EDITO

Closer to the Water Than Ever Before.

More than ever, fishing is evolving fast—very fast. Techniques continue to improve, technology is transforming the way we fish, fish behaviour is constantly changing, and anglers are looking for equipment that is increasingly efficient, easy to use, and perfectly suited to real fishing conditions. In an economic environment where every purchase must be carefully considered and value for money has become a key factor, GUNKI remains committed to its mission: developing products that are effective, accessible, and, above all, designed to meet the real needs of anglers.

For 2027, our product ranges have undergone a major review to improve consistency, clarity, and overall efficiency. Every single product has been reassessed according to its technical relevance, its ability to answer a genuine need, and its ease of use on the water. This approach has enabled us to streamline our range while strengthening the identity and complementarity of each product family.

This new momentum is also marked by the arrival of **Rémi SEIGLER** to the GUNKI team. Widely recognised for his experience, his practical approach to predator fishing, and his mastery of modern techniques, Rémi further strengthens the expertise already represented within our team of specialists. His angler's perspective, technical standards, and deep understanding of anglers' expectations will help shape the future of our product ranges, always guided by the principles that have driven GUNKI from the very beginning: greater efficiency, greater relevance, and greater ease of use.

Beyond his involvement in product development, Rémi will also play a key role in sharing this expertise. Through our social media channels, our YouTube channel, and all our communication platforms, he will provide practical advice, tackle recommendations, and real-world feedback to help anglers get the very best from the products they trust and enjoy.

This expertise will also benefit our retail partners. By providing more technical content, stronger sales arguments, merchandising guidance, and tools to help select the right product ranges, Rémi will strengthen the commercial support that GUNKI is committed to offering its dealer network. Acting as a genuine link between the field, our product development team, the sales force, and retailers, he will provide valuable technical support to help our partners make the right choices and grow their business with confidence.

At GUNKI, staying close to the water is at the heart of everything we develop. It is this philosophy—driven by passion and by listening to anglers—that continues to guide every new product we create and shape both today's and tomorrow's ranges.

The entire GUNKI team would like to thank you for your continued trust and wishes you an outstanding 2027 fishing season.

The GUNKI Sales Team

SPINNING

N REELS GUNKI SHOWTIME BLOCKB FV

The GUNKI SHOWTIME BLOCKBUSTER FV spinning reels (with front drag) combine power, smoothness, and reliability. Designed to perfectly match the rods of the SHOWTIME BLOCKBUSTER range, they enable the creation of high-performance sets dedicated to pursuing large fish with a wide variety of lure techniques. Their aluminum spool, both deep — to accommodate larger line diameters — and wide, is equipped with an LC Lips rim that promotes smoother line release. This design reduces friction when casting and significantly improves casting distance as well as the precision of trajectories. A major advantage for effectively exploring vast areas or accurately reaching the most distant spots. Their precise and robust mechanics, combined with an S-Curve oscillation system, ensure a regular line winding and an exceptionally smooth retrieval, even under the most demanding conditions. The composite material body and rotor offer an excellent weight-to-power ratio, while the multi-disc, micrometric, and progressive drag ensures optimal control during fights. Equipped with an infinite anti-reverse system, anti-twist line roller, reinforced bail arm, and an ergonomic 'EasyGrip' handle, the SHOWTIME BLOCKBUSTER FV reels deliver performance and reliability that meet the expectations of anglers primarily targeting large fish such as perch, asp, barbel, zander, pike, and many others.

N REELS GUNKI SHOWTIME KICK-OFF FV

The GUNKI SHOWTIME KICK-OFF FV spinning reels are designed for lure fishing where smoothness, lightness, and precision are essential. Available in three complementary sizes (100, 200, and 300), they cover a wide range of techniques, from vertical to finesse approaches, and are suitable for light and intermediate predator fishing. Their carbon composite body offers an exceptional stiffness-to-weight ratio, ensuring power and endurance while maintaining remarkable lightness. Their precision mechanics, combined with premium stainless steel bearings and a handle screwed directly onto the drive wheel, provide exceptional smoothness and fluidity of rotation as well as immediate power transmission. Equipped with a 'Shallow Spool' aluminum spool featuring 'LC Lips' profile, an Ultra S-Curve oscillation system, and an anti-twist line roller, they optimize line retrieval and maximize casting performance. Their progressive and micrometric multidisk drag ensures perfect control during battles, an essential asset for confidently handling the best fish and minimizing the risk of losing them. When every cast counts and every strike can make the difference, the SHOWTIME KICK-OFF FV offers the level of performance and confidence sought by the most demanding lure anglers.

REELS GUNKI G’CORPS GT FV

These new GUNKI spinning reels are fantastic value for money! Light and quiet, the technical attributes of the G’CORPS GT reels are very comfortable to fish with. The gearing is exceptionally smooth and powerful. The two sizes available cover most modern lures (plugs and softbaits) and tactics. Capable of tackling big waters where distance is important to more technical venues where accurate casting is the key. These reels are supremely versatile. The spool capacities are designed to take either braid or nylon. Great new reels that marry perfectly with our G’CORPS rod range.

Product plus points!

- Versatility
- Body and rotor made from light and strong composite material
- Compact design
- Infinite anti-reverse
- Aluminium spool
- S-Curve oscillation system (cross spiral)
- Long life pick-up spring
- Consolidated bail arm
- Anti-twist line roller
- Micrometric progressive drag
- Easygrip handle

N REELS GUNKI FISHRIDE FV

The ideal gateway into the GUNKI universe! The GUNKI FISHRIDE FV300 spinning reel has been designed for lure anglers seeking a reliable, versatile, and accessible model. Its modern design pairs perfectly with FISHRIDE rods to create harmonious and high-performing sets. Its robust mechanics and quality gears ensure smooth retrieval and excellent longevity. Featuring a progressive micrometric front drag, it provides perfect control during fights. Its cross-wound oscillation optimizes line lay and improves casting performance. Lightweight thanks to its composite body, it also has an aluminum spool, infinite anti-reverse, and an anti-twist line roller. Offered in a particularly versatile size, it effectively supports the majority of modern lure fishing techniques and is an essential choice for anglers seeking performance, simplicity, and an excellent quality-price ratio.

BAITCASTING

N REELS GUNKI SHOWTIME KICK-OFF BC 100

Specially designed for anglers who favor technical and precise lure approaches, the GUNKI SHOWTIME KICK-OFF BC100 casting reel combines lightness, compactness, and precision. Its 'low profile' design and shallow aluminum spool make it an ideal ally for finesse fishing, vertical fishing, and techniques requiring the use of thin lines. Its fast 7.3:1 gear ratio, combined with a retrieval of 75 cm per turn of the handle, offers excellent responsiveness to control and effectively animate lures. Its wide casting range (4 to 80 g) also provides great versatility. Built around a one-piece aluminum frame and carbon composite side plates, the SHOWTIME KICK-OFF BC100 combines robustness with a low weight. Its high-precision mechanics, premium stainless steel bearings, and optimized line distribution system ensure smooth operation. Its multi-disc drag, equipped with carbon washers, develops up to 9 kg of power, offering ample reserve to handle the finest fish. It is also equipped with a centrifugal casting brake (zero friction in position 0), ergonomic EasyGrip handles, and a memory ring for quickly identifying the diameter of the line used. Efficient, versatile, and comfortable to use, this reel is intended for anglers seeking efficiency and precision in their most demanding casting approaches.

N REELS GUNKI SHOWTIME KICK-OFF BC 200

Developed for lure anglers, the GUNKI SHOWTIME KICK-OFF BC200 baitcasting reel stands out for its versatility and high level of performance. Its fast ratio (7.3:1) and retrieval of 75 cm per crank turn make it an ideal ally for dynamic linear fishing while maintaining excellent control over a wide variety of techniques and lure weights (from 8 to 100 g). Its 'low profile' aluminum frame combined with composite carbon side plates ensures a perfect balance between lightness, rigidity, and endurance. Its precision mechanics, high-performance stainless steel bearings, and perforated aluminum spool ensure an especially smooth rotation for precise and regular casting. Equipped with a progressive 9 kg carbon drag system and a centrifugal cast brake (zero friction in position 0), it offers optimal control in all circumstances. Conveniently, it features a memory ring located at the crank level to quickly identify the spool's line diameter. Suitable for modern lure fishing techniques, it excels in both 'classic' approaches in 'power fishing' with hardbaits, soft lures, spinnerbaits, and chatterbaits, as well as with larger lures designed for big pike fishing. Its ergonomic grip and 'EasyGrip' handles provide remarkable comfort during long fishing sessions. High-performing, lightweight, and particularly pleasant to use, the SHOWTIME KICK-OFF BC200 establishes itself as a premium reel for anglers seeking precision, smoothness, and versatility. The ultimate multi-species, multi-technique reel!

**N REELS GUNKI SHOWTIME BLOCKB
BC 300**

Developed for big bait enthusiasts and the pursuit of the most beautiful predators, the GUNKI SHOWTIME BLOCKBUSTER BC300 baitcasting reel combines power, durability, and ease of use. Its compact 'low profile' design ensures an excellent grip, while its fast 7.3:1 gear ratio allows for efficient maneuvering of swimbaits, jerkbaits, and other large lures, while adapting to different cranking approaches. Built around a one-piece aluminum frame, it features reliable and durable mechanics, reinforced by high-precision stainless steel bearings and a progressive multi-disc drag system equipped with carbon washers, delivering up to 9 kg of power. Its aluminum spool, designed to accommodate large diameter braids, is paired with a dual control system (magnetic and centrifugal) ensuring controlled casting. The ergonomic 'SureGrip' handle offers a secure and comfortable grip, essential during the most demanding battles. Thought out in every detail, the SHOWTIME BLOCKBUSTER BC300 reel includes a spool hook for easy line attachment, as well as a memo ring located by the handle to quickly identify the line diameter used. A reel designed to take on the most ambitious challenges, where performance and reliability accompany every quest for trophy fish.

GUNKI SHOWTIME BCR 300

The GUNKI SHOWTIME BCR 300 baitcasting reel features a round profile particularly appreciated by 'big bait' enthusiasts. Equipped with precise and durable gearing, this model has a relatively fast ratio (7.1:1 = retrieval of 79cm/ crank), but above all it is versatile, allowing the appropriate retrieval speed (slower or faster) according to the technique used (cranking, jerking, etc.). Powerful and smooth, the precision machining of its gears and monoblock body (made from aluminium) provide reliability, comfort, and performance. Compact and ready for action, it comes with a large-size 11cm aluminium handle (left side) and oversized EVA grips that ensure a pleasant and secure grip. Its large aperture line guide and capacity are suitable for using thick diameter braid. A product designed for targeting large fish, whether in its casting performance or its ability to battle the biggest catches. The solution to stay in control in all circumstances without compromising reliability and performance! Magnetic casting brake. Powerful drag system (15kg). Micrometric adjustment knobs. Power range: 50-250g lures. Large capacity spool designed with a peg for securely and easily attaching your braid.

Plus points:

- Round profile 'big bait' reel
- Comfortable grip
- Powerful & durable
- Monoblock aluminium body
- High precision stainless steel ball bearings
- Infinite anti-reverse
- Large capacity spool (0.33mm/ 185m), perforated, in aluminium
- Multidisc drag system (carbon washers), progressive and powerful (15kg)
- Magnetic casting brake
- Oversized 'suregrip' ergonomic handles

GUNKI OVERTAKE BCM

This GUNKI casting reel is equipped with a high gear ratio that ensures a fast retrieval speed (80cm/turn). Essential for intensive prospecting, it allows for rapid lure movement while maintaining a comfortable handle rotation speed. Boosted by its smooth and fluid mechanics, you can be certain with this model to have your lure swim at a constant cruising speed and to modulate its speed with often decisive accelerations (and decelerations!), without tiring your wrist! Perfectly suited for techniques where you need to retrieve the slack line, this OVERTAKE BCM reel comes into its own with setups that allow for prospecting among obstacles to quickly extract your lure or hooked fish (Heavy Texan, rubber jig, etc.); and any other technique where an 'up & down' animation is required (shad with blade, for example). 'Low-profile' design. Drag power: 5kg. Lure usage range: 10-75g. Left-handed handle.

Plus points:

- One-piece lightweight and powerful composite material frame
- High retrieval speed
- Smoothness & endurance
- 'Stainless' steel bearings
- Infinite anti-return
- Vented aluminium spool
- Powerful and progressive multi-disc drag
- Magnetic centrifugal brake
- 'Corkgrip' handle

GUNKI G'CORPS BCM

New generation of GUNKI baitcasting reels with a reworked Low-Profile shape and improved technical performance. This G'CORPS BCM is designed to be very versatile covering a wide range of lures and techniques. The moderate retrieve rate (7.1:1) and 6kg drag power will handle lures in the 10-80g range. Winding back 73cm/turn, this reel will cover a range of retrieve speeds with ease. Easy to adjust, the magnetic centrifugal drag system allows for very accurate casting. The higher you set the drag position, the more force it applies on each cast! These reels are perfectly adapted to European fishing and great value for money! Pair one up with a G'CORPS rod for an unbeatable fishing combo! Handle on left.

Product plus points!

- Monobloc Low-Profile body
- Versatile and elegant design
- Stainless ball bearings
- Infinite anti-reverse
- Perforated aluminium spool
- Powerful and smooth multidisc combat drag
- Magnetic casting drag
- Handle on the left
- Easy grip ergonomic handle

N REELS GUNKI FISHRIDE BC 200

Designed to assist anglers in their first steps in casting as well as to evolve towards more technical practices, the GUNKI FISHRIDE BC200 casting reel combines ease of use, reliability, and fishing enjoyment. Designed for modern lure techniques, it offers intuitive handling and accessible adjustments, allowing full concentration on the fishing action. Its modern 'low profile' design integrates perfectly with GUNKI FISHRIDE rods to form coherent, balanced, and high-performing sets. Its proven mechanics guarantee smooth and regular usage, while its quality gears ensure good power transmission and consistent comfort during retrievals. Featuring a retrieval of 65 cm per crank turn and a progressive drag of 6kg, it effectively manages fights with most targeted freshwater predators. Its magnetic casting brake makes adjustments easy and limits the risk of backlash, ensuring safe use, even for beginner anglers. Constructed around a compact 'low profile' frame and equipped with a perforated aluminum spool, it combines lightness and sturdiness for optimal comfort throughout sessions. The infinite anti-reverse enhances precision and safety during fishing action, while the EasyGrip ergonomic handle provides an excellent grip. Simple, reliable, and accessible, the GUNKI FISHRIDE BC200 stands as an ideal reference for discovering casting and progressing quickly, while benefiting from excellent value for money. A versatile reel designed to make lure fishing more intuitive and enjoyable.

