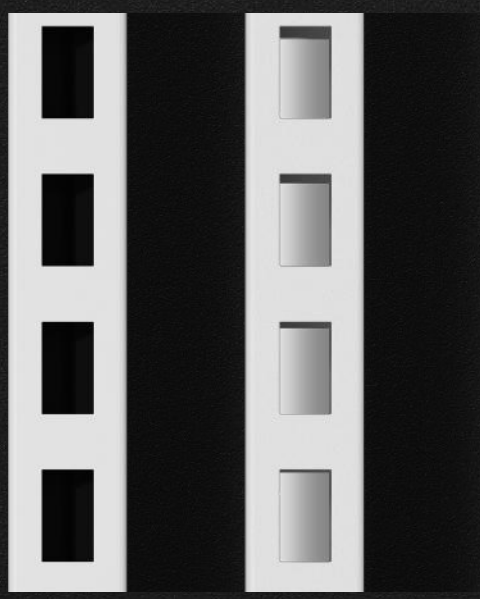

See page 98

Hidden Hole Technology (HHT)

Change the look, hide the holes and stop the light bleed though double-sided posts with HHT. Add HHT to improve the look of your display without compromising the effectiveness of the holes.

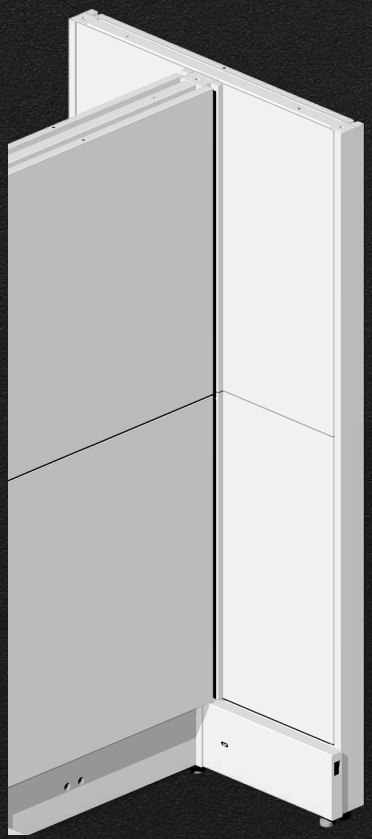

See page 50

Double sided post with HHT *Double sided post without HHT*

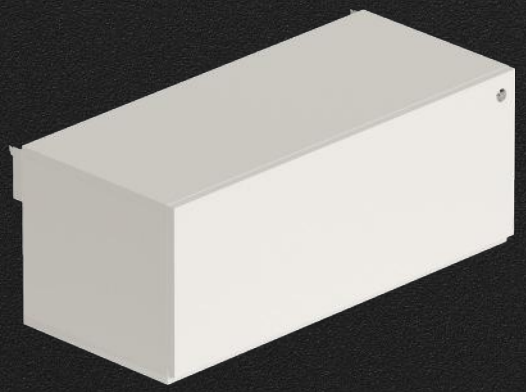

End bay post covers & inner panels
Use these to enhance the look of the back of end bays and posts.

See page 95

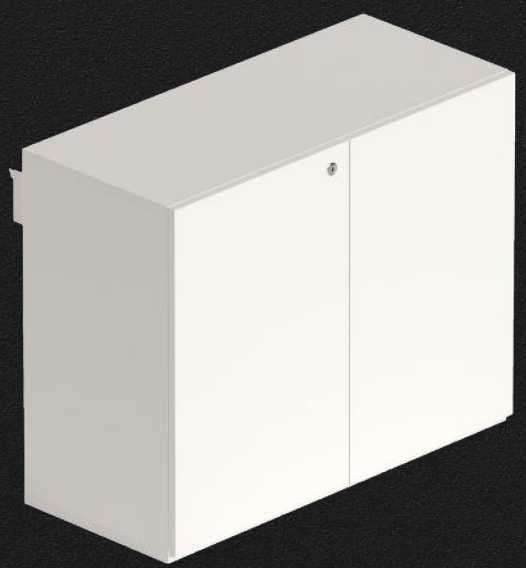

Drawer Units
MAXe Drawers work seamlessly with wall mounted or freestanding MAXe applications to provide hassle-free storage.
They are fully assembled to save you time and with locks fitted. Available in three widths and four timber colours to match your MAXe set up beautifully.

