Kettal is a family business established in Europe in 1966.

All of our products are manufactured 45km from Barcelona in a small coastal town. We pride ourselves on our European made quality. In-house manufacturing allows us to pay close attention to detail and gives us the ability to meet our clients' customization requirements, making each piece of Kettal furniture unique and exclusive.

The importance of research – both scientific and technological – has always been at the forefront of our product development. The high-quality products we offer today are the result of our spirit of innovation.

We have our own state of the art manufacturing plant where the product is designed, manufactured and tested locally.

Our manufacturing processes involve intense manual labor and 85% of Kettal products are handmade. Our handmade ethos means that we build strong yet beautiful Kettal pieces that display an exquisite attention to detail.

Altar

by Miguel Milà

Miguel Milà designed this table in the mid-sixties as an altar for his wedding. It later became a table for everyday use, but was never produced. As if he were a master craftsman, Miguel Milà designed this piece based on the art of simplicity and efficiency. Its shape hides its complexity, but at the same time reveals the wood's own character, giving it life and prominence. Its constructive logic makes it strong enough in terms of structure, but formally a beautiful piece. The beauty of logic and common sense understands neither time nor trend.

Arc by Kettal Studio

The Arc collection features an enveloping backrest based on fundamental geometry: a constant radius arc. It shows restrained, elegant proportions. The light aluminium frame clearly expresses a desire to maintain armchair tradition.

The backrest features simple yet sophisticated braided strips, while the seat is padded with polyurethane foam covered in matching fabric and the fabric cushion has a removable cover.

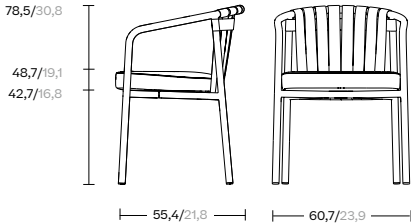

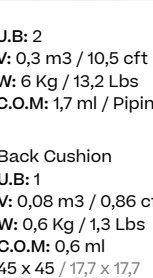

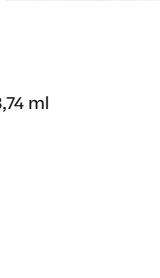

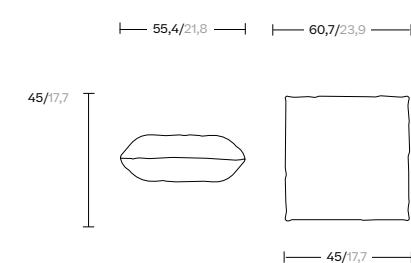

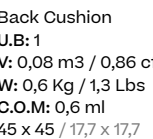

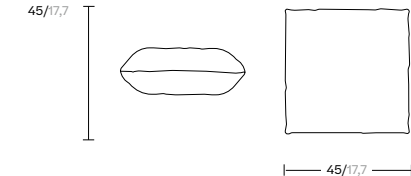

The collection is used mostly in hotels, in lobbies and rooms, on cruise ships and also in domestic settings as light furniture in sofa and dining areas.

Band

by Patricia Urquiola

The idea behind the Band collection is the breakdown of structure.

An object designed using an ensemble of pieces.

The chair's design intentionally challenges the classic sophisticated lines of furniture design and becomes something schematic, a conceptual programme.

A structure made up of repetitive angular shapes that give centre stage to its raw materials, and can be formed entirely of aluminium or teak wood.

Padded seat and backrest, in Terrain laminate fabrics.

Base Kitchen by Kettal Studio

This modular kitchen structure offers infinite solutions. An aluminium supporting frame can be teamed with a number of stoneware modules in various combinations whilst maintaining its authentic linear design. This design features clean, smooth surfaces, with no corners, for easy cleaning and maintenance. It is available in two types of stoneware and wood finishes for the doors. The modular aluminium structure comes in black only. Along with basic kitchen functions, it has a gas barbecue and can include several burners with a support for a wok. It can also include a bar.

Basket

by Nanna & Jørgen Ditzel

In 1950 Nanna and Jørgen Ditzel created an unusual bowl-shaped seat, essentially creating a basket hanging from a light oak frame. Achieving a chair design that blended the seat and backrest into a bowl form and consistent with a shell, the Basket chair is outstanding for being organic in its form and its materials. The craft material and painstaking skill used in making the rounded form, along with the chair's pure lines, give a sensation of comfort and luxury in a seat that allows a variety of positions.

Bitta

by Rodolfo Dordoni

Kettal Bitta is characterized by a combination of aluminum and teak frames, seats of braided polyester and comfortable cushions, with teak or stone table tops - all while using all waterproof materials. “The intention of the designer was to create dense braiding that would still let the air through, reminiscent of the braiding of the ropes used to moor boats (hence the name Bitta, which means ‘mooring’ in Italian), which makes the pieces look lightweight but, at the same time, they look just like cozy nests in natural colors to sit back and relax in.”
New Bitta finishes : Aluminium legs, Teak legs, Bela ropes, Parallel fabrics.

Bitta Lounge by Rodolfo Dordoni

Bitta, designed in 2009 by Rodolfo Dordoni, is one of those collections that create a product type in the outdoor furniture sector. But it is also a living product that can be updated and reinvented over time. This is accomplished naturally thanks to its form and rational concept. For this reason, without compromising the initial concept, we are extending the family with a new version and all the brand's standard finishes that we have designed over these almost ten years since Bitta was launched.

The new Bitta Lounge features a gentle, rounded design with sizes and proportions appropriate for small spaces.

Materials

- Aluminium
- Rope
- Teak
- Stone

Boma

by Rodolfo Dordoni

The Boma collection, designed by Rodolfo Dordoni for Kettal, was born from the need of high performance of the outdoor environment, without sacrificing the increasing demand for comfort that new products have to face. Therefore the structure is organized around a frame made entirely of aluminum, capable of hiding in the essentiality of its lines either the quality of the used materials and the chance of easy articulation in different compositions. On the base of this flexible and light support, soft seats, made of large cushions and different modularity, take place. The textile upholstery, that nowadays has nothing to envy to solutions for interior, completes the warm and cozy feeling the product was meant to communicate. We are facing a real system, capable to easily fit various situations and to be composed in several typologies of products.

