WORKING WITH US

Here at Customworks we have been helping our customers to create exceptional bespoke gift collections for over 25 years, sharing their unique stories through fabulous merchandise.

Our continued investment in product development and cutting-edge technology ensures that we bring fresh new products that will inspire you and your customers alike.

WHY CHOOSE CUSTOMWORKS?

Bespoke products too difficult? Too expensive? Not at all. By keeping our design and sampling costs to a minimum and offering low MOQ's, your bespoke project need not be costly. With over 95% of our products designed, printed and produced in the EU and UK, you can be certain that you'll receive a fast and efficient service.

And that's not all. We're proud of the positive changes we've made towards sustainability - plastic free packaging has been rolled out as standard across our core product range and our commitment to source eco-friendly raw materials continues, ensuring maximum use of environmentally friendly elements in our production processes.

Packaging for transit has been transformed too. To reduce single-use plastic, we use paper filler in place of bubble wrap, gummed kraft tape instead of packing tape, and paper banded inners to replace plastic bags. Giving you the peace of mind that we care every bit as much as you do - together we can make a difference!

95% OF OUR
PRODUCTS ARE

ARTWORK GUIDELINES

We are happy to accept any of the following file formats and media types. If you have any queries regarding artwork set-up please contact us for more information.

APPLICATIONS:

We can work with the following applications:

- QuarkXpress up to 2025.
- Adobe Creative Suite – Photoshop, Illustrator and InDesign.

MEDIA TYPES:

- Email files up to 25Mb direct, or use file transfer service to send larger files.

IMAGE FILES:

We can accept images in any of the following formats:- .eps, .tiff or .jpeg (high quality setting)

IMAGE RESOLUTION:

For quality reproduction, please save your image at 300 dpi. If you are scanning your own images, consider the final size of the image placement on the final product. Always scan photographs to the finished size at 300 dpi. Use your scanning software to help you calculate the output resolution. Conversely, scanning photographs at a higher resolution than 300 dpi will not improve the print quality and will unnecessarily increase the file size and processing time. Please do not supply web downloads, these are generally only 72 dpi and will result in poor quality print.

RGB TO CMYK:

All images must be converted to CMYK, applications such as photoshop are the best route for this.

FONTS:

Please include all fonts that have been used in your artwork. Postscript fonts come in two parts, the screen font and the printer font. True type fonts are only in one part. If you are designing your artwork on a PC, please be aware that there may be some cross-platform issues with the fonts when we process the artwork using Macs.

ORIGINATION CHARGES

OPTION 1

You supply finished artwork on our template, no charges incurred.

OPTION 2

We lay-out your design from reference supplied and charge a one-off artwork charge. This covers the cost of scaling artwork to our template and basic design elements such as placement/cropping, addition of credit lines, barcodes etc.

OPTION 3

Option 3 For more detailed design work, design charges will apply according to the complexity of the project. Discounts are applied for multiple images/products.

CHECKLIST

If you are not supplying finished artwork, please supply a detailed brief. If colour is critical, please supply colour reference and we will match as closely as possible.
Please note we do not guarantee 100% colour match, particularly across a mix of product types.

FORMATS/FILES:

- ☐ Design is created in either Quark Xpress or Adobe Creative Suite
- ☐ Design is saved as the native file from the application
- ☐ Design is supplied in appropriate media type
- ☐ Files are clearly labelled and no extraneous files included

IMAGES:

- ☐ All images saved as .tif, .eps or high res .jpeg
- ☐ All images are converted to CMYK
- ☐ Photos are scanned at 300dpi and at finished size
- ☐ All lined/placed images files are supplied
- ☐ No web downloads are included

YOUR IDEAS, OUR PRODUCTS

Bespoke product development made simple!

CONSULTATION

We start by exploring your vision - discussing possibilities, outlining costs and sharing examples of bespoke collections we've created for other clients. It's your opportunity to see what's possible and shape the direction of your range.

DESIGN & SAMPLING

Using your brief and brand guidelines, our in-house design team develops refined visuals for your chosen products.

We translate your artwork into beautifully considered concepts, with sampling available to help you perfect every detail.

PRODUCTION

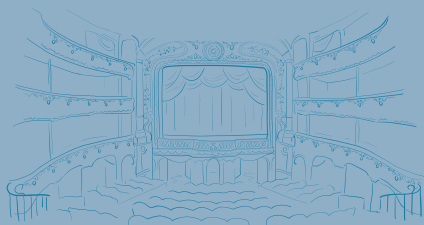

Once your designs and samples are approved, we take care of everything. From production and finishing to packaging and logistics, we manage the full process to meet your deadlines seamlessly - leaving you free to focus on what you do best.

Our aim is to make creating your bespoke collection effortless, enjoyable and inspiring. Our friendly, knowledgeable team is here to support you at every stage.