SHOWTIME

GUNKI SHOWTIME KICK-OFF S-198ML-M

Built from a fast action and progressive blank, the extreme sensitivity of this rod and impressive power reserve in the butt make it ideal for finesse approaches. The GUNKI SHOWTIME KICK-OFF S-198ML is perfect for targeting perch and zander (as well as trout, barbel, chub...etc) with small soft lures, small jigs, spintails, small crankbaits...etc! Ultra manageable, its great versatility for multi-species/multi-technique makes it indispensable! Fuji K Alconite rings and microguides at the tip ensure maximum sensitivity. Streamlined ergonomic handle for optimal perception of the slightest information. Toray carbon.

GUNKI SHOWTIME KICK-OFF S-215M-ML

A versatile length, suitable for both shore and boat fishing, adapted for finesse tactics with soft lures and crankbaits. With its fast and progressive blank and extreme sensitive at the tip, this GUNKI SHOWTIME S-215M-ML rod is perfect for finesse fishing for zander, perch, black bass, etc., with small soft lures (linear, drop-shot, light Texas, weightless, etc.). Its fast action and rather short butt are perfectly suited for working small hard lures (Gigan, Megalon XCAST, Gamera, etc.) and other metal lures (notably for metal blades!). Fuji K Alconite rings and micro guides at the tip ensure maximum sensitivity. Handle features a stripped back design for optimal feedback of any information. Toray carbon.

N GUNKI SHOWTIME KICK-OFF S-220M/ML

The GUNKI SHOWTIME KICK-OFF S-220M-ML rod was designed for anglers seeking a precise and tactile spinning rod, suitable for finesse techniques, particularly Ned Rig and Carolina Rig approaches. Its solid tip combined with a fast action offers excellent bottom reading and allows for the instant detection of the subtlest bites. Its light and responsive blank, as well as its length, provide optimal control of small lures, both for slow dragging animations (Ned Rig, Carolina Rig, micro jig, micro soft lures) and more dynamic linear retrieves (small crankbaits, vibrating blades). Thanks to its short butt and careful balance, it ensures great maneuverability and appreciable comfort for these technical fishing methods requiring precision and repeated animations. The Toray carbon blank, combined with Fuji K Alconite guides and micro tip guides, maximizes resonance and transmission of information for exceptional feel with every contact.

GUNKI SHOWTIME KICK-OFF S-215MH

This spinning rod S-215MH is certainly the most versatile model of the GUNKI SHOWTIME KICK-OFF rod range. It is the perfect rod for those who like to switch approaches with a rod capable of transitioning seamlessly from a soft to a hard lure, regardless of the technique and targeting various species (pike, zander, perch, barbel, etc.)! Fuji K Alconite rings and micro guides on the tip ensure maximum sensitivity. Handle with streamlined ergonomics for optimal perception of even the slightest tap. Toray carbon.

GUNKI SHOWTIME KICK-OFF S-228M

A rod developed for long-distance casting! Whether from the shore or by boat, it is ideal for large bodies of water and/or large rivers. Designed to fish linearly with soft lures between 3' and 5', crankbaits (jerk minnow, crankbait, top water) and metal lures (vibrating blade, casting jig, spintail). Its extremely sensitive blank, combined with the sleek ergonomics of the handle, provides a lot of feedback for optimal perception of even the slightest tap or knock. Significant power reserve in the butt. Fuji K Alconite guides and micro-guides at the tip to ensure maximum sensitivity. Toray carbon.

49819	Extra Fast	1+1	180	215	28	10	131	5-21/ Max 25	149,99

GUNKI SHOWTIME KICK-OFF C-220MH

Designed for crankbait fishing with bladed jigs (BOOMER), crankbaits (GIGAN, SLATTERN, DOGORA), lipless crankbaits (KAIJU), or spinnerbaits (GENNAKER, SPINNAKER), the smooth and progressive action of this rod is perfect for approaches that require a lot of precision. An excellent caster, equipped with a remarkable power reserve, the GUNKI SHOWTIME KICK-OFF C-220MH baitcasting rod is THE model for 'Power Fishing' prospecting. The responsive blank is also ideal for small to medium-sized soft baits, whether in a linear or a jigging motion. It is an easy rod to use, providing a lot of comfort with vibrating lures when a lot of casting and retrieving is required. The progressiveness in the blank and its ability to accompany and absorb each rush of a fish is also a valuable asset in preventing hook pulls, especially on the strike. Fuji K Alconite double-leg and single-leg tip rings for maximum sensitivity. Toray Carbon.

GUNKI SHOWTIME KICK-OFF C-220MH-H

Designed for 'power fishing' with rubber jigs, spinnerbaits, shads, etc., the marked fast action and sensitivity of the tip of this GUNKI SHOWTIME KICK-OFF C220MH-H rod allows for precise and discreet lure placements. Ultra-responsive, it has a large power reserve in the butt (with a '1+1 = detachable butt' construction to preserve the blank's full power), essential for fishing in snaggy areas and controlling big fish. We chose a mixed guide setup (50% double-leg and 50% single-leg at the tip) to enhance sensitivity and responsiveness. Fuji K Alconite guides. Toray carbon.

N GUNKI SHOWTIME BLOCKB S-240H

The GUNKI SHOWTIME BLOCKBUSTER S-240H spinning rod is designed for long-distance fishing from the shore or a boat, suitable for large lakes as well as rivers. It is an excellent caster, precisely launching medium-sized soft lures and crankbaits intended for chasing large pike and zander. Its fast action blank combines sensitivity with a substantial power reserve. Its length provides the necessary leverage to maintain precise control of the lure and hookset at long distances, as well as to handle the strongest fish. The ergonomic handle is particularly comfortable. The reel seat is secured with a ratchet lock. It features Fuji K Alconite double-foot and single-foot tip rings to ensure maximum sensitivity. Made with Toray carbon.

GUNKI SHOWTIME BLOCKB S-225XH

This SHOWTIME BLOCKBUSTER S-225XH spinning rod allows fishing with medium to large lures designed for pike (SCUNNER 135S, ITOKA RUN 180S, GUNZILLA 160, G'BUMP 140 & 170, KING GAMERA, etc.). Noticeably light for the power range it offers, it enables the pike angler to efficiently exploit big open waters as well as tight margins. Its length is a real advantage for distance fishing without compromising its balance and control when working lures. The progressive tip remains fast and provides a wealth of information and sensations! The ergonomic wrap-around handle is particularly comfortable. The reel is secured by a reel seat with a ratchet lock. Fuji K Alconite double-leg and single-leg tip guides ensure maximum sensitivity. Toray carbon.

GUNKI SHOWTIME BLOCKB S-265XH

Rod designed for heavy prospecting from the shore. Casts brilliantly and will launch medium to large lures intended for big fish (large zander, pike). The power and leverage offered by this SHOWTIME BLOCKBUSTER S-265XH spinning rod are most appreciated when working lures over long distances and playing big fish. The ergonomics of the handle are particularly comfortable. The reel is securely fastened with a reel seat with a locking mechanism. Fuji K Alconite double-leg and single-leg tip rings ensure maximum sensitivity. Toray carbon.

GUNKI SHOWTIME BLOCKB S-250XXH

The progressive action and length of this spinning 'big bail' rod make it easy to cast with large lures (G'BUMP 170 & 200, SCUNNER 175S, ITOKA RUN 180S, etc.). It is a dedicated tool for exploring big waters in search of big fish. Very comfortable and perfectly balanced, its conical blank is built in '1+1' (detachable butt) which ensures a perfect progression through the blank when compressed. A magnificent rod, designed for pike fishermen (and other specimen hunters!) who do not like using a casting rod for this power range. The ergonomics of the handle are particularly comfortable. The reel attachment is secured by a reel seat with a ratchet closure. Fuji K Alconite double-leg guides. Toray carbon.

N GUNKI SHOWTIME BLOCKB C186H

The blank of the GUNKI SHOWTIME C186H+ casting rod has been completely redesigned to meet the latest developments in vertical fishing techniques. Featuring a Fast action, excellent resonance, and significant power reserve, this rod excels in 'classic' vertical approaches with jig heads from 14g to 28g, while also offering the capability to use much heavier rigs (up to 70g). It proves particularly effective for ultra-precise fishing, combined with LIVE probe technologies, allowing you to stay perfectly within the detection cone (Vertilive) and effectively control the lure presentation. Versatile and highly precise, the SHOWTIME C186H+ naturally transitions from one approach to another, while maintaining the essential qualities sought for modern vertical fishing: precise lure animation, quick hooksets, and complete control during fights with the best fish. A rod that amazes with its fishing qualities, offering optimal handling and a perfectly adapted balance for precise and long explorations. FUJI K-Alconite rings and microguides. Toray carbon.

GUNKI SHOWTIME BLOCKB C-220XH

A magnificent rod designed for pike fishing, with a conical blank and 'fast regular' action that provide both smoothness and comfort while fishing. Particularly suited to fishing with large swimbaits (SCUNNER 175S, ITOKA RUN 180S) and 'cranking shads' (G'BUMP 170 & 200), this GUNKI SHOWTIME BLOCKBUSTER C-220XH casting rod demonstrates exceptional versatility. Perfectly balanced, the lightness is remarkable considering its inherent power! It's the perfect rod for covering big waters, when regularly changing lure is essential to adapt to the changing moods of the fish. Fuji K Alconite double-leg and single-leg guides on the tip ensure maximum sensitivity. Toray carbon.

GUNKI SHOWTIME BLOCKB C-240XH

For those seeking a pike rod whose length and power allows fishing with large lures without needing to switch to an ultra-specific 'big bait' rod. The taper coupled with a 1+1 setup (detachable butt), ensures perfect progression through the blank when compressed. This is guarantees comfort and performance during casts and in managing battles with the largest pike. This GUNKI SHOWTIME BLOCKBUSTER C240XH+ rod is a true tool for exploring big waters and covering a lot of ground in just a few casts. Double-leg guides have been mounted on the bottom two-thirds of the rod (from the butt) to preserve maximum power. We selected single-leg guides at the tip to enhance sensitivity and responsiveness. A perfect rod for cranking with swimbaits, as well as for fishing deeper with more heavily weighted shads. Fuji K Alconite guides. Toray carbon.

GUNKI SHOWTIME BLOCKB C-245XXH

Belonging to the SHOWTIME BLOCKBUSTER series, this 'Big Bait' casting rod is designed for targeting large specimen pike! Powerful long handle (set up with a detachable '1+1' butt to preserve all the performance of the blank) coupled with a smooth and progressive action (fast regular) provides great comfort for long-distance casting with large lures. Of course, its power and action are adapted to handle the largest specimens and prevent any accidental hook-pulls. The superb balance of this GUNKI SHOWTIME S245XXH rod offers exceptional comfort for demanding fishing for large pike with cranking shad, swimbaiting, and traction techniques. Fuji K Alconite double-foot guides. Toray carbon.

OVERTAKE

GUNKI OVERTAKE FINESSE ROD ED-S

OVERTAKE FINESSE spinning rods are ideally suited for finesse lure tactics either street fishing or from a boat. Designed for targeting perch and zander using finesse tactics like drop shot, micro jigs, and Ned rigs. The action combines crispness and progressivity to cast cleanly and accurately, control lures and strike cleanly. The S-205ML & S-228M/ML rods have a solid carbon tip for extra sensitivity. The ultra-light reel seats have been carefully selected to give a comfortable ergonomic grip and maximise contact with the blank.

D.O.T.S

At last- a range of GUNKI tackle dedicated to lure fishing for trout! Our stunning new D.O.T.S range features a series of technical lure rods designed with plenty of input from our specialist trout team. Each detail has been thought through from the diameter of the cork handle to the position of the wooden reel seat to achieve the optimal grip and balance. We have worked on the tapers of each high modulus TORAY blank to get the casting and playing actions just right and to optimise lure control. Each model strikes the right balance between responsiveness, flex and power to give you maximum fishing pleasure and enjoyment from each hooked trout. The six models in the range cover most trout fishing situations and meet the needs of the most demanding trout lure anglers.

GUNKI D.O.T.S- LURE

GUNKI D.O.T.S- LURE S-175L-UL

The ideal rod for plug fishing on smaller rivers. Fast action blank keeps you in constant touch with the lure detecting subtle changes in flow and transmitting every slight wrist movement to your bait. Perfect for plugs between 30 and 50 mm (GAMERA 39F & GAMERA 50SP) and no.0 and 1 spinners

GUNKI D.O.T.S- LURE S-198ML

Designed for small to medium size rivers with the right blend of power and fast action to work plugs and soft baits. 198cm is the perfect length for controlled underarm casting and accurately holding baits in the current. We advise using plugs between 45 and 65 mm and no.1 and 2 spinners.

GUNKI D.O.T.S- LURE S-210ML

The perfect rod for bigger fish in medium to large rivers that casts well and can also be used on lakes. The fast action blank handles soft baits, plugs and spoons with enough power to get them working effectively. Ideal rod for the opportunist who is just as happy catching a trout, big perch or even a chub on the lure. We recommend using this model for plugs between 45 and 70mm and spinners from no.1 to no.3

GUNKI D.O.T.S- FAST ROD

GUNKI D.O.T.S-FAST S-198M-ML

This is the ideal rod for fishing plugs in fast water. The blanks have been developed specifically for fishing dense baits like HW and SHW minnows giving plenty of movement through twitches and jerks. The blank allows you to give the right amount of movement to your lure without saturating the rod. The progressive blank has enough power to tackle big trout and sea trout in small to medium rivers.

GUNKI D.O.T.S-FAST S-228M

This rod has the length and power to tackle medium to large rivers targeting trout and sea trout with plugs, spoons and heavy spinners. The blanks have been developed specifically for fishing dense baits like HW and SHW minnows giving plenty of movement through twitches and jerks. The blank allows you to give the right amount of movement to your lure without saturating the rod. The progressive blank has enough power to handle big, hard fighting fish.