Cala

by Doshi Levien

‘Cala’ is a high backed armchair inspired by the iconic Emanuelle. The chair has a majestic spatial presence with transparent and light surfaces. The open weave of the rope provides a latticed window for visual privacy while maintaining a connection to the natural elements. ‘Cala’ may be used for outdoor dining as well as a chair to lounge in. The wide selection of metal coatings, rope colours and cushion fabrics offer many possibilities to tailor the identity of the chair to suit different projects. Cala’s seat frame is made from coated aluminium sections. The weave is knitted rope. The chair comes with two options of teak legs or an aluminium pedestal base.

Cala collection includes a dining chair, a series of tables, low footstools, two and three seater sofa. The dining table has a monolithic and bold presence, providing contrast to the lightness of the chairs. The same frame construction can be recognised in the low tables and foot stools.

Il Colonnato by Mario Bellini

In this project, Mario Bellini took his inspiration from a basic elemental structure in architecture. His design emulated the colonnade of classical architecture, in which a sequence of columns supports a portico, in this case a table top. The base is a visually closed volume, despite being materially open.

When seen from a different viewpoint, perception changes completely, as the columns no longer overlap and the space appears empty.

It was initially designed exclusively in a classic material such as marble, however, Kettal incorporates two other materials, for its more contemporary version.

Materials

- Teak
- Marble
- Minera stone

Eolias

by Antonio Citterio

Eolias Collection by Antonio Citterio, inspired by the breathtaking archipelago located off the coast of Sicily. This versatile collection includes a range of indoor and outdoor furniture pieces designed to elevate any space.

One of the collection's highlights is the Eolias Salinas series, which features a chair, club chair, and club lounge chair made from sturdy aluminum with a woven wicker detail. These pieces come in both indoor and outdoor versions, with the indoor chairs available with or without wheels for added convenience.

Giro

by Vincent Van Duysen

Giro, a very versatile and wide collection composed of armchairs, tables, sofas and club chair as well as coffee tables.

The combination with teak gives it a very natural, authentic aspect.

The materials are the protagonists of the collection, which seems almost not designed, it comes naturally together. Therefore, the attention to details is essential. That's why we attached a deep attention to the intrinsic qualities of each material: the pattern of the rope (twisted), its thickness, its stitching and sewing details. But also, the joinery details, definition of edge radius and sections of the teak.

In Giro, we have some variety of shapes, textures and materials (see the difference between the seating items and the coffee and side tables).

And still all the items merge harmoniously together to create a warm, tactile and pleasant atmosphere.

Giro is a collection which can blend into interiors and exteriors due to its tactility and pure lines. It's somehow related to the architectural work of Vincent himself.

Grand Bitta, By Rodolfo Dordoni

Crafted from a blend of ropes, teak, and aluminum, this stunning piece is fully customizable with a range of rope and fabric colors to suit your style. Designed with outdoor lounging in mind, the Daybed's generous size and comfortable design make it the perfect addition to any patio or poolside. Enjoy luxurious relaxation in style with the Grand Bitta Daybed.

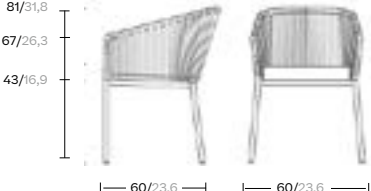

The Grand Bitta collection features a unique combination of aluminum and teak legs, seats made of braided polyester, and comfortable cushions, with teak or stone table tops, all crafted from waterproof materials. The designer's intention was to create a dense braiding that would allow air to flow through, evocative of the braiding used to moor boats (hence the name "Bitta," which means "mooring" in Italian). The result is a collection of pieces that appear light and airy, while also providing cozy, natural-hued nests to unwind in.

Materials

- Ropes
- Teak
- Aluminium

Maia

by Patricia Urquiola

Using an architecture that keeps its surroundings in mind, Patricia Urquiola's Kettal collection has a natural lightness and elegance to it. The design of the artisan braiding, the sturdiness of the aluminum frame, and the new fabrics create a combination that oozes energy. The collection was hailed as one of the most representative designed of our century.

Mesh

by Patricia Urquiola

This collection combines natural and industrial materials, hard and soft surfaces, as well as transparent and opaque appearances. The expanded metal used is reminiscent of building facades that let in light and air, while keeping the elements out and provides support for the cushions. The slight slope of the sofa armrests lends delicacy to this industrial structure. The sofa's slight wooden base and ample upholstery resemble a costly living room, only, for outdoors.

Materials

- Deploye aluminium
- Teak
- Fabrics

Molo

by Rodolfo Dordoni

This is an example of a modular sofa in its purest form. Its orthogonal geometry is based on a rectangular modularity design, which means it can be easily adapted to suit any situation and optimise the space in which it sits. Each module can be taken apart and re-organised, creating new uses and configurations. The design is aesthetically minimalistic with intentionally oversized pieces. On the other hand, the decorative elements have conscientiously not been emphasised in order to give centre stage to the various combinations of fabric, colours and carefully selected details. “Molo, or pier in English, jetée in French and embarcadero in Spanish, is a structure built on the shores of an ocean, sea, lake or river which extends from the land over the water; a mooring place for boats, a rest between trips and a refuge from the swell of the waves. A return to terra firma and people. Molo by Kettal offers a place of relaxation and reconnection.”

Pad by Kettal Studio

Kettal has made deck chairs for decades, and always of the same excellent quality. This enables us to offer a product that garners all that experience: comfort, durability, stackability and so on.

Pad is a sturdy, long-lasting deck chair system designed for relaxing in comfort. It is built to withstand continued use. The sturdy seat guys and backrest can be easily changed. The ample seat surface and sandwich-style structure make it exceptionally comfortable. With a stretch guy attached to the aluminium frame and optional cushions that add extra comfort.