See page 134

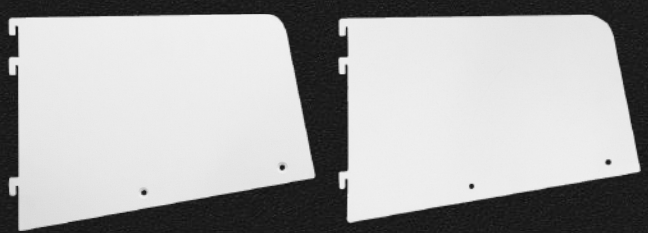

Cupboards
Cupboard come with a fully adjustable shelf and locks and the strong tops can be used as shelves.
Cupboards can be stacked with other cupboards or draw units to create practical storage and working set ups for shops, exhibitions and more.

See page 133

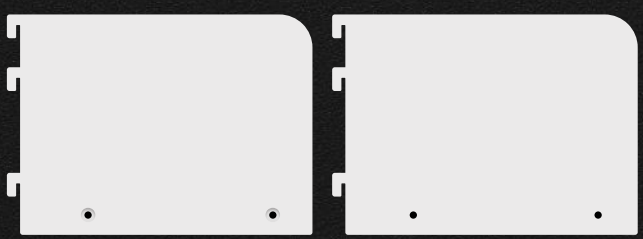

Bookshelf bracket set
Our bookshelf brackets work with our wide range of MAXe 200 mm deep metal and timber shelves and lips to create flexible, strong and cost-effective shelving for books and more.

See page 108

Shelf brackets with taller ends
These bracket sets work with all our metal and timber shelves to give you a taller end to stop items falling off or to segregate products neatly.

See pages 108, 110, 112 & 114

Freestanding MAXe Instructions
See how quick and easy freestanding MAXe is to assemble with the instructions in this manual.

Our custom projects, fitouts & installations team made this happen. See page 41 or scan the QR code for more information.

For prices, scan here or visit **shopforshops.com** and enter product code

Did you know we can draw your space and help design the best MAXe solution for you?

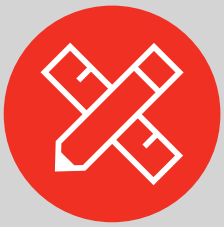

From one bay of MAXe to an entire store fitout, talk to Shop for Shops about our five step process to get the right solution for you...

Consult

We start by working with you to understand your requirements, timeframe, and budget.

We can come to your site, meet in our shops or virtually to get an understanding of how we can help transform your space.

Design

After getting a solid understanding of your needs, we use Revit software to replicate your space into a 3D model so you can see a tailored MAXe solution come to life.

Quote

The design and quotations are produced simultaneously to ensure your budget aligns with the design space. Our itemised quotes allow for complete transparency relating back to plans where any revisions are easy to track and follow.

Delivery

Whether we use national freight companies or our delivery teams we will ensure the product arrives safe and ready for your fitout.