N GUNKI D.O.T.S SPIN 2.0

The GUNKI D.O.T.S SPIN 2.0 spinning rods have been completely redesigned to offer the best compromise between performance and price. Designed for ultra-light trout fishing, they excel with small spinners and spoons. Their progressive action, optimized by a spigot joint, perfectly accompanies fine animations and effectively absorbs fish head shakes, minimizing hook pulls and the risk of breakage with the thinnest lines. Lightweight and particularly maneuverable, they allow precise casts while ensuring excellent comfort of use along rivers and small streams. Their responsive blank promotes controlled and precise casting with small lures, ensuring discreet and natural presentations, essential in technical approaches where every move counts. Designed to maximize combat enjoyment, the D.O.T.S SPIN 2.0 offers an ideal balance between sensitivity, flexibility, and control for all enthusiasts of ultra-light trout fishing. Progressive action. HM carbon. Ergonomic cork handle. Anti-tangle SIC guides.

N GUNKI D.O.T.S GOLD

The GUNKI D.O.T.S GOLD rods have been developed for trout lure fishing enthusiasts seeking high-performance models with a simple and elegant style. Their discreet and refined finish makes no compromise on technicality and performance.

The range consists of two L (light) power models with a Fast Regular action, which are particularly versatile and perfectly suited for trout fishing with both minnows and spinning or wobbling lures. Light, maneuverable, and responsive, these rods excel at efficiently exploring small to medium streams. Their fast and progressive action promotes accurate casts, good animation control, and excellent fish handling during the fight.

Two more powerful ML (Medium Light) models with 'Fast' action complete the series for anglers looking for more power and reactivity, particularly with denser minnows, for fishing in medium rivers. Their power reserve and maneuverability allow for effective animation of dense lures (HW and SHW) while maintaining precision, sensitivity, and comfort of use.

HM Carbon. Ergonomic cork handle. Anti-tangle SIC guides.

N GUNKI D.O.T.S RED

With their particularly attractive quality/price ratio, GUNKI D.O.T.S RED rods have been specially developed for trout fishing with hard lures. Inspired by the universe of lure rods, they feature a modern, sleek, and thoroughly technical design. Their Fast Regular action offers an excellent compromise between responsiveness, precision, and progressiveness. They are sufficiently fast to effectively animate minnows, jerkbaits, and small crankbaits, yet maintain a nice suppleness during battles to reduce unhooking, even against powerful fish. This versatile action also promotes precise casts and excellent control over animations, including in strong currents with denser lures. Lightweight, balanced, and particularly maneuverable, the D.O.T.S RED provide great comfort during long river scouting sessions. These rods are designed for trout anglers practicing a modern, dynamic, and versatile approach to hard lure fishing. Progressive action. HM carbon. High density EVA ergonomic handle. SIC anti-tangle guides.

KIZUNA

N GUNKI KIZUNA-BATTLE-S

Thoughts for lure anglers seeking technicality, the GUNKI KIZUNA-Battle Series rods offer a remarkable 'quality-price-performance' ratio. This range of spinning rods consists of several models designed to cover a wide array of lure fishing approaches and techniques, from shore or boat, to effectively target perch, zander, pike, asp, or chub. Built on IM24T carbon blanks, resonant and with excellent power reserve at the butt, the KIZUNA-Battle Series stand out for their reactivity, sensitivity, and actions perfectly suited to the length and power of each model. They thus offer optimal control of the lures, precise bite detection, and perfect handling of the fights. Their sleek, modern design and construction, combined with carefully selected components (anti-tangle SIC rings, high-density EVA, etc.), make the KIZUNA-Battle Series a reliable, high-performance range perfectly suited to the demands of modern predator lure fishing.

N GUNKI KIZUNA-BATTLE-C

Thoughtfully designed for lure anglers seeking technicality, the GUNKI KIZUNA-Battle Series rods offer a remarkable 'quality-price-performance' ratio. This range of Casting rods consists of different models designed to cover various approaches and lure fishing techniques, whether from the shore or from a boat, to efficiently target perch, zander, pike, asp, or chub. Built on resonant IM24T carbon blanks with excellent power reserves in the butt section, the KIZUNA-Battle Series stands out for its reactivity, sensitivity, and actions perfectly adapted to the length and power of each model. They provide optimal lure control, precise bite detection, and perfect handling during fights. Their sleek, modern design and construction, combined with carefully selected components (anti-tangle SIC guides, high-density EVA, etc.), make the KIZUNA-Battle Series a reliable, high-performance range perfectly suited to the demands of modern predator lure fishing.

G’CORPS

GUNKI G’CORPS FINESSE

The GUNKI G’CORPS FINESSE series of rods cover a range of technical tactics like drop shotting, micro jigs, ned rigs and micro jigheads. The solid tip is ultra-sensitive coupled with a fast-progressive blank that guarantees ultimate lure control and clean striking. The handle shape and cut-out reel seat are particularly ergonomic and comfortable letting you feel the bottom and tiny taps and bites directly through the handle. These are the ideal rods for targeting perch, chub, asp or goby in situations where a finesse approach pays dividends. High performance rods with classy cosmetics. The GUNKI G’CORPS FINESSE models are also great value for money! Profiled SIC anti-frap long leg guides and micro guides. IM24T carbon blanks.

GUNKI G'CORPS CROSSOVER S

GUNKI G'CORPS CROSSOVER is a range of lure rods offering exceptional value for money! Featuring no less than thirteen models of different lengths and power ratings to cover the full range of bank and boat lure tactics for pike, zander, perch, asp or chub fishing with plugs, lures or soft baits. The blanks are built using high performance IM24T carbon and are well balanced with plenty of reserve power. Resonant and light, these are technical fishing rods featuring SIC anti-frap long leg profiled guides and micro guides.

SWIMBAIT SERIES

N JARHEAD 150 F

The GUNKI JARHEAD 150F is a hybrid lure that combines the advantages of a jointed swimbait and a wakebait to offer a unique presentation in shallow waters. With its two-section articulated body and realistic silhouette of a crucian carp/goldfish, it perfectly mimics a vulnerable prey, particularly sought after by large pike. Floating and equipped with a specific lip, the JARHEAD 150F moves just under the surface, in the first decimeters of water, generating both a wide, natural swimming motion and a particularly attractive wake. This combination makes it a formidable choice for spring fishing, when predatory fish come to warm up and hunt in shallow areas and above weed beds. Highly versatile, it can be used in a 'steady retrieve' at different speeds, where its smooth swimming imitates a moving fish, or in 'twitch & pause'. Despite its relatively compact size, its body height, articulation, and broad tail move an impressive volume of water, generating powerful vibrations that predators can detect from a great distance. Thanks to the combination of its lip and its buoyancy, it can also be animated almost in place near key spots. Thus, it stays longer in the predators' field of vision while making attractive moves over short distances, an important asset for triggering strikes in confined spaces and/or in areas under high fishing pressure. When you need to provoke a reaction from a large pike in shallow water, the JARHEAD 150F never goes unnoticed! Comes with a spare tail.

SCUNNER 135 S TWIN

This two-part swimbait was developed from the original design of the OTACHI jerk bait. The compact and bulky body is the perfect shape for very slow retrieves just under the surface. Both the size of 135mm and 53.50gr weight are designed for targeting big pike, without having to use over size equipment. But the greatest strength is the S-type swimming action generated on very slow speed retrieves! Top tip: if you have to slow down your SCUNNER and get a wider action, remove the hook from the back of the lure. Fitted with an eye under the head specifically to add a John Weight, the SCUNNER can be fished deeper exploring different layers of water. All you need to do is adapt it to the ideal depth of your spot and / or how the fish respond. Belly hooks mounted on a rolling swivel. removable tail section.

SCUNNER 135 S TWIN NATURAL SKIN

Offered in 'Natural Skin' colours that are amazingly realistic, the SCUNNER 135 S is a GUNKI swimbait with two sections and an ultra-natural swimming action. The PERCH colour is a must-have in tackle boxes as pike love this fish! The ROACH (rudd) colour, very discreet in the water due to its transparency, is perfect for crystal clear waters and very sunny conditions. These latest SCUNNER models are equipped with a new tail made from a floating PVC that is resistant to heat and deformation.

SCUNNER 175 S TWIN NATURAL SKIN

Offered in impressively realistic 'Natural Skin' colours, the SCUNNER 175 S is a GUNKI swimbait with two sections that swims in a very natural way. The PIKE colour variant has a lighter spectrum suited for clear waters. A few UV touches of fluorescent yellow, strategically placed, allow the fish to target the lure perfectly. The RUDD colour variant, with its orange belly, is ideal for acidic waters and low light conditions. These latest SCUNNER variants are equipped with a new tail made from a floating PVC that is less sensitive to heat and deformation.

GROUPER 180 S

GUNKI hybrid swimbait featuring an ABS hard body with a soft tail. Supplied with a shad-type tail as standard that can be swapped for a curly "comma" shaped tail (sold separately). Designed to be fished in relatively shallow water, over weed beds for example, the GROUPER 180S is easily customisable and can be adapted to a wide range of situations. Two fixing points for retrieving the lure and two eyes on the stomach that take a GUNKI CLIP WEIGHT give you lots of different rigging options. Fished slowly without additional weight you can work the lure at just 10cm deep. By adding a 4g clip weight (supplied with the lure) you can fish it comfortably at 60cm deep. You can add more weight to fish the lure deeper or faster as required. If you want to achieve a fast dive attach the weight to the front of the lure. If you prefer a slower drop with the lure sitting flatter, use the clip weight attachment in the middle. For slow shallow retrieves or fast retrieves with added weight use the forward attachment point located at the mouth. To fish the lure deeper using a slow cranking retrieve attach the lure to the point below the head. This gives the impression of a big prey fish by displacing more water. All these options make it surprisingly versatile for a big 18cm lure! Easy to fish using simple cast and retrieve tactics and does not pull too hard on the rod tip yet offers so many ways to change your presentation quickly whilst fishing. A genuine pike magnet that can catch fish everywhere! Hooks fitted to rolling swivels.

GROUPER 140 S

The GROUPER 140 is a smaller size of our GUNKI GROUPER hybrid lures. Has the same great features: two fixing points, hooks mounted on rolling swivels, two rings underneath the body for additional clip weights and soft interchangeable tails so you can switch from a shad tail to a grub tail. The lure is silent and can be fished in very shallow water (20cm). The perfect lure for targeting pike on smaller waters or when the fish are fixated with small prey. The shad tail has been re-designed to give plenty of movement even on slow retrieve. The Grouper 140 is a chunky lure with flat sides and displaces plenty of water for a small bait. This will attract the attention of pike both on sight and through the lateral line. Great range of colours. Ideal for targeting pike in clearwater and round weedbeds. Supplied with a 2.5g clip weight. Lead-free design.

BIG BAIT SERIES

N ITOKA RUN 140 S

The GUNKI ITOKA RUN 140S retains the qualities that brought success to its big brother in a more compact format, perfectly suited for small environments and areas where downsizing is necessary to trigger strikes. This multi-section swimbait maintains a smooth 'S' swim at the lowest retrieval speeds, but with a deliberately more pronounced amplitude. This evolution allows it to generate greater attraction over short distances, a major advantage for efficiently exploring narrow zones, gaps in vegetation, or marked spots. Easy to cast and sinking perfectly flat, the ITOKA RUN 140S responds instantly to any prompt while maintaining a natural and realistic swim. Despite its smaller size, its volume and articulation displace a lot of water to effectively stimulate the lateral line of pike without producing an excess of signals. Particularly versatile, it proves effective both in slow retrieval and more dynamic animation. It can accommodate additional weights (Clip Weight) to adapt its depth of operation. Positioned under the head, they allow for quicker exploration of deep water layers. Attached under the belly, the ITOKA RUN 140S maintains a slow and horizontal descent, ideal for prospecting above vegetation or in shallow waters. Designed to make a difference in technical conditions, the ITOKA RUN 140S turns challenging areas into true hunting grounds! Comes with a spare tail.

ITOKA RUN 180 S

The ITOKA RUN has a fluid flag-like swimming motion, even at low speeds. This opens new horizons for pike hunters. Easy to cast, sinking horizontally, this multi-section GUNKI swimbait hardly pulls on the rod and responds to the slightest acceleration. Its tight 'natural' swim is suitable for overfished environments and for targeting large fish, which are often very wary. With its 180mm size and a nice volume, the ITOKA RUN 180S 'pushes' water and perfectly stimulates the pike's lateral line. It has a sinking speed of about 20cm/s and performs well in tighter swims and shallow waters (fishing above weed beds). It is versatile, allowing for both slow fishing and faster and/or deeper fishing by adding weight. Additional weights (Clip Weight) can be used to make it heavier: on the ring under the head for a quicker descent; on the ring at the belly's centre for a slower, flat descent. A lure for pike hunters, its size perfectly suited to match the diet of the biggest specimens! The ITOKA RUN 180S offers an additional vibration, indispensable in a 'piker's' tackle box. For pike hunting throughout Europe! Moreover, the range of colours allows adaptation to situations encountered in France, Ireland, and Sweden. Supplied with a spare tail (PVC). Hooks mounted on rolling swivels.

TOP WATER SERIES

HEDORAH 43 F

Slimmer version of the HEDORRA 55F that is both more compact and stable. Whether worked with sharp pulls creating a popping effect or with fuller twitches for a classic dog walking retrieve this smooth moving surface lure will pull predators in from distance. Even the wariest of fish will be intrigued by the erratic movements and the trail of micro bubbles left in its wake.

HEDORAH 55 F

HEDORA 55 is a little popper that is both compact and stable. Great for gliding and popping! Surprisingly heavy for its size the weight helps both with casting accuracy and creating those all important noisy pops following sharp pulls of the rod. We have worked hard on the shape of the lure so that the first sprays of water as it hits the surface set of a stream of micro bubbles which fox and intrigue more wary older fish

MEGALON X-CAST 75 F

Based on the X-CAST MEGALON 75, this model has been tweaked to attain greater casting distances. The 75mm size is ideal for perch, asp and bass in shallow, clear water. Great for educated fish where the small size, ease of movement and distinctive noise attraction can trigger takes. We advise using a robust leader if pike are present to avoid getting bitten off!