Paladin

by Konstantin Grcic

Paladin is a wooden parasol for domestic and public use. Its canopy appears to be floating on top of an elegantly shaped mast. The design employs a mechanical principle which incorporates the tension of the canopy into its structural logic. With only the mast and four movable struts, the textile absorbs the tensile forces of the parasol when unfolded.

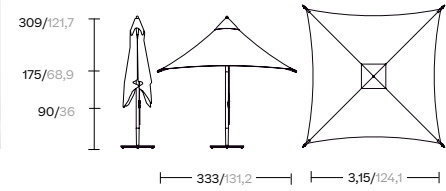

The mast goes right through the center of the canopy, leaving a central hole that is acting as an indirect skylight and allowing for air circulation.

The wooden elements are made in natural teak with a reinforcing core in aluminium. The mechanical joints and fasteners in aluminium and stainless steel are designed to minimize the material input while offering maximum performance.

Park Life by Jasper Morrison

Park Life is a complete family of furniture for outdoors whose clean-cut profile is adaptable to a wide range of different scenarios. Lightweight, yet extremely durable, Park Life chairs easily stack for transport or winter storage. With its technical sophistication and careful consideration of ergonomics, besides plenty of care over its looks, the Park Life collection was designed to ensure a long life both structurally and visually.

Plumon, by Patricia Urquiola

Inspired by the concept of dressing and undressing furniture, this collection features elegant and versatile pieces that add sophistication to any living space. Our stackable teak chair with two cushion options offers both comfort and versatility, perfect for outdoor settings. The new Club armchair, a stylish and versatile chair, the perfect blend of form and function, adding sophistication to any space.

The ceramic side table with Glaze finish adds a unique touch to your living space, available in a range of colors to suit any style. Meanwhile, the central ceramic table is a true statement piece, also available in Glaze colors, with a striking design and eye-catching finish. Each piece in the Plumon collection embodies the perfect fusion of form and function, with exquisite attention to detail and premium materials. Whether you're looking to create a stylish outdoor oasis or elevate your indoor living space, the Plumon collection has something for everyone.

Tonale Boucle (laminate & no laminate)

Ringer

by Michael Anastassiades

The Ringer Collection is the first collaboration between Kettal and Michael Anastassiades, and was conceived as a minimal approach to Café dining furniture. The title references the traditional Game of Horseshoes, and links to the gesture of the armrest sitting on top of the legs. Michael made use of Kettal's expertise in aluminium fabrication to create a robust collection which is still easy to move and rearrange. The focus is an Armchair with a singular arm and back element. There is a slight flaring on the opening of the armrest as a subtle invitation to occupy the seat, echoing the traditional Chinese Horseshoe Back Chair. The challenge has been to make the individual elements which compose the chair to appear as if they touch without visible joints, yet providing sufficient structural support.

Riva by Jasper Morrison

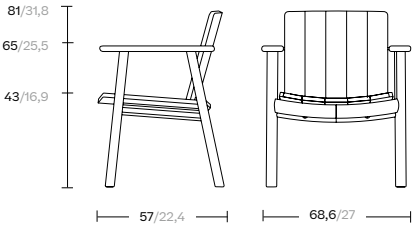

The Riva collection of outdoor furniture is above all about achieving a certain atmosphere for the better enjoyment of outdoor space. The plank construction of seat and back follows a long and varied tradition of outdoor chairs made in similar ways, and which in this case provide a high level of comfort and good looks!

Roll

by Patricia Urquiola

Using a unique intervention of conventional upholstery, Kettal converts an average backrest into two independent 'wraps' connected by colorful straps. These straps are connected to the aluminum structure by means of two pins, allowing our clients to easily remove them during the winter time. The seat cushion is supported by a semi-transparent micro fabric, allowing the aluminum frames to support the protagonist of our chairs: the cushion.

The design of side tables could be considered postmodernist, given its basic yet unexpected forms. The tables are built following a graphic pattern which appears in all of the collection's pieces, a pattern in which various materials - metals, concrete and wood - are joined together in unique and unusual ways.

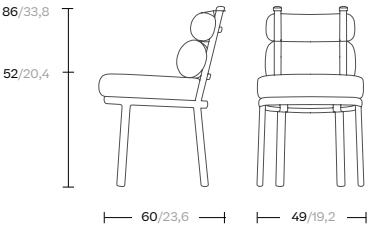

The table tops are made up of different materials such as aluminium, Glaze, teak wood or marble, while the base, resting on architectonic concrete, is made of intentionally-oversized aluminium.

Stampa by Ronan & Erwan Bouroullec

“When we started the collaboration with Kettal, our first idea was to make an aluminium chair that was both sturdy and delicate at the same time. A chair that could assume the passage of time. With Stampa we have developed a full-body aluminium chair combining several aluminium manufacturing techniques.

The injection-moulded ring connects the stamped seat, the back and the hydro-formed legs and reinforces the whole shell. A calyx shaped metal shell is inhabited by carefully organized holes made by the technique of punching metal sheets. This allows to create delicate shapes that recall textile sensations and are robust enough to stand the test of time – also in an outdoor environments. Like a pair of leather boots, we wanted the chair to change organically with the use over the time.

An additional seat cushion is available. All versions are suitable for outdoor and indoor use.”

Superfan

by Michael Anastassiades

Superfan is a tri-blade fan whose geometry is simply defined through three angled blades, meeting at the rotating axis. All design decisions are made to maximise performance and improve efficiency: the angle of the blades, the lightness of the aluminium material and the selection of the motor for accurate speed control and quiet function. The two fan versions operate with equal efficiency both with and without a pendant, offering flexibility of use for different ceiling heights.