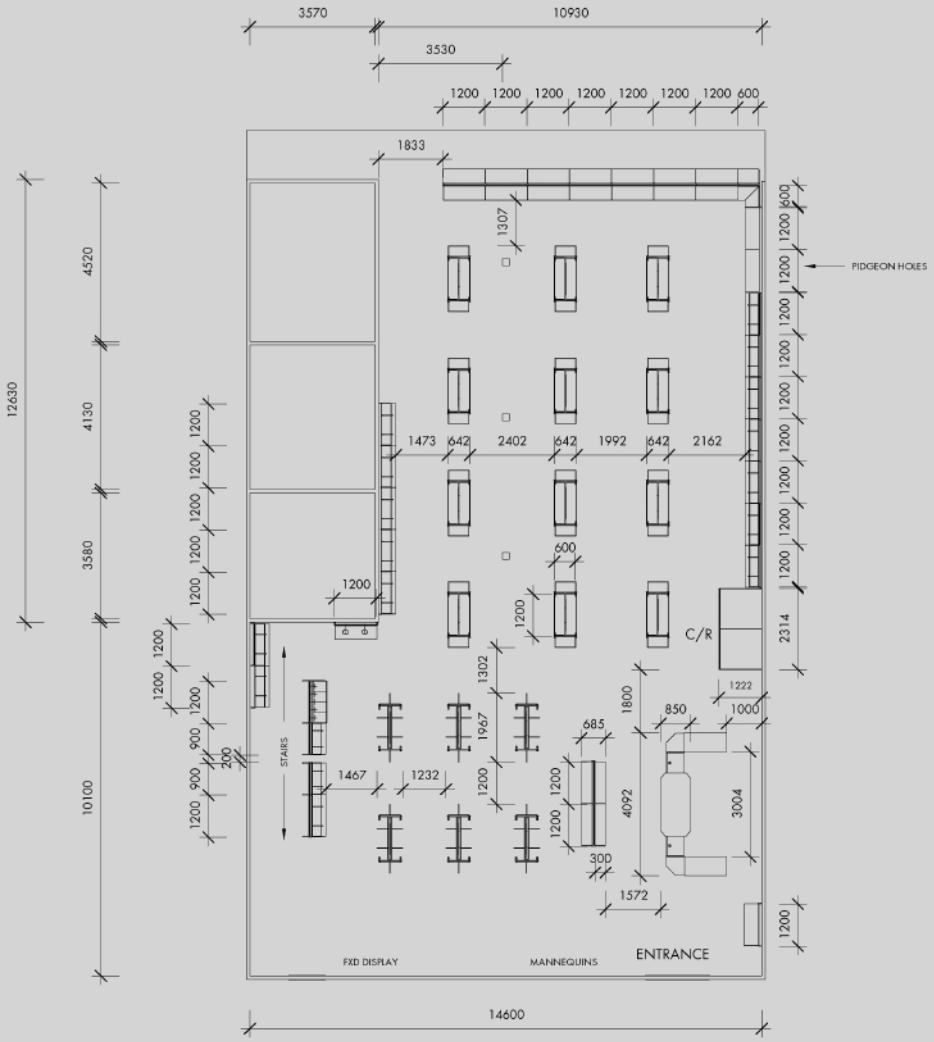

Fitout & Installation

Let us take care of it.