MEGALON X-CAST 95 F

The MEGALON X-CAST 95 is a surface lure whose large internal ball bearing generates the great sound attraction that characterises these GUNKI stickbaits. We design our X-CAST lures so the body shape and the distribution of the internal weights maximise casting distances so you can cover more water quickly. The 95 is the perfect "all-rounder" size that will appeal to perch, pike, asp and black bass and can be used at sea to target bass particularly in shallow water around oyster parks and over reefs and bars at low tide. The lure is very versatile and easy to fish on simple 'walking the dog' style retrieves.

MEGALON X-CAST 115 F

The X CAST generation lures embody the innovations we have brought to the MEGALON family. The MEGALON X-CAST 130 casts further and more accurately than before thanks to the new position of the internal weights. We have also lowered the balance point of the lure to displace more water and create more of a wake. Fished with the rod up the lure reacts to twitches and jerks and wide dog walking style retrieves. Can also be fished sub surface with the rod down to the side. A great surface lure that works equally well targeting bass at sea or inland pike and perch

MINNOW SERIES

RODAN 40 SHW

With its flat sides, significant density, and beautiful finishes, the RODAN 40 SHW is sure to satisfy the most demanding trout anglers! This silent lure is ideal for exploring watercourses between 0.20m and 0.80m deep. Its compressed shape perfectly complements the Gunki trout lure range. This small 'minnow' is at ease in strong currents. During pause phases, it sinks flat, oscillating on itself, showcasing the diversity of colors offered—each more beautiful than the last—but especially tailored to the various conditions a trout angler might encounter. Compact and dense, it allows for long-distance scouting and ensures easy and precise casting under branches. At the beginning of the season, it can be used in slow linear retrieves close to the bottom, with its tight swimming action triggering even the most reluctant trout. As soon as the waters warm up a bit, you can animate it with relaxed pulls, with a strong strike upon descent guaranteed!

N RODAN 50 S

The GUNKI RODAN 50S retains the DNA that made the RODAN range successful in a less dense version (S=SINKING), specifically designed to explore more slowly and higher in the water column. With its flat sides and compact profile, this minnow maintains excellent stability while offering a more subtle presentation. It excels in low-water periods in streams, shallow rapids, calm edges, and all areas where a too-quick descent can harm presentation effectiveness. Highly versatile, the RODAN 50S adapts equally well to slow linear retrieves and more dynamic animations punctuated by twitches and pauses. During pauses, it sinks naturally, oscillating on its own, producing many visual signals often irresistible to trout. Its more moderate sinking speed allows the lure to stay longer in the fish's strike zone. Accurate when casting and easy to control, the RODAN 50S is a weapon of choice for trout anglers, especially when conditions require a discreet approach and less aggressive animations.

RODAN 59 SHW

With its flat sides, significant density, and exquisite finishes, the RODAN 59 SHW is sure to satisfy the most demanding trout, sea trout, and salmon anglers! This silent lure is ideal for exploring waterways with depths between 0.40m and 1.50m. Its compressed shape perfectly complements the range of Gunki trout lures. This small 'minnow' is at ease in the strongest currents. During pauses, it sinks flat, oscillating on itself, showcasing the variety of beautiful color options designed to meet the diverse conditions trout anglers may encounter. Compact and dense, it enables long-distance exploration and ensures easy, precise casting under branches. At the beginning of the season, it can be used in a slow linear motion along the bottom; its tight action will trigger even the most reluctant trout. As soon as the water warms up slightly, you can animate it with gentle pulls; a violent strike on the descent is guaranteed!

GAMERA 39 F

Don't be deceived by the diminutive size of the GAMERA 39F. This lure makes plenty of impact under water! The chunky body and large lip generate plenty of wake the moment you start retrieving. Works well just cranked or with the occasional twitch to get the flanks flashing enticingly. A floating lure that can become a "slow sinker" with the addition of a 00 swivel. The GAMERA 39 F is the perfect size for summer perch, trout and chub fishing.

GAMERA 39 HW

Smaller version of the GAMERA HW designed specifically for flowing water. Slim line body profile and low centre of gravity help keep this lure stable in a flow. We have worked on the body density so it is heavy enough to work round likely fish holding holes without compromising natural movement. The lip has a fairly tight angle on it that again strikes the right balance between stability and energy when twitching. The Gamera 39 HW is a must-have lure for fishing downstream in shallow water or simply downsizing when bites get difficult.

GAMERA SLIM 110 SP

When cranked the GAMERA SLIM SP has a tight, lively swimming action. It does not create a lot of water turbulence relying on visual attraction with the flanks provocatively flashing on every move. This finesse jerk-bait has one other deadly built-in attraction-the "roll twitch". The rear of the head section is angled downwards and this provokes a stationary rolling lunge when twitched with a slack line. This ability to roll without moving means you can keep twitching the bait over the tightest of likely fish holding spots -like a hole in a bed of lilies. This will get bites when other lures simply don't work! Try alternating with a GAMERA 128SP for a great lure pairing.

GAMERA SLIM 115 SP MR

Building on the success of GAMERA 110SP we have designed a new MR MIDDLE RUNNER version with a longer bib to get down more to attract big wary predators who are sitting deep and reluctant to feed. Worked back on steady retrieves this jerkbait minnow pulses and flashes enticingly so fish can see it from a distance. In tighter spots the longer bib offers more resistance in the water and helps you hold the bait in place longer. Try jigging it with tiny twitches on the rod tip. You can effectively roll the bait without retrieving- an action that often provokes a lunge from a watching fish!

KNIFEHEAD 68SP-DR

Belonging to the latest generation of hard lures developed by GUNKI, the KNIFEHEAD is a 'longbill minnow' that can be cast far! Its tungsten mass transfer system is held by a magnet inside the lure. It is released under the momentum of the cast, providing a catapult effect to the lure, propelling it over long distances. Offered in stunning colours, it swims well at all retrieval speeds, thanks to its precise design and perfect balance. It reacts to the slightest 'twitch', doesn't lose its line regardless of retrieval speed, and stops dead on pauses. Offered in the DR version (= Deep Runner), the KNIFEHEAD 68SP-DR quickly descends to reach its swimming depth. An essential asset for slow and precise fishing for perch and zander 'stuck' on the bottom. During summer open water fishing, its slender shape reduces rejections, especially if the water is clear. The size 68 is recommended in tight swims and around schools of fry. Its proportions are adapted to the usual prey of zander and perch. Be sure to carry a light pike trace with you. Depending on the conditions and season, pike can focus solely on small prey of this size!

KNIFEHEAD 75SP-DR

Belonging to the latest generation of hard lures developed by GUNKI, the KNIFEHEAD is a 'longbill minnow' that casts far! Its tungsten mass transfer system is held by a magnet inside the lure. It is released upon casting, providing a catapult effect that propels the lure in a straight and stable position over long distances. Offered in stunning colours, it swims well at all recovery speeds, thanks to its precise design and perfect balance. This new GUNKI 'longbill minnow' is extremely versatile. It reacts to the slightest 'twitch', does not lose shape regardless of retrieval speed, and stops abruptly during pauses. Offered in a DR version (= Deep Runner), the KNIFEHEAD 75SP-DR quickly descends to reach its swimming depth. An indispensable asset for slow and precise fishing of perch and zander that 'stick' to the bottom. During summer open-water fishing, its slender shape reduces refusals, even more so if the water is clear. Its 75mm size proves effective for autumn fishing when bigger fish gather and start moving a little deeper. Beware! Even though this size is formidable for large perch and zander, it can also save your fishing day with apathetic pike during winter conditions. An indispensable lure for any season!

CRANKBAIT SERIES

N RAIJU 40 F-DR

GUNKI expands its range of crankbaits with the RAIJU 40F-DR, a compact model developed to quickly explore deep water layers (Deep Runner) while maintaining the profile of a small prey. This feature is particularly effective on large perch, but also on zander, asp, chub, and pike when they hunt small fish along drop-offs, rocks, or deep banks and are particularly selective. Equipped with a magnetic mass transfer system ensuring long and precise casts, its lip allows it to quickly reach its operating depth. Once in action, its tight and dynamic swimming remains perfectly stable, even at high speed. Deadly in linear retrieval, it also excels in stop & go, where its suspension phases often trigger the most brutal strikes. Capable of handling the fastest retrieves without losing its track, the RAIJU 40D-DR is the ideal crankbait when fish are looking for small, easy-to-capture bites that swim deep. A true concentrate of technology that makes the RAIJU 40D-DR a formidable weapon for hunting predators where few small crankbaits are capable of operating.

GIGAN 55 F

A 55 mm crankbait that is quickly detected by any nearby predators thanks to the large amount of water it displaces. This is an all-round lure that can easily be worked round branches and obstacles. The lip has been made using a polycarbonate plastic which is very solid. Ideal for anglers who like to fish 'bottom tapping' style. The Gigan is designed to be fished deep where its pronounced wobbling action coupled with a gentle rolling movement will seduce perch, zander and pike, of course. We have deliberately reduced the vibration attraction on this lure so it can be fished all season long even during periods when the fish are less confident about feeding.

DOGORA 65 F

Here is a shallow crankbait that displaces lots of water despite its modest size. The head swings from left to right in a wiggling action that coupled with a flat and deep body and unique vibrations make this a particularly attractive lure for pike. But rest assured all predators will have a go at a Dogora (it is just the pike often get there first!)

DOGORA 85 F

The GUNKI DOGORA is a flat-flanked crankbait that works particularly well in clear water when fished above and around vegetation. The 85 size completes the range designed mainly for pike anglers. This new slow-floating model rises slowly every time it is paused. Great for exploring margins and big weed beds provided there is at least a metre of water above them. The DOGORA is best fished on slow retrieves punctuated with faster bursts and the occasional jerk to change direction. Casts a long way, displaces plenty of water and gives off strong vibrations that you can clearly feel through your rod. A veritable pike magnet!

Strass Perch

Buoyant crankbaits that are perfect for fishing in the snaggiest of swims. Kraken lures displace loads of water thanks to their chunky body shape and this coupled with their frenetic wobble and roll action (from the square bib) mean fish just can't miss them! They cast well and dive to about 1 metre. Weighing in at 9.6g and 14.6g these lures work best when wound back hard. Predators simply can't resist!

TAIL SPINNERS

The DRAG SPIN is a slow sinking pencil bait with an added lip that can be fished very close to the surface. Ideal for fishing over weed beds or in shallows such as the tails of lakes. Has a slow sink rate and stays flat on the descent. This gives you time to start your retrieve without the lure getting caught in weeds. Best fished on straight retrieves at a variety of speeds. You can also try short pauses to provoke a take - but hang on to your rod! The lure has two attachment eyes. The eye on the mouth keeps the lure high in the water, perfect for ultra-slow retrieves but equally good for very fast retrieves. The other eye on the front of the head holds the lure better at depth. You can alter how deep the lure fishes by adding a GUNKI CLIP WEIGHT to the stomach to the eye holding the first treble hook. The advantage of the two-attachment system is you can quickly swap from a very shallow retrieve to a deeper retrieve simply by swapping the attachment point and clipping on a lead. To get a more exaggerated diving effect try clipping the weight to the front attachment ring. This will cause the lure to dive dramatically with every slight pause, provoking reaction takes. By playing with different weights, you can also vary the sink rate. An incredibly versatile lure that will find pike in any swim at any time of year!

SHOCKER VIB 4.5

Everyone knows that trout love a spinner bait. However classic spinners tend to rise in the current unlike the SHOCKER VIB 4.5. This is a spinner bait that follows the bottom and does so without causing unnecessary line twist! Great for the early season fished $\frac{3}{4}$ downstream. In these situations, fish it with a slow retrieve to just stay in contact with the lure and let the current push the bait back to the bank. The carefully selected colour schemes cover all different water conditions. In high summer cast the lure upstream and work it back with a steady fast retrieve. Get ready for some savage takes! This spin-tail trout bait is great for exploring deeper channels and bouncing across the bottom. Keep your eye on the line every time you drop it back to the bottom looking out for reaction takes. A versatile performer that can be adapted to suit the constantly changing nature of trout rivers.

SHOCKER VIB 10

This GUNKI spin tail bait is lead-free. The lure is made from an alloy that is very stable and displaces plenty of water giving the impression of a big bait. Fitted with a spinning blade emitting powerful vibrations that pull fish in from a long way off. When targeting big autumnal perch bounce the lure across the bottom mixing up the retrieve with short pauses. Be ready for sharp reaction takes when you start retrieving the bait again! Each detail of the SHOCKER VIB is carefully crafted. From the signal eye, the size and colours of the Indiana blade to the perfectly balanced proportions on each lure. Treble hooks come with small teaser feathers to act like a trigger point for any attack, particularly important when predators pick the lure off the bottom. The SHOCKER casts well and is easy to fish with. Designed initially as a perch lure, it has proved equally good for asp and pike. We recommend using a short trace that will withstand the ravages of pike teeth if you want to keep your SHOCKER VIB for any length of time!

VIBRATION SERIES

MUTO BLADE 46 S

Built using a lead free alloy, the MUTO BLADE 46 is a vibrant GUNKI blade bait suited to smaller venues or when predators are focused on fry. Generates surprisingly powerful vibrations for such a small lure and is very attractive to barbel, perch and chub. But be aware - nearby pike will also be tempted to have a go! Easy to cast, the MUTO BLADE 46 is very versatile and can be worked on straight retrieves at any speed or jigged vertically just off the bottom. Try pausing now and again to let the bait just sit on bottom. Big perch in particular often drop down to pick it up!

MUTO BLADE 56 S

The MUTO BLADE 56 is a vibrant medium sized GUNKI blade bait perfect for prospecting for actively feeding fish. This lure is ideal for power fishing situations, giving off powerful vibrations and generating plenty of flash. Will appeal to all predatory species. For early season fishing we recommend straight lining on fairly fast retrieves over weedbeds looking for perch and pike. In autumn try a deeper retrieve using saw teeth movements interspersed with pauses to target zander and perch. Fished vertically, the MUTO BLADE can be jigged aggressively then dropped back down to the bottom without getting tangled. Lead free design.

MUTO BLADE 66 S

This GUNKI metal vibrating blade bait is the perfect size for tackling big waters and/or targeting specimen fish. The MUTO BLADE 66 is great for fishing over weedbeds for pike. Works equally well for big perch and zander in deeper water particularly along known drop offs. Being compact and dense, the lure is ideal for anglers who need to be able to distance cast or are fishing deep water and holding in strong currents. Perfect for fishing weir pools and where you need to provoke bites using little jerks and then letting the bait fall fast to the bottom. Lead free design.

