WHEELS

DRIVEN BY PERFORMANCE • ENGINEERED TO PRECISION

Torque Wheels, a prominent player in the wheel industry, has emerged to address a crucial gap that existed in the market. Founded upon a visionary dream, Torque Wheels has swiftly transformed that dream into a tangible reality. The company's unwavering commitment to excellence encompasses every facet, placing immense emphasis on craftsmanship, quality, precision, and above all, customer satisfaction. Take a moment to explore our diverse wheel lines, encompassing everything from the rugged Overland/Off-Road category to the deluxe Luxury Truck/SUV segment, one will observe an unfaltering adherence to Torque Wheels' core values. With a relentless drive, Torque Wheels aims to present alluring, robust, functional, and exceptionally high-quality wheels to its revered customers, going above and beyond to exceed their expectations at every turn or obstacle in their way.

Follow us on social media or visit us at TorqueWheels.com to learn more about our products and stay up to date with what's new!

LIMITED LIFETIME STRUCTURAL WARRANTY

Industry Leading 3-YEAR Limited Finish Warranty

Torque Wheels Structural Warranty:

Torque Wheels, LLC warrants to the original retail purchaser that Torque wheels will be free of structural, manufacturing, or material defects, provided they are utilized under normal and intended usages. This warranty will remain in effect for the entirety of the time that the original retail purchaser owns the product. An original invoice or bill of sale in the name of the original purchaser may be required. This warranty is non-transferable.

Torque Wheels Finish Warranty:

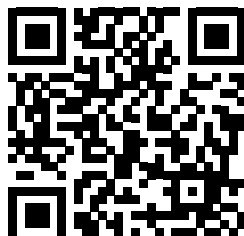

Torque Wheels, LLC further warrants Torque wheels to be free from defects in finish for a period of three years from the date of original purchase. Painted and chrome plated aluminum finishes will be free from peeling or lifting on the face of the wheel for a period of three years from the date of original purchase. This warranty is non-transferable.

This limited warranty is the sole express warranty given and is in lieu of all other warranties, express or implied, whether oral or written. All implied warranties, including, without limitation, warranties of fitness for a particular purpose, are hereby disclaimed.

Warranty Policies:

Torque Wheels, LLC's sole obligation under the Structural Warranty and Finish Warranty shall be to repair or replace, at Torque Wheels LLC's discretion, without charge, any Torque wheel which is returned (freight prepaid) to the dealer from whom the item was originally purchased, and which, after examination is determined that said product has failed in normal use and service due to defects in material and/or workmanship. Replacement or repair of any Torque wheel shall not include installation. Return of defective products MUST be approved in advance and accompanied by a Return Authorization # issued by Torque Wheels prior to any return. All goods must be properly labeled, packaged, palletized, loaded, and shipped with a packing slip listing the Return Authorization #.

PREMIUM MANUFACTURING PROCESSES

**FLOW
FORGED**

- Enhanced structural integrity and performance
- Lighter for enhanced handling, braking and acceleration.
- Balance of strength, weight reduction, and performance enhancement

Torque Flow-Forged wheels are lightweight, high-performance wheels that combine the benefits of both cast and forged wheel technology. Manufactured through a process known as "flow forming," the wheel begins as a cast aluminum wheel that is then placed into a mold and subjected to increased heat and pressure. This process stretches and strengthens the material, aligning the aluminum's grain structure and enhancing its mechanical properties, resulting in a wheel that is lighter and stronger than traditional cast wheels. Torque Flow-Forged wheels perfectly balance strength, weight, and cost, making them a popular choice for performance and off-road vehicles. The process increases the wheel's durability, impact resistance, and fatigue resistance, while reducing unsprung weight, which improves handling, braking, and acceleration. With a design often tailored for both aesthetic appeal and functionality, Torque Flow-Forged wheels offer a premium appearance while being more affordable than fully forged wheels. They are commonly used in motorsports, during automotive tuning, and on everyday high-performance and off-road vehicles.

**ADVANCED
FORGED**

- High-quality T6061 Forged Aluminum •
- Boosts the maximum possible weight reduction and strength •
- Unmatched structural integrity with unlimited design creativity •

At Torque Wheels, our Advanced Forged wheels are high-performance, precision-engineered wheels designed for exceptional strength, lightweight construction, and superior durability. Made from a single piece of high-quality aluminum, the forging process involves applying low heat and intense pressure of up to 30,000 tons to mold the material into shape, resulting in a wheel that is both stronger and lighter than cast alternatives. These wheels are often designed for motorsport and luxury performance vehicles, where maximum performance, handling, and aesthetics are critical. The forging process enhances the material's grain structure, improving fatigue resistance and impact strength, making them highly resistant to cracking and deformation. Advanced forged wheels often feature intricate, custom designs with a high degree of personalization, offering cutting-edge technology and a premium appearance. Their precision ensures optimal balance, while the reduction in unsprung weight contributes to better acceleration, braking, and cornering.
