Developing, manufacturing, and commercializing a comprehensive suite of biologically based products.

**Fiscal 2026 was a breakthrough year in the continued development of EZES. We grew revenue to more than \$2 million, substantially narrowed our operating loss and generated positive operating cash flow... The completion of testing and demonstration of our first EasyFEN system intended for an African customer provides another encouraging example of that progress. We believe the accomplishments reflected in this filing provide a stronger foundation for the next stage of the Company's growth."**

**Mark Gaalswyk, Chief Executive Officer,  
Easy Environmental Solutions**

# Transparent Growth Profile & Risk Disclosures

## Liquidity & Going Concern

Continued operations depend upon generating profitable operations and/or obtaining additional financing.

Current growth funding relies on CEO/Founder Mark Gaalswyk and/or other investors.

Full Annual Report available at:  
[www.otcmarkets.com/stock/EZES/disclosure](http://www.otcmarkets.com/stock/EZES/disclosure)

## Forward-Looking Statements

Projections regarding commercialization, customer deliveries, and revenue involve inherent risks.

Key variables include: customer acceptance, manufacturing/shipping requirements, regulatory permitting, and third-party supplier dependence.