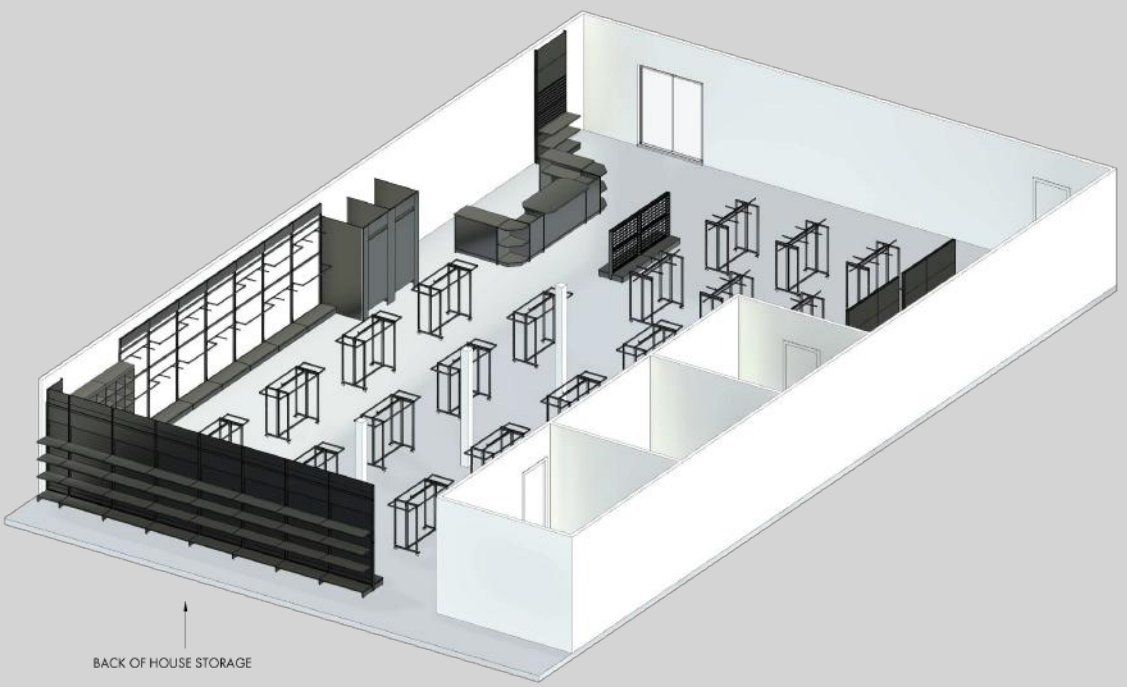

We provide cost-effective fit-outs and installation services and are the specialists at installing our products. We can work with you to organise, manage and complete installations all over Australia.

Talk to us about getting a free design like this...

Want to learn more about projects, fitouts & installations?

Scan the QR code above.

MAXe is easy to install yourself, but if you would like us to take care of it for you we offer installation services.

Freestanding MAXe Instructions

Posts, feet & heels

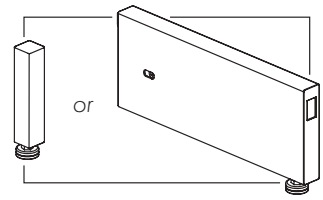

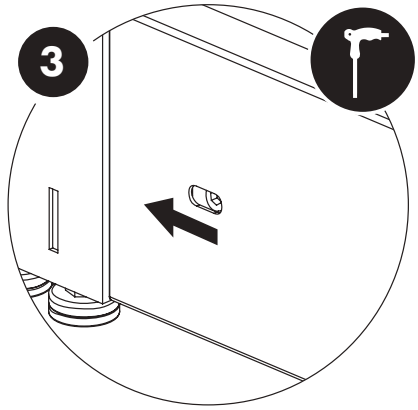

Slide lock into foot using the turn-lock tool.

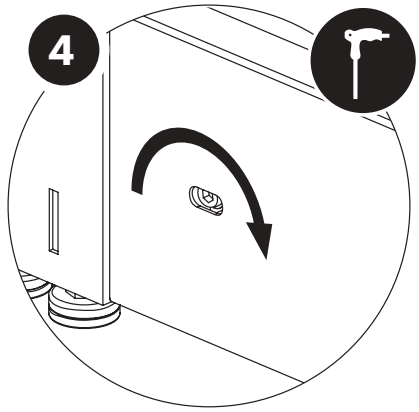

Position post with the underside visible, slide on the foot and heel until the base of the foot and heel are level with the bottom of the post. Use mallet to assist in easing foot into position.

Slide lock into the post using the turn-lock tool.