Materials

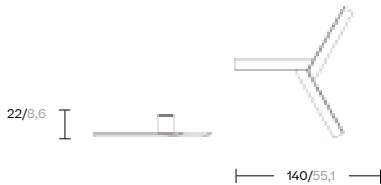

- Aluminium

Tou

by Naoto Fukasawa

Tou is our modest tribute to the ancient handicraft of rattan and reed wickerwork, an essential element in the development of both Western and Eastern cultures. Historically, it has been used for all kinds of domestic utensils, furniture and more. The materials are simple and completely natural, but the internal structure of the stem consists of hundreds of cavities, making it both strong and light.

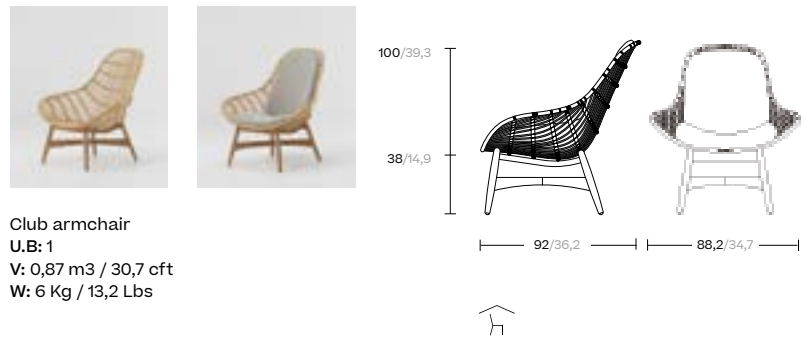

The manufacture combines traditional manual techniques with much more industrial processes. Instead of using the most common form of weaving, we use striped vertical lines, which are lighter and much more expressive than mesh. The outline is smooth and soft, following the natural shapes provided by the material.

Vieques by Patricia Urquiola

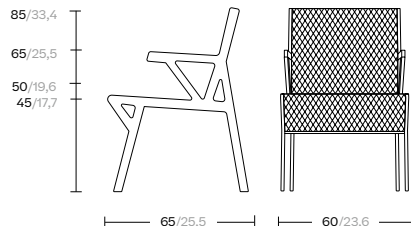

The search for a combination of natural patterns applied to the industrial world were found in simple objects seen under a microscope, such as a coffee filter. With this inspiration, an innovative fabric is born. Both style and texture is applied as a developing layer to the aluminum frame of armchairs, sofas and rocking chairs. While, at a macroscopic level, a layer is formed from a three-dimensional braid tripled in thickness, altering the visual perception and giving rise to the creation of the outdoor mat.

Village by Jasper Morrison

From all outdoor situations to the grand cafe, the Village chair pays respect to the long standing codes of metal stacking outdoor chairs while also providing a refreshing look. The lightweight aluminum structure allows easy handling while the neutral language of its form takes nothing away from the scenery.

Vimini

by Patricia Urquiola

The Vimini collection came about following a conversation we had about Nanna Ditzel and her Basket chair; apart from both being designed by women, we have much in common. We called it Vimini because it means wicker in Italian and it sounds like Bimini, an island I like. We used just the right amount of outdoor wicker with a rougher wooden frame. It doesn't have the same modernist spirit as the Basket but it's familiar enough that, when you get close, it stirs a memory and makes you feel at home. That's what it was, more or less—an object of memory.

The chair consists of a basket with large backrest cushions. Seen from the side and back it has that modernist look. The braiding is traditional, your classic outdoor fiber.

'I fancied something really traditional, something a bit modernist, relaxed in the way we treated the fibre. And the Vimini, the chair with its classic braiding and baskets, it's captivating, and we wanted to make something neutral'.

VDL Pavilion by Dion & Richard Neutra

Kettal introduces the VDL Pavilion, which measures 12 x 4 m and with the original colors.

Under the supervision of Dion Neutra, Richard's son, we have used updated construction methods and materials while respecting all of the house's original details.

An automated smart home system has also been designed to control the lighting, air conditioning and heating, among other things.

Materials

- Aluminium
- Ceramic
- Glass
- Oak

H Pavilion

Experience the ultimate in outdoor living with the Outdoor Pavilion H - the fully configurable pergola that's taking the market by storm. With a range of new components that are sure to impress, including a new bioclimatic roof with cutting-edge technology and a sleek, redesigned shape, a waterproof aluminum roof, a polycarbonate roof, new canopies with slats, stylish louvers, new aluwood carpentry, and a glazed side, this pavilion is the perfect way to create a customized outdoor oasis that's uniquely yours.

But that's not all - the Outdoor H Pavilion is now smart home compatible, which means you can control everything from the lights to the fan with the Kode app. And with the ability to configure your pavilion to your exact specifications, you can create the perfect outdoor space for relaxing, entertaining, or anything in between.

Whether you're looking to create an intimate outdoor retreat or a spacious entertainment area, the Outdoor H Pavilion has everything you need to make your vision a reality. So why wait? Upgrade your outdoor living space today with the ultimate in customizable outdoor living - the Outdoor H Pavilion.

L Pavilion

by Kettal Studio

Landscape aims to be part of a project. It is not understood as an item apart, but instead relates to its environment and melds with it. It is the project that is important, not the product, and this is it's essence. It's rationalist construction seeks to give order, form and structure to the outdoor space, although, in terms of function, it has been designed to give shelter: to shade and cool or protect from the rain and wind.

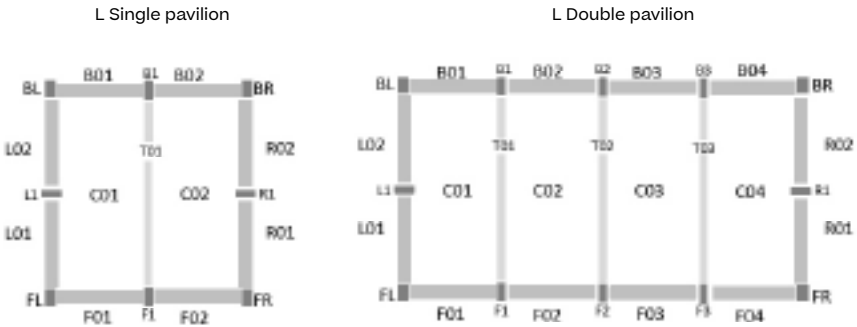

Materials

- Aluminium
- Teak
- Red Balau
- Canadian Cedar

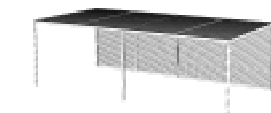

INSTRUCTIONS

1. Select frame: single or double.
2. Select ceiling type and location.
3. Select side closure type.Various types are available for each side. Please consider incompatibilities shown in table.
4. Select floor (optional).

