PuraPrime™

SLIP RESISTANCE · PENDULUM TEST

Slip-resistance performance of the PuraPrime™ decking board, expressed as pendulum test value (PTV) to EN 15534, for wet and dry surfaces.

WET	DRY	CLASSIFICATION	METHOD
≥ 36 PTV	≥ 36 PTV	Low slip potential	EN 15534

— PENDULUM TEST VALUE

01

Slip resistance

CONDITION	RESULT	CLASSIFICATION
Wet surface	≥ 36 PTV	Low slip potential
Dry surface	≥ 36 PTV	Low slip potential

NOTE

A pendulum test value (PTV) of 36 or above corresponds to a low potential for slip; both wet and dry surfaces meet this threshold. The figure is the declared minimum from the product's technical assessment (EN 15534).