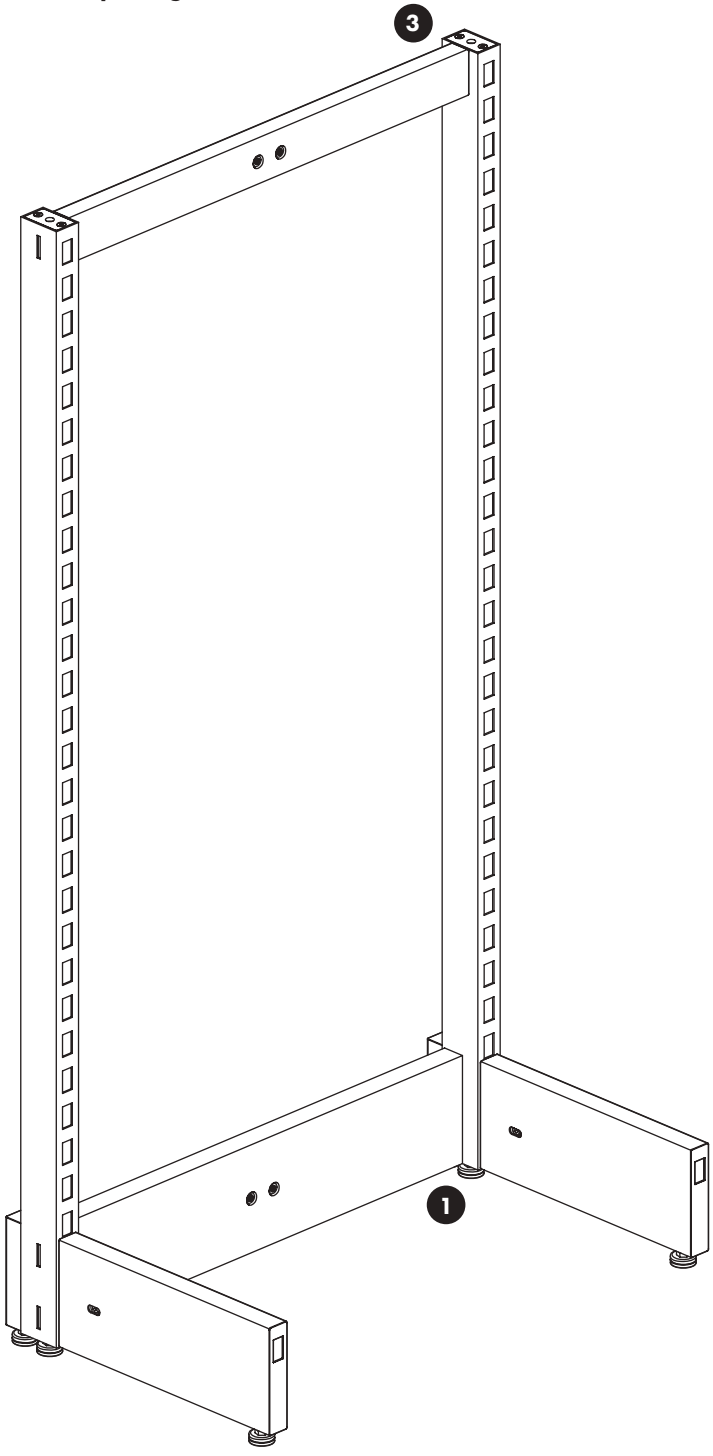

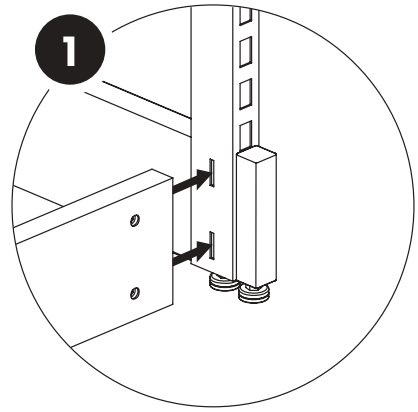

Turn the lock fully (180°) into the locked position.

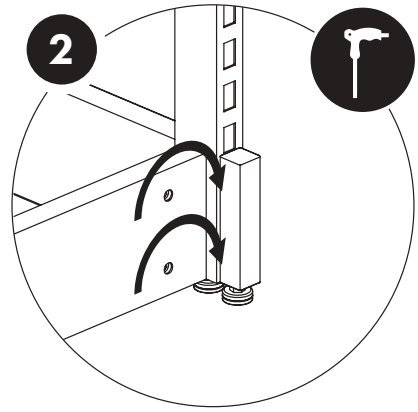

Freestanding MAXe Instructions

Posts & joining rails

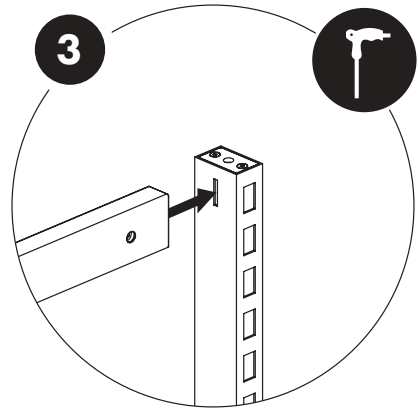

Start with the base joining rail. Insert the locks into the holes on the post.