Incompatibility between side panels and ceilings

Cottage

by Patricia Urquiola

“Cottage is a charming spot, a place in which to relax in comfort, meditate, rest or simply pass the time in the company of a good book, enjoying the air and the light, the definitive refuge in which to enjoy the outdoors.”

- Materials**
- Aluminium
 - Canadian Cedar

Lounge Pavilion by Kettal Studio

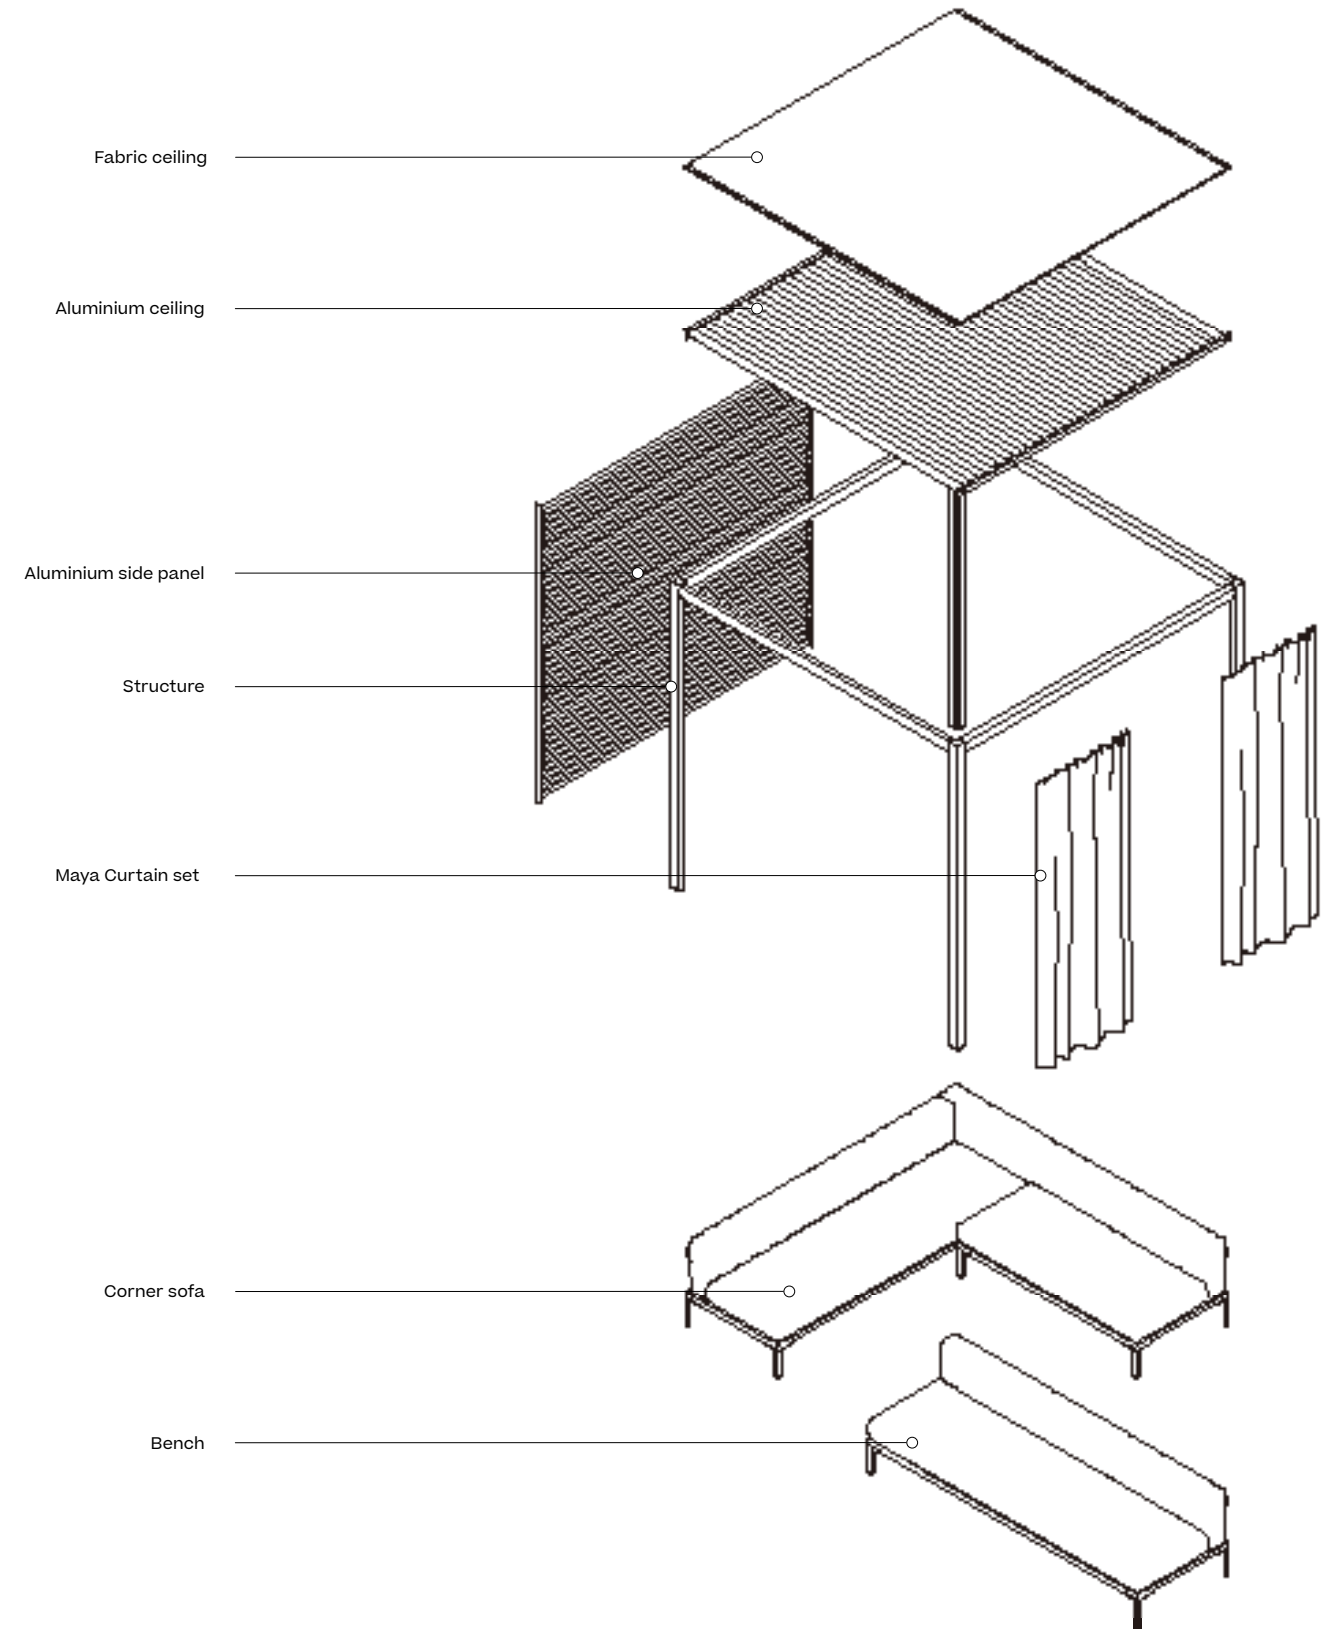

Landscape aims to be part of a project. It is not understood as an item apart, but instead relates to its environment and melds with it. It is the project that is important, not the product, and this is its essence. Its rationalist construction seeks to give order, form and structure to the outdoor space, although, in terms of function, it has been designed to give shelter: to shade and cool or protect from the rain and wind.

Materials

Triconfort

The love for detail, the passion for creativity and the ideal that furniture should last a lifetime; these are the principles on which TRICONFORT was established. An adventure that began in 1950 in Paris, a city in the throes of a transition and awaiting an imminent period of technological and social change.

Today, sixty years later and with aesthetic codes and production systems that are a far cry from what had gone before, our values remain intact, our history inspires our designs and that seething Paris of 1950 is still our trademark.

Enea

by Kettal Studio

This design comes from the traditional chairs made of bulrush (enea) this universal design is very common in different parts of the world: from Mediterranean areas until places in north of Europe. Throughout the years many updated designs have been made: wood, plastic. Triconfort enea is an outdoor version made in aluminium with synthetic fibers.

Riba

by Kettal Studio

Riba is a declaration of intentions and a clear tribute to designers such as Jean Prouvé, George Nelson and Friso Kramer. This collection mixes ancestral techniques such as the braiding of natural fibres with aluminium, a material that had its heyday in the fifties. Now, the metal frame replaces traditional wood, while natural fibre has been replaced with a synthetic material in order to provide greater weather resistance.

1950 by Kettal Studio

The 1950 collection combines wrought iron work with 21st-century technology. The pieces, formerly shaped from heavy iron, are now ingeniously produced with aluminium, a much lighter material that is more weather resistant. Like any good design, their aesthetics come from their structure. A tribute to civil works built in the second half of the 19th century.

