DSI shop admiring the
steel beams during
his break.

OTH + DSI TOUR

We recently opened our doors to the team at **OTH Pioneer Rigging** for a tour of our facility, and it was great to connect with the crew we rely on for our rigging technology in the field. Out on our job sites, OTH's **remote-controlled quick-release Ludwig Hooks** are a core part of how we move steel. Faster load releases, multiple rigging configurations, and a fail-safe design that keeps our crews safer on every lift. That's the kind of technology that **literally raises the bar** at every one of our job sites.

With over **4 million releases logged and zero accidental drops by design**, OTH isn't just a product, they're a standard of excellence we're proud to have brought onto our sites.

EARNING BEAM BUCKS

Don't forget to earn your **Beam Bucks**!

Complete the required activities listed on the forms, review them with a manager for approval, and submit the signed form to the designated department box outside McKennah Ring's office.

Want to check your balance?

Email McKennah (mckennah.ring@dohertysteel.com) to request your current **Beam Buck** total. If you're ready to redeem at the **Swag Shop**, let her know how many you'd like to use and she'll provide your code and update your balance accordingly.