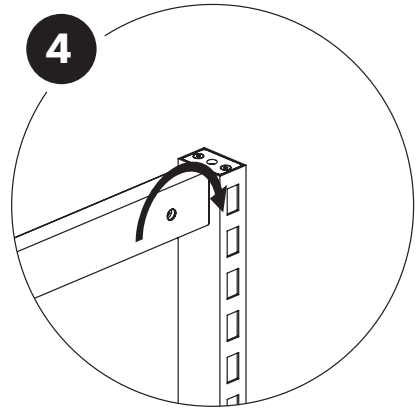

Turn the locks fully (180°) into the locked position.

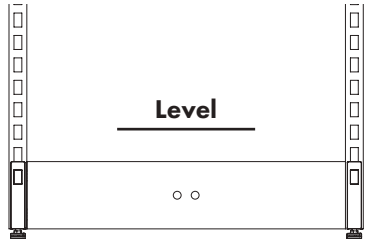

Insert the lock into the hole on the post.

Turn the lock fully (180°) into the locked position.

Important

Ensure the glides under posts take load to the floor and the unit is level in all directions by adjusting the glides under posts, feet and heels.

Finishes

A powder coated finish applied to various types of metal parts.

White sand - *WTS*

A powder coated finish applied to various types of metal parts.

Black sand - *BKS*

A plated finish applied to various types of metal parts.

Chrome - *CH*

A natural veneer applied to shelves, panels and cabinetry.
Natural oak veneer is produced from natural timber. Slight colour variations between natural oak products may occur

Natural oak - *OAK*

A laminate finish applied to shelves, panels and cabinetry.

Ply - *PY*

A laminate finish applied to shelves, panels and cabinetry.

White - *WH*

A laminate finish applied to shelves, panels and cabinetry.

Black - *BK*

Cleaning & maintenance

We recommend regular dusting & periodic cleaning to minimise the effects of weathering. Clean with a damp cloth using a solution of warm water and non-abrasive pH neutral detergent.

Technical information

For prices, scan here or visit **shopforshops.com** and enter product code

Installation

It is important that single sided posts not using joining rails are mounted precisely. Use a level on the post installation jigs (page 44) to assist with mounting posts vertically at a distance of 600, 900 or 1200 mm from centre to centre.

Ensure post are plumb. Use adjustable wall mounts or pack the wall if mounting post directly onto it.

Ensure appropriate fastening hardware is used for the type of wall/ceiling/floor that posts are mounted to.

Glides included with posts, feet, heel & junction joiners must be adjusted to sit firmly on the ground.

Use the turn-lock tool (page 44) when assembling & disassembling joining rails, base joining rails & feet. Ensure to turn fully to the locked position.

When assembling the feet to the post, make sure feet are secured in the correct position so the base of the foot is level with the bottom of the post. Use the mallet (page 44) to assist in easing foot into position.