Finishes

The importance of research, both scientific and technological, has always been at the forefront of product development. The highly innovative nature of the brand means that today one can enjoy a high-quality product.

Kettal, loyal to its philosophy of respect for the environment, uses eco-friendly paint. Almost all of Kettal's furniture paints are now 100% ecological and recyclable, and the wood used is protected under Perhutani certification.

Materials

Aluminium
electro-paint

Aluminium is one of the most corrosionresistant metals in existence. Kettal selects and continuously controls its raw material aluminium in regard tochemical composition, hardness and elasticity through stress, bending and temperature tests. Once selected, the aluminium is painted with polyester powder (used in the automobile industry) applied electrostatically. This finishing process lends superior surface quality and weather resistance.

Concrete

Architectural concrete made out of concrete resin. This material provides an aesthetic finish, which allow us to find the exact smoothness and color we require for our collection. Most importantly not losing the properties of concrete, which gives the architectural feeling to the product.

Ceppo di gre

Ceppo di gre is a typical Italian stone which its origin comes from the mountains of Lombard, it is recognized by its elegance and exclusivity featured by its large pebbles. We provided in a gres finish, since we get the beauty of the material combined with the properties of gres, including skid resistance and high performance. The Ceppo di gre is an ideal option for exterior usage.

Stone

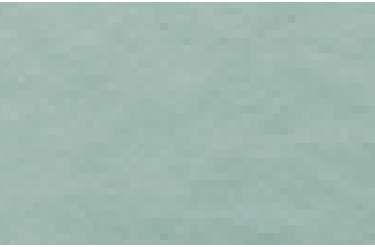

Unlike surface-dyed fabrics, the fabric colour is impregnated into the fibre during manufacture, providing exceptional resistance to wear and tear caused by chlorinated and salt water, sunlight and moonlight.

Minera stone

Architectural concrete made out of concrete resin. This material provides an aesthetic finish, which allow us to find the exact smoothness and color we require for our collection. Most importantly not losing the properties of concrete, which gives the architectural feeling to the product. Water repelent

Glaze

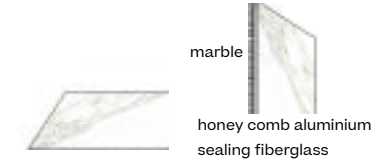

It is a painting finish developed and used exclusively by KETTAL. The concept is to apply a finishing which visually looks as ceramics, but with a strong technical development that allows to apply it on aluminium top tables. This allow us to have the warm feeling of ceramics with the durability and quality of aluminium coatings.