SPINNAKER 1/4

Unique head design ensures that the Spinnaker has a low balance point which keeps the lure stable when retrieved and horizontal as it sinks. Great for slow rolling type retrieves. This spinnerbait has a few other special features. Great balance is also an advantage when power fishing as it stays stable when drawn between obstacles. The silicone skirt, made up of 24 separate silicone strands, pulses naturally to look like a much bigger prey fish. 0.9mm stainless wire needle has the right balance between strength and flexibility. The oversized Willow blade gives a 'parachute' effect as the bait sinks. Fitted with a quality bearing swivel that starts rotating immediately. The skirt is secured by wire thread whipping, the wire needle is soldered to trap the Willow blade, a realistic 3D eye, secure fitting for taking a trailer bait, rubber security ring on the needle. This is a top quality versatile lure that can be adapted on any fishing situation! Willow #3.5 blade and Mustad 2/0 hook.

BLADED JIGS

TINY BOOMER 5G

The BOOMER has proved its worth catching a variety of predators over the years but our testers have found it particularly deadly for big perch! This new mini version has all the great features of the original. Big target eyes, ultra-sharp perfectly sized hook and a high quality skirt whipped with steel wire, perfectly balanced swimming action with a blade designed to keep the lure down during retrieves and turning freely on the drop. This micro bladed jig is great for summer street fishing sessions combining plenty of flash, vibration and movement in one compact package. Ideal for perch, of course, but also black bass, trout, chub and barbel. The TINY BOOMER will get an aggressive reaction from all sizes of feeding summer predators!

METAL LURES

Gunki bladed jig designed to imitate the small reptiles found in our waterways. Highly visible signal eye has a hypnotic effect through the water and give fish a focus point for attacks. Fitted with a deliberately small blade to give off discrete vibrations ideal on pressured venues. Bladed jigs combine different vibrations from the blade and the bulky silicone skirt with flashing attraction from the eye and the blade itself. This is a great roving lure with a compact, loaded body. Works particularly well in overgrown and snaggy swims. Great for pike, perch, black bass and even catfish! We caught plenty in field-testing particularly when using a V²IB soft bait as a trailer! Skirt attached with metal wire to stand pike attacks. Mustad 4/0 hook.

SUGAR BELLY CONCEPT

Whether in open water on a 'classic' jig head, in vegetation with a Texas rig hook, or as a trailer on a BOOMER, let yourself be surprised by the Bull Frog! With its bulky body that displaces a maximum amount of water, oversized eyes and two legs that vibrate at the slightest movement (while ensuring great stability for the lure) pike won't let it pass by! Its belly is cut with grooves to trap air and/or attractant; but most importantly, it ensures optimal compression of the lure under jaw pressure, completely releasing a Texas rig hook. Here's a little tip when fishing 'weightless': generously fill this belly with an attractant to ensure good lure stability and play with its density to alter its descent speed. The grooved, softer texture prolongs the time a predator holds onto it, giving you more time to set the hook effectively! This BULL FROG is equipped with a few strands of tinsel to enhance its attractiveness! This lure will have a hard time going 'incognito' in a bed of water lilies! Aniseed flavour.

Recommended Texas rig hook:

BULL FROG 100-#4/0 wide gap.

BULL FROG 130-#6/0 wide gap.

MAMA BULL FROG 170

The BULL FROG is rightly famed for targeting pike in the margins and over weed beds particularly in spring when the fish focus on frogs and toads. For the specimen hunters we have developed a new 17cm (tail folded) size! The MAMA BULL FROG is a big target bait that can swim at any speed. We have increased the thickness at the base of the legs to magnify vibrations and the gliding effect of the lure as it drops. Try long pauses on your retrieve to let the lure fall enticingly in front of any following big fish. The double grub tail and big body shifts plenty of water, working alongside the pulsing legs to create a remarkably seductive action in the water. The MAMA BULL FROG displaces a lot of water, stands out distinctively in the water layer and gives a clear message to any predators that it is a prey worth checking out! These details will help draw specimen fish to your lure and get more positive takes. Aniseed flavour.

MEGA FROG 230

With its hypnotic swimming action the MEGA FROG 230 is not made for the faint hearted! Our famous double Grub is now available in a bodybuilding version, to meet the wildest dreams of specimen hunters. With its 35cm extended tail and weighing in at 220g, it is built to move and attract the largest pike. It pushes water, vibrates at the slightest touch, and presents a body profile that allows for a gliding, slow swim, perfectly suited for 'high' fishing and provoking the movement of the biggest pike. The laminated 'SBC' (Sugar Belly Concept) belly allows for optimal lure compression under jaw pressure, optimizing hook setting. The 'body/legs' junction has been reinforced for increased endurance. The thickness of the appendages has also been increased to resist cuts and produce strong vibrations. Perfectly stable, it allows for weedless fishing in shallow areas, above the weeds. A MEGA SHALLOW SCREW has also been developed to ensure reliable rigging of this outsize MEGA FROG!

Length 9
Length (cm) 23
Qty/pack 1

Initially developed for cold water zander fishing and deep water in the larger sizes, the Mosquito has proved itself to be much more versatile than we originally thought! The firm rubber generates subtle vibrations on slow pulls then pulses strongly when jerked or twitched fast. This has proved deadly for bass up in the water and vertical fishing for pollock with our field testers catching plenty of big fish by matching the right size of Mosquito to the size of sand eels present in the area. Available in 5 sizes. Smaller models are perfect for perch and zander (drop-shot, rubber jig, jig head etc...). Intermediate sizes can be fished classically but are also great as trailers on Boomers, Gennakers and other Spinnaker set ups. The biggest sizes are for vertical fishing in deep venues targeting specimen fish – big zander on stillwaters or bass, pollock and cod at sea. Features our SBC (Sugar Belly Concept) for maximum mobility and lets you load the bait with attractant when the fishing is difficult. A multi-species, multi tactic lure that will get you fish in all sorts of circumstances. Aniseed flavour.

Finesse-style lure with a V shaped tail. This is a SBC (Sugar Belly Concept) lure features slits along the stomach section below the hook which you can fill with attractants to create a focal point for better hook ups. These slits also increase the attractive turbulence created by the PACEMAKER in the water. The shape and suppleness of the lure are designed to be as versatile as possible and respond to the slightest animation. The result is a great drop shotting or vertical lure which worked especially well on zander and perch during field testing. Try a pointed jig head and jerk it hard when bass fishing or darting style for perch. Bigger sizes are designed for offshore fishing and have proved particularly effective around wrecks. Flavoured with aniseed.

SOFT BAITS

This GUNKI grub bait adds a new vibration attraction to our SBC range. The slender profile resembles elvers, sandeels and worms which all predators willingly eat. A lot of care has gone into the design of the grub tail which moves at the slightest impulsion and gives of subtle vibrations as it drops through the water. These life-like movements will trigger takes from the wariest of predators. The 120 and 145 sizes are fantastic for slow linear retrieves, particularly on Carolina rigs, and are equally good as trailers on BOOMER and SPINNAKER baits. The 145 and 180 sizes are great fished vertically for big zander, bass and pollock. Aniseed flavour.

V-MAX

TIPSY SXL has a distinctive dynamic swimming action ideal for linear fishing. The body shape is wider than it is tall which makes the lure stable and helps it glide effortlessly when teamed up with lighter jig heads. When worked faster the tail which is set at 90° starts the whole body vibrating. The body is built like a skeleton so relatively little material has been used for a bait of this volume giving the lure its incredible ability to vibrate. The sides of the bait are ribbed again to make the surface softer making sure that predators hang on to the bait once they've taken it. Aniseed flavour.

SOFT BAITS

Pumped up soft bait that moves even on its own! The light round tail starts vibrating at the slightest impulse. Great for slow or very slow retrieves (linear or vertical) where the angle of the tail creates an S shaped rolling swimming action that gets more pronounced the faster you retrieve the lure. Try under-loading the rig with a micro head, for example, to get even more vibration and flank flashing that many fish find irresistible. Dorsal and stomach slits allow you to rig up a G TEX head to fish the lure right in the heart of snags and obstacles either on the bottom (dead tree roots, for example) or through weedbeds. Aniseed flavour.

THINK FINESS GAME

We have worked hard on creating the perfect imitation of a prey fish. The silhouette is identical to a small fish, the oversized realistic eye, the rounded pectoral fin are designed to attract predators feeding on fry. The long shad type tail gives off lively but tight vibrations that work particularly well on perch and zander. The long tail vibrates at the slightest movement so is also perfect for static approaches such as drop shotting. When twitched the whole body starts moving in a tight rolling action making the flanks flash seductively. Great all-round lure for finesse style tactics on pressurised venues where bites are tentative and fish focused on small fry.

The KIDDY is a finesse lure par excellence! We have worked hard to create the perfect imitation of a prey fish. The silhouette is identical to a small fish, the oversized realistic eye, the rounded pectoral fin designed to attract predators preying on fry. The long shad type tail gives off lively but tight vibrations that work particularly well on perch and zander. The split tail vibrates at the slightest movement. The bright flanks are easily spotted and shimmer from top to bottom flashing seductively. The large head makes hooking easy no matter what rig you are using – drop shot, jig head etc. Great all-round lure for finesse-style tactics on pressurised venues where bites are delicate and fish are focused on preying on small fry.

TIPSY-S38

Our two TIPSYYY baits are tiny. Measuring less than 4 centimetres each (38mm to be precise) these baits have a nervous wriggling action that is ideal for ultra-light styles on freshwater and rock fishing. The body shape is wider than it is long which helps give the bait stability particularly when fished drop shotting or on extra light jigheads. The body is not totally solid but built like a skeleton with rings of material round a central spine which give the bait great freedom of movement either on still or straight back style retrieves. Perch and trout will find this lure easy to take. Available with a shad type tail (S38) or a split tail (V38). Shellfish flavour.

ROCKSTAR 59

Since its creation, the GUNKI ROCKSTAR family of soft lures has built a solid reputation among anglers. The smallest size (45) has become essential for light fishing of trout and perch. Its effectiveness is particularly impressive! In practice, we noticed that we lacked a slightly larger size when it came to fishing larger waters using heavier jig heads or simply offering a size more appropriate to the baitfish that the fish are focused on. We therefore designed the ROCKSTAR 59 to meet these needs while still preserving the very specific specifications of the 45mm version. We have combined this ROCKSTAR 59 with a vibrant material and a slender tail. The result is a robust lure that starts moving at low speeds and/or can be used with lightweight jig heads. The versatility of this lure, combined with its attractiveness, should quickly make it an 'essential' in the boxes of specimen hunters. It's a real magnet for larger trout and big perch! Aniseed flavour.

ROCKSTAR 45

Designed to resemble little goby or bullhead, the ROCKSTAR has already caught plenty of big perch and trout. This 45mm size is perfect for targeting trout on small to medium rivers or for street fishing for perch. Tight tail vibrations coupled with the firm body rubber are ideal for fishing in fast flows for trout but are equally effective when using finesse street fishing tactics. All the great attributes of the ROCKSTAR are encapsulated in this smaller version. The chunky body shifts plenty of water when moving and provides great stability when the lure settles on the bottom. A small but irresistible morsel for surprisingly big fish! Aniseed flavour.

HOURRA CRAW 50

Don't be fooled by the diminutive size of our HOURRA CRAW 50. When conditions demand a lighter approach this little crayfish imitation is a fish catching machine! Works well on trout perch, chub and even rudd. For fans of rock fishing on the coast most small species will fall for this little shellfish bait. As with the larger versions, the claws are floating and vibrate when pulled back hard. Particularly deadly when fished on jig heads, drop shotted or used as a trailer with a micro jug. Shellfish flavoured.

BASS ADDICT

No need to introduce the HOURRA CRAW, noted for its realistic body, floating claws and vibrating legs and antennas. The perfect imitation of a crayfish defending itself. Fished on a jighead either straight or as a Ned rig, on a Carolina rig or a Texas hook set up, this is a fantastic bait for big perch and zander. Great for pike and black bass when fished with a Hoverjig, worked slowly across the bottom in a stop-start action. The latest generation of HOURRA CRAW UP baits feature two-tone colour schemes contrasting the stomach and back. The range of colours covers all situations from natural tones to more aggressive colour combinations. Shellfish flavour. Impregnated to the core with salt.

SOFT BAITS

The Boogie Craw has proved itself as a perch and zander bait par excellence thanks to the pronounced flapping action generated by the claws when fished on Carolina or Ned rigs or straight jig heads. Our Team GUNKI anglers swear by the Boogie Craw as a pike and black bass catcher, often fished with a Hoverjig. The team have decided to tweak the shape of the claws to improve the swimming movement and increase vibrations. They have re-worked the body shape to deepen the stomach slit and optimise the dispersion of an attractant. The legs have also been modified to pulse more on the drop and when retrieved. To complement these design changes, team GUNKI has worked on new colour schemes using double-injection dyes. With colours ranging from imitative to provocative, the new colours and body shape improvements make our BOOGIE CRAW VIB a must-have bait for many anglers. Shellfish flavour. Impregnated to the core with salt for more positive takes.

SKIP WORM 100

Sometimes you need to fish right in the heart of snags and obstructions like platforms or building foundations. For these situations you want a SKIP WORM in your box! This earthworm imitation lure is particularly good at targeting black bass but will work with other predators too. The body is ribbed with a flat section on the back for the hook point. The stomach side is rounder and helps the lure sink with a swaying motion stomach side down. The secret to the SKIP WORM is its density. The body is mixed with a high percentage of salt so it skips easily over obstructions, bouncing up to the surface and sinking down again. Try either a Wacky rig or a Texan set up to get the worm sinking slowly. Once it hits the bottom you can bounce and skip it along with little tip movements that fish find irresistible. Boosted with a worm attractor and particularly useful for black bass.

VISTA WORM

Choose your rig -wacky, drop shot, Texan with or without a weight. Whatever you prefer the Vista Worm is a classic for black bass fishing! The body is segmented with a flat back and round belly. This asymmetry lets you get the bait to dart in different ways depending on where you hook it. The tail is more ribbed than the rest of the body so it moves more. In the water each ribbed section gives off slight vibrations that are very life like. The Vista Worm will wriggle of its own accord just like a real worm! The body is dense and impregnated with salt so it can be cast a long way and worked back even by skipping over weeds or branches. A must have lure for all black bass fans! Impregnated with worm flavour.

