NEWSLETTER

AUGUST

2026

EDITOR'S NOTE

Welcome to the August 2026 edition of the Cross Ocean Newsletter. Welcome back. For much of the network this issue lands at the end of the summer break – though here in Cebu, it's hot like summer, all year round. During July and August I worked on the Cross Ocean **mobile apps** and **website**. You can now **log in** with your email address alone and receive a **magic link** or a **login code**. (the [iPhones update](#) will be live within 24 hours)

One item worth your attention this month. Our Honorary Chairman has been reaching out to shipping lines. The details can be [FOUND HERE](#). You will need to be logged into the Cross Ocean website to view them, which is now much easier to do. The list is laid out in spreadsheet format, so you can copy it back into a spreadsheet.

Our next in-person one-day meet-up is in **Houston** on September 21, it is now **FULLY BOOKED** – if you would like to be added to the waiting list please message us.

After Houston our next in person event will be a lunch meeting in **Rotterdam** the day before **Breakbulk Europe**, details TBA.

For our next **Global Conference**, we are aiming for **mid-November 2027** in SE Asia due to conflicting dates earlier in the year. No European venues were a good fit.

Our next **online one-to-one meetings** will be held on the **16th** of **September**, then the **7th**, **14th**, and **21st** of **October** – find meeting times on the next page.

In **member news** we share movements related to: India → Mozambique, Turkey → Poland, Singapore → Argentina, Belgium, Tanzania → Rwanda, China → Mexico, Romania → Ukraine, China → Brazil, Mozambique → Zambia, Chile, Netherlands, Guatemala, Europe → Bolivia, Germany → Israel, China → Jordan. We are also happy to welcome **new members** representing USA (Southeast) and China (Ningbo).

Upcoming Zoom Meetings for September - October

Zoom Meetings for September - October

16th September	14:00	Sweden time (GMT +2)
07th October	10:00	Sweden time (GMT +2)
14th October	14:00	Sweden time (GMT +2)
21st October	13:00	Sweden time (GMT +2)

COLI Group has recently completed a six-month transport project for GE Vernova, moving 14 large power transformers from GE Vernova's Turkish factory to a job site in Poland supporting the Baltica 2 offshore wind farm. The cargo was shipped across three voyages on three separately chartered vessels, and the project marks the second collaboration between COLI and GE Vernova's team in Poland. [Read more...](#)

Total Movements is proud to have successfully executed the door-to-port movement of 10 × 80 MT 3300 HP Diesel-Electric Locomotives, along with bogies and associated components, from the supplier's works to Mozambique.

Our scope covered:

- Road transportation from the supplier's works to Mumbai Port
- Export customs clearance and intercarting at Mumbai Port
- Specialized lifting arrangements and equipment
- Ocean transportation from India to Mozambique using a heavy-lift geared vessel
- Coordination with statutory authorities and key stakeholders

There are operations where logistics ceases to be simply transport and becomes a determining factor in whether a project moves forward. ULOG Argentina recently coordinated the movement of critical equipment from Singapore to Argentina, destined for a key project in the development of LNG in the country - one that will allow Argentina to take its first steps in exporting liquefied natural gas and open a new stage for the national energy infrastructure. It was a highly complex operation, with oversized cargo and extremely demanding transit times.

Planning begins... BEFORE MOVING THE CARGO!

Route analysis for oversized cargo

Bridge shoring >

Heavy-weight cargo >

<Oversized cargo

Before transporting oversized, heavy-weight cargo, it is necessary to analyze the route to identify restrictions, validate conditions, and plan a safe, efficient operation.

Universal Cargo Conducts Route Survey in Guatemala for Specialized Logistics Operation

Universal Cargo & Trade shares a real case of a Route Survey to evaluate the conditions of the route before executing a specialized logistics operation. This analysis makes it possible to identify possible constraints, plan maneuvers, coordinate resources and reduce risks before transport
