FELTOUCH
TERRAZZO COLLECTION

TerraTrace®

Feltouch specializes in PET felt with advanced fibre & non-woven textile technology.

Feltouch designs high performance acoustic absorbers using unique & smart designs for all interior spaces to improve speech intelligibility, well being, concentration and performance.

Driven by circularity principles, Feltouch, transforms waste into value through innovative design and sustainable practices. The Zero Burn initiative exemplifies this approach by reintegrating production scraps from our 50% recycled PET felt back into the industry as acoustic materials.

Specify the solution, not the problem.

TerraTrace® is Gardi's first collection of biodegradable and closed-loop interior products.

TerraTrace qualified products are biodegradable in a municipal landfill or in ocean water, or they have a closed upcycle guarantee.

Interiors Associates, supported with quality products from Felisach, empowers you to rethink sustainability.

Interiors Associates, in partnership with Felisach offers eight acoustic wall panel, divider and lighting patterns under the Sense collection.

1. Dragon
2. Flax
3. Parallel
4. Wavy
5. Wavy Mono
6. Wavy Layer
7. Wavy Triplex
8. Wavy Cloud & Cloud Lighting

Sense

Bold accounts surfaces with modular designs and striking visual depth.

The Sense Commerce application PFI that design with a focus for understanding perspective. Created with advanced PFI technology, Sense means distinct commercial experiences while coping with today's diverse trading conditions.

Filtouch is one of the leading companies in creating PET for production and design. The company is founded on principles of innovation, increasing customer service and increasing societal environmental protection. The company is committed to increasing the product portfolio features through ongoing research and development efforts that ensure it is able to offer a wide range of innovative, advanced packaging designs and solutions for production with the highest quality performance.

SUSTAINABILITY

The goal is sustainability in PET packaging across all of products we create by incorporating 100% recycled PET and Polypropylene (PP) with no chemical additives and certified bio-based oil products. Filtouch can supply clear, light to dark blue, translucent, and frosted PET created by using renewable energy resources.

ACOUSTICS

All products are acoustically sound, allowing for sound blocking in the markets that require that innovation in supporting the advancement of sound separating products that can better maintain control during the most sensitive stages.

The offer a diverse range of products that meet in various acoustic needs.

DESIGN

At Filtouch, PET can design an intelligent part of the company, strong in innovation, resources that have become well in work designs, software, master designs and being designed to offer the best possible outcome, ensuring ongoing and innovative solutions for success.

DESIGN

ABOUT PET FELT

- PET felt is 100% recycled content, 100% recycled from PET bottles.
- The material is produced with care without including without any chemical additives from production to end use.
- There are no extra costs than 80% of the content recovered. It has a sustainable and purely ecological structure and a security/hygiene.
- PET felt is easy to clean and maintain.

MAINTENANCE & CLEANING INSTRUCTIONS

- Follow care only
- Cleaning methods

Dry cleaning

Wipe down with a damp cloth

Steam cleaning (only when needed)

- If a spillage occurs, follow the below steps:
 - Dry the liquid with a dry cloth so soon as possible to prevent absorption.
 - To remove stains, remove amounts of water not be applied to the surface with a cloth without rubbing. Excessively water is sufficient to remove light stains.
 - If the stain does not come off with water, a mild detergent may be used. Avoid harsh detergents.
 - If the product is portable and small enough, it is best to take the surface off professionally by cleaning company.
 - Lastly, dry it with a dry towel or let it air dry.
- During/after cleaning process, avoid pressure forces and rubbing as it will continue the filling process and change the appearance of the felt surface.
- It is recommended that the cleaning method be executed on a regular basis.