SOFT BAITS

BUMPY is developed for linear fishing and designed to give off a very precise range of vibration. The tail starts vibrating gently at very slow speeds when you need to slow the lure right down to get a take. Fished faster the tail vibrates more strongly and the lure starts to roll. We use a lively rubber that is supple yet solid. The outline is proportioned to exactly mimic a prey fish. BUMPY is a real perch and zander magnet and suited to Texan hooking with a stomach and dorsal cavity. Super versatile this lure has caught fish in all sorts of different conditions. This ability to catch on any venue guarantees it a place in your lure box!

Snow Paradise

SOFT BAITS

The TIPSY SXL has a nervous yet lively swimming action that is particularly suited to straight retrieves. The body is wider than it is high which keeps the lure stable and gives it a gliding movement when fished with light jig heads. The whole body starts vibrating on stronger retrieves and the large tail gives chasing predators a great visual target. The skeletal body reduces the material used in the lure and gives incredible dynamism to jerks and twitches. The skeletal design also makes the surface of the bait feel softer and this can confuse wary predators who will hang on to this lure a bit longer before spitting it out. Hopefully long enough for you to strike! Flavoured with aniseed.

UFO

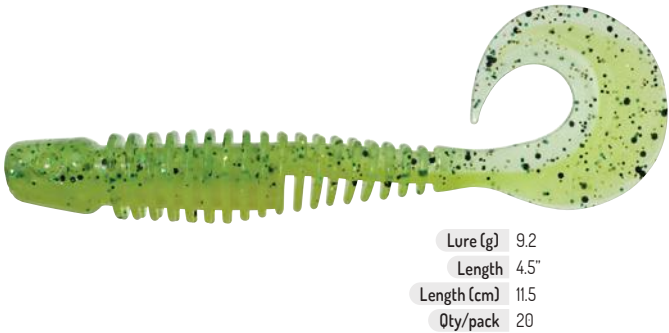

The sickle shaped tail on the TIPSY C-XL shifts a lot of water and can be detected by fish a long way off. Fished on the surface or just above weedbeds the lure will buzz back creating enough disturbance to attract even the wariest predator to investigate. On the bottom and around obstacles the attraction is equally strong. Fished on the drop the tail will twitch and pule at the tiniest impulsion. Can be fished on a classic jig head or a Texan rig. The lure moves plenty of water without pulling too hard on the rod and is very effective when fish are wary of strong vibrations. The body features slits, a flat back to perfectly position your hook and is very stable in the water. Works well as a trailer on spinner baits, rubber jigs or bladed jigs. This size works particularly well on perch and zander when they are fixated on small fry. Flavoured with aniseed.

MOSQUITO PLG 230 ITB

It has not taken long for the MOSQUITO to build an excellent reputation as a reliable perch and zander catcher, particularly in autumn and winter. Team GINKI anglers also use it extensively as a sea bass lure. This beefed-up 23cm version is aimed at anglers looking to target bigger fish in deeper water. The head of the MOSQUITO 230 has been re-worked to fit our screw on G'RIDER PLG deep-water vertical jig heads. The slimline profile and absence of a tail means the lure gets down fast and pulls less on the rod, keeping in range of your echosounder for longer. The subtle vibrations generated by the maxi-pintail work particularly well on educated zander and pike. Destined for accurate, deep vertical fishing and specimen hunting, the lure is also great at heavy sea fishing targeting bass, pollock and meagre. Over weedbeds try using an unweighted Texan hook and working the lure with a series of jerks to provoke opportunist hits from pike. The stomach features SBS grooves to maximise the efficiency of your attractant. Aniseed flavour.

V3IB PLG 190 ITB

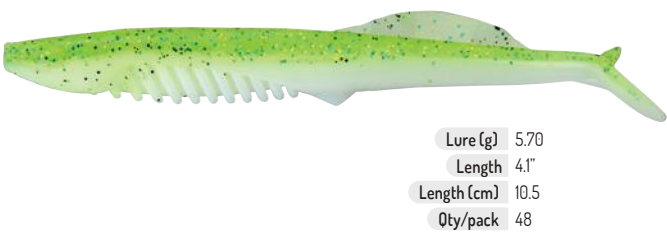

This is a proven zander catcher in the classic sizes, having proved its worth for GUNKI anglers over time and decisive in helping Gael Evans win the FC Fight Sandre final. The V3IB has been lengthened slightly to create a 190cm version ideal for anglers trying to select bigger zander and pike. The head of the V3IB 190 has been re-worked to fit our screw in G'RIDER PLG deep-water vertical jig heads. This shad gives off subtle vibrations and works well on classic heavy vertical rigs. Works equally well at sea for targeting bass, pollock and meagre in deeper water. The lure sinks fast and the small tail offers little resistance so it pulls less on the rod staying longer in the range of your echosounder. Can also be used for light linear fishing for pike when a slimline profile and subtle vibrations are key to getting takes. Aniseed flavour. SBC concept.

SOFT BAITS

The V3ib is a new generation soft bait based on our legendary V2ib lure much loved by zander anglers for its subtle action. The new version features our SBC (Sugar Belly concept) which lets you load the bait with attractants and makes the bait easier to suck in, often the key to nailing delicate takes. The rubber is firm and highly mobile and stands up well to sharp toothed attackers. The slimline profile does not pull too hard on the rod tip and is particularly suited to vertical tactics for winter zander. Great for sea angling particularly when bass and Pollock are smashing sand eels. The slender tail is an asset when fishing under the boat as the lure falls faster and straighter than other patterns, a real plus when precision fishing over defined spots. Aniseed flavour.

G'Bump needs no introduction. Its reputation as a top fish catcher is known across Europe! Nevertheless we are always looking to modify and update even this classic lure. So we have put together a range of new more subtle and nuanced GHOST colours. Every detail has been refined to tempt the wariest of fish in the toughest conditions. Tackling windless days, crystal clear water and educated fish will no longer be a problem. It is the fish who should be afraid of ghosts now!

G'BUMP CLASSIC 65

There is no need to introduce the G'BUMP range to European anglers. Their fish-catching powers are already legendary! The G'BUMP 80 is often the key to triggering takes from big perch and zander in autumn. However, in the height of summer the fish can get obsessed with slightly smaller prey. This is when our new 65mm version comes into its own! From midsummer onwards, this new size is perfect for perch and zander fishing on straight retrieves or on more energetic animations for reaction takes. Be ready to be surprised by the number and quality of bites you will get on this diminutive morsel. Aniseed flavour.

This new shad bait will not go unnoticed! The tail is large and imparts a distinct rolling action which runs right through the body to tempt any opportunistic predators. The triangular shape of the body is very stable and holds the bait well in the water. Ideal for cast and retrieve prospection be it for perch, zander or pike. For specimen pike try the big 20 cm lure with a 10g jig head. The lure is amazingly stable and gives off surprisingly strong deep vibrations sure to attract any passing esox!

SOFT SWIMBAIT

N GARUDA 170

The GARDUDA 170 is a pre-rigged shad specifically designed by GUNKI for pike fishing in linear, cranking, and for exploring deep areas. Its powerful yet stable swimming allows for effective exploration of water layers between 1.5 m and 6 m, depending on retrieval speed and rod position. It performs particularly well in water bodies with depths of 3 to 4 meters. Equipped with stabilizing fins, it maintains perfectly balanced swimming during accelerations, changes in pace, and in strong currents, making it an excellent choice for river and lake fishing. Its rigging with a removable '90° treble' hook offers great versatility: belly position to maximize hooking in open areas or back position to minimize snags in cluttered areas. This free rigging also helps preserve the lure and reduce unhooking. To multiply stimuli likely to trigger predator strikes, GUNKI has equipped this rigging with a removable blade. This generates additional vibrations and strong flash effects that enhance the lure's attractiveness, especially when it's necessary to provoke an aggressive reaction. The GARDUDA 170 features multiple attachment points to adapt its behavior. Connected to the ring located at the mouth level, it ascends more quickly through the water column. When attached to the central attachment point, it maintains a more straight trajectory and stays longer at the desired depth, a valuable advantage for deep exploration. Thanks to its elongated profile, instant action, and high stability in swimming, the GARDUDA 170 excels in sharp shooting approaches associated with LIVE technologies. Its casting precision and ability to quickly reach the targeted depth allow for effective strikes on precise spots or fish spotted in real-time (drop-offs, submerged trees, clearings in weed beds, bridge pilings, or isolated obstacles). A major asset to provoke attacks from the most wary pikes.

G'BUMP SWM 95 READY PACK 14G

Cleverly designed to be mounted interchangeably with a G'BUMP SWM HEAD or HEAD TEX, the G'BUMP SWM allows you to switch from a 'classic' head, suitable for swimming in open and less cluttered environments, to a 'Texas' head that limits snags in weedier and rocky areas. In this pack, the rigs are ready to fish, pre-assembled for a perfectly adjusted finish. You will find a lure with a lead-free G'BUMP HEAD (classic 2/0 hook) and a lure rigged with a lead-free G'BUMP HEAD TEX (Texas 2/0 hook). For those who don't want to waste time assembling the lure at the water's edge! 14g lead head. 'Lure + TP' size: approximately 9.5cm. 'SBC' concept to optimize the use of attractant.

G'BUMP SWM 145 READY PACK 34G

This pack embodies the interchangeability of the G'BUMP SWM system. You can swap effortlessly from a TP G'BUMP SWM HEAD to a HEAD TEX' allowing you to change from a classic head in open water to a Texan style head when fishing near weeds and rocks. This pack contains ready-to-fish lures each perfectly set up. You will find a lead-free G'BUMP head with a lure fitted to a size 4/0 hook and a lead-free G'BUMP HEAD TEX fitted with a size 5/0 Texan hook. 34g jig head, lure size approximately 14.5cm (including head). SBC concept to optimise the use of an attractant.

G'BUMP SWM 95 BODY

Our G'BUMP SWM bodies can be swapped effortlessly between a G'BUMP SWM Head (classic hook) and a G'BUMP SWM TEX HEAD (Texan hook) to create a bait approximately 9.5 cm long. Attaching these lures is made easy by the insertion points which help position the hook perfectly. Designed to complement each head for a perfect finish. Made from firm plastic generating those legendary G'BUMP vibrations. Works particularly well for sea bass fished linear or traction styles. The G'BUMP SWM gives off strong signals when retrieved at any speed and can be fished in even the strongest currents. SBC concept to optimise the use of an attractant.

SWM JIG HEADS

G'BUMP SWM 95 HEAD

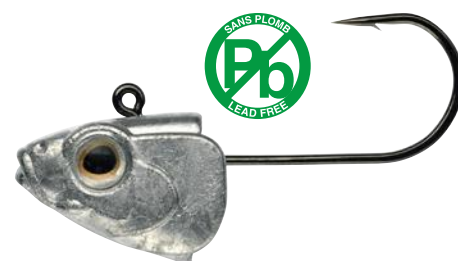

The G'BUMP SWIM HEAD (classic hook) is designed to be fished with a G'BUMP SWIM lure. When put together you can get a bait of roughly 9.5 cm in size. The head features a signal eye and the triangular shape stays stable in faster water. Ridged gills help hold the lure perfectly in place and straight. Fitting a G'SWIM lure onto this head is easy thanks to the hook insertion points on the lure. Lead-free weight, hook 2/0, tin plate finish.

LOADED HEADS

This GUNKI jig head stands out for its great versatility. It has been profiled for rapid descent through the water layer. Its hydrodynamics offer little resistance in currents. Designed to be reactive to movements, it is suitable for both linear fishing without animation and more dynamic fishing styles such as 'jigging' or traction fishing. Its balance and shape provide the stability necessary for vertical approaches. The hooks have been selected for use with G'RIDER both in saltwater and freshwater. The shape, wire diameter, shank length, and gape have all been meticulously considered to optimize the hook's penetration at the strike, regardless of the fishing technique used or the target species. All without compromising their ability to withstand the strongest takes. The grip of the G'RIDER has received special attention to ensure optimal lure holding while limiting tearing when catches are frequent. An opening integrated into the head design allows for the quick attachment of a stinger hook or a blade. Well-finished head in a range of colours that allow you to adapt the jig head according to the fishing environment and the target species.

N G'RIDER PELAGIC ORANGE CHART FLUO

This GUNKI jig head was designed for pelagic approaches. Compact, its streamlined shape allows for a rapid descent of the lure and limits the drift of the setup under current pressure. Its balance ensures perfect stability of the lure in a horizontal position and supports any type of animation. Its wide front ring accommodates larger diameters of fluorocarbon and allows for adding a split ring to attach your hook (HOOKS RIG- G'RIDER PLG). Its oversized eye helps target fish strikes close to the head, where the hook will be ideally positioned. Coupled with a flat rim, the lure is attached to this jig head thanks to the stainless steel spiral rod, whose diameter and length ensure optimal and reliable hold of the lure, whether it is slender (MOSQUITO 230, V3IB 190) or bulkier (G'BUMP 200). A second ventral ring, integrated into the head's profile, allows for the addition of a stack, blade, or any other appropriate accessory for those who like to customize their setup as desired.

Ref		Color	Weight (g)	Qty/pack	RRP€

71291	55	Orange Fluo Yellow	55	1	3,99
71292	75	Orange Fluo Yellow	75	1	3,99

G'RIDER PELAGIC

GUNKI loaded head developed specifically for deep-water fishing. The compact design gets down fast and keeps the bait sitting horizontally against the force of the current and when working the bait. The front ring is wide enough to take thick fluorocarbon leaders and a split ring to attach a hook (HOOKS RIG- G'RIDER PLG). Over-sized eye acts as a trigger to incite fish to take as close to the head and hook as possible. Fixing your softbait neatly against the flat rear of the head is easy thanks to the stainless-steel prong. This guarantees your lure stays in the perfect position. Works with slimline baits like the MOSQUITO 230 or V3IB 190 and chunkier baits such as the G'BUMP 200. There is a second eye on the base of the head that will take an extra hook or blade if required to customise your set up.