Marble (Untreated)

Kettal Marble is light and strong, thanks to its technical structure, a combination of marble, aluminium honeycomb andfibreglass. It is a natural matte carbonate stone from the metamorphosed limestone family that is outstanding for its compact texture and fine crystalline structure. Travertine marble is a hard natural stone, very sturdy in terms of outdoor use, with uneven colouration and a polished finish.

Red Balau

Red Balau is a tropical wood from the Dipterocarpaceae family. It is a compact high-density wood with a high tropical resin and oil content. Balau is used in nautical construction due to its robustness and resistance, and it is prized for is hardness and excellent water-resistant properties. The mechanical properties of Red balau are optimum; however, this wood is little-known among the general public. One of its characteristics is that it is heavier and harder than teak.

Teak (Untreated)

The teak used in Kettal products is obtained by selecting the best trunks from sustainably managed plantations controlled by Perhutani. Only the most appropriate trees are selected, one by one. The area used is the central part of the trunk, as it is the straightest and free of branches. From this painstaking selection process we obtain our teak, one of the finest in the world. The wood is planed to give it a more natural feel, and a sealant is applied. All Kettal teak products are provided with a waterproof sealant, which should be applied every three months.

Warning

Being a natural material, teak may change colour or even crack due to humidity levels and sudden changes in temperature. Left outdoors, teak undergoes a natural process of oxidation that affects its colour, which turns an attractive silvergrey shade. Teak furniture is treated with a waterproof sealant to protect it from damp and stains (as long as they are cleaned immediately); however, this sealant naturally wears off over time. We recommend treating the wood with sealant every three months, more frequently in the case of hotel and catering establishments. To restore the original appearance of teak, sand all over and apply teak sealant.

Oak

Oak selection as a material for Kettal is due to the optimal characteristics of this type of wood. It's one of the strongest and long lasting woods in the market. The oak wood is very attractive since it has beautiful light grain natural color and the smoothest feeling when touched. In fact it is a highly resistant material due to its anti fungi properties. Our oak is provided from a sustainable source, using naturally fallen trunks. Even though oak wood is very durable, the tree lifespan is short, making this process complete sustainable.

Rattan

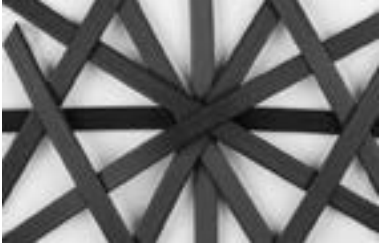

It is a natural fiber which comes from palm lianas. It is an extraordinary material, characterized by its flexibility. Its warmness and natural nature gives the furniture a special feeling. It's a material which is recommended to be used in an INDOOR ambiance, if not it can get damaged since natural rattan fiber needs a dry area to maintain its properties.

Rattan Synthetic

Our rattan synthetic fiber is very exclusive due to its similarity to the natural fiber, not only visually but also by its smoothness in touch and texture. It has been designed to have a high durability in outdoor conditions. Its strength and durability can withstand extreme conditions.

Anti-UV Synthetic Fibre

The material used is high-density polyethylene with UV inhibitors and is one of the most suitable materials for outdoor use. To guarantee perfect quality, Kettal uses a mass-dyed fibre (for colourfastness) of a density higher than market standard.

Terrain Elements Fire Retardant

Unlike surface-dyed fabrics, the fabric colour is impregnated into the fibre during manufacture, providing exceptional resistance to wear and tear caused by chlorinated and salt water, sunlight and moonlight. These fabrics receive water-resistant treatment.

Tonale Lino / Boucle Fire Retardant

Unlike surface-dyed fabrics, the fabric colour is impregnated into the fibre during manufacture, providing exceptional resistance to wear and tear caused by chlorinated and salt water, sunlight and moonlight. These fabrics receive water-resistant treatment.

Bela rope Fire Retardant

Cord made of polyester or polypropylene thread and handcrafted, weather-resistant material.

Parallel fabric

A fabric with high-strength polyester yarn, covered with PVC, with wefts that may vary in accordance with each need. Porotex from Kettal can be used for seats and backrests stretched over aluminium structures and for cushions. Foam-filled Textilene cushions are completely suited to the outdoors thanks to their permeable capacity: the open plaiting of Textilene and “open” structure of its wadding mean drainage of water from the cushion occurs naturally.

Shelters

Special fabric designed to last for years. It's a membrane with a satin finish ideal for outdoor conditions due to its high UV resistance, easy cleanability and stability.

Leather

Genuine cowhide used in high-wear areas. It has a stain-resistant finish and is easy to clean. One of its key features is its resistance to stains. Thanks to this and many other features, Kettal Leather requires no specific or costly maintenance.

Cleaning and maintenance.

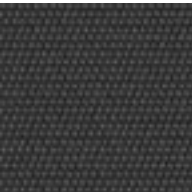

For everyday maintenance, clean with a soft cloth and warm water. To extend the life of Kettal Leather, we recommend using a neutral non-oily leather care product every six months. In case of stains, rub gently in circles with a damp cloth from the centre of the stain outwards. Dry the treated area with a cloth. Leather is a natural material, which means there may be slight variations in colour.

Soga

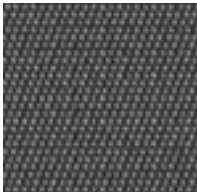

Cord made of polyester or polypropylene thread and handcrafted, weather-resistant material.

