SJ-220 Portable Surface Roughness Tester

This is a portable measuring instrument that allows you to easily and accurately measure surface roughness. The Surftest SJ-220 offers you the following benefits:

- Robust design, yet comfortable handling
- Skid system gives you user friendly and intuitive menu navigation via touchscreen.
- It works independently of mains power, allowing you to make on-site measurements.
- The 2.8" high resolution LCD touchscreen gives you excellent readability.
- Roughness analysis conform to various international standards
- (EN ISO 21920, EN ISO 4287, ISO 13565, ISO 12085, VDA, ASME, JIS)

UPGRADE TO PRECISION COLLET CHUCKS

Features and Benefits

- Excellent concentricity in the system (chuck + collet + clamping nut)
- 3 µm radial run-out with a 2 µm clamping nut, 6 µm radial run-out with a 5 µm clamping nut
- Extremely strong holding force (increases the holding power by at least 60% compared to standard ER chuck)
- Plain clamping nut without grooves for high speed machining
- Balancing Quality – 25000 RPM.

UPGRADE TO SYNCHRONIZED TAPPING CHUCK

Features and Benefits

- Synchro tapping chucks compensate synchronisation errors.
- Minimal length compensation on compression and expansion balances very small pitch differences between synchro spindle and tap, which can cause high frictional forces on the thread flanks.
- A possible increase of axial force during the tapping process is reduced to a minimum.
- Suitable for internal coolant.
- Coolant pressure up to max. 100 bar.

THOR
SOFT FACED HAMMERS

COPPER/RAWHIDE HAMMERS

Thor copper and rawhide hammers are designed for powerful yet surface-safe striking across industrial, engineering, and maintenance applications. The dual-material heads combine a copper face for firm, controlled impact with a rawhide face for cushioned, non-marring blows, giving technicians the flexibility to match the hammer's response to the task.