68899	75	Neutral	75	1	3,99

HOOKS RIG-G'RIDER PLG

3X treble hooks that are very strong and ready to use. Perfect for using with G'RIDER PLG heads. Sitting the treble at 90° gives the ideal presentation on the back of Mosquito 230's or V3IB 190's to maximise hook ups. There is a stop to hold the treble in place when fishing but releases on the strike. Great for deep vertical fishing. Can also be used as stomach hooks. PTFE coated.

The famous G'Foot, the 'football' jighead developed by GUNKI, has evolved. In terms of shape, nothing changes: the rolling, balance, and descent speed of the original model have been retained. It has been equipped with a new hook whose gape, straight point and wire diameter provide extra sharpness to optimize hooksets along with strength to handle the largest predators. The grip has been redesigned to hold the lure more reliably and durably on the jighead without damaging it. Whether used linearly or vertically you will be impressed by the performance of this G'FOOT 2.0, born from the experience of top Team Gunki anglers!

G'VERTI 2.0 GREEN CHART

The G'Verti has been revamped. This 'clog' shaped jig head developed by GUNKI has had a facelift! Offered in new colours and equipped with a new ultra-sharp hook (with a straight point), its metal is also stronger for extra resistance when targeting big fish. The grip has been revised to hold the lure in place more durably without damaging it. The primary qualities of the G'Verti 2.0, notably a very stable presentation of the lure during pause phases (whether on the bottom or suspended in the water column), remain the same. GUNKI has ensured that the hook size is matched to each weight to optimize the lure's movement (neither too long nor too short) without compromising the 'hit/capture' conversion rate.

G'TEX

For setting up Texan rigs there is no wider choice of heads on the market than our G'TEX range. The hook hangs at almost a 90° angle to the line which improves your strike rate and gives a smooth gliding action to your lures. Equally at home on straight retrieves or vertical fishing situations the offset centre of gravity on the G'TEX head gives a realistic live bait type action to baits when paused – a sure way to provoke an attack from following fish! Developed to work alongside our new JUNGLE soft baits for searching out snaggy swims where no other anglers dare fish! Available from 3/0 to 5/0 and 5 to 21g, the G'TEX range covers the needs of most European predator anglers!

G'ROUND

A classic round loaded head that will take any lure type and can be fished with any style. Dense, stable and well balanced. Our round head gives off a strong eye signal to predators that focus attacks on the head itself guaranteeing cleaner hooking and less fish lost. This compact head offers little water resistance and can be worked easily round snags.

«STREET FISHING CONCEPT» JIG HEADS

Each aspect of these new GUNKI Concept Street Fishing loaded heads has been carefully considered to cover all 'finesse' styles of soft lure fishing. Each of the four models has a precise function. Working on the hydrodynamics and weight distribution we have got some heads to sail smoothly whilst others have a more darting action, other heads that suit a more static presentation of a lure and respond to tiny micro animations. Fine wire but remarkably strong hooks complete each micro rig. Mat finish for extra discretion.

G'FOOT MAT NATURAL

Football shaped weight designed specifically to get a lure down quickly. Most attractive when scraped and bounced over snaggy bottoms (rockin' motion style). Perfect for working round deeper jetties and moorings with shads and other lures. The mat finish is discrete and blends in with darker rocky bottoms.

G'SLIDE MAT NATURAL

The G Slide is a truly dynamic loaded head with a distinctive missile shape. Perfect for linear fishing from the bank. With the weight distribution loaded to the front of the head you can generate sudden dives which will often trigger an attack. Worked back more actively with fast short pulls you can get a lure to dart looking just like a panicking prey fish. Absolutely deadly on perch!

RUBBER JIGS

The MICRO HOVERJIG GUNKI was designed for downsizing enthusiasts, an approach that involves reducing the size of lures to deceive the wariest fish. Inspired by the success of the HOVERJIG, which incorporates its main technical strengths, it offers an ultra-discreet, natural, and particularly versatile presentation capable of triggering strikes even on fish under heavy fishing pressure. Its streamlined head has been specially developed to efficiently navigate vegetation, submerged branches, and obstacles while maintaining excellent stability. Its specific hook, perfectly adapted to the format of this micro jig, features a wide gape and optimized wire diameter, providing an excellent balance between penetration quality during the hookset and resistance during fights. Its design also promotes the retention of trailers while minimizing snagging risks in cluttered areas. The carefully calibrated weed guard ensures effective protection without compromising hookset quality, especially with finesse setups. Its silicone skirt, composed of very thin and particularly supple strands, animates at the slightest movement, creating a natural volume and subtle mobility both on the drop and during the most minimalist retrieves. Thanks to its compact profile, the MICRO HOVERJIG perfectly mimics various aquatic prey, such as fry, invertebrates, or small crayfish. Combined with different types of trailers (crayfish, larvae, shads, etc.), it becomes formidable on perch, chub, trout, and black bass, as well as on zander, asp, barbel, ide, and even pike. A reference for street fishing and finesse fishing enthusiasts looking for a lure capable of enticing the most educated fish.

The HOVERJIG quickly established itself as a reference for pike fishing in snaggy swims. This smaller version, the TINY HOVERJIG, retains the same shaped lead head to easily pass through vegetation and wood. As with the larger models, the hook has been specifically adapted to the size of this mini rubber jig. Designed to minimize hang-ups on obstacles, support trailers, and optimize hooking efficiency. This hook is short with a fairly wide gap. Capable of handling big fish, the wire diameter is specific to each hook size to achieve the best 'penetration during hook set/resistance to opening' ratio. The brush is rigid enough to navigate obstacles but flexible to ensure a clean hook set with finesse rods. The suppleness of the silicone strands, along with their length and number, gives the skirt a subtle volume and mobility, whether on the jig's descent or during minimalistic animations. Perch, black bass, large trout, and bass anglers will undoubtedly find a colour suitable for the substrate and prey they target, regardless of the environment! Available in three weights: 5g, 7g, 10g.

The HOVERJIG is a swimming jig developed for pike fishing. There are times when pike feed on crayfish in snaggy swims (sunken trees, boulders etc.) more than they do around weedbeds. The HOVERJIG has been created for these moments! Profiled head shape easily works around snags and the long anti-weed bristles the perfect balance of softness-(so a pike easily flattens them in its jaw) and stiffness to keep the hook clear of snags. Pike are drawn to anything that moves a lot of water, so we have designed the skirt from a mix of natural fibres, flashabou and silicone to get maximum volume and visual attraction. The skirt opens up in water and slows the lure down on the drop. Stainless steel wire whippings for extra solidity -a real plus point when pike are attacking repeatedly. There is an extra eye on the head to add an optional blade (blade supplied with lure). We have developed a size 5/0 short shank wide hook to optimise the action of the trailer blade and give more direct positive hooking.

We recommend you team the HOVERJIG up with these trailer baits:

Crayfish imitation:

- HOURRA CRAW: slight vibration/worked on bottom
- BOOGIE CRAW: flapping vibration/on the drop

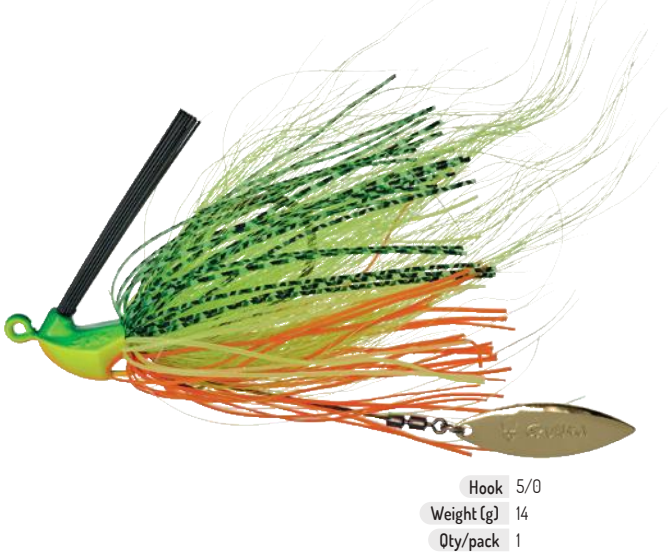

Fish imitations

- TYPSY SXL: powerful vibration/on the drop
- PEPS: Gliding action/weedbeds

PRE-LOADED HOOKS

GUNKI LOADED TEXAN HOOK

Range of loaded (zinc) Texan style hooks in a variety of weights and hook sizes to suit different lures and fishing depths. A screw fitting allows you to easily and securely attach a soft bait to the hook. Great for fishing through weedbeds or other snaggy swims.

Blades designed for attaching to soft baits! Adding a blade increases the visual attraction of any soft bait plus adds to the noise/vibration attraction. Placed above your lure a Fix'Flash blade will also help your bait to glide through the water, particularly effective when you are after pike. Different colours let you play with a showy flash or a more discrete colour contrast. These blades are great when the fishing is harder and have been used for years by top perch and pike anglers!

BRAID

G'BRAID 8X EDGE

Featuring exceptional knot resistance, high abrasion resistance and a supple finish, this GUNKI braid has all the characteristics needed for lure fishing! The top-quality PE fibres in this G'BRAID 8X Edge are woven to create a perfectly round, low diameter profile. This 8-strand braid offers exceptional linear strength and in testing increases knot strength by 20% (manufacturers data). The braid is coated with nanoparticles of fluorocarbon to increase abrasion resistance and enhance smooth running for greater casting performance. Twin coloured braid with 2 metres of green fluoro alternating with 1 metre of khaki for great visibility even in tricky light conditions. Our team noticed that this helped camouflage the braid over single colour versions. This is the braid of choice for anglers targeting big fish using Bigbaits and other demanding and technical approaches

N G'BRAID 8X FIGHT PIKE AD

The G'BRAID 8X FIGHT PIKE ADDICT braid is specially designed for big bait enthusiasts and the pursuit of the largest predators, particularly record-breaking pikes. This GUNKI 8-strand, 100% PE braid benefits from a specific weaving process developed to maximize its linear strength and meet the demands of specimen fishing. This design optimizes the diameter-to-strength ratio to offer exceptional power while maintaining a perfectly round profile. These characteristics increase casting accuracy and distance due to improved glide quality through the guides. The reinforced '3X-Silicon' surface treatment gives the G'BRAID 8X FIGHT PIKE ADDICT great suppleness and appreciable smoothness, reducing friction and noise during retrievals. It also retains excellent abrasion resistance, an essential asset for tackling snaggy spots and intense battles. Its fluorescent green color ensures optimal line visibility in all conditions, allowing for perfect control of drifts, trajectories, and movements. A braid developed for anglers seeking power, reliability, and control, essential qualities when hunting record fish!

G'BRAID 8X FIGHT

This braid is designed for intensive cast-and-retrieve lure fishing. An 8-strand GUNKI PE braid produced using a special weaving technology which optimises linear strength. This means the diameter/breaking strain ratios on this G'BRAID 8X FIGHTING are greatly improved, creating a round-profile braid that is very discrete in the water. The surface features a 3x Silicon coating which makes the braid very soft and helps improve casting performance. Fluoro Green for maximum visibility.

G'BRAID 4X GAME

GUNKI 4-strand braid made from top quality high-density PE fibres giving you unparalleled linear strength and abrasion resistance. The lack of stretch is vital for bite detection but what sets this apart from other braids is the quality of the weave, adjusted to create a perfect balance between suppleness and stiffness. Ideal for lure fishing. Our G'BRAID 4X has all the qualities of a top-class braid and is available at an unbeatable price! Colour Fluoro Green for optimum visibility.

FLUOROCARBON & HARD MONO

GUNKI ICE FLOUROCARBON

Top of the range fluorocarbon (PVDF) with some very special qualities. The refractive index is very close to that of water so it is virtually invisible. Being totally waterproof means almost no stretch compared with nylon and this is particularly impressive in the lower diameters. Sinks three times quicker than classic lines which helps with precision fishing or where you don't want a slack belly of line to form. The line is exceptionally abrasion resistant – perfect for sanggy swims – and strong. Supplied in a plastic spool with soft edges that automatically catches the line. Great for technical hook lengths! 25m spools (20 m from 0.64mm upwards).

GUNKI HARD MONO

This hard mono is ultra-resistant to abrasion and cutting. Perfect for making rigs targeting pike, catfish, sea bass and cod. Less stiff and easier to knot than a 100% fluorocarbon, this nylon is a great choice for longer hooklengths in thicker diameters and for shock leaders. Great knot resistance. 50m spools.

PIKE ADDICT

GUNKI

N DROP NET FLEX-HIGH STREET

Designed for high-altitude sessions, the GUNKI DROP NET FLEX-HIGH STREET landing net perfectly meets the demands of street fishing. Compact, it is easy to carry in its cover. It allows for the quick securing of catches from docks or any high banks. Equipped with a 10-meter-long rope, it offers excellent capability to land a big fish from several meters below the angler. Its wide-opening frame and deep net ensure effective landing of large pike, zander, and other big perch. The mesh diameter limits water resistance (you can, if necessary, weight down the bottom of the net) and reduces the risk of hook snags. Its flexible frame, which is easily collapsible, minimizes bulk and facilitates storage and transport. Essential for frequent movements that are typical of street fishing. Reliable, practical, and designed for urban environments, the GUNKI dock landing net stands out as an essential piece of equipment for all anglers seeking efficiency and mobility by the water's edge. It features luminous strips for better visibility of its position in low light conditions.

PIKE ADDICT LANDING NET

The ingenious system used to lock the net simply by turning the handle two times means this net can be ready to use in seconds. The GUNKI PIKE ADDICT features a solid 11.5x15mm aluminium frame fitted with PVC mesh that will hold fish safely in the water once netted. Collapsible handle with EVA comfort grip and a ruler markings. Folds away neatly for a net of this size. An all-round net that works equally well when perch and zander are possible targets.

SUPERSIZE

SUPERSIZE PIKE LANDING NET

GUNKI SUPERSIZE PIKE nets feature a reinforced frame capable of coping with the demands of specimen hunters. The handle is 80mm in diameter for exceptional stiffness and strength. The mesh itself is securely fitted to the frame and will not tangle. An ingenious yet simple system attaches the head to the handle and the net can be opened very easily. The aluminium frame comprises an oval tube measuring 11,5mm x 15mm. The flat-bottomed net is deep and large enough to rest a big fish ready for unhooking. The thick fish-friendly, long-lasting knotless mesh is PVC coated to ensure quick drying and eliminate tangles. Handle with a high-density PVA comfort grip.