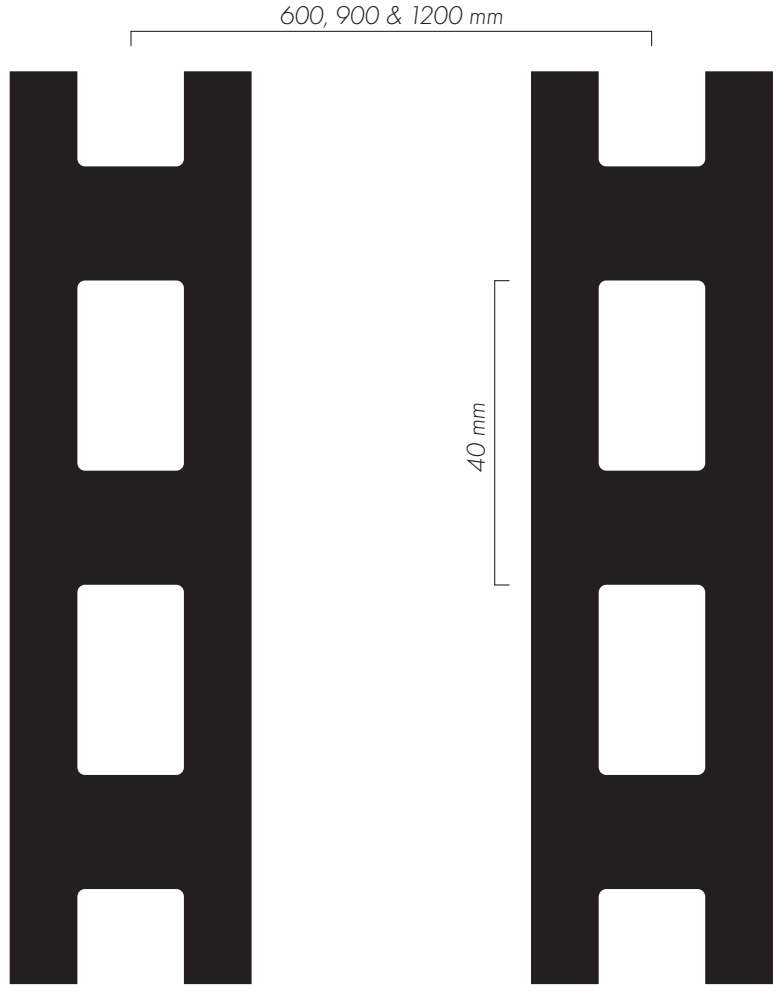

Slide the lock into the post and turn fully to the locked position.

Units

All dimensions are in millimeters and weights in kilograms.

The post has a vertical pitch of 40 mm, meaning accessories and shelving can be moved up or down at 40 mm increments.

D - depth
W - width
H - height
M10 - metric thread size
DIA - diameter

T1234	Sign holder magnetic adaptor	142

Did you know we can draw your space and help design the best MAXe solution for you?

From one bay of MAXe to an entire store fitout, talk to Shop for Shops about our five step process to get the right solution for you...

Consult

We start by working with you to understand your requirements, timeframe, and budget.

We can come to your site, meet in our shops or virtually to get an understanding of how we can help transform your space.

Design

After getting a solid understanding of your needs, we use Revit software to replicate your space into a 3D model so you can see a tailored MAXe solution come to life.

Quote

The design and quotations are produced simultaneously to ensure your budget aligns with the design space. Our itemised quotes allow for complete transparency relating back to plans where any revisions are easy to track and follow.