General conditions of sale 2023-2024

1. Scope

These General Conditions of Sale (hereinafter “GCS”) shall apply to the sale and all acts related to it of the KETTAL products (hereinafter “the Products”) between KETTAL, S.L. (hereinafter “KETTAL”), as seller, and the customer, either consumer or professional, as buyer (hereinafter “the Customer”). In case that there is an agreement signed between KETTAL and the Customer, these GCS shall be included therein. The technical specifications of KETTAL products are an integral part of these GCS. These GCS exclude the application of any conditions of purchase the Customer may have. These GCS can only be amended with KETTAL's written approval contained in the relevant offer or confirmation of order.

2. Purpose

The purpose of these GCS is the sale of the products inclu-ded in KETTAL's catalogs. KETTAL reserves the right to cancel and amend any product, material, color or other item in its Products con-tained in the catalog without prior warning.

3. Acceptance of these GCS

The order of any Products or the acceptance of informa-tion about them by the Customer implies the automatic acceptance of these GCS, that shall apply to all acts rela-ting to the sale, from the order until the termination of all obligations that correspond to each of the parties.

4. Orders

To be considered binding, all orders must be made in wri-ting and the Customer must have featured the complete references of the Products it requires in accordance with the catalog and the price list. Nevertheless, KETTAL reserves the right to accept or reject the order. The order of Products by the Customer does not result in a sale agreement between KETTAL and the Customer. The sale agreement shall be deemed entered only when KETTAL sends its written acceptance to the Customer by means of a confirmation of order. KETTAL's acceptance of the order shall be notified to the Customer by a written confirmation of order, specifying the Products, prices, and any applicable conditions. The cancellation of an order by the Customer is valid only if it occurs prior to KETTAL's confirmation of order.

5. Prices

Prices and other economic conditions are featured in euros in the price list corresponding to the commercial period 2023-2024, comprising from 1st September 2023 until 31st August 2024. Prices are EXW (Ex Works) / FCA Factory-Bellveí. (INCOTERMS 2020 ICC).

The prices are recommended retail prices and shall be applicable during the above referred commercial period, except in the event of a force majeure circumstance, chan-ges in production costs or in the exchange rates that justify an amendment by KETTAL. The prices shall be applicable to the orders received within the above referred commercial period. Notification of any modification to prices in this period will be sent upon receipt of order and prior to processing it. The prices of the previous commercial period are cancelled and without effect.

Prices are valid except typographical error and can be changed without prior notice

6. Payment and billing

The Customer shall pay in full and in advance, either by bank transfer, credit card, check, or any other payment method previously accepted by KETTAL. The only valid payment conditions shall be included in the offer, proposal or confirmation of order expressly accep-ted by the Customer and by KETTAL.

7. Delivery

The Customer must always check the Products upon delivery and record the date of receipt, the person who received them and the company stamp, along with any anomalies detected, on the delivery note.

8. Storage cost

Under FCA, EXW, FOB (INCOTERMS 2020 ICC) if the Customer does not pick up the Products within one (1) month after being notified that the order was finished and the Products ready for delivery, KETTAL shall apply a storage cost of €5/m3/day as from the first day following the above said term. If delivery of the Products is delayed due to the Customer, KETTAL shall apply a storage cost of €5/m3/day as from the first day of delay.

9. Complaints and returns

KETTAL only accepts claims for breakage, missing goods, or transport problems within a period of seven (7) days after the receipt of the Products, otherwise the period to claim is of 24 hours maximum from delivery. No Products may be returned without KETTAL's prior knowledge and written authorization.

10. Title to property

The Products will be deemed in bond until full payment has been made for them. The ownership of the Products is transferred to the Customer once they have been paid in full.

11. General guarantee

All Products are guaranteed for a period of five (5) years for domestic use and of two (2) years for non-domestic use in normal conditions of use and maintenance, except lamps, batteries, cushions, covers and fabrics. Lamps have a guarantee of two (2) years for domestic use and of one (1) year for non-domestic use, except consuma-bles and batteries.

This guarantee does not apply to faults or imperfections resulting from the passage of time or normal wear and tear (changes in wood texture, fading or change in shade of colors, chips, scratches, etc.). For pavilions and pergolas KETTAL does not guarantee the Product if it is not properly anchored. The assembly and, in its case, anchor of the Products and previous refurbish-ment of the anchor area are the final user's sole respon-sibility. The Customer shall sign KETTAL's Statement of Compliance document and deliver it to KETTAL. For appropriate cleaning, water and pH neutral soap should be used (no power washers or water outside the temperature range of 10-40°C). In case of use of any other products or systems for cleaning the Product, it will not be covered by the guarantee.

12. Intellectual and industrial Property

KETTAL holds the intellectual and industrial property rights on the designs, plans, sketches, software, photogra-phs, know-how and any other data relating to the Products and catalogs, as well as of its trademarks, brands, and any other distinctive signs. Their use is completely forbidden except KETTAL's prior written authorization.

13. Force majeure

If a force majeure event occurs, KETTAL shall be entitled to suspend or delay the delivery of the Products for a period that is reasonable according to the circumstances, without incurring in any liability or infringement. Force majeure means any cause or circumstance beyond KETTAL's control (e.g. war, fire, flood, explosion, strike, epidemic, pandemic, etc.).

KETTAL shall notify the Customer as soon as possible of the existence of a force majeure event, as well as of its ter-mination, indicating the term in which it shall comply with the obligation that was suspended or held back.

14. Data protection

According to the General Data Protection Regulation (EU) 679/2016 and the Spanish applicable laws on data protection, KETTAL shall process the personal data pro-vided by the Customer for handling the commercial rela-tionship and executing this agreement. The personal data provided shall not be transferred to third parties except for compliance of a legal obligation. Data subjects of the personal data provided to KETTAL shall have, at any time, the right of access, to rectification, erasure, object, restriction of data processing and revo-cation of consent, by addressing KETTAL, S.L., c/ Aragón, 316, 08009 Barcelona, in writing.

15. Applicable law and jurisdiction

These CGV are governed by Spanish law.

Any dispute arising in connection with the execution or interpretation of these GCS shall be subject to the compe-tent courts and tribunals of the city of Barcelona, expressly waiving any other jurisdiction that may be applicable.

We would love to hear from you.