CONCEPT STREET FISHING

READY STREET RUN LANDING NET

New GUNKI net designed for the roving Street Fishing angler. Very compact, measuring just 65 x 50 x 4cm folded, the telescopic carbon handle extends to 2.5 or 4 metres depending on the model. Can be clipped to a belt or a ring on your fishing bag. Designed to cope with high banks like quaysides, the net opens with a single hand movement by sliding the button. Deep flat based pan made from fish-friendly knotless mesh and coated in quick-drying PVC to reduce the chance of snagging lures.

FAST STREET LANDING NET

GUNKI Street Fishing concept designed for roving on foot made with a very strong aluminium handle. Packs away to only 60 cm and comes with a shoulder strap for easy transport. The real innovation is the handle itself. The three sections can be set up with just one movement thanks to a telescopic system on the middle section that on the push of a button extends the handle to its full length simply by pulling on the butt section. The handle goes to 1.20m without the head! Simple and quick to set up- a real advantage if you are fishing on your own! Solid net head with a 15mm aluminium frame. Standard screw fitting. Deep net with PVC coated mesh.

AREA & FLOAT TUBE

FLOAT-DRIFT HANDLE LANDING NET

Floating GUNKI landing net whose 75cm handle lets you reach fish without having to bring them right beside you. The handle folds away with a simple push of a button. Compact yet with a deep net than can take specimen fish or act as a temporary holding net next to your float tube. Cord with a carabiner to clip the net to your craft. The mesh is intentionally wide to offer less water resistance both when netting fish or travelling with the net in the water. The fish-friendly, quick-drying knotless weave is PVC coated to reduce the risk of getting hooks snagged. Aluminium handle and frame with comfortable EVA grip.

POWER GAME COLLECTION

This OVERTAKE luggage range is designed for predator fishing from the bank or a boat. The luggage has a modern look and every detail has been carefully considered to optimise the storage of your equipment. The exterior fabric is 100% Polyester 300x300D, covered with a thin layer of PVC to limit water penetration (rain). Lining is 100% Polyester 210D. Nylon zipper.

GUNKI OVERTAKE BOX BAG-PIKE

Optimized for big bait enthusiasts, this GUNKI OVERTAKE BOX BAG-PIKE is equipped with two large boxes (35.5x22x8cm), ideal for storing bigger lures and other bulky equipment. It opens from the back. It also features numerous external pockets for extra storage and quick access to gear. Comfortable and removable shoulder strap. Reinforced bottom. A bag suitable for anglers who fish both from the shore and from a boat!

Ref	Size (cm)	RRP€
18587	36x22x25	69,99

GUNKI OVERTAKE BOX BAG-FRONT STRIPES

Bag with a main compartment accessible via a front opening allowing quick access to three boxes measuring 27.5x19.5x4.5cm. The upper compartment also contains a plastic box (20x13.5x4cm), very practical for organizing small accessories. This GUNKI BOX BAG-FRONT STRIPES is very functional. It is offered in a compact size, taking up little space but perfectly suited for organizing your lure fishing gear. Numerous 'secondary' storage pockets (zipper, mesh, transparent, pliers) have been added for those who always want to pack 'a little more than necessary'! Removable shoulder strap.

WATERPROOF COLLECTION

Solid and waterproof range of luggage that will keep your gear dry no matter what the weather! This simple yet practical storage system is fully interchangeable and you can modulate your tackle so you only carry what you need with you.

GUNKI WADING-PROTEAM BACKPACK

The must-have for wading! The design of this GUNKI PROTEAM BACKPACK is fully thought out for those who fish from the shore and don't hesitate to get into the water to access areas that are difficult to exploit from the bank and/or to gain casting distance. Its base is made of a single block to protect its contents from any contact with the water surface. The materials used, the sealed seams, and the waterproof zipper, which doesn't go all the way to the bottom of the bag, offer effective protection against water penetration inside. Made from waterproof 900D polyester fabric coated with TPU, this PROTEAM BACKPACK has a waterproof rating of IP6. Robust and compact, it features 'D' rings and straps to attach additional equipment (wading net, attractants, pliers, etc.). On the side, there's a 'pocket + adjustable strap' system for carrying a water bottle, a spare rod, etc. The padded shoulder straps and adjustable chest strap ensure comfort during walking, wading, trekking, etc., as well as great freedom of movement inherent to fishing activities (casting, hooking, fighting, etc.). A technical, durable, and waterproof bag that can be used in both open and/or overgrown situations, for wading in small rivers or along a beach!

GUNKI DRY BAG-WADING BACKPACK 40

This GUNKI DRY BAG- WADING BACKPACK 40 keeps your belongings dry and allows you to go 'treck-wading' while protecting your gear from the elements. It features an external mesh side pocket and a strap on each side, useful for storing a water bottle and/or carrying a spare rod. The bag is also equipped with 'D' rings for attaching any other useful accessory for quick access (landing net, attractant tubes, etc.). The foam ventilated back ensures optimal comfort even during long activity days, while the wide and comfortable shoulder straps evenly distribute weight across your shoulders. For added comfort, a chest strap is included, helping to stabilize the bag regardless of movement. The bag closes securely with three buckles, guaranteeing the protection of your belongings against the elements. It is made of 500D Polyester with PVC coating. This waterproof and very strong material, coupled with a roll-top closure, ensures maximum waterproofness. This closure secures with three buckles, guaranteeing protection of your belongings against weather, spray, and other water splashes. Once fastened, the buckles form a carrying handle. Functional and reliable, it is THE bag for the adventurer-angler!

GUNKI DRY BAG-ALLROUND 25

This GUNKI DRY BAG-ALLROUND 25 keeps your belongings dry. With its 25-litre capacity, it's ideal for carrying essential gear (change of clothes, etc.) and securing important items (camera, phone, wallet, etc.). It is made of 500D Polyester with PVC coating. This waterproof and very durable material, along with a roll-top seal, ensures maximum waterproofing. The seal is securely closed with three buckles, protecting your belongings from the elements, spray, and other water splashes. Once fastened, the buckles form a carrying handle. For added comfort, we've included two straps that allow for carrying in 'backpack mode' when there's a long distance to cover with a loaded and heavy bag! A reliable, practical, and compact bag that doesn't take up much space but offers great utility!

GUNKI BAKKAN-HARD LID 40

The reliability of this luggage made from 1.5mm EVA (Polyester), a waterproof and rot-resistant material, is well established in the angling world. This GUNKI HARD LID 40 model is above all durable: its walls are rigid, and the base has been reinforced and protected by non-slip pads. The rigid lid features profiled edges (protection against rain and splashes). It serves as a tray and is tailored to hold and keep in place a SAFE BAG LID or a rectangular box measuring 35x22cm. Convenient for separately storing lures used during fishing from those kept in the main compartment; and for those who reorganize their equipment once back home! Comfortable and removable shoulder strap to avoid tripping over it on the boat! It also allows you to secure the luggage with its clip system. Ergonomic carrying handle for added comfort. Note that SAFE BAG PM/MM/GM/ LID is adapted to the format of the BAKKAN-HARD LID 40, FULL PACK 40 & STARTER 40, and developed to allow modular and organized storage of your equipment inside this luggage (sold separately). Accessorised with two rod holders and a pocket for pliers, this bakkan is optimised and designed for lure fishermen fishing from the shore, boat, kayaks, paddles, etc.!

GUNKI SAFE BAG PM

These waterproof and modular bags are compatible with all our GUNKI Bakkans. Their format is adjusted for optimized storage of equipment in the HARD LID 40, FULL PACK 40, and STARTER 40 models. For those meticulous about organization, each of these GUNKI SAFE BAGS can also be nested inside another (nesting system: 2 PM in the MM / 2 MM in the GM). Made from 1mm EVA material (Polyester), they are waterproof, strong, and rot-proof. The transparent 'gun smoke' lid allows you to determine at a glance what is stored inside while minimizing the harmful effect of the sun's rays on your tackle.

TITAN

N REELS P&M TITAN PUNCHER FV

Developed for the powerful fishing of catfish, the P&M TITAN PUNCHER FV spinning reels combine robustness, reliability, and power. Available in two complementary sizes, they perfectly meet the demands of the main techniques dedicated to tracking the finest specimens: fireball, drifting with bait or lures, as well as lure fishing by spinning. Their compact design, combined with a reinforced composite frame and rotor, gives them excellent resistance against the most demanding battles. Equipped with a large capacity aluminum spool 'LC Lips,' a progressive and powerful multidisc drag system (8 or 10 kg depending on the model), and a cross-winding oscillation system, they offer high-level performance for a particularly attractive quality-price ratio.

IMPACT

N REELS P&M IMPACT CASTLINE FV

Designed for predator fishing with lures, the P&M IMPACT CASTLINE FV spinning reels combine modern design and performance. Their proven mechanics offer smooth rotation and remarkable ease of use, providing optimal comfort both during retrieval and fights. The S-Curve oscillation system with cross-winding ensures regular spooling and perfect line release when casting. Equipped with a progressive micrometric drag, they guarantee precise adjustment and perfect control of the fish. Lightweight and robust thanks to their composite material body and rotor, they also feature infinite anti-reverse, an anti-twist line roller, and an ergonomic 'EasyGrip' handle. A high-performance series offering excellent value for money.

N REELS P&M IMPACT CASTLINE FD

Designed for fishing predatory and large fish with bait, the P&M IMPACT CASTLINE FD freeing reels combine robustness, reliability, and comfort of use. Their particularly precise freeing system allows for fine adjustment of the line tension for perfect management of bite starts. Equipped with a 'Long Cast' profiled aluminum spool, they optimize casting distances while improving the smoothness of line release. Their high-performance mechanism includes an infinite anti-reverse, S-Curve cross oscillation for regular and optimal winding, a progressive micro-adjustable drag, and an anti-twist line roller. With a decidedly modern design, this generation of P&M reels also stands out for its excellent quality-price ratio.

TITAN

N P&M TITAN STRIKE

Pezon & Michel TITAN STRIKE rods are designed for catfish fishing. With an outstanding quality/price ratio, they combine accessibility and technicality without compromising on performance. Featuring a powerful and progressive action, they allow the angler to master the largest specimens with authority while offering excellent user comfort. Their versatility covers all techniques dedicated to the pursuit of this extraordinary fish: drift fishing with natural baits and lure fishing with cast-and-retrieve. Made from composite carbon, the TITAN STRIKE ensures robustness and reliability in the most demanding conditions. They are equipped with SIC double-footed rings and an ergonomic handle with a fighting butt. For big catfish hunters!

N P&M TITAN PUNCHER

New generation of Pezon & Michel rods dedicated to catfish fishing, these TITAN PUNCHER models are versatile and have been designed to cater to both active lure approaches (from the shore or by boat) and natural bait drifting fishing. The M1 carbon blank provides a strong power reserve while maintaining excellent tip sensitivity, essential for detecting subtle bites and precisely controlling lure movements. Its progressive action facilitates long-distance casting and ensures, under heavy pressure, a constant hold on the fish as well as safe management of battles with larger catfish. Equipped with anti-tangle SIC double-leg rings, a tip ring with a wrap-around ceramic insert, and an ergonomic fighting handle with a large knob, this rod offers reliability, comfort, and endurance for intensive catfish fishing.

N P&M TITAN CORE

The Pezon & Michel TITAN CORE S-300 SHORELINE rod is designed for bank fishing for catfish using live bait. It stands out with its exceptional value for money and allows effective practice of the main techniques dedicated to hunting large catfish: float fishing, bottom fishing, break-line fishing, or controlled drifting. Its ultra-powerful conical blank provides the necessary reliability to launch and maintain heavy rigs when needed, while ensuring perfect control during fights with the biggest fish. Its progressive action offers comfort and safety during combat phases. Robust and reassuring, the TITAN CORE S-300 SHORELINE is an accessible solution for anglers seeking high-performance and durable equipment without compromising on the essentials. An excellent choice for discovering or regularly practicing bank fishing for catfish.

BUCK PIKE TANDEM

Tandem version of our BUCK PIKE lure with two nail shaped blades of different sizes that give a complex set of vibrations that provoke takes from pike that are not interested in standard lure signals. Ideal for fishing slowly past obstacles. Teaser in bucktail with tinsel. Shaft made from 1.2mm stainless steel. Red translucent target ball gives perusing fish a focus to attach right at the level of the hook.

Ref		Ø mm	Hook	Weight (g)	RRP€
49012	N°2/6 FIRE TIGER	1,20	1	27	8,99
49013	N°2/6 WHITERED	1,20	1	27	8,99

49015	N°2/6 RAINBOW TROUT	1,20	1	27	8,99
49017	N°2/6 FULL SILVER	1,20	1	27	8,99

Top quality landing nets that cover most fishing situations. Rubberised mesh helps the nets last longer as hooks don't get caught up so easily and are kinder to the fish and their scales. This range covers every situation from trout angling, general predator fishing and targeting specimen sized fish either roving from fixed swims or from a boat.

P&M SPECIMEN 3 NET

The aluminium handle is made from 3 telescopic sections to reduce the packed length but still give you decent reach when you need to get a fish in the net. Metal fixings and folding head.

Ref		Size (cm)	Length (m)	Depth (cm)	Ø Mesh	Landing net Size	RRP€
45572	M	69	2.00	40	6mm	50x50	29,99
45573	L	82	2.50	50	6mm	60x60	39,99

P&M SPECIMEN 2 NET

Tough landing nets designed to handle big fish. Two different handle lengths are available to suite either boat or shore fishing. Light grey rubberised mesh for extra discretion so as not to panic fish as they are drawn to the net.

Ref		Size (cm)	Length (m)	Depth (cm)	Ø Mesh	Landing net Size	RRP€
45575	BOAT	60	1.10	55	15x8mm	60x50	29,99
45576	BANK	90	2.50	55	15x8mm	60x50	39,99

P&M SPECIMEN 2 TGM

Oversized net capable of handling the biggest specimens! Extra wide opening and extra depth. Strong aluminium 2 piece telescopic handle with adjustable screw. We have used light grey rubberised mesh to avoid spooking fish at the net.

Ref	Size (cm)	Length (m)	Depth (cm)	Ø Mesh	Landing net Size	RRP€
45574	110	2.50	55	15x8mm	65x58	59,99