Delivery

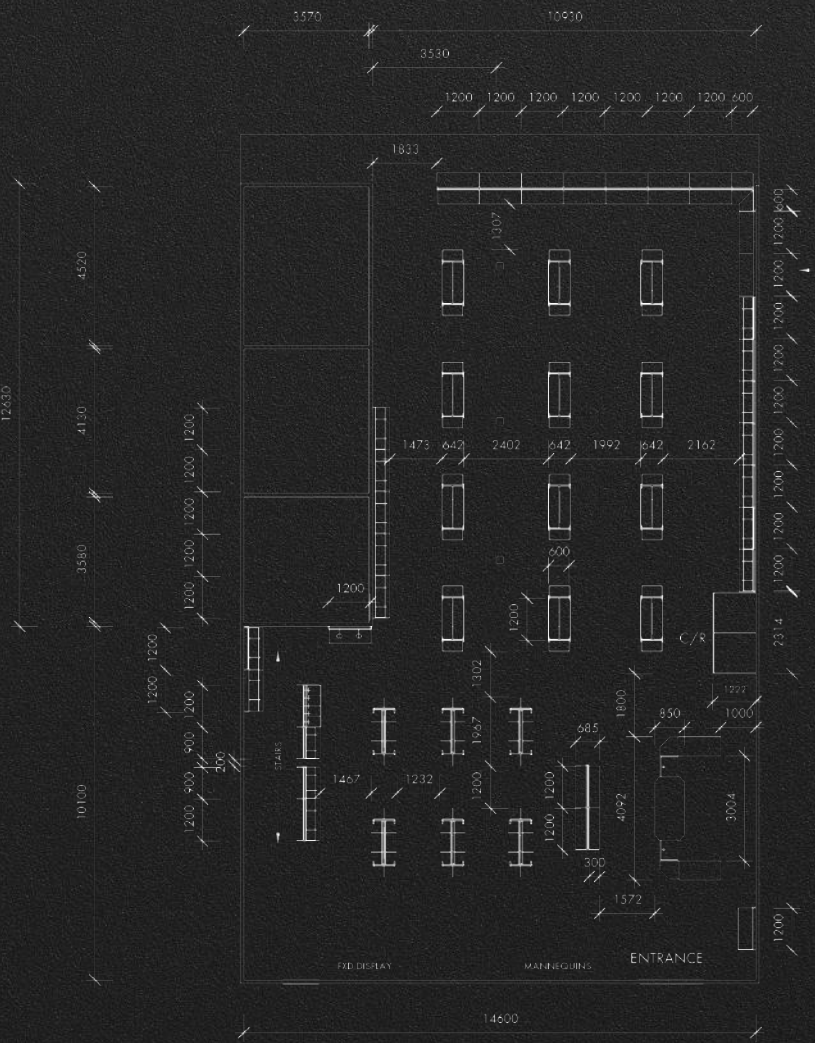

Whether we use national freight companies or our delivery teams we will ensure the product arrives safe and ready for your fitout.

Fitout & Installation

Let us take care of it.

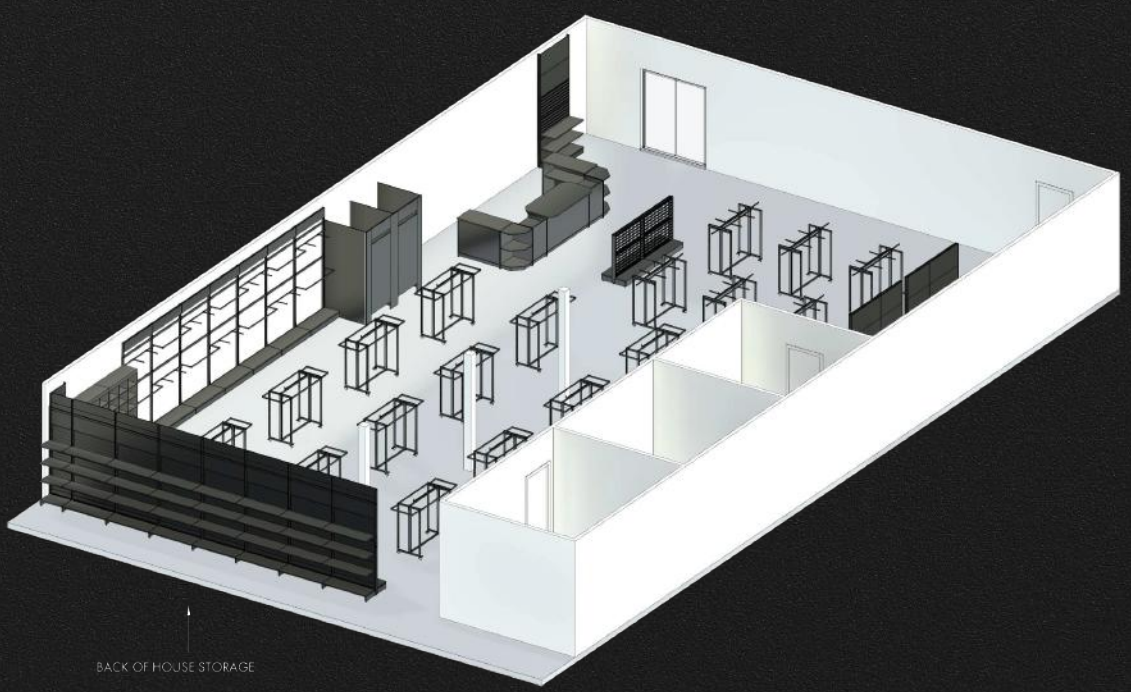

We provide cost-effective fit-outs and installation services and are the specialists at installing our products. We can work with you to organise, manage and complete installations all over Australia.

Talk to us about getting a free design like this...
