PORTRAITS THAT REFLECT A RELATIONSHIP

You're looking for a portrait
that feels like them.

The posture.
The expression.
The small details you notice
without thinking.
That spark that makes you smile.

When you see it, there should
be no question.

CUSTOM PORTRAITS

Each portrait begins with observation.

I study structure, movement, coat, and expression not to stylize them but to understand them.

Composition is deliberate, and backgrounds are considered so that every decision supports the subject.

I create portraits that honor the relationship, not just the likeness.

Whether honoring a legacy or shaping one in the making.

This is what matters.

A STRAIGHTFORWARD PROCESS

We begin with a conversation. You tell me about your dog and what feels true to them. I guide the direction so nothing feels overwhelming.

Before I begin painting, you'll see the concept. Composition, background, and tone are refined together. There are no surprises.

The portrait is painted digitally, then printed on canvas and finished by hand. Each piece is completed carefully before it leaves the studio.

When it arrives, it's ready to hang. Framed or gallery wrapped.

STORYSCAPES

Layered environments that place your dog within a meaningful setting. Whether rooted in heritage or landscape, these portraits carry narrative depth. Light and atmosphere become part of the story.

SIGNATURE PORTRAITS

A classic composition with a refined painted background. Focused on expression and presence. Designed to feel timeless in your home.
